RESOLUTION ON THE ANNUAL GENERAL ADMINISTRATION REPORT OF THE CHITTAGONG DIVISION FOR THE YEAR 1897-98.

GENERAL DEPARTMENT—MISCELLANEOUS.

Dated Darjeeling, the 4th October 1898.

RESOLUTION No. 3066.

READ—

The Annual General Administration Report of the Chittagong Division for the year 1897-98.

Mr. F. R. S. Collier was in charge of the Division for the greater part of the year, Mr. J. D. Anderson having officiated as Commissioner for a few weeks in April only on the retirement of Mr. Skrine, and Mr. Manisty, by whom the present report is submitted, not having assumed charge until the beginning of March 1898. There was no change of Collectors during the year in the districts of Tippera and Noakhali, nor of Subdivisional Officers in the subdivisions of Feni and Chandpur.

2. *Tours and Inspections.*—The Commissioner (Mr. Collier) spent 105 days on tour, inspecting every district and subdivision, and paying several visits to the area affected by the cyclone and storm-wave of the 24th October.

As noticed last year, the Commissioner has again omitted to report how far the duration of the tours of District and Subdivisional Officers coincided with the periods approved by the Commissioners and Collectors respectively. They appear, however, to have been generally of sufficient scope and extent, though from November onwards the Collector of Chittagong had to confine his trips entirely to visiting the sea-board and islands of his district which were submerged after the cyclone. The 16 days occupied by the Subdivisional Officer, Chandpur, in attending meetings of the District Board should not be counted as time spent on tour. With the exception of Chittagong, where it is

not stated what inspections were made, the Lieutenant-Governor is glad to see that Collectors made regular inspections of their own offices. The most important inspection in the district is apt to be neglected, just because it can be made at any time.

A statement has been furnished showing the inspections made by District Officers of Government and wards' estates, from which it appears that each estate and tahsil office was visited once, and in one instance twice. No serious irregularities came to light anywhere.

3. *Weather and crops: Material condition of the people: Public Health.*—The rainfall during the year was sufficient and on the whole well distributed; but a disastrous climatic disturbance occurred in the cyclone of the night of the 24th October, which, sweeping over a tract of some 70 miles in length in the Chittagong district, caused deplorable loss of life and did great damage to crops and property. The islands of Kutubdia and Moiscal, with the adjoining sea-board, including an area of 193 square miles, with a population of 86,603 persons, were at the same time devastated by a storm-wave which is reported to have caused the death of 14,000 people and 15,000 cattle. The affected area was visited by the Officiating Lieutenant-Governor, Mr. C. C. Stevens, shortly after the occurrence, and the results of his tour have already been made public. A grant of Rs. 50,000 was made by the Committee of the Indian Famine Charitable Relief Fund, and Rs. 7,674 was raised by public subscription for distribution in gratuitous relief. Rupees 39,000 in all are reported to have been so distributed, while Rs. 1,15,631 was advanced under the Land Improvement Loans Act mostly for the repairs of embankments. Remissions of land revenue to the extent of Rs. 98,220 during the current year and Rs. 36,075 during 1898-99 were also sanctioned. The funds placed at the disposal of the local officers for relief of distress were in fact larger in amount than they found it necessary to expend.

Outside the storm-swept area, where the corps are reported to have given a 4-anna outturn only, the rice crop generally was up to the average.

At the close of the year prices of food-grains, though cheaper than in the preceding year, still ruled higher than in 1895-96. Jute prices were low, partly owing to the great crops of previous years. The cultivation in Noakhali is reported to be extending.

The recorded death-rate per mille in Tippera was practically the same as in the preceding years, 26·02—a result which shows continued defective registration. The rate in Noakhali rose from 30·19 during 1896-97 to 37·08, and the Collector, after enquiries in certain villages, is disposed to accept the statistics as accurate for practical purposes. The death-rate in Chittagong rose from 32·5 to 53·2 per thousand, owing to the loss of life in the storm-wave and the virulent epidemic of cholera that followed in its course. The sanitary conditions in the submerged area lent themselves to an outbreak of disease, in the treatment of which eight extra Hospital Assistants were employed.

Various influences, it is reported, injuriously affected the material condition of certain sections of the people, particularly the bad crops of previous years and the prevailing high prices. In Noakhali especially, during May, June and July, prices of rice rose almost to famine rates, causing some distress and leading to the importation of Burma rice into a district usually regarded as a granary for others. Subscriptions were raised and 19,909 people gratuitously relieved; advances were also given, and khas mahal and Court of Wards' collections were temporarily suspended. In Chittagong the cyclone marred prospects which till then had been bright. In ordinary times the people of this Division generally are remarkably well-off. They are well housed and well fed, their standard of comfort has been rising in recent years, and all but the comparatively few who depend on fixed incomes are benefiting by the steady rise in price of agricultural produce. The wages of labour are for India very high, being for a common cooly from 5 to 8 annas a day, but show no tendency to increase.

4. *Emigration and Immigration.*—Complaint is still made of the influx of destitute coolies into Tippera from the tea-gardens and railway works in Sylhet. The subject has occupied the special attention of Government, and representations on it were addressed to the Government of India and to the Chief Commissioner of Assam, with the result that arrangements were promised which

will, it is hoped, lead to the discontinuance of the evil. The Commissioner observes that the majority of the railway coolies come from the employ of petty contractors, whom it is difficult to trace, and those from the gardens are usually free labourers leaving of their own accord.

The destruction of crops wrought by the cyclone in Chittagong led to an increase in the annual migration for the rice-cutting in Backergunge and Burma.

5. *Manufactures: Trade and Commerce.*—There was a considerable decrease in the quantity of tea exported, which fell from 1,130,963 cwts. to 909,590 cwts.—a decrease which is attributed chiefly to the effects of the cyclone. The ship-building industry appears languishing, only three vessels of small tonnage being built during the year. The two pearl fisheries in the district have ceased to exist, that at Gumakhali having been covered with silt by the storm-wave.

The cyclone did considerable damage to the Chittagong Port, and although the receipts increased by Rs. 60,109 over the figures of the previous year, it was not found possible to repay any portion of the balance of the loan of Rs. 2,00,000, which still stands at Rs. 1,48,586. There was an increase of Rs. 23,23,788 in the total trade of the port (which was valued at Rs. 2,41,27,044), shared alike by imports and exports, but it was not sufficient to cover the large falling off of Rs. 58,80,226 in the previous year. The value of rice and paddy exported increased from Rs. 2,64,706 in the previous year to Rs. 4,45,558, but the most noticeable feature of the year was the large import of rice and paddy, which rose in value from Rs. 4,71,417 to Rs. 21,27,419. The importation was mainly from Burma to meet the large demand for local consumption consequent on the destruction of crops by the cyclone; the effects of the damage done is also shown by the decrease in the export of rice and paddy from the Division as a whole from 4,20,502 maunds in 1896-97 to 2,96,555 maunds during the year under report. Seventeen vessels cleared for foreign, and 593 for home ports, compared with 11 and 548 respectively in the previous year.

There was a slight increase in the export of jute from the Division, which rose from 13,98,405 maunds during the previous year to 15,35,062 maunds. The export of food-grains to Calcutta amounted to 61,849 maunds, showing an increase over the figures of the preceding year—29,019 maunds—but still vastly below those of 1895-96, amounting to 3,85,140 maunds.

6. *Civil Justice.*—Rent suits rose from 34,443 in 1895 to 35,633 and 36,649 in 1896 and 1897 respectively; suits for money, on the other hand, declined, the figures for the same three years being 29,941, 28,652, and 27,672 respectively. Lastly, title suits, which numbered 11,627 in 1895 and fell to 10,913 in 1896, have recovered somewhat during the last year, and numbered 11,290. The increase in the number of rent suits, which, however, is not very great, is attributed to the agricultural depression of the past three years, and the consequent difficulty of realising rents without suits. The detention of witnesses in the Courts of District, Subordinate and Small Cause Court Judges was somewhat greater, and in the Courts of Munsifs slightly less than in the preceding year, the percentage of those detained over two days being 26·96 and 13·4 per cent. respectively, as against 24·06 and 15·4 per cent. in 1896. In connection with the settlement proceedings, there was an increase in the number of notices served under section 424 of the Civil Procedure Code from 209 to 318, as compared with 1896; but the number of suits actually instituted to question the Settlement Officer's proceedings in the civil courts diminished from 27 to 11—a number which is extraordinarily small considering the magnitude of the operations involved in making a survey and a record of rights of the whole district, and in settling rents and revenue throughout the temporarily-settled portions of it.

7. *Crime: Police: Criminal Justice.*—The number of cognisable cases rose from 7,346 to 10,243; the increase, which is common to all districts, it is explained, is more apparent than real, and is due to the inclusion of cases ultimately declared non-cognisable which in the previous year were omitted. It appears, however, from the Annual Police Report, that the number of true cognisable cases was 8,891, which is still a noticeable increase. Non-cognisable

crime was less in the districts of Tippera and Chittagong, but increased in the district of Noakhali, as compared with the previous year, the total number of cases reported in the whole Division being 13,873, as compared with 14,253. The Lieutenant-Governor regrets to observe a further increase in cases of arson, which rose from 91 to 111, mostly in Chittagong town, where in March and April 1897, property to the value of over a lakh of rupees is reported to have been destroyed by a regular organised series of incendiary fires. In explanation of this outbreak, it is suggested that the fires were due to concerted opposition against the introduction of Part IX of the Municipal Act relating to the construction and cleansing of latrines. Stringent measures of patrol were adopted by the Magistrate, and there was no recurrence of the offence in the hot season of 1898. Another unsatisfactory feature of the criminal history of the year was the occurrence of a considerable number of cases of obstruction to the railway line by obstacles placed upon it; many of these were petty, but some serious, and the offence should be severely dealt with. There were two cases of gunshot murders, in neither of which was the murderer convicted.

The detective work of the police, judged by the proportion of cases successfully brought to conviction, improved slightly in Chittagong, and fell off somewhat in Tippera and to a greater extent in Noakhali. The status of the rural police is said to be improving, noticeably in Noakhali; but although there is a satisfactory decrease in the number of punishments awarded, the number of men punished is still considerably in excess of those rewarded, being 2,212 as against 853. The Lieutenant-Governor would be glad to see the statistics the other way. The rural police are poorly paid and their duties are not the most exhilarating. The system of constant punishment for petty offences is essentially bad: the generous reward of good work is essentially better. The Magistrates and their police officers are allotted a reward fund for this express purpose, and the Lieutenant-Governor will be best pleased when he sees the allotment fully utilized.

Eight thousand five hundred and sixteen cases were disposed of by Stipendiary Magistrates and 1,517 by Honorary Magistrates, as compared with 8,479 and 1,563 during 1896. The average duration of cases in Noakhali, already high, rose from 18 to 22 days, though the number of cases disposed of by each officer was only 216 per annum; while in Chittagong the average duration, already comparatively low, fell from 11 to 9 days, each officer disposing of 296 cases. The difference indicates laxity in Noakhali and some want of proper supervision. The number of witnesses examined also increased, but it is satisfactory that the percentage of those detained over two days by Stipendiary Magistrates remained the same, or 2·7 per cent., while the corresponding proportion in the Courts of Honorary Magistrates fell from 12·9 to 7·3 per cent. The results in this respect are worst in the Court of the Subdivisional Officer of Cox's Bazar, who was also unfavourably noticed in last year's Resolution; but there is the justification for him this year that his time after the cyclone was much absorbed in relief operations. The Lieutenant-Governor trusts that the District Magistrate will see that in future witnesses are not unnecessarily summoned or, when summoned, unnecessarily detained in this subdivision. The delays in the Courts of the Bench Magistrates at the head-quarters stations in Chittagong and Tippera were also excessive. One thousand eight hundred and seventy-nine police cases were disposed of by Stipendiary Magistrates in comparison with 1,831 during 1896, of which 4·6 per cent. were adjourned six times and over, against 3·6 per cent. in the previous year. The results were worst at the Chandpur subdivision.

The system of territorial distribution of cases, which was noticed last year as having yielded unsatisfactory results at Chittagong and Noakhali, has been discontinued in the Courts of Stipendiary Magistrates in the latter district, and the Commissioner has also directed its discontinuance in the Courts of Honorary Magistrates. The attendance of Honorary Magistrates in Chittagong and Noakhali continued to be good, but in Tippera was poor, and those who were most irregular in their attendance have been properly asked to resign.

Ninety-eight cases were disposed of at the Sessions, of which 72 per cent. ended in conviction—a similar result to that of the previous year.

8. *Land Revenue.*—The current demand of land revenue and cesses during the year amounted to Rs. 33,17,172, and the total demand, including the outstanding balance of the previous year, to Rs. 35 59,863 The total collections were Rs. 31,48,305, or 88·4 per cent. of the gross demand. The following statement shows the amounts of the current and arrear demands of land revenue and cesses and the percentages of the total realisations on the current demand :—

District.	Class of estates.	Current demand.	Arrear demand.	Total collections, current and arrear.	Percentage of total collections (5) on current demand (3).
1	2	3	4	5	6
Tippera	I.—Permanently-settled estates ...	Rs. 9,22,179	Rs. 4,433	Rs. 9,24,104	A little above 100.
	II.—Temporarily-settled estates ...	40,682	4,421	42,081	Above 102 per cent.
	III.—Estates held direct by Government	99,508	28,382	97,562	98
	Total ...	10,62,662	37,236	10,63,747	100
Noakhali	I.—Permanently-settled estates ...	4,71,709	1,336	4,65,171	98·6
	II.—Temporarily-settled estates ...	52,412	5,154	54,367	103·7
	III.—Estates held direct by Government	1,11,661	27,638	1,14,500	102·5
	Total ...	6,35,874	34,178	6,34,039	99·7
Chittagong	I.—Permanently-settled estates ...	5,81,925	8,201	4,89,262	91·9
	II.—Temporarily-settled estates ...	9,079	.....	9,079	Cent. per cent
	III.—Estates held direct by Government	5,01,410	80,316	3,98,088	79·4
	Total ...	10,42,414	88,517	8,96,429	85·9
	Divisional Total, 1897-98 ...	27,40,950	1,59,931	25,94,214	94·9
	Divisional Total, 1896-97 ...	27,99,640	99,553	26,54,097	97·9

	Total, 1896-97 ...	5,54,757	64,503	5,23,031	96

Zamindari Dák Cess.

Districts.		Current demand.	Arrear demand.	Total collections (current and arrear).	Percentage of total collections of current demand.
1		2	3	4	5
		Rs.	Rs.	Rs.	
Tippera	...	7,348	238	7,395	A little above 100 per cent.
Noakhali	...	7,553	129	7,482	99
Chittagong	...	7,859	670	7,748	98·6
Divisional Total.	1897-98	22,760	1,037	22,625	99·4
	1896-97	22,781	963	22,677	99·7

The percentages of the current collections of land revenue on the current demand, as compared with the standard prescribed by Government, are shown below:—

	Permanently-settled estates.	Temporarily-settled estates.	Government estates.
Standard	99	95	90
Chittagong	90·45	100	68·72
Noakhali	98·35	93·89	85·99
Tippera	99·72	91·89	86·43

The collections were markedly short of the standards in Chittagong owing to the cyclone, while, as already mentioned, considerable remissions were also sanctioned on this account. The percentages of collections on the demand alike in the temporarily-settled estates and in Government estates were below the standards in Noakhali and Tippera. The high price of food-grains is given as the cause of short collections in Government estates, but high prices with the good harvests of 1897 ought to have produced the opposite results. It is true that the raiyats suffered from the bad harvests of the preceding year, though not to the same extent as in other districts; but the main staple—the rice crop—in the year under review was a 16-anna one in Tippera and little short of 16 annas in Noakhali, and this, with low rents and high prices, should have enabled the tenants on khas mahals in these latter districts to pay much more than one year's rent and thus to reduce largely the arrears of the previous year. In the Backergunge district, where conditions were very similar, the collections in Government estates were 98·8 per cent. of the demand. Road-cess collections were best in Noakhali, where they amounted to 92·49 per cent. of the current demand, and worst in Chittagong, where the percentage was 79·03 only.

The Lieutenant-Governor is glad to observe a considerable improvement in the disposal of certificate cases, the delay in dealing with which was unfavourably commented on in the Resolution of last year. The percentage of disposals has risen from 49 to 66 per cent. in Tippera, from 61 to 78 per cent. in Noakhali, and in Chittagong only has it fallen from 63 to 57 per cent. Fewer certificates, too, were issued for the realization of rents in wards' estates.

Attention is drawn to the slow progress made in the disposal of land acquisition cases in the Chittagong district, where only one case was disposed of out of 24.

The grant by the Board for miscellaneous and sanitary improvements in Government estates was raised from Rs. 18,920 in 1896-97 to Rs. 1,00,766 during the current year, of which Rs. 95,766 were allotted to Chittagong for the repairs of the damage done by the cyclone. Only Rs. 50,239, however, in all were spent: the failure to utilise the balance is not explained, but is no doubt due to the fact of its not having been required to relieve distress within the year, while the repairs can be completed in the current year.

The cadastral survey and settlement operations in Chittagong were concluded during the year, only some office arrears still remaining. One thousand nine hundred and twenty-three square miles in all, containing 1,037 villages and 620,656 tenants, have been surveyed and settled, with a total expenditure of Rs. 4,99,778 on survey and Rs. 10,23,674 on settlement, and with an increase of revenue on the Noabad taluks of Rs. 1,83,812.

The cadastral survey in the estates of the Raja of Hill Tippera is still in progress. Up to the close of the year 556 square miles, comprising 1,507 villages and 183,000 tenants, had been surveyed at a cost of Rs. 4,07,823, and with an increase of rent of Rs. 23,562, or 25 per cent. on the previous rental. The Lieutenant-Governor hopes that this long-pending settlement will soon be brought to a conclusion.

9. *Wards and attached Estates.*—The number of estates under the charge of the Revenue authorities increased from 14 to 15, with a total current demand of Rs 3,57,279. The large estates of Miss Courjon in Noakhali were released from the Court's management at the close of the year. Collections, as in the case of Government estates in this district, were poor, and reached a percentage of 71·3 per cent. only upon the current demand, as against a percentage of 80·01 in the previous year, and the standard of 90. The straitened circumstances of the raiyats is reported as the cause, and in the island of Sandip,

in which a large area of the estates lay, it is probable that the explanation is just. The remissions allowed were not heavy, and the outstanding balances, to the necessity for the reduction of which special attention was drawn last year, increased from Rs. 1,05,800 to Rs. 1,16,788. The amount spent on improvements, all practically in the district of Chittagong, was only Rs. 23,935 as compared with Rs. 29,805 during 1896-97. In the Resolution of Government, dated the 9th October 1896, special attention was drawn to the desirability of expending 3 per cent. of the income of solvent wards' and of all Government estates on agricultural and sanitary improvements, and it was requested that the subject be noticed in annual reports. The actual expenditure in improvements in wards' estates in Noakhali was only 1 per cent., and no notice has been taken of the matter in the Commissioner's report. It is probable that there is a good explanation, but it should have been furnished.

10. *Excise: Stamps: Income-tax.*—The excise revenue again fell during the year from Rs. 2,74,721 to Rs. 2,73,490, but less heavily than in the preceding year. The importations of salt, on the other hand, more than recovered, 6,57,325 maunds being brought in, as compared with 55,206 maunds during 1896-97. The revenue from stamps continued to rise and now amounts to Rs. 15,86,933, the increase being chiefly under the head of judicial stamps in Tippera, where the cadastral survey operations were in progress. The income-tax collections show a decrease of Rs. 3,650, which occurred in Chittagong alone, and is ascribed to the damage done by the storm-wave. The work of assessment in Noakhali, where the percentage of successful objections (42·7) was exceedingly high, appears to call for more supervision when the assessments are being made.

11. *Education.*—There was a decrease in the total number of schools and pupils in every district of the Division during the year. Excluding elementary private institutions, the number of schools of all kinds fell from 4,673 to 3,986, and pupils from 138,096 to 121,762. The decrease was largest in Noakhali and Chittagong, and is most noticeable in primary schools, in which it is most to be regretted. The result was a decrease in the percentage of boys of a school-going age at school from 45 to 40 per cent., the proportions in the three regulation districts being fairly uniform, but lowest in Noakhali. Private institutions suffered heavy losses in every district, and there is unfortunately no doubt that here, as elsewhere, the effect of hard times was felt in the reduction of the private subscriptions, on which the primary schools so largely depend. The result is not marked at once. The school-masters struggle on, and as shown by the figures here the collapse is the last of the indications of the strain. It is to be hoped that with the return of good harvests these schools will soon revive. The only facilities afforded for technical education is at Comilla, where there is an artisan school.

Girls' schools similarly showed a falling off from 490 schools with 7,687 pupils during the previous year, to 428 schools with 6,762 scholars. The Commissioner remarks that female education is not very favourably regarded by the inhabitants of the Division and is seldom carried beyond the primary stage.

12. *Employment of Muhammadans.*—The Collectors of Tippera and Noakhali state that the claims of Muhammadans are borne in mind when suitable vacancies occur, but that it is extremely difficult to find eligible candidates. Now that the Chittagong Madrasah has begun to turn out B. A.'s, all of whom have not yet found employment, it may be hoped this difficulty will cease. The Lieutenant-Governor desires that careful attention should be paid to the orders of Government on the subject. *Cæteris paribus*, preference should be given to Muhammadans in Muhammadan districts till they secure their fair share of Government appointments.

13. *Dispensaries and Hospitals.*—One new dispensary was opened during the year, and the total number of out-door patients attending the different institutions in the Division increased from 295,853 to 308,796. Several hospitals, notably the General Hospital at Chittagong, are reported to be suffering for lack of subscriptions. The Lieutenant-Governor notices with regret the remark of the Collector of Tippera that gentlemen of position in his district subscribe to institutions in Calcutta, while they refuse to give anything to local

objects of this nature. Next to good water, as the Collector observes, there is nothing the people in those parts appreciate more than good dispensaries. However meritorious subscriptions to useful institutions in Calcutta may be, they are still more necessary in the *mufassal*.

14. *Local Self-Government Institutions.*—The information supplied on the subject of Local Self-Government Institutions is somewhat meagre. It is said that the Union Committees have not proved successful. The large balance in hand of the Tipperah District Board, amounting to some 1¼ lakhs of rupees, requires explanation; but, on the other hand, the Chittagong District Board ran into debt in consequence of work undertaken after the cyclone and of confusion in their accounts, and ended the year with a deficit. The unsatisfactory working of the Chittagong Municipality was unfavourably noticed last year. Complete information has not been supplied regarding the improvements effected during the year. Part IX of the Municipal Act was intoduced after considerable opposition and friction. Otherwise little seems to have been done to improve the sanitation of the town.

15. *Conduct of Zamindars.*—The non-resident landholders of the Noakhali district are said to have done little to assist in the gratuitous relief operations undertaken during the year. The petty zamindars of the Chittagong district are reported to have behaved well on the whole, but to have been somewhat lacking in generosity to their raiyats after the cyclone.

16. *Political.*—The most important administrative change had effect from the close of the year, in the transfer of the South Lushai Hills to the control of the Assam Administration with effect from 1st April 1898. Considerable damage was done in Hill Tippera by the earthquake of the 12th June, and by the cyclone of the 24th October in the South Lushai Hills and the Chittagong Hill Tracts. In the latter the crops were poor, and the outturns of winter rice, cotton, and sugarcane were respectively estimated at 2, 1, and 2 annas only. The public health was fair, but there was an outbreak of sporadic cholera, and fever was prevalent. The number of schools decreased by 10, and of pupils by 184. The demand on account of land-tax increased from Rs. 10,256 to Rs. 11,991, which is partly due to extension of plough cultivation. Collections, however, fell off largely, from Rs. 12,966 to Rs. 7,625.

17. The acknowledgments of Government have already been made to the Commissioner, Mr. Collier, and to Mr. Anderson, the Collector of Chittagong, for the energy and humanity they showed in coming to the assistance of the sufferers from the cyclone and storm-wave.

Mr. Manisty's report is clear and concise, but meagre in certain points on which fuller information is desirable. Extracts from the report are published for general information.

By order of the Lieutenant-Governor of Bengal,

M. FINUCANE,

Secretary to the Govt. of Bengal.

Extracts from the Annual General Administration Report of the Chittagong Division for the year 1897-98.

* * * * *

III.—WEATHER AND CROPS.

18. On the whole the weather was fairly seasonable, and the rainfall was sufficient as will be seen from the table below :—

	1895-96.	1896-97.	1897-98.
Tippera	67·34	58·17	75·15
Noakhali	100·65	89.51	95·26
Chittagong	97·23	74·13	102·15

19. The rain was well distributed in Tippera, and there was considerable increase in the outturn of all the principal crops, except *bhadoi* crops and mustard, which had a slight falling off, as the early months of the year were extremely dry. Jute prices were low, partly owing to over-production on account of the very high prices of the two previous years.

20. The rainfall was somewhat unequal in the district of Noakhali, but on the whole not unsatisfactory. The Collector, as the result of special enquiries made by him, found that the outturn of *aus* per acre was 16 maunds and of *aman* 25 maunds, and that the district in an average year produces paddy enough for two years' consumption. The *rabi* crops suffered from want of rain at the sowing time, but the outturn was better than in the previous year of drought. The jute cultivation is reported to be extending appreciably in thanas Ramganj and Lakhipur. The betel-nut plague has not re-appeared. The yield of betel-nut was 6 annas and that of cocoanut 10 annas. These two crops are an important source of income to the people of Noakhali.

21. The district of Chittagong, over some 70 miles of its length, was visited on the night of Sunday, the 24th October last, by a cyclone of exceptional severity, which did great damage to houses and crops, including tea gardens, especially in the southern parts of the district, where the islands of Kutubdia and Moiscal and the neighbouring sea-board were submerged by a storm-wave. It swept everything that lay in its path, and drowned 14,000 people and 15,000 cattle in the course of a few hours. Twelve native brigs were sunk in the river at Chittagong, and most of the public buildings, except masonry ones, all over the cyclone area, were wholly or partially destroyed. Over Rs. 39,000 has been spent on gratuitous relief out of a sum of Rs. 50,000 contributed by the Central Famine Relief Fund, and Rs. 7,674 raised by private subscriptions, and Rs. 1,15,631 has been advanced for the repair of embankments damaged by the storm-wave under the Land Improvement Loans Act. The year was also one of short rainfall, and the outturn of crops was much below the average. In the cyclone area it was reduced to a 4-anna crop.

IV.—PUBLIC HEALTH.

22. The table below shows the mortuary statistics of the year :—

Prevailing diseases.	Tippera, population 1,782,935.				Noakhali, population 1,009,093.				Chittagong, population 1,290,167.			
	Number of deaths reported.		Deaths per mille.		Number of deaths reported.		Deaths per mille.		Number of deaths reported.		Deaths per mille.	
	1896.	1897.	1896.	1897.	1896.	1897.	1896.	1897.	1896.	1897.	1896.	1897.
1	2	3	4	5	6	7	8	9	10	11	12	13
Cholera	5,139	4,210	...	...	2,360	2,924	...	...	1,525	10,781	...	...
Small-pox	36	23	..	...	14	3	...	...	9	2	...	...
Fever	32,261	33,742	...	...	23,594	29,742	...	...	37,104	40,058	...	...
Bowel-complaints ...	391	700	...	...	160	655	...	...	473	1,153	...	...
Others	9,264	7,734	...	...	4,455	4,121	...	...	2,829	16,833	...	...
Total ...	47,071	46,408	26·4	26·02	30,483	37,445	30·19	37·08	41,940	68,027	32·5	53·2

23. The low death-rate in Tippera seems to show that registration there, despite previous year's remarks, still continues to be defective. The personal attention of the Magistrate will be drawn to this matter. The District

Inspector of Vaccination checked the births and deaths in 308 villages in Noakhali, and discovered only 4 omissions in births out of 919 cases. Similarly, the Sub-Inspector of Vaccination tested the entries in 106 villages, and found no omissions. Mr. Agasti thinks that the statistics of his district may, therefore, be taken as accurate for all practical purposes. The marked increase of mortality in Chittagong is due to the drowning of about 14,000 persons on the night of the cyclone, and to the virulent epidemic of cholera which followed in the track of the storm-wave. There was also a severe outbreak in the hot weather, but most of the deaths occurred after the cyclone. The increase of cholera mortality in Noakhali is due, Mr. Agasti thinks, to climatic causes, though high prices made the people more amenable to it by lowering their vitality. Two extra hospital assistants were employed by the District Board of Tippera to give relief in out-of-the-way affected places. In Noakhali compounders were deputed to the affected tracts with a supply of medicines. Eight hospital assistants and a vaccinator were also employed in the submerged area of Chittagong, the cost being met from the funds of the Central Relief Committee. The Division was remarkably free from small-pox, while fever appears to have raged in all the districts with increased virulence, accounting for over two-thirds of the whole mortality. The increase in the number of deaths from bowel-complaints in Tippera is ascribed by the Civil Surgeon to the influx of a large number of destitute coolies from tea gardens and railway lines in Sylhet. Mr. Kennedy writes:—"The practice of steeping jute and bamboos and, in some places, flax in the small rivers and khals is no doubt a cause of much ill health, but, as a rule, public opinion is in favor of the practice, and a strong preventive staff would be required to make any prohibitory rules effective. As the effective prohibition of this practice is very doubtful, and to attempt it would certainly start a great outcry, the only plan at present seems to be to allow the public to continue to pollute its drinking-water, and to leave it to local bodies, such as municipalities and local unions or village panchayats, to ask for the enforcing of rules to prevent pollution of water-supply. I would give them vigorous support, but without their aid no efforts will be effective, while an excess of odium would be thrown on Government. Fortunately in this district the annual cleansing of the land and khals by floods very materially minimizes the evils of the practice."

24. The District Board of Tippera spent Rs. 4,787 on a Pasteur filter at Chandpur, Rs. 2,735 on tanks, Rs. 150 on ring wells, and Rs. 3,324 on khals for drainage. In Noakhali the District Board laid out Rs. 5,136 and Rs. 4,920 in improving drainage and water-supply respectively. Two new tanks were excavated, and some others were reclaimed. All the reserved tanks were cleared, and the deepening of the drain from Kaliandi to Little Feni river was completed during the year. There was a regular scarcity of water, specially in the islands and the littoral tracts. In consequence of the drought even the water of the reserved tank turned bad, and some of these tanks dried up altogether. Relief was afforded in the worst places by temporary wells being sunk and tanks being reserved temporarily with the consent of their owners. Mr. Agasti had, by issuing executive notices, 614 tanks and about 100 deserted homesteads cleared of weeds and jungle. The District Board of Chittagong cleared some tanks, public and private, and disinfected them with permanganate of potash after the cyclone.

25. The Municipality of Comilla spent Rs. 1,990, and that of Brahmanbaria Rs. 1,118 on sanitary works. Even the little Municipality of Noakhali spent Rs. 387 on water-supply, and Rs. 389 on drainage improvement, while the Chittagong Municipality, the largest and most important in the Division, spent, it is reported, only Rs. 1,020 in taking levels of all important drains and in undertaking their repairs on a systematic plan, and only Rs. 211 on road-side wells and tanks. Nothing has as yet been done to improve the existing sources of water-supply, to which its unhealthiness is believed to be partly due.

V.—MATERIAL CONDITION OF THE PEOPLE.

26. The agricultural classes improved in circumstances by the sale of their surplus paddy and rice at the high prices which ruled during the year.

In Noakhali, though the early rice crop was on the whole satisfactory, yet a succession of bad harvests and the destruction of betel-nut trees by disease brought matters to a bad state in places. The rice market rose very high, and prices in parts exceeded famine rates. In Feni littoral, Sundwip, and in parts of Sadar thana only 6 seers of common rice could be had for the rupee in May, June and July. Burma rice had actually to be imported from Chittagong to a place which has been looked upon as one of the granaries of Bengal.

A very handsome subscription was raised, and altogether 19,909 people were gratuitously relieved. Relief works were also opened by the District Board, and in some exceptional cases, by the Khas Mahal Departments. Advances were given on a large scale under the Agricultural Loans Act, and all Khas Mahal and Court of Wards' collections were suspended for part of the year.

27. In Chittagong two years of drought were followed by a good harvest. Prices fell, and prospects were brighter than they had been for many months, when suddenly the cyclone of the 24th October devastated a great part of the district. The crops in the islands and along the sea-board were destroyed, and they were much damaged elsewhere, while all over the cyclone area many people became for the time houseless. The Central Famine Relief Committee placed Rs. 50,000 at the disposal of the local authorities for purposes of relief, and Rs. 7,674-1-1 was received as donations from a few wealthy men of Bengal including the Dacca Nawab. Rupees 39,909-5-10 was spent largely in the submerged area in charitable relief, and land improvement loans to the extent of Rs. 1,15,631 have been given for the repair and reconstruction of the embankments swept away by the storm-wave, out of the Rs. 1,25,500 sanctioned by Government. Latterly, relief was being quite needlessly given in grain doles, and I induced the Collector to stop it in May 1898 in Satkania.

28. On the whole, Mr. Kennedy thinks the material condition of the people of Tippera is remarkably good. As a rule they are well off, and ordinary labour in that district has all to be supplied from other places. The Noakhali peasants are also generally well-fed, well-clothed and well-housed. It is only the comparatively few middle class people with fixed incomes who have some difficulty to live. Their standard of living has been rising considerably in recent years, while of late the purchasing power of their incomes has decreased. I consider the Chittagonian lower orders remarkably well off compared with most parts of the Province.

VI.—EMIGRATION AND IMMIGRATION.

29. There was no regular immigration or emigration during the year. In Tippera a certain number of coolies drifted down from the tea gardens and railway in Sylhet. They were mostly broken down with illness, and many were women and children who had lost their natural protectors. Cooly hospitals were started for them at Comilla and Chandpur, and helpless cases whom the Medical Officers thought likely to recover at home were sent on to Calcutta, as also women and children who had no male relatives to look after them. The evil was much the same during 1897-98 as in the previous year, but with the completion of the railway it should materially diminish. The coolies from the railway seem mostly to have been employed by petty contractors, and it was found impossible to trace their history so as to fix the responsibility. The tea garden coolies were mostly free labourers, and seemed to have left the gardens of their own accord. The District Board paid for the hospitals, and the Local Government for their carriage to Calcutta. The Government having sanctioned an alternative route for the conveyance of coolies for the Surma Valley districts by the Assam-Bengal Railway, three cooly depôts or rest-houses have been constructed and a cholera hospital opened at Chandpur.

30. A number of people as usual migrated from Noakhali and Chittagong to Backergunge and Burma during the harvesting season for employment as day labourers. The exodus this year, however, was on a large scale owing to high prices and the cyclone in Chittagong. The Burma labour market was over-stocked and wages probably low. Mr. Anderson, however, thinks that it afforded much relief after the cyclone. One hundred and forty-five families emigrated to Arrakan from his district owing to the high prices.

VII.—PRICES OF FOOD AND LABOUR.

31. Prices ruled high, common rice selling at 8 to 6½ seers per rupee. It was only after the harvesting of the winter rice that they began to fall. With the rise of the rice market there was a corresponding rise in the price of other food-grains. This, however, caused no variation in the prices of labour. Skilled labour of a superior kind is not to be had anywhere in the Division. It has to be imported from Calcutta or Dacca when required. The prices of ordinary unskilled labour continued stationary. Of course matters became abnormal for a time in Chittagong after the cyclone, and record prices both of food and labour ruled in the market.

* * * * *

IX.—TRADE AND COMMERCE.

35. The Assam-Bengal Railway traverses the district lengthwise, tapping some of the important trade centres in the Chandpur and Sadar subdivisions. The traffic of Brahmanbaria subdivision is largely carried on by rivers. The internal trade is carried on partly by rivers and partly by bullock-carts. As there are no registering centres, it is not possible to furnish any estimate of its extent. The export trade of the district rose from 5,44,648 maunds to 7,37,725 maunds, while the import trade dropped from 3,43,579 maunds to 2,58,058 maunds. The increase of export was in rice, jute, gunny-bags and mustard-seed. In import also there was a considerable increase in piece-goods, cotton twist (European), gunny-bags, salt and kerosine oil.

Tippera.

36. The principal articles of exports from this district are paddy, husked rice, betel-nuts, cocoanuts, linseed, til, chillies, onion, cotton, eggs, hides and jute. The articles imported are chiefly piece-goods, yarn, petroleum, salt, twists, mustard oil, molasses, sugar, tobacco, brass and bell-metal articles, spices and betel leaves. The year of report and the one before it having been periods of severe and general shortness of crops, the export trade in paddy and rice, the most important produce of the district, was not so brisk as in former years. Of the articles of import trade, salt and mustard oil, being constituents of the daily food of the people, are consumed more or less by every family, while kerosine oil has, owing to its cheapness, found favour with the poorer classes. Tobacco, molasses and sugar are largely consumed, as also betel leaves, most of which are imported from Backergunge.

Noakhali.

37. As already stated in 1896-97 the geographical configuration of this district is very disadvantageous from a commercial point of view. There are only a few navigable rivers that intersect the district, while the large rivers that border it are too big for country boats to ply with safety, except during the winter season. During the rains, however, all the khals in the district become navigable by dug-outs.

38. The formerly most important commercial mart in this district, the Raipura hát, has lost its importance owing to the partial silting up of the Dakatya river on which it stands, and the depression in the betel-nut trade consequent on the destruction of the trees by plague. Chowmohani is now the most important mart for the export of paddy and rice, the other important rice marts being Bosur hát in Bamni, Shaheberhát in Hatiya, char Ani and Nando Bhuia's háts in Sandip, Panchgachia and Foolgazi háts in the Feni subdivision.

39. A railway to connect the town of Noakhali with the Laksham station on the Assam-Bengal Railway line has been sanctioned by the Government of India, and it is likely that either the Assam-Bengal Railway Company or some other Company will soon take up its construction.

40. The steamer service between Noakhali and Barisal continued to ply four times in the week each way during the year. There was another bi-weekly and intermittent service between the mainland and Sandip during the winter season. The quantity of goods imported by steamers was 40,938 maunds, against 50,279 maunds of the preceding year, while the quantity exported was 8,383 maunds, against 99,456 maunds of the previous year. The large fall in exports was owing to short crops and betelnut plague.

41. The figures are given in Statements B and C appended. As reported last year, no improvement in the system of inter-local boat traffic registration at Chittagong has yet been devised.

Inter-local boat traffic registered at Chittagong.

42. *Imports.*—Husked and unhusked rice constitute the staple imports. The quantity registered was 1,88,606 maunds, against 1,16,991 maunds in 1896-97, showing an increase of 71,616 maunds. The increase under the heads of cotton (raw), chillies and tobacco also is most marked, while there was a noticeable decrease in cocoanuts, hides, betel-nuts, sugar (unrefined), timber and firewood.

43. *Exports.*—European piece-goods, husked rice and cocoanuts registered show a large increase, and unhusked rice and salt large falling off. No explanation has been furnished with regard to the fluctuations in exports and imports.

44. The instructions contained in Government Circular No. 103, dated the 22nd July 1897, have been followed in compiling the statistics of trade of this Division for the year 1897-98. The import and export statements with regard to the 24 staples have been prepared and submitted in forms Nos. XXXIV, XXXV and XXXVI. A similar statement in form No. XXXVII for the whole Division, excluding the traffic moving between the districts within the Division, is also appended. Besides these, two statements of imports and exports in forms Nos. XXXVIII and XXXIX with regard to the trade of the several districts with Calcutta have been prepared from the monthly statements published in the *Calcutta Gazette* and annexed herewith. With reference to the instructions contained in paragraph 3 of the Government circular No. 1, dated the 20th April 1896, the District Officers have prepared and submitted amalgamated statements showing separately the total import and export trade in each of the 24 staples carried by rail and along the Nadia rivers and canals. From these statements divisional statements have been prepared in my office, and are submitted as appendices to this report, bearing No. XL. In preparing this statement the internal trade between the several districts of this Division has been excluded, as directed by Government.

45. The Port Commission during the year consisted of three representatives of European and two of native firms, the Magistrate of Chittagong, and the Assistant Agent and Chief Engineer, Assam-Bengal Railway, with Mr. J. D. Anderson, Mr. F. R. S. Collier, and, for the last few days of the year, myself as its Chairman, and Mr. E. Good (Port Officer) as Vice-Chairman. The Commissioners held 12 ordinary meetings and 1 special meeting, with an average attendance of 5·1.

Port of Chittagong.

46. The cyclone caused serious damage to the port. Some of the moorings were injured, and all the bar and river channel buoys were dragged out of position. The light tower of the Kutubdia Light house had its walls cracked, and every pane of glass of the lantern-room broken. The frame on which the cut-glass reflector stood was so completely smashed that it had to be temporarily replaced by a dioptric light from the tug *Gekko*, and a flare was burnt every 15 minutes from the top of the tower. The damages were promptly repaired by Mr. Good, the moorings and the buoys were relaid, the tug *Gekko* rendering valuable assistance in this emergency.

47. Owing to the consequent strain on their finance, the Commissioners were unable to repay any portion of the balance of the loan of Rs. 2,00,000 which still stands at Rs. 1,48,586-8-8. Of the loan of Rs. 33,000 taken for mooring materials, Rs. 2,519-10-8 was paid up.

48. The opening balance at the credit of the Port Fund was Rs. 8,709. The receipts during the year yielded Rs. 1,09,785, and the expenditure amounted to Rs. 1,04,983, leaving a balance of Rs. 13,510. As compared with the previous year, the receipts increased by Rs. 60,109, and the expenditure by Rs. 12,714. The hospital port dues stood thus: receipts, Rs. 5,726; opening balance of previous year, Rs. 4,680; disbursements, Rs. 4,997; and closing balance, Rs. 5,408. The health of the port was good. Eighty-eight seamen were admitted into hospital, and 76 were discharged cured. Admissions in the previous year were only 21.

49. The chief articles of export were rice, paddy, jute, tea and salt, and of import kerosine, salt, hardware and cutlery, railway materials, piece-goods, jute, paddy, rice and sugar.

Foreign and Interportal Trade.

	Hardware and cutlery ...	56,365	97,196
	Apparel	2,63,436	7,07,766

50. The total value of the foreign trade of the year amounted to Rs. 81,50,349, and that of the interportal trade to Rs. 1,59,76,695, showing an increase of Rs. 6,10,747 in the former, and Rs. 17,13,041 in the latter, as compared with the previous year. The increase in imports was Rs. 9,08,482, chiefly in kerosine oil from America and salt from the United Kingdom, and that in exports was Rs. 14,15,306 contributed chiefly by the export of rice to Ceylon and Trinidad, and of jute to the United Kingdom, Hamburgh and Dunkirk. The total increase of Rs. 23,23,788, however, is not sufficient to cover the large falling off of Rs. 58,80,226 of the previous year. The cyclone of the 24th October last, which partly damaged the crops, did not allow trade to recover from the paralysis inflicted on it by the drought and scarcity of the previous year.

Number and tonnage of vessels which cleared for foreign and home ports:—

Year.	Foreign Ports.		Home Ports.	
	Vessels.	Tonnage.	Vessels.	Tonnage.
1	2	3	4	5
1896-97	11	20,915	548	1,75,044
1897-98	17	29,146	593	1,87,402
Increase	6	8,231	45	11,458

51. The total receipts of the year amounted to Rs. 6,65,2,73, salt duty alone contributing Rs. 6,11,442. They show an increase of Rs. 13, 165 chiefly in import and export duty, and a falling off of Rs. 1,38,141 in salt duty, as compared with the results of the previous year. This decrease is due chiefly to smaller clearances of salt for Tippera, and for local consumption, in consequence of two years' bad crops and the cyclone. The disbursements showing a total of Rs. 37,350 left a margin of Rs. 6,27,923 in favour of Government.

52. The Juldeah Customs station at the entrance to the port was abolished during the year, and the staff was removed to head-quarters. The present Customs office building being in a bad way and quite unfit for the purpose, a proposal for a new building is under the consideration of Government.

* * * * *

XXIV.—COMMUNICATIONS.

117. The Kasba, the Merkota, the Lowi and Syamagram to Lakhiganj khals were excavated and made navigable for internal traffic in Tippera. Four feeder roads were also constructed at a cost of Rs. 3,853. The Sylhet and Cachar line of steamers continued to touch at several important places on the Meghna, and the boat services between Comilla and Narainganj, Akhaura and Brahmanbaria, and Maniknagar and Brahmanbaria were maintained, the last only receiving subsidy from the Tippera District Board.

118. Two new roads were made in Noakhali, and the steamer service between Noakhali and Barisal was kept up. The cyclone in Chittagong blew down many bungalows, damaged bridges, and blocked up roads, specially the hill paths with fallen trees. It also washed away jetty approaches, and caused other damages, which taxed the resources of the District Board to repair. Little else was, therefore, done during the year in that district.

119. The following table shows the outlay on communication:—

District.	Village roads.		District roads.	
	Mile.	Cost.	Mile.	Cost.
1	2	3	4	5
		Rs.		Rs.
Tippera	220	18,501	297	32,242
Noakhali	141	10,999	377	33,642
Chittagong	50	1,181	575	68,648

120. In planting and maintaining trees Rs. 815 was spent in Tippera, Rs. 1,515 in Noakhali, and Rs. 1,707 in Chittagong. Five hundred and eighty-five new trees were planted in Tippera, and 1,250 in Noakhali, and none in Chittagong. The trees planted in the last district in previous years were destroyed or damaged by the cyclone to a great extent.

* * * * *

XXX.—LOCAL SELF-GOVERNMENT INSTITUTIONS.

133.—There were three District Boards presided over by the District Officers as Chairmen.

District Boards.

Name of District Board.	Number of members.	Number of meetings.	Average attendance at each meeting.
Tippera	19	13	11·07
Noakhali	13	16	7·62
Chittagong	19	12	16·2

134. As compared with the previous year, the attendance suffered in Tippera and Noakhali and improved in Chittagong. The Boards continued to work through Standing Committees. They had 53 meetings in Tippera, 41 in Noakhali, and 22 in Chittagong during the year.

Income.

Name of District.	Opening balance.	Rate.	Government contribution.	Pounds.	Ferries.	Other sources.	Total.
1	2	3	4	5	6	7	8
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs
Tippera	1,22,193	97,082	80,709	7,705	7,177	20,887	2,13,560
Noakhali	55,713	71,518	45,545	5,133	9,858	13,907	2,45,961
Chittagong	46,282	70,754	41,760	5,374	16,138	1,01,706	2,35,732
Total ...	2,24,188	2,39,354	1,68,014	18,212	33,173	1,36,500	5,95,253
Total for 1896-97 ...	2,23,765	2,39,371	1,92,165	17,879	34,743	79,963	5,64,121

Expenditure.

Name of District.	Communication.	Education.	Sanitation.	Establishment.	Other sources.	Total.
1	2	3	4	5	6	7
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Tippera ...	66,714	49,017	10,995	7,576	73,793	2,08,095
Noakhali ...	52,207	30,075	5,345	5,924	66,025	1,59,576
Chittagong ...	82,428	29,105	4,059	7,063	1,49,614	2,72,269
Total ...	2,01,349	1,08,197	20,399	20,563	2,89,432	6,39,940
Total for 1896-97 ...	1,50,097	1,06,658	9,551	19,751	2,77,658	5,63,718

135. The cost of establishment was 3·6 in Tippera, in Noakhali 3·7, and 2·5 in Chittagong. The Boards everywhere appear to have worked smoothly.

Local Boards.

Name of District.	Name of Local Board.	Number of members.	Number of meetings.	Average attendance at each meeting.
1	2	3	4	5
Tippera ...	Comilla ...	12	11	5·7
	Brahmanbaria ...	9	6	4·6
	Chandpur ...	7	12	4·5
Noakhali ...	Sadar	11	19	5·5
	Feni	9	7	6·1

Union Committees.

Name of District.	Name of Union Committee.	Number of members.	Number of meetings.	Average attendance at each meeting.
1	2	3	4	5
Tippera ...	Laksam ...	5	3	3·3
	Sarail ...	5	4	3·75
	Navinagar ...	5	2	3·5
	Chandpur ...	5	5	3·60
	Matlab ...	5	6	3·16
Noakhali	Hatiya ...	6	4	5·5
	Lakshmipur ...	6	7	5·7
	Sandip ...	6	7	5·9
	Feni ...	6	1	1·66

136. The district reports are extremely meagre as to information regarding the working of the Local Boards and Union Committees. It is not even stated what funds and what works were assigned to them. They all show deterioration in the attendance of members. These institutions seem to exist only in name and might well be done away with. The Union Committees in Tippera are reported by Mr. Kennedy to be still in doubtful condition. The

District Boards of Tippera and Noakhali, like that of Chittagong, are capable of attending to the requirements of their districts. The Local Boards of Noakhali are said to have worked well, with some instances of friction between the Sadar Board and the District Engineer—a result of the division of authority.

137. The District Board of Chittagong got considerably into debt owing to cyclone damages, aggravated by the absence on leave of their old and experienced Vice-Chairman (Rai Kailas Chandra Das Bahadur), the accounts falling into confusion so that the Board could not tell until May last how they really stood. The year closed with a deficit of Rs. 9,744. Owing to large payments not having been made though due within the year, the estimated deficit at the close of the current year was Rs. 61,512, which, however, has been reduced by about Rs. 38,000 by reducing current expenditure.

138. There were five Municipalities in the Division to which the Chandpur municipality was added during the year. Except Cox's Bazar and Chandpur, all other municipalities have elective system.

Municipality.

139. The statement below shows the number of Commissioners of each Municipality and of the meetings held by them, and the percentage of their attendance:—

District.	Name of Municipality.	Number of Commissioners.	Number of meetings.	Percentage of average attendance at each meeting.
1	2	3	4	5
Tippera ...	Comilla ...	18	19	48·9
	Brahmanbaria ...	12	13	58·3
	Chandpur ...	9	7	7
Noakhali ...	Noakhali ...	12	19	49·5
Chittagong ...	Chittagong ...	18	20	44·2
	Cox's Bazar ...	13	7	108·

140. The following figures show the income and expenditure of each Municipality:—

District.	Name of Municipality.	Income.	Expenditure.
1	2	3	4
		Rs.	Rs.
Tippera	Comilla	25,802	19,388
	Brahmanbaria ...	7,613	7,408
	Chandpur ...	...	...
Noakhali	Noakhali ...	12,103	8,853
Chittagong ...	Chittagong ...	79,989	78,729
	Cox's Bazar ..	6,348	4,431

141. Mr. Kennedy thinks the Brahmanbaria Municipality is too poor to be of much use. It includes a great quantity of agricultural land, and the main roads have to be kept up by the District Board. As regards the Noakhali Municipality Mr. Agasti writes:—"The sanitary condition of the Municipality is on the whole remarkably good, and the introduction of Part IX of the Municipal Act from the beginning of the year under report has brought about a material improvement in the state of the town. The drains are in fairly good order and the conservancy arrangements generally satisfactory."

142. The provisions of Part IX of the Municipal Act, after considerable friction and an outbreak of incendiarism, possibly caused by them, were introduced into the town of Chittagong, and the operations have been started in the whole of one ward and in the greater part of two other wards. With this exception, nothing further was done to improve the sanitation of the town. The water-supply scheme referred to in the last year's report still remains practically where it was last year. The Assam-Bengal Railway Company have offered only to pay for the quantity of water actually taken by them instead of a fixed subsidy, and the matter being referred to the Government of India, they have enquired whether the credit of the municipality would justify a loan of Rs. 2,50,000 being given to it for the purpose. The scheme seems to me much too costly.

XXXI.—EMPLOYMENT OF MUHAMMADANS.

143. Gazetted appointments held by Muhammadans were 6, ministerial appointments 180, and menial posts 655, nearly the same as in the preceding year, when the respective numbers were 8,168 and 649. Their claims are reported to have been carefully considered in every district. Mr. Kennedy remarks:—"In the lower grades a fair number of Muhammadans have been appointed, but it is still extremely difficult to get a fair number of competent men for the higher posts."

Mr. Agasti says:—"The claims of Muhammadans are always borne in mind when suitable vacancies occur. Eligible Muhammadans are very rare in this district. In the whole staff of ministerial officers and apprentices under the Magistrate-Collector, there is not a single Muhammadan who has passed the Entrance examination."

144. The Chittagong Madrasah has, however, now begun to turn out more Entrance-passed students, and all the B.A. students do not yet seem to have found employment.

* * * * *

XXXIV.—SOCIAL AND POLITICAL INSTITUTIONS.

155. There are none worth mentioning in this Division. The Rate-payers' Association and Branch Islamia Association of Noakhali evinced no signs of life during the year. In Chittagong the Islam Association worked for the improvement of the Muhammadans, and for securing Government employments for them. It is also reported to have helped them on a very small scale after the cyclone. The so-called Chittagong People's Association, the members of which are chiefly pleaders of the town, favoured Mr. Anderson with criticisms of Bills, specially the Sedition Act, the Criminal Procedure Act, and the Tenancy Act. After the cyclone it acted in concert with the local Brahmos and collected money for helping the distressed, of which, however, the Magistrate knows nothing. The Arjya Shava of Chittagong is said to be doing good work in stimulating an interest in Hindu religious literature. Mr. Anderson regrets that no interest is taken by the school-masters in the United Schools Athletic Club.

State of public feeling and public Press.

156. The people of this Division ordinarily take interest in nothing outside their own villages. It is only the pleaders and other educated men who take any interest in public matters. The Diamond Jubilee was duly celebrated. The high price of rice and low price of jute in places aroused public interest in Tippera, while in Chittagong town the latrine tax was very unpopular. Tippera possesses 5 printing presses, Noakhali 3 and Chittagong 5. Noakhali has no newspaper. The *Tripura Prokash* of Comilla has ceased to exist, and in its place has sprung up a fortnightly paper called the *Tripura Hitoishi*, said to be edited by a member of the local Bar. There are two newspapers now in Chittagong—the old-established *Sanshodhinee* and the newly-started *Jyoti*. They are not always too accurate in their information, and generally exaggerate any failure of crops, damage by cyclones, and so forth.

FIRST FORECAST OF THE WINTER-RICE CROP IN BENGAL, 1898.

THE following is published for general information.

M. FINUCANE,
Secy. to the Govt. of Bengal.

The 7th October 1898.

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL.

First forecast of the winter-rice crop in Bengal, 1898.

Explanatory.—The district returns appended to this note report on the state of the crop about the middle of September. The figures of normal area given in these returns have been revised by District Officers, partly with reference to the areas sown during the past five years, and partly as the result of special enquiries on the subject. As with other forecasts published during the current year, a percentage notation of outturn has been adopted in place of the anna notation previously used. Under the new system of notation, 100 represents the normal outturn per acre, or the 16-anna crop of the former system.

2. *Character of the season.*—The rainfall of the season up to the third week of September has already been described in the first forecast on the *bhadoi* crops of Bengal, dated the 27th September 1898. In April, it was deficient over the whole of Bengal Proper, but not by a large amount, except in East Bengal. It was a little above the normal in Orissa, and about normal in Chota Nagpur and Bihar. In May, the rainfall was slightly below the average in all parts of these Provinces except Bihar, where there was only a nominal excess. On the whole, these ante-monsoon showers seem to have been favourable to the cultivation of winter rice in the extensive low-lying areas of East, North, and Central Bengal. In June, the rainfall was abundant and well distributed in Bengal Proper and Chota Nagpur, and deficient in Bihar and Orissa. In July, it was generally below the normal. In August, the rainfall was above the normal everywhere, except in parts of North Bengal and North Bihar, where the deficiency caused serious delay in transplantation. Towards the end of this month, very heavy rain fell in Eastern Bengal, and did some damage to winter rice in Noakhali and Chittagong. In the first week of September, good general rain fell throughout the Province, excepting parts of North Bihar and Orissa, where more rain was still required for transplantation. In the second week of September, heavy rain fell in the north of the Province and especially in North Bihar, elsewhere rain was moderate. In Orissa more rain was still wanted. In the third week of September, there was generally heavy rain throughout the Province, accompanied by high wind.

The same kind of weather prevailed during the early part of the following week, but since then the weather has become fine and settled all over the Province.

The excessive rain of September caused floods in Midnapore, Murshidabad, Patna, Saran, Champaran, Muzaffarpur, Darbhanga, Monghyr, Bhagalpur, Purnea, and Balasore. The extent of damage done by these floods to winter rice is not yet accurately known. It has undoubtedly been great in low-lying lands in North Bihar, but elsewhere has not been serious, and the loss sustained should not affect the outturn of winter rice for the Province as a whole. On high lands, the heavy rain of September, although coming late, has proved useful in some places for transplantation. In Cuttack, locusts were reported to have done some damage to paddy in the beginning of September. Insect pests have appeared also in Backergunge and Balasore. Grasshoppers have been doing much damage to paddy in Midnapore.

3. *Area cultivated.*—According to the revised figures shown in column 5 of the appended returns, it will be seen that the normal area under winter rice amounts to 31,195,600 acres. The area under cultivation this year is estimated in the same returns as 31,933,600 acres against 31,815,500 acres estimated to have been cultivated in 1897. There is an increase in area this year as compared with that of last year and with the normal area, and this is due to seasonable rainfall, and to the extension of paddy cultivation on lands hitherto sown with jute—a result brought about by the low price fetched by jute last year and the high price of food-grains. The areas entered in columns 3 and 4 of the statistics below have in some cases been revised by this Department, and some discrepancies between them and the areas previously reported are being enquired into.

4. *Character of the crop.*—A reference to the district returns, appended hereto, will show that out of 45 districts of these Provinces, 16 districts report crops above the normal (100 per cent.) 10 districts return normal crops, and 18 districts report crops between 75 and 100 per cent. Chittagong only reports a crop below 75 per cent. Nine districts report better crops than last year, 7 equal crops, and 29 worse crops. Damage has been done by the recent floods; but as the weather is now more favourable, and flood-water is subsiding, it is hoped that much of the submerged paddy will be saved. In several districts, the heavy rains of

September have, on the other hand, greatly improved the prospects of the crop. The crop is now roughly estimated by this Department as a 95 per cent. crop, against a 97 per cent. crop, which appears to have been harvested last year. This year's crop is reported to have been sown on a larger area than that of last year.

N. N. BANERJEI,

Asst. Director of Land Records and Agriculture, Bengal.

(Countersigned.)

P. C. LYON,

Director of Land Records and Agriculture, Bengal.

CALCUTTA;
The 5th October 1898.

Preliminary Forecast of the Winter Rice Crop of 1898.

1	2	3	4	5	6	7	8	9	10	11
District.	Subdivision.	Total area of subdivision in acres.	Total area estimated to be under cultivation in acres.	Approximate normal area under winter rice in acres.	Approximate area under winter rice last year in acres.	Estimated area under winter rice this year in acres.	Taking 100 to represent the normal outturn, how much represented the outturn last year?	Taking 100 to represent the normal outturn, how much will represent this year's outturn?	Remarks by District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
Burdwan	Sadar	794,880	635,600	351,600	434,300	432,000	126	100	Owing to want of timely rainfall, the area sown and the expected outturn this year are less than that of last year.	
	Kalna	276,480	234,900	115,200	128,000	122,800	125	100		
	Katwa	225,280	180,600	130,200	140,800	140,000	125	125		
	Raniganj	429,440	254,700	209,000	225,300	220,000	125	100		
	District Total ...	1,726,080	1,283,800	806,000	928,400	920,000	125	102		
Birbhum	Sadar	709,120	900,000	393,300	390,000	373,380	119	112	There has been more than sufficient rain during the current season. The paddy on high lands is doing excellently, but low land paddy is not doing as well. On the whole, a little more than the average crop is expected if conditions continue favourable.	
	Rampur Hát ...	412,800		211,600	225,900	226,100	106	112		
	District Total	1,121,920	900,000	604,900	615,900	619,400	113	112		

1	2	3	4	5	6	7	8	9	10	11
District.	Subdivision.	Total area of subdivision in acres.	Total area cultivated or assessed to be under cultivation in acres.	Approximate normal area under winter rice in acres.	Approximate area under winter rice last year in acres.	Estimated area under winter rice this year in acres.	Taking 100 to represent the normal outturn, how much will represent this year's outturn?	Taking 100 to represent the actual outturn of last year, how much will represent this year's outturn?	Remarks by District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
Bankura ...	Sadar ...	1,223,430	428,970	345,600	355,200	358,800	100	100	The area cultivated is the largest on record, and the rainfall of the year being somewhat later than in 1897, the outturn will be less.	As the September rainfall has been very favourable, the outturn may prove to have been underestimated.
	Vishnupur ...	453,400	214,000	192,400	192,000	192,000	100	100		
District Total ...		1,677,440	642,880	537,600	537,600	537,600	100	100		
Midnapore	Sadar ...	2,603,440	1,229,120	717,500	700,000	700,000	105	105	The area brought under cultivation this year has been less than that of last year every where except in the Sadar subdivision, and is due to the submersion of some lands under Hooghly. In the Ghatal and Tamluk subdivisions the outturn is likely to be more, below the normal, as the water is not subsiding. Grasshoppers are said to be damaging the crops in some parts of the district.	Special enquiries will be made as to the ravages of grasshoppers this district.
	Tamluk ...	417,840	279,760	220,300	230,000	230,000	100	100		
	Contai ...	595,295	452,300	547,600	542,000	542,000	110	110		
	Ghatal ...	336,080	146,300	118,300	131,200	166,050	112	60		
District Total ...		3,952,862	2,111,540	1,403,600	1,603,200	1,443,200	105	94		
Hooghly	Sadar ...	282,560	176,300	115,000	141,440	119,000	150	75	Owing to short and unseasonable rainfall, a smaller area has been brought under cultivation this year, and the outturn for the same reason is expected to be poor.	
	Serampore ...	212,530	151,160	85,000	100,000	100,000	87	87		
	Jahanabad ...	288,560	182,700	75,300	80,000	75,000	87	75		
	Howrah ...	119,720	61,800	41,800	61,000	61,700	100	148		
	Uluberia ...	215,650	126,000	73,600	80,000	80,000	67	75		
District Total ...		1,067,960	702,360	346,300	462,440	432,700	91	91		

24-Parganas	Sadar	533,700	462,700	255,700	300,700	340,500	100	100	The increase in the area under the winter rice crop this year is due to favourable rainfall. In the south of the district sowings were retarded owing to insufficient rainfall during the early part of the season, but subsequent rains have improved the prospects of the crop and the outturn is expected to be not below the average. Transplantation was somewhat delayed, especially in Diamond Harbour, for want of rain.	
	Barasat	313,600	159,400	102,100	117,100	117,100	100	110		
	Basirhat	236,400	192,900	160,000	142,500	142,500	100	100		
	Diamond Harbour	266,880	243,900	243,300	232,000	233,900	100	90		
	District Total ...	1,314,640	1,058,900	770,000	792,300	833,000	100	100		
Nadia ...	Sadar	407,920	362,800	61,400	82,400	76,680	100	80	Owing to seasonable rainfall, a larger area has been sown this year, but the decrease in the estimated outturn is said to be due to the difficulty experienced at the time of weeding in the Meherpur subdivision on account of incessant rain and also to the overflow of the rivers, which submerged the young plants and destroyed them in places.	It seems probable that the outturn has been somewhat under-estimated.
	Kushtia	382,080	278,400	26,680	28,000	28,000	75	75		
	Meherpur	404,480	294,700	22,800	35,900	37,400	69	62		
	Chuadanga ...	230,400	167,900	10,300	14,200	24,000	69	75		
	Ranaghat	273,280	199,200	11,300	11,800	11,100	94	100		
	District Total ...	1,788,160	1,303,000	132,400	172,000	177,100	86	78		
Murshidabad.	Sadar	536,240	393,100	68,100	60,000	60,200	100	87	The increase in the area sown is due to seasonable rainfall. The decrease in the outturn is due to inundation. If the embankments break and heavy floods occur, the crop will be much injured.	The recent floods reported from this district do not appear to have been heavy.
	Kandi	405,760	279,800	171,700	189,900	189,900	100	100		
	Jangipur	361,440	310,600	37,300	40,000	40,300	100	100		
	District Total ...	1,373,440	983,500	277,100	289,900	290,400	100	97		
Jessore ...	Sadar	568,080	304,000	153,300	166,400	180,000	112	112	The decrease in this year's area in Jhenida subdivision is due to more accurate figures being obtained and to the fact that the land having been gradually drained, the old *aman* lands have been partly sown with *aus* crops. The rainfall having been, on the whole, seasonable, a good outturn is expected.	
	Jhenida	304,000	204,800	64,000	64,000	43,100	112	107		
	Magura	272,000	171,500	82,000	88,000	89,000	112	106		
	Narail	311,080	187,500	128,000	128,000	128,000	112	112		
	Bongaon	415,360	249,000	77,000	100,000	100,000	112	109		
	District Total ...	1,873,000	1,116,800	504,300	546,400	520,700	112	107

	District Total	1,660,160	1,217,000	624,900	669,800	687,000	90	120		

Dinajpur	Sadar	1,971,300	1,338,200	897,200	662,300	897,200	106	112	Owing to the high price of paddy and the low price of jute last year, the cultivation of the winter rice crop has been extensive, and the rainfall having been hitherto very favourable, a very good outturn is expected.
	Thakurgaon ...	554,880	367,400	218,100	218,100	218,100	75	125	
	District Total ...	2,526,080	1,687,600	1,115,300	880,400	1,115,300	87	114	
Jalpaiguri	Sadar	1,072,000	607,500	292,700	297,400	302,400	89	85	The increase in column 4 is due to the increase of cultivation in the Duars. The decrease in outturn is due to deficient rainfall in August, which retarded the work of transplantation. Recent rain has improved the prospects of the crop.
	Alipur	822,600	467,500	168,590	160,200	140,200	100	70	
	District Total ...	1,894,600	1,075,000	461,500	457,600	442,600	94	80	
Darjeeling	Sadar (including Kalimpong).	464,640	61,440	11,500	11,500	11,500	100	125	The increase in outturn is due to seasonable rain.
	Kurseong ...	118,408	12,508	No winter rice crop in this subdivision.					
	Siliguri ...	161,929	68,708	52,708	45,000	45,000	113	100	
	District Total ...	744,980	142,900	64,208	54,500	54,500	109	105	
Rangpur ...	Sadar	730,240	486,800	309,000	300,000	300,000			
	Kurigram	599,690	463,900	209,400	234,500	214,500	94	100	
	Gaibanda ...	456,467	371,200	215,000	200,000	203,000			The increase in this year's area in the Gaibanda subdivision is due to the decrease in the area under jute. Seasonable rainfall is the cause of the increase in the outturn.
	Nilphamari ...	414,720	275,900	88,000	90,000	90,000			
	District Total ...	2,251,040	1,602,700	821,400	824,500	827,500	94	100	
Bogra ...	Whole district ...	869,760	600,000	363,000	400,000	410,000	100	110	Seasonable rainfall has enabled the cultivators to grow the crop on a larger scale than usual and, owing to the same cause, the outturn is also expected to be better than normal this year.
Pabna ...	Sadar	564,480	423,000	405,200	400,000	405,600	100	100	Owing to high floods in the Ganges, a normal outturn is expected in the Sadar subdivision. The greater portion of the jute land which was not sown with it has been cropped with *aman* in the Sirajganj subdivision, hence the increase in area. Owing to low floods the outturn has been affected in Sirajganj, but if the river rises shortly (as it is still rising) the normal outturn may be had. The prospects of the crop have improved since the submission of the forecast.
	Sirajganj	612,480	439,500	210,800	216,200	236,200	100	88	
	District Total ...	1,176,960	862,500	616,000	616,200	641,200	100	92	

1	2	3	4	5	6	7	8	9	10	11
District.	Subdivision.	Total area of subdivision in acres.	Total area estimated to be under cultivation in acres.	Approximate normal area under winter rice in acres.	Approximate area under winter rice last year in acres.	Estimated area under winter rice this year in acres.	Taking 100 to represent the normal outturn, how much represented the outturn last year?	Taking 100 to represent the normal outturn, how much will represent this year's outturn?	Remarks by District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
Dacca ...	Sadar	810,240	475,160	243,500	244,000	243,800	125	125	Timely rainfall and the gradual rise of river water have been favourable to the crop.	
	Manikganj ...	312,320	234,200	187,300	202,200	202,200	125	125		
	Munshiganj ...	247,040	160,000	60,800	68,000	68,000	125	126		
	Narayanganj ...	410,240	230,400	66,800	69,000	75,000	125	125		
	District Total ...	1,780,460	1,029,760	560,900	573,200	583,700	125	125		
Mymensingh.	Sadar	1,185,280	697,000	246,700	236,000	250,500	100	100	The increase in area is due to land previously sown with jute having been brought under the cultivation of winter rice.	
	Netrakona ...	697,600	284,500	162,000	165,000	169,000	100	112		
	Kishorganj ...	667,520	264,000	122,700	130,000	130,000	87	100		
	Jamalpur	824,960	627,200	275,100	310,000	314,000	100	100	The sowing and transplantation of winter rice were much retarded by deficiency of rainfall during April and May 1898, hence the outturn is estimated as less than that of last year.	
	Tangail	679,040	533,000	205,000	205,000	205,000	100	75		The outturn has probably been underestimated in Tangail.
	District Total ...	4,052,460	2,405,700	1,011,500	1,046,000	1,068,500	99	95		

Faridpur	Sadar	556,400	385,300	209,100	289,000	348,000	112	112	Last year's area in the Sadar subdivision seems to have been an over-estimate. The Subdivisional Officer of Madaripur reports that about 20,000 acres of land which were not sown with jute, have been sown with *aman* paddy. The revised figures in columns 5, 6, and 7 against Goalundo have been furnished by the local police. It appears that they have been under-estimated.	
	Madaripur ...	636,160	416,900	322,400	324,000	344,000	112	110		
	Goalundo	273,920	205,400	57,700	137,000	57,700	100	100		
	District Total ...	1,460,480	1,007,500	649,200	750,000	649,700	111	111		
Backergunge.	Sadar	711,040	450,000	325,000	325,000	325,000	112	100	Recent enquiries have caused some alterations to be made in the figures in columns 4 to 7. Ample rains have brought the outturn up to the normal. But for insects, an estimate over the normal would have been submitted.	Prospects appear to have improved since the Collector submitted his forecast.
	Patuakhali ...	787,840	350,000	300,000	300,000	300,000	112	100		
	Pirojpur	442,880	350,000	275,000	275,000	275,000	112	100		
	Dakhin Shahbazpur.	393,600	255,000	200,000	200,000	200,000	112	100		
	District Total ...	2,335,360	1,408,000	1,100,000	1,100,000	1,100,000	112	100		
Tippera	Sadar	730,880	547,200	283,200	402,400	347,200	100	88	The decrease in the area in the Sadar subdivision is due to the fact that transplantation of *aman* has not yet been completed, while the increase in the other subdivisions is ascribed to certain jute lands being cropped with winter rice this year.	
	Brahmanbaria ...	492,160	357,900	229,700	250,000	340,000	100	100		
	Chandpur ...	371,200	265,200	192,000	192,000	196,000	112	112		
	District Total ...	1,594,240	1,171,300	806,000	844,400	843,200	103	100

District.	Subdivision.	Total area of subdivision in acres.	Total area estimated to be under cultivation in acres.	Approximate normal area under winter rice in acres.	Approximate area under winter rice last year in acres.	Estimated area under winter rice this year in acres.	Taking 100 to represent the normal outturn, how much represented the outturn last year?	Taking 100 to represent the normal outturn, how much will represent this year's outturn?	Remarks by District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
Saran ...	Sadar ...	1,696,087	553,500	145,800	144,000	144,000	100	75	Great damage is reported owing to the submersion of the crops by unusual floods. These have done much damage, because sowings and transplantation were late on account of insufficient rain in June. If, however the waters fall quickly, much of the rice crop will be saved.	
	Siwan ...		450,600	179,000	179,000	179,000	125	75		
	Gopalganj ...		371,000	117,100	117,600	117,600	100	75		
	District Total ...	1,696,087	1,375,100	441,900	431,600	440,600	105	75		
Champaran	Sadar ...	971,360	782,600	286,800	284,000	285,000	106	69	This year's area is somewhat less than the normal, as owing to want of timely rain for transplantation some tracts in the north of Bettiah have not been planted out. The increase over the area of last year is due to the fact that some lands usually sown with winter rice were utilized for the *bhadoi* crops this year. The outturn is expected to be much less than the average owing to want of rain for transplantation and to heavy rainfall in the beginning of September and to the damage done to the crop by the recent flood.	
	Bettiah ...	1,958,239	682,000	306,000	302,000	300,000	94	85		
	District Total ...	2,929,599	1,364,600	592,800	586,000	585,000	100	77		
Muzaffarpur	Sadar ...	1,923,673	649,400	240,300	240,300	240,300	100	100	Owing to insufficient rainfall in August, the transplantation of the rice crop in the Sitamarhi subdivision was greatly retarded, and hence the outturn is estimated to be a little less than the normal. The normal area under winter rice shown in column 5 is based on the survey and settlement figures and may be accepted as fairly reliable.	It is probable that the area sown this year in the Sitamarhi subdivision has been over-estimated. Great damage has been done to the crop by the recent floods.
	Hajipur ...		325,700	97,500	97,500	97,500	113	112		
	Sitamarhi ...		823,700	364,840	364,500	364,900	94	95		
	District Total ...	1,923,673	1,830,800	702,640	702,300	702,600	100	99		

Darbhanga	Sadar	782,050	594,600	375,000	375,000	375,600	100	113	The decrease in area and outturn is due to insufficient rain during the sowing season.	It is probable that the area sown this year in the Madhubani subdivision has been over-estimated. Great damage has been done to the crop by the recent floods.
	Samastipur ...	468,960	391,000	165,800	165,800	160,000	100	100		
	Madhubani ...	883,390	834,500	651,700	651,700	651,700	100	87		
	District Total ...	2,134,400	1,820,100	1,192,500	1,192,500	1,187,300	100	97		
Monghyr...	Sadar	397,760	299,200	265,100	279,000	265,000	94	96	A good outturn is expected on account of timely and sufficient rainfall.	Recent floods have done considerable damage in Begusarai.
	Jamui	1,919,520	815,300	563,809	364,000	364,000	100	100		
	Begusarai	492,160	369,300	14,700	14,700	14,700	94	100		
	District Total ...	2,809,440	1,583,800	843,600	657,700	643,700	97	99		
Bhagalpur	Sadar	897,760	464,000	280,000	250,000	250,000	100	100	Unfavourable rainfall in July and August in North Bhagalpur accounts for the decrease in this year's area.	Damage has been done to the crop by the recent floods in Madhupura and Supaul.
	Banka	736,480	588,000	327,400	327,400	327,400	125	125		
	Madhupura ...	732,640	396,600	318,800	318,800	318,800	113	160

RESOLUTION ON THE ANNUAL RETURNS ON THE WORKING OF THE CHARITABLE DISPENSARIES IN BENGAL FOR THE YEAR 1897.

MUNICIPAL DEPARTMENT.—MEDICAL.

Darjeeling, the 7th October 1898.

RESOLUTION.—No. 676T—M.

READ—

Annual Returns on the working of the Charitable Dispensaries in Bengal for the year 1897.

Read also—

The Annual Returns on the working of the Charitable Dispensaries in Bengal for the year 1896, and the Resolution recorded thereon by Government.

UNDER the orders in force, a full report on the working of mufassal dispensaries is submitted once in three years. In the intermediate years, only statistical returns are submitted, with such brief comments as the figures appear to call for. The last triennial report was submitted by Surgeon-Colonel Ross in 1896, and dealt with the three years 1893, 1894, and 1895; and the next will not be due till the close of the present year.

The returns for 1897 were due to Government on the 1st May, but were not received until the 6th September, or nearly four months after the proper date. The delay was no doubt mainly due to the present Inspector-General having only received charge of his office after the close of the year to which they relate. The Lieutenant-Governor trusts that greater punctuality will be observed in future.

2. The number of dispensaries open at the close of the year was 477—a net increase over those open in 1896 of 22 institutions. Twenty-five new dispensaries were opened during 1897, and two others which previously existed submitted their returns for the first time and were brought on to the Government list. Of those newly opened, 1 was in class I, 15 in class II, 6 in class III-A, and 3 in class III-B. The steady increase in the number of class II dispensaries, as the Inspector-General of Civil Hospitals remarks, shows a laudable desire on the part of local bodies to bring medical relief within easy reach of the people. The District Board of Backergunge alone has established no less than 11 dispensaries during the last two years. The addition of eleven new institutions in class III shows that private individuals also were not behindhand in providing medical relief for their poorer neighbours. Five dispensaries are shown as having been closed in 1897. Of these, the dispensary at Bangaon was not really closed, but was removed from the Government list, owing to the transfer of the management of the Bengal Central Railway, by which it is maintained, to a private company; the two Lady Dufferin Zanana Hospitals at Bhagalpur were amalgamated; and three were actually closed. The 477 dispensaries remaining open at the close of the year are classified as follows:—

Class I	...	...	...	30
Do. II	...	...	...	275
Do. III-A	...	...	...	98
Do. III-B	...	...	...	74
		Total	...	477

3. The following table shows the distribution of dispensaries in each Division according to population:—

Division.	Population.	Number of dispensaries.	Number of people to each dispensary.
1	2	3	4
Burdwan	7,688,818	55	139,796
Presidency	7,853,566	67	117,217
Rajshahi	8,019,187	74	108,367
Dacca	9,844,127	85	115,813
Chittagong	4,190,081	41	102,197
Patna	15,811,014	63	250,968
Bhagalpur	8,582,490	40	214,562
Orissa	4,047,352	34	119,039
Chota Nagpur ...	4,628,792	20	231,439
	70,665,427	479*	147,526

* Although the total number of dispensaries at the close of the year was 477, the working of 479 dispensaries is shown in the annual Returns.

4. The following table shows the chief statistics in respect of area, population, and number of dispensaries and patients treated in Bengal in 1897, as compared with corresponding figures for other provinces for the year 1896. The figures for Calcutta and Howrah are, as usual, excluded:—

Provinces.	Number of dispensaries.	Area of the provinces in square miles.	Square miles per dispensary.	Population of the provinces.	Population per dispensary.	Number of patients treated.	Number of patients per dispensary.
1	2	3	4	5	6	7	8
Bengal	479	151,543	318	70,665,427	147,526	2,834,112	5,941
Bombay	314	125,144	398	18,931,128	60,194	2,319,546	7,386
Madras	475	141,189	297	35,630,440	75,011	4,042,533	8,510
Central Provinces	96	71,582	751	9,561,401	100,014	1,374,139	14,164
Punjab	307	110,687	419	20,860,813	78,134	3,512,934	11,696
North-Western Provinces	550	107,807	307	42,905,085	134,014	3,965,359	11,301
Burma	96	171,480	1,785	7,665,360	79,224	708,489	7,380

As in previous years, Bengal, as compared with other provinces, shows the lowest number of patients per dispensary. The reasons for this have been fully explained in previous Resolutions. The Lieutenant-Governor hopes that, with the increase of charitable dispensaries in the mufassal, and as a consequence of the closer supervision now exercised and the greater attention paid to the comfort of patients, Bengal will gradually overtake those provinces in which the standard of medical charity is higher. The provision of separate wards for pauper and moribund patients, orders regarding which have recently been issued by this Government, is also likely to result in an increase in the number of patients.

5. *Medical Officers in charge of Dispensaries.*—Of the 477 dispensaries open at the close of the year, 234 were in charge of Medical officers of the Government establishment and 243 in charge of local native doctors, against 235 and 220 respectively in the previous year. Of the 234 officers of the Government establishment, 73 were Assistant Surgeons and 161 Civil Hospital Assistants.

6. *Inspections.*—The number of dispensaries inspected by Civil Surgeons rose from 374 to 382, and the number visited four times and over, as required by Rule 29 of the Dispensary Manual, from 153 to 161. The number of dispensaries visited less than four times remains the same as in the previous year, while the number not inspected at all rose from 17 to 27. The explanation offered by Civil Surgeons of their failure to pay the prescribed number of visits is not in all cases satisfactory. Thus, the dispensary at Giridih is said to be inaccessible during the rains, which is not correct. In Howrah, though there are only four dispensaries outside the head-quarters town, the Civil Surgeon visited

one of them only twice and another only three times. In the 24-Parganas the Civil Surgeon visited Kamarhati eight times, while the dispensary at Cossipore, which is large and important, and which lies on the direct road from the head-quarters to Kamarhati, was only visited twice. In this district, however, the number of dispensaries is unusually large, and the Civil Surgeon's duties are heavy.

The Inspector-General makes the following remarks on the subject of inspections:—"There seems to me to be no reason why Civil Surgeons should not do more inspection, which would be easy without detriment to their other duties if they arranged their tours in a more systematic manner than they seem to do at present. This will be insisted on in the amalgamation scheme of the Sanitary with the Medical Department which is about to take place." In these remarks, the Lieutenant-Governor fully concurs. Medical subordinates at outlying stations cannot be expected to do their work efficiently without proper supervision, any more than officers of the same standing in other departments: and it is just as necessary for a Civil Surgeon to inspect his dispensaries as for a District Officer to inspect his subdivisions, or a Superintendent of Police, his thanas. Nor is it sufficient merely to examine the dispensary registers, and the state of instruments and drugs. A Civil Surgeon, when visiting a dispensary, should always arrange to do so when patients are present, and he should require the officer in charge to examine them in his presence, and make sure that this essential duty is performed in an efficient and not in a perfunctory manner. In this way alone can he ascertain whether his subordinates are up to their work, and are not in the habit of scamping it. The Lieutenant-Governor is aware that this most important subject is receiving Dr. Hendley's earnest attention, and desires to assure him of the full support of Government in his efforts to effect a much-needed reform.

7. The following table shows the number of in-door and out-door patients treated during the last three years, and the ratio per cent. of this number to the population of the area concerned:—

Year.	Patients.			Population, excluding Calcutta.	Ratio per cent. of total treated to population.
	In-door.	Out-door.	Total treated.		
1	2	3	4	5	6
1895 ...	45,243	2,434,536	2,479,779	70,665,427	3·51
1896 ...	47,109	2,637,501	2,684,610		3·79
1897 ...	55,644	2,778,468	2,834,112		4·01

The total number of patients treated during the year shows an increase of 149,502 over the previous year. The figures show that the annual increase in attendance at hospitals still lags far behind the normal increase of population, which in Bengal is not less than ·7 per cent. per annum. In seven dispensaries the increase in the number of patients was over 3,000, the most marked improvement being in the Bhanga dispensary in Faridpur (6,494) and the Kalimpong Mission Hospital in Darjeeling (5,640). On the other hand, there was a decrease of 2,000 and upwards in the case of 16 dispensaries, the largest being in Laheria Sarai in the district of Darbhanga, where the number fell off by 9,427. Increases are attributed either to the growing popularity of the dispensary or to the greater appreciation by the people of medical charity, while decreases are ascribed to the healthiness of the year, and to the panic caused in Bihar by the publication of the plague regulations towards the end of the year. Nine out of the 16 dispensaries which show a large decrease were situated in districts affected by famine, and it is probable that a certain number of persons who would have attended them received medical relief in poor-houses.

In-door patients.—In-door patients were received in 201 dispensaries as compared with 192 in the previous year, and the number thus treated rose from 47,109 to 55,644, being an increase of 8,535 or more than one-sixth. The number of beds available increased from 3,057 to 3,247, and the daily average

attendance from 1,898 to 2,226. The increase in the daily attendance is satisfactory, but it is still far below the number of beds provided. This, the Lieutenant-Governor is afraid, will continue to be the case until suitable accommodation for relatives of patients is provided near each dispensary. The attention of Dispensary authorities has more than once been drawn to the matter, but their funds do not permit of very rapid progress being made. The Lieutenant-Governor will be glad if the Inspector General will state in the next triennial report what improvement has been effected in this respect. The number of deaths among in-door patients rose from 5,487 to 8,172 and the death-rate from 11·64 to 14·68. In the year under review, a large number of patients was no doubt admitted in an emaciated and anæmic condition. The pilgrim centres of Gaya and Deoghur record a higher death-rate than in the previous year. At Gaya it was almost double, viz., 16·6 against 8·25 in the previous year. The Puri dispensary shows a death-rate of 28·38 against 32 17 in 1896.

9. *Out-door patients.*—The number of out-door patients rose from 2,637,501 to 2,778,468, or 140,967 more than in 1896. The steady increase in the number of out-door patients is so far satisfactory, but the number still falls short of the number treated in 1896 in the North-Western Provinces (3,892,918) and the Punjab (3,070,117), where the population is far less than in Bengal. The daily average attendance was 19,494 as compared with 18,377, the increase being on a far smaller scale than that of in-patients. Twenty-one dispensaries had an average daily attendance of 100 and upwards in 1896, as well as in 1897, as against 26 in the year 1895. The largest daily attendance (223·43) was at the Durraon dispensary.

10. *Diseases treated.*—The number of cases of malarial fever treated rose from 506,757 to 536,428. There was an increase under this head in all the Divisions except the Presidency, where the number of cases fell from 103,559 to 96,891. The increase was largest in the district of Mymensingh. When recently reviewing the Sanitary Commissioner's report for 1897, the Lieutenant-Governor noticed that the mortality from fever was highest in Pabna; but from the present report it appears that the number of patients treated in hospital for this disease in that district rose only from 7,305 to 7,763. In Hazaribagh, where the same disease was very prevalent, the number treated rose from 3,648 to 5,103. In Rangpur and Dinajpur, which also had a high mortality from this cause, there was a large diminution in the number treated, of which no explanation is given. The number of cholera cases treated rose from 14,388 to 16,845. The district which suffered most from this cause was Chittagong, where there were two epidemics of the disease during 1897: one in the hot weather and one after the cyclone. The increase in cholera in the Chota Nagpur Division is ascribed to famine. Bowel complaints (dysentery and diarrhœa) account for 166,516 admissions as against 137,568 in 1896. The number of cases of small-pox treated rose from 185 to 208. Although the number of cases treated under the various heads shows an increase, this must be ascribed more to the fact that the prevailing scarcity made the people readier to accept charity than to the unhealthiness of the year. The death-rate among the general population was only 32·94 per mille against 34·17 in 1896.

11. Before next year's report is submitted, it is probable that the amalgamation of the Sanitary Commissioner's Department with the Medical Department will have been carried out. In that case, the Lieutenant-Governor would be glad if the Inspector-General of Civil Hospitals in submitting the triennial report for the three years 1896, 1897, and 1898, will arrange to collate for each district or division the figures of the chief diseases prevalent among the general population with those of patients treated for the same diseases at the public hospitals within the same area. It is probable that useful deductions may be drawn from such a comparison both as to the defects of existing institutions and as to the directions in which public requirements are efficiently provided for.

12. *Surgical operations.*—The total number of surgical operations performed rose from 124,067 to 135,505. Of these, 13,115 were principal, and 2,390 secondary, operations against 122,187 principal, and 1,880 secondary, operations in 1896. Of the patients operated on, 125,454 were cured, 6,542 relieved, 1,080 otherwise discharged, and 216 died. The more important operations numbered 3,596, of which no less than 2,718 were extraction of lens. The number of

operations for lithotomy shows an increase of three cases, and for litholopaxy a decrease of seven cases. The largest increase was under the head of "Amputations," viz., 53. The following officers performed more than 100 operations for cataract:—

Surgeon-Lieutenant-Colonel A. Tomes (Gaya)	...	...	246
Surgeon-Major T. R. Macdonald (Chapra)	...	...	145
Surgeon-Lieutenant-Colonel R. Macrae (Dacca)	...	...	137
Surgeon-Major F. S. Peck (Muzaffarpur)	...	...	121
Assistant Surgeon Chunder Kumar Gupta (Burdwan)		...	114
Ditto Nrita Gopal Mittra (Arrah)	...	...	113
Ditto Bipin Vihari Gupta (Dumraon)	...	...	110
Ditto Chuni Lal Das (Gaya)	...	...	103

The number of cases of ovariotomy was the same as in 1896, viz., 15. The result of operations was not, however, so satisfactory—one-third of the cases having ended fatally.

13. *Sex of patients.*—The number of males treated increased from 1,603,533 to 1,711,742 and the number of females from 423,238 to 458,670. The number of children admitted also increased from 657,839 to 663,700. The average daily attendance of in-door patients of the female sex rose from 372 to 448, but was still very small in relation to the accommodation available. The Lieutenant-Governor, however, hopes that the new plan of Cottage Hospital, which has been circulated for adoption in the construction of new buildings and which provides for the separate treatment of female patients, both in the in-door and out-door departments, will have the effect of increasing their number.

14. *Income and Expenditure.*—The following table compares the income and expenditure of dispensaries during the last two years:—

Income.	1896. Rs.	A.	P.	1897. Rs.	A.	P.
Cash balance on 1st January ...	25,497	3	10	27,048	13	5

Total Expenditure ...	8,29,372 11 2	8,90,202 7 0
Cash balance on 31st December ...	25,947 5 0	40,376 3 5

15. The total income of the dispensaries during the year 1897, inclusive of the opening balance of Rs. 27,048, was Rs. 9,30,578 against Rs. 8,55,320 of the previous year. The net increase, excluding opening balance, was Rs. 73,707. The Government contribution rose from Rs. 70,904 to Rs. 83,786. The chief item of increase, (Rs. 2,347) was under the head of salaries of medical officers, and is due to the order issued in Government Resolution No. 2977Medl., dated the 18th July 1896, requiring local bodies to contribute the average salaries of medical officers employed by them, Government undertaking to meet their grade pay. Receipts from municipal and other local funds amounted to Rs. 4,82,969, or 51·89 per cent. of the total income, as against Rs. 4,28,735 or 50·12 per cent. the previous year. The amount derived from municipalities shows an increase of Rs. 19,160. Subscriptions from Europeans and natives combined constituted 27 per cent. of the total income or 2·49 per cent. less than in 1896. The amount subscribed by Europeans shows an increase of Rs. 5,106, and that by natives a decrease of Rs. 6,057. The decrease in subscriptions from the latter is ascribed to the general financial pressure consequent on the scarcity which prevailed during the year. Receipts from paying patients also show a decline, the figures being Rs. 1,713 as against Rs. 1,930 in 1896.

16. The total expenditure rose from Rs. 8,29,372 to Rs. 8,90,202, owing in the main to increases in the number of dispensaries and of patients treated. The chief item of increase was salaries, but charges on account of diet also rose from Rs. 78,222 to Rs. 1,06,680, and the cost of European medicines from Rs. 1,15,446 to Rs. 1,20,398. The increase of Rs. 28,458 under the head Diet is partly due to the dearness of food-grains and partly to a more liberal scale of diet having been granted to patients who were admitted in a weak or emaciated condition owing to the scarcity of food-grains. The cost of buildings and repairs shows an increase of Rs. 9,808, and is attributed to the damage done by the earthquake. The year closed with a cash balance of Rs. 40,376.

By order of the Lieutenant-Governor of Bengal,

E. N. BAKER,

Offg. Secretary to the Govt. of Bengal.

RESOLUTION ON THE STATISTICAL RETURNS OF VACCINATION IN BENGAL FOR THE YEAR 1897-98.

MUNICIPAL DEPARTMENT.—SANITATION.

Darjeeling, the 8th October 1898.

RESOLUTION—No. 689 T.—M.

READ—

The Statistical Returns of Vaccination in Bengal for the year 1897-98, with brief notes by the Sanitary Commissioner.

Read again—

The Returns for 1896-97 with the Government Resolution reviewing them.

The returns are six weeks late, but there is excuse. The work of the department was greatly interfered with during the year owing to the fact that the military operations on the frontier rendered it necessary to recall the Deputy Sanitary Commissioners and Superintendents of Vaccination to military duty at the beginning of August. During the greater part of the year the Sanitary Commissioner, in addition to his own duties, held charge of two out of the three circles into which the province is divided for the purposes of vaccination, while Assistant Surgeon Gopal Chandra Mukherji took charge of the third.

2. *Strength of Inspecting and Working Staff.*—The following table compares the strength of the supervising and working staff during the last two years:—

	Year.	Inspecting staff.						Operators.					Remarks.
		Number of Superintendents.	Number of Deputy Superintendents.	Number of Inspectors.	Number of Sub-Inspectors.	Number of head vaccinators.	Total number of inspecting staff.	Vaccinators.		Apprentices.		Total number of operators.

One Inspectorship in Calcutta and another in the Bhagalpur Municipality were abolished, while one appointment was made in the new municipality at Garden Reach. The appointment of one more head vaccinator in the Tributary States accounts for the rise in the inspecting staff, and the entertainment of a number of paid vaccinators in the famine-stricken areas and of licensed vaccinators in some of the other districts, accounts for the increase in the number of operators. The number of vaccinators working in mufassal municipalities and dispensaries fell off by eight. Inspection work was seriously affected by the employment on plague duty of the Covenanted Deputy Sanitary Commissioners during the working season.

3. *Number of Operations and Average per Operator.*—The total number of vaccinations performed rose from 2,293,655 to 2,319,536 and the average per operator from 615 to 639. The increase is shared by 27 districts, and was highest in the following:—

	Increase.
Muzaffarpur	20,600
Darbhanga	17,069
Khulna	16,067
Faridpur	15,267
Nadia	13,750
Bhagalpur	13,675
Cuttack	11,943
Jessore	10,619

These results do credit to the officers concerned, especially as the prolonged scarcity and dearness of food must have made the realisation of fees a matter of considerable difficulty. Twenty-four districts show a decrease, the most marked decreases being in the following districts:—

	Decrease.
Chittagong	26,237
Shahabad	21,579
Noakhali	17,721
Dacca	12,898
Bankura	11,511
Mymensingh	10,516
Dinajpur	8,857
Political States	7,661

The decrease in Chittagong is attributed to the cyclone and the storm-wave that passed over the district in October 1897. In Shahabad it is ascribed to the large number of vaccinations performed during the previous year and also to the outbreak of small-pox during the year under report. The Lieutenant-Governor agrees with the Sanitary Commissioner in refusing to accept this explanation, since the prevalence of small-pox ought to act and ought to be made to act as an additional stimulus to work. The decline in the other districts is explained in some by the fact that vaccination work had been pushed on during the previous year owing to outbreaks of small-pox; in others by the inability of the people in their straitened circumstances to meet the cost of vaccination, or by a combination of both causes. A severe outbreak of small-pox in some of the States and the supply of reliable figures in the returns of others account for the diminution in the Political States of Chota Nagpur. A Sub-Inspector who used to run up totals by giving false figures has been dismissed.

4. *Protection afforded to Infants.*—In the statement showing the population among which vaccination was performed, the figures differ from those of last year in 8 districts, and in those of mufassal municipalities. The variations are considerable in Rajshahi and Dinajpur, and in the Tributary States of Orissa the population is shown as having diminished by over 200,000. No

explanation of this great difference has been given, nor is there any suggestion that the field of vaccine operations was restricted during the year. The Sanitary Commissioner will be requested to supply this omission.

Taking the total population at 73,595,096, and calculating the birth-rate for the Province, as in previous years, at 40 per mille, and deducting 500,707 as the mortality among infants under one year of age, the total number of infants under one year available for vaccination is estimated at 2,443,996 against 2,460,228 in the preceding year; and of these 508,615, or 208·18 per thousand, were vaccinated, as compared with 498,979, or 202·81 per thousand in 1896-97. As in the previous year, Malda, Darjeeling, and Lohardaga show the best results. Patna is at the bottom of the list, and Puri, Shahabad, Gaya and the Tributary States of Orissa also have very low percentages. The changes are small, and the differences remain enormous. The range in the proportion of the vaccination of infants born during the year is from 983 per mile in Malda to 54 in Patna, and these prodigious differences are constant. Why has vaccination become and continued so popular in Malda? What can be done to establish it in Patna? Why should Puri average about 75, while its neighbour of Balasore exceeds 200? These are obvious questions to which the Lieutenant-Governor can find no answer in the Sanitary Commissioner's memorandum, and he trusts that very special attention will be given to these backward districts to ascertain the causes of their hostility to vaccination and to settle the best methods of surmounting that hostility. All the three southern districts of the Patna Division require the Sanitary Commissioner's special regard and the serious co-operation of the Collectors.

5. *Primary Operations.*—The proportion of successful primary operations for the whole Province is returned at 97·87 against 98·50. The slight decrease is reported to be due to the inclusion for the first time of unknown cases in calculating the ratio of successful operations. In previous years unknown cases had been excluded. It is reported that orders are under issue for introducing during the ensuing vaccination season the system (referred to in previous resolutions) in force in the Punjab of making three punctures in each arm. The draft of the instructions which it is proposed to issue on the subject has lately been approved by Government.

6. *Secondary Operations.*—The number of secondary operations increased from 70,527 to 76,443. There was an increase of 20,250 cases in rural areas, while Calcutta and the mufassal municipalities and dispensaries show a decrease of 7,852 and 6,482 cases, respectively. The percentage of successful cases was 64·36 against 60·23, excluding "unknown cases," and 52·59, including them in 1896-87, and the increase is attributed to a larger number of re-vaccinations among adults.

7. *Recess Work.*—The number of operations performed during the recess in connection with small-pox epidemics and the up-keep of lymph for emergencies rose from 115,833 to 122,612, or by 6,779. The increase is attributed partly to the greater prevalence of small-pox in some of the districts, and partly to the relaxation of the rule prohibiting the grant of deputation allowance to licensed vaccinators when employed within their own jurisdictions in stamping out outbreaks of small-pox.

8. *Vaccination at the expense of District Boards.*—The number of vaccinators employed by the District Boards and paid from district funds was reduced from 60 to 58, and the number of persons vaccinated by them fell from 58,722 to 55,937. The contributions made by District Boards for the purpose of giving free vaccination in rural areas rose from Rs. 3,368 to Rs. 3,602. The largest contribution of Rs. 1,322 was again made by the District Board of Puri. A comparison of the work done by the Licensed, Government, District Board, and Municipal agencies shows that there was an increase in the number of operations performed by the Licensed and Government agencies, and a decrease in the number performed by the other agencies.

9. *Cost of Vaccination.*—The total cost of vaccination declined from Rs. 2,06,204 to Rs. 1,81,480, and the average cost of each reported successful

vaccination from one anna and five pies to one anna and three pies. The large decrease in the total cost is attributed to the abolition of the paid vaccination system in Angul and also to the absence during the greater part of the year of the Deputy Sanitary Commissioners, which effected a considerable saving in their pay and travelling allowance. These two items alone represent a saving of Rs. 23,000.

10. *Death-rate from small-pox.*—The diagram given in the report illustrates the death-rate from small-pox in each district as compared with the proportion of population protected by vaccination during the last seven years. It is interesting, but inconclusive. The death-rate from small-pox during the last seven years has been identical in the districts of Darjeeling, Rangpur, and Bogra, but in Darjeeling 6,000 of the 10,000 of the population are protected; in the other two districts the proportion is under 2,000. In Backergunge the percentage of protection is the same as in Rangpur and Bogra, but the proportion of small-pox mortality is 0·2 per mille against 2·0. Small-pox in Darjeeling may be abnormally fatal: in Backergunge abnormally mild; and the Lieutenant Governor would like to see such comparison as the trustworthiness of the older returns may permit between the mortality prior to the spread of vaccination in any district with that which prevailed before. In a district, for instance, like Malda, where nearly the whole of the infant population is habitually vaccinated, there ought to be evidence, which he who runs may read, of the value of the process in saving life. There is some evidence already. In Malda last year only one person died of small-pox. Let the enquiry and the comparison be carried further. It is by tangible evidence such as this that the suspicious mothers in the Patna Division will be won over.

11. *Method of vaccination.*—Compared with the figures of the preceding year, the number of operations performed direct from the calf shows an increase of 25,000 in the case of primary vaccinations and of over 5,000 in that of re-vaccination. This increase is noticeable in the districts of Rajshahi, Dinajpur, Dacca, Mymensingh, and Backergunge, where the bulk of the inhabitants are Muhammadan, and also in the backward districts of Lohardaga and Palamau. The proposal to introduce the system of vaccination direct from the calf into the mufassal was under consideration during the year, and reports were obtained from all Civil Surgeons, through Magistrates and Commissioners. From twenty districts it is reported that there is no objection to the extension of the system; but in other districts where it is less acceptable to the people, the Sanitary Commissioner rightly considers that, having regard to the present state of public feeling in respect of plague measures, it is inexpedient to press it.

12. *Supply of lanoline lymph to Nepal.*—Five hundred and sixty-four grains of lanoline vaccine paste were supplied to the Nepal Durbar from the Animal Vaccination Depôt at Darjeeling. Only one return showing the result of operations performed with the lymph was received, and it was found that all the 25 cases reported therein proved successful.

13. *Inspections.*—The Deputy Sanitary Commissioners could not do any inspection work during the year, because, as stated above, they were employed throughout the working season on plague duty. Assistant Surgeon Gopal Chunder Mukherji, who was in charge of the Western Bengal Circle from the 4th August 1897 to 31st March 1898, visited only 111 villages and inspected 4,227 operations. On the other hand, Civil Surgeons are stated to have shown greater activity in this branch of their duties. The statement showing the number of villages visited by Civil Surgeons, and the number of vaccinations inspected by them, appears, however, to require further explanation. The Civil Surgeons of the Sonthal Parganas, Muzaffarpur, and Palamau are shown as having each visited more than 500 villages, and five others as having visited more than 300 villages. The Lieutenant-Governor is unable to understand how an officer who has heavy work at head-quarters can have paid really effective visits to so large a number of villages; or have adequately inspected

so many as 15,000 vaccinations within the year. In two districts the number of villages visited was less than 10, and in 20 it was under 100. There seems reason to think that the returns have not always been compiled on a uniform basis; and the Lieutenant-Governor would be glad if the Sanitary Commissioner would give this matter his attention before next year's report is submitted.

By order of the Lieutenant-Governor of Bengal,

E. N. BAKER,

Offg. Secy. to the Govt. of Bengal.

THE PRELIMINARY FORECAST OF THE INDIGO CROPS OF BENGAL FOR THE YEAR 1898.

THE following is published for general information.

REVENUE DEPT., *The 11th October 1898.*

M. FINUCANE, *Secy. to the Govt. of Bengal.*

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL.

First note on the indigo crops of the Lower Provinces of Bengal for the year 1898.

Explanatory.—The present return includes all the districts shown in the first note on the indigo crops of the Lower Provinces of Bengal for the year 1897. Indigo is grown extensively in the five districts of "North Bihar" (Saran, Champaran, Muzaffarpur, Darbhanga, and North Monghyr), and in Purnea, but the areas in Murshidabad and Nadia are probably over-estimated, and the outturn of indigo in Eastern Bengal is very small.

As with other forecasts issued in the current year, the percentage system of notation has been adopted in the place of the anna system under the orders of Government. In this percentage system, 100 represents the normal outturn per acre, which used to be represented by 16 annas in the anna system.

Character of the season.—The weather has been favourable for indigo throughout North Bihar generally, but the recent heavy floods are reported to have done some damage to the second cuttings. In Bengal Proper, some districts report favourable and some unfavourable weather, and the rainfall appears to have been very unequally distributed.

Area under cultivation.—In the first note on the indigo crops for the year 1897, the total approximate normal area under indigo in these Provinces was given as 609,300 acres. The revised figures for the current year show it to be 582,400 acres.

The decrease is chiefly due to a revision of the figures for Midnapore, and a further decrease will probably be shown when the figures for area shown by the other districts of Bengal Proper have been revised.

The area sown this year is given as 527,500 acres as against 538,400 acres in 1897. The causes which have brought about this decrease are given in the notes appended to the returns.

Outturn.—A considerable improvement on last year's butturn is shown by the chief indigo districts, and had it not been for the recent floods, all the five districts of North Bihar would have had a crop something over the normal. In the Bhagalpur Division the crop may be termed a normal one, out in Eastern Bengal it appears to have varied between 63 and 88 per cent. of a normal crop. The exact effect of the floods has not yet been ascertained, but it may be roughly estimated that the outturn for the Province will not fall below the normal.

Messrs. Baines & Co. estimate an outturn of 74,000 maunds for "Bihar" and 21,000 maunds for Lower Bengal. According to the statistics below, the outturn for Bengal should be larger; but the figures of area are incorrect, and I have little doubt that Messrs. Baines & Co.'s figures should be accepted. On the other hand, the estimate for Bihar is much in excess of the average outturn for the past 15 years, which amounts to about 63,000 maunds. It seems possible that the recent damage to the crop by floods may have been under-estimated and that the outturn will not be quite so high; but Messrs. Baines & Co.'s sources of information are of the best, and it is probable that the prospects of the crop may have been under-valued by us. Perhaps an outturn of 70,000 maunds for Bihar may be safely estimated.

D. L. Roy,

Asst. Director of the Dept. of Land Records and Agriculture, Bengal.

Countersigned.

P. C. LYON,

Director of the Dept. of Land Records and Agriculture, Bengal.

CALCUTTA;

The 8th October 1898.

First forecast of the Indigo Crop of Bengal, 1898.

1	2	3	4	5	6	7	8	9
Division.	District.	Approximate normal area under indigo.	Approximate area sown last year (1897).	Estimated area sown this year (1898).	Taking 100 to represent the normal outturn per acre, how much represented outturn last year (1897)?	Taking 100 to represent the normal outturn per acre, how much will represent this year's outturn (1898)?	Remarks by District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
		Acres.	Acres.	Acres.				
Burdwan	Burdwan	6,100	5,700	5,300	100	66	The decrease is due to insufficient rainfall at the time of sowing and heavy showers afterwards.	
	Bankura	2,300	2,200	2,300	75	60	The weather has not been favourable for the cultivation of this crop during the year, and consequently a slight decrease in the outturn is expected.	
	Midnapore ...	16,500	17,700	16,600	80	70	Owing to seasonable rainfall at the sowing and other times, a larger area than the normal was brought under cultivation, and the outturn is likely to be better this year. The figures of normal area and of areas sown this year and last have been revised this year.	
Presidency ...	Nadia	51,300	47,900	54,600	75	74	The increase in the area sown this year is due to the timely rainfall at the sowing season. The decrease in the estimated outturn is too small to call for any explanation.	The Collector will be asked to revise his figures of area as soon as he can conveniently do so. They appear to be too high.

1	2	3	4	5	6	7	8	9
Division.	District.	Approximate normal area under indigo.	Approximate area sown last year (1897).	Estimated area sown this year (1898).	Taking 100 to represent the normal outturn per acre, how much represented outturn last year (1897)?	Taking 100 to represent the normal outturn per acre, how much will represent this year's outturn (1898).	Remarks by District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
		Acres.	Acres.	Acres.				
Presidency—*concluded.*	Murshidabad ...	54,500	51,400	46,100	58	57	The decrease in area shown this year is due to the cultivation of *bhadoi* and other crops on indigo lands.	The Collector will be asked to revise his figures of area as soon as he can conveniently do so. They are apparently too high.
	Jessore ...	16,900	13,700	13,200	69	46	The decrease in this year's area is due to the abolition of an indigo factory in the Magura subdivision. The low outturn is due to untimely rainfall.	
Rajshahi ...	Rajshahi ...	8,100	6,600	7,100	50	80	The improvement in outturn is due to favourable weather.	
	Dinajpur ...	100	100	.....	75	.....	No cultivation this year, owing to the one factory having been damaged by the recent earthquake.	
	Rangpur	6,600	5,500	5,000	56	50	The cultivation of indigo is gradually dying out here; hence the decrease in area. I am inclined to think that the area is much overestimated. Unfavourable rainfall has proved injurious to the crop, so a smaller outturn is expected.	The Collector will be asked to make enquiries and revise his estimate of area.
Dacca ...	Faridpur ...	600	500	600	98	50	The decrease in the approximate normal area is due to the adoption of revised figures furnished by the local police. The expected decrease in the outturn is due to untimely and excessive rainfall.	

Patna ...	Gaya	100	100	100	100	Owing to the favourable rainfall this year, the whole area has been cultivated, and the outturn is expected to be average.	
	Shahabad ...	7,700	7,700	63	75	Want of rain in the beginning of the season affected the outturn.	
	Saran	33,500	33,500	44	104	The indigo season has not been uniform throughout the district: some factories did very well with their first cuttings, other not so well. Second cuttings have been spoiled in many factories by excessive rain.	Floods have injured the second cuttings.
	Champaran ...	34,000	34,000	66	97	A fair outturn is expected owing to the seasonable rainfall.	The crop in Champaran being an early one, it has not been much affected by the recent floods.
	Muzaffarpur ...	35,000	35,000	44	94	The weather this year was more favourable, and hence the increased estimated outturn.	Much damage has been done to second cuttings by the recent floods.
	Darbhanga ...	30,400	30,800	65	99	.....	Damage has been done to second cuttings by recent floods.
Bhagalpur ...	Monghyr ...	12,900	11,900	81	100	.....	Some damage has been done by the recent floods.
	Bhagalpur ...	13,000	15,000	100	100	The season has been favourable for indigo.	
	Purnea	46,100	34,300	63	97	The marked decrease in area sown is mainly due to the late scarcity in some cases, and to the insufficient deposit of silt in some diara lands.	
	Malda	31,000	18,800	75	75	The figures represent the actual area cultivated as reported by the managers of different factories in the district.	
	Sonthal Parganas	4,700	4,700	85	85	The distribution of rainfall was, on the whole, favourable, and hence the better estimated outturn.

WEATHER AND CROP REPORT.

For the week ending the 10th October 1898.

Burdwan.—Rainfall at Sadar, Kalna, and Raniganj nil, and at Katwa ·03. Weather hot. Harvesting of *aus* almost over. Rain wanted for *aman*. Common rice selling as follows:—

	Srs.	
Sadar	12 to 16	per rupee.
Kalna	14	
Katwa	13 to 13½	
Raniganj	14	

Birbhum.—No rain. Weather hot. Rain wanted. Prospects favourable. Price of common rice at Sadar and Rampur Hât 15 seers per rupee. Fodder sufficient.

Bankura.—Rainfall at Bankura ·11, Vishnupur nil. Weather hot. Mornings cool. Rain wanted in places. Prospects of *aman* paddy and sugarcane favourable. Harvesting of *aus* continues. Fodder and water sufficient. Common rice selling at 16½ seers per rupee at Bankura and 15 seers at Vishnupur.

Midnapore.—Rainfall only at Contai ·63. Prospects of crops favourable. Damage by grass-hoppers reported from Nayagram and Kessiari outposts. Rain was wanted, which has come in time: it is raining now. Prices of common rice:—

	Srs.	
Sadar	12½	per rupee.
Contai	14 to 18	
Tamluk	12¾	
Ghatal	13 to 15	

Hooghly.—No rain. Prospects of paddy favourable. More rain wanted shortly. Common rice sells from 10 to 12 seers per rupee.

Howrah.—Rainfall at Sadar 1·89, Ulubaria ·02. Weather hot. Condition of *aman* good. Harvesting of *aus* still going on. Fodder and water sufficient. Common rice sells at 11 to 14 seers per rupee.

24-Parganas.—Rainfall only at Basirhat ·35. Weather hot. Prospects of crops good. Harvesting of *aus* and cutting and steeping of jute going on. Cattle-disease reported from Chaital outpost in Basirhat subdivision. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	11 to 12	per rupee.
Barasat	15½	
Basirhat	14⅞	
Diamond Harbour	12⅝	

Nadia.—Rainfall at Sadar 1·09, Kushtia ·95, Meherpur ·33, Chuadanga 5·89. Prospects of *aman* generally good. Sowing of *rabi* has commenced. Common rice selling at 11 to 14 seers per rupee. Fodder and water sufficient. No cattle-disease reported.

Murshidabad.—No rain. Weather seasonable. Harvesting of *bhadoi* finished. Cutting of jute and sowing of *kalai* going on. *Aman*, sugarcane, and mulberry doing well. Cultivation of lands for *rabi* crops commenced. Fodder insufficient in places. Common rice sells as follows:—

	Srs.	
Sadar	15	per rupee.
Jangipur	15	
Kandi	16½	

Jessore.—Rainfall at Sadar nil, Jhenida 2·16, Magura ·86, Narail nil, Bangaon ·48. Weather fair; days hot, mornings and evenings cool. Prospects of *aman* good. Sowing of winter crops commenced in places. Harvesting of *aus* completed, and that of jute going on. In the Bangaon subdivision the floods are subsiding. The standing crops which escaped destruction by floods are improving. *Aman*, *arhar*, *til*, and *kalai*, which continued submerged for days, are destroyed. No cattle-disease reported. Fodder-supply insufficient. Cattle from villages in flooded tracts removed to higher lands for grazing Water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	16 to 18	per rupee.
Jhenida	17 to 18	
Magura	18 to 20	
Narail	17-12½ chs.	
Bangaon	13	

Khulna.—Rainfall nil. Weather hot and clear. Transplantation of *aman* and harvesting of *aus* over. Prospects good. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	14 to 18	per rupee.
Bagerhat	16	
Satkhira	15	
	21 (new *aus*)	

Rajshahi.—No rain. Prospects of crops good. No cattle-disease. Fodder and water plentiful. Rice sells from 12 to 22 seers per rupee.

Jalpaiguri.—Rainfall at Sadar ·47, Alipur Duars nil. Weather seasonable. Steeping of jute going on. Prospects of standing crops favourable. Lands are being prepared for *rabi* crops. Fodder and water sufficient. Common rice sells from 8 to 15 seers per rupee.

Darjeeling.—Rainfall at Darjeeling ·23, Kurseong 1·75, Siliguri 1·50. Weather seasonable. *Hills*—Pulses and phaphur being sown; *haimanti* paddy and *bara marua* progressing and premise well. *Terai*—Transplanting of *haimanti* paddy and harvesting of *bhadoi* finished; jute being reaped; sugarcane doing well; prospects good. Coarse rice sells as follows:—

	Srs.	
Hills	8 to 11	per rupee.
Terai	12 to 14	

Bhutta sells from 19 to 40 seers per rupee.

Rangpur.—No rain. Cutting, steeping and washing of jute going on. Lands are being prepared for tobacco and potatoes. Prospects fair. Common rice selling at 11 to 14 seers per rupee. Fodder and water sufficient.

Bogra.—Rainfall at Sadar ·08, elsewhere nil. Transplantation of *aman* finished except in parts of Dhunat and Shariakandi. Lands are being prepared for *rabi* crops. Prospects good. Common rice sells from 12 to 15¼ seers per rupee. Supply of fodder and water sufficient.

Pabna.—Rainfall at Sadar ·04, Sirajganj ·49. Weather seasonable. Crop prospects very good. Price of rice 13 to 14 seers per rupee.

Dacca.—Rainfall at Sadar nil, Manikganj ·02, Munshiganj ·95, Narainganj ·71. Weather seasonable. Harvesting of jute and rice continues. Prospects of standing crops good. Water subsiding rapidly. Fodder available. No cattle-disease. Common rice 12 to 13 seers per rupee.

Mymensingh.—Rainfall at Sadar nil, Kishorganj ·95, Jamalpur ·20, Tangail ·28. Weather unseasonably warm. Crops all doing well. Cattle healthy. Fodder and water ample. Rice selling at 12 seers per rupee.

Faridpur.—Rainfall at Sadar ·54, Goalundo ·14. Weather seasonable. Prospects of crops good. Rice 14 seers per rupee.

Backergunge.—Rainfall at Sadar nil. Weather fine. Prospects of crops good. Common rice sells from 11½ to 17 seers (*aman*) and from 18 to 22 seers (*aus*) per rupee.

Tippera.—Rainfall at Comilla ·66, Brahmanbaria ·03, Chandpur ·16. Weather seasonable. Harvesting of jute still continues. Prospects of *aman* fair. Fodder sufficient. Price of common rice 12 to 20 seers per rupee.

Noakhali.—Rainfall at Sadar 1·20, Feni ·03. Weather hot. Prospects of crops good. No cattle-disease. Fodder not good. Price of rice—*Aman* 10 to 14 seers and *aus* 15 to 20 seers per rupee.

Chittagong.—Rainfall 3·02. Weather seasonable. Transplantation of *aman* progressing. Prospects favourable. Prices steady. Water and fodder sufficient.

Patna.—Rainfall nil. Fields being actively prepared for *rabi* crops. Rain wanted in Bihar for paddy on high lands. Prices almost stationary. In Patna common rice sells at 16 seers a rupee. Fodder and water for cattle sufficient.

Gaya.—Rainfall nil. Prospects of paddy good. *Rabi* lands being prepared. Common rice selling at 14 seers per rupee.

Shahabad.—No rain. Days hot, nights cool. Rain wanted. Paddy on high lands suffering. Fields being ploughed for *rabi* sowings. Rice sells at Arrah 14 seers per rupee.

Saran.—*Hatiya* ended without rain. Flood-water nearly gone. Much paddy lost on low lands, but high lands will give good yield and largely compensate. Ploughing for *rabi* continues. Pulses are being sown. Average prices are—Common rice 13 seers 9 chitaks, and *makai* 23 seers 11 chitaks per rupee.

Champaran.—Rainfall only at Bettiah ·63. Weather hot, but cool at night. *Bhadoi* harvesting still continues. Winter rice prospects favourable. *Rabi* preparation begun in places. Fodder and water sufficient. Price of common rice 14½ seers and of maize 22 seers per rupee.

Muzaffarpur.—Rainfall nil. Floods much subsided. Prospects of standing crops good. Lands being prepared for *rabi* sowings in places. No cattle-disease. Prices are—Common rice 11 to 14 seers, wheat 15 to 18 seers, barley 20 seers, maize 20 to 35 seers, gram 17 to 18 seers, *rahar* 20 to 21 seers, and *marua* 25 seers per rupee.

Darbhanga.—No rain. Threshing of *bhadoi* finished. Paddy doing well. Actual damage done by the floods is being ascertained. Prospects of crops in Madhubani good. Parts of the Warisnagar and Dalsingh Sarai thanas are still under water, and some difficulty in procuring fodder for cattle is experienced. Ploughing for *rabi* beginning. Prices unaltered.

Monghyr.—No rain. Weather hot and dry. Prospects of standing crops good. Rain wanted for winter rice at Jamui. No cattle-disease. Common rice sells as follows:—

Monghyr	...	...	...	13	seers per rupee.
Begusarai	...	...	...	12 to 13½	„ „
Jamui	...	...	...	14½	„ „

Bhagalpur.—No rain. Mornings and nights cool; days hot. Harvesting of *bhadoi* crops over in Supaul. *Bhadoi* and winter paddy crops have suffered from the recent floods in the Madhipura subdivision; otherwise prospects of standing crops continue favourable, but more rain is needed in parts. Fodder and water sufficient. No cattle-disease reported except in parts of Supaul. Prices steady.

Purnea.—Rainfall at Sadar nil, Kishanganj ·05, Araria ·15. Weather seasonable. Harvesting of jute nearly finished. *Aghani* rice good. Ploughing for *rabi* crops commenced. Cattle-disease still continues in Araria. Fodder and water sufficient. Common rice (*bhadoi*) sells as follows:—

Sadar	...	...	...	17	seers per rupee.
Kishanganj	...	...	...	18	„
Araria	...	...	...	21	„

Malda.—No rain. Weather fair and hot. Winter rice thriving well. Sowing of *kalai* pulse progressing. Coarse rice selling at 20 seers per rupee at Tulsihatta and 14 seers at English Bazar. Fodder ample.

Sonthal Parganas.—No rain, but cloudy. Prospects of crops good, but rain wanted for winter rice and for sowing of mustard. Price of rice 14½ to 16 seers, and of maize 39 to 60 seers per rupee. Some cattle-disease in Pakour.

Cuttack.—Rainfall nil. Weather very hot, and want of rain much felt. Harvesting *beali* nearly over. *Laghu sarad* in ear. *Guru sarad*, sugarcane, and *arhar* growing. Jute being cut. Condition of cattle generally good, but disease prevails in places. Fodder and water sufficient. Common rice sells as follows:—

				S.	ch.	
Cuttack	...	...	...	17	1	per rupee.
Jajpur	...	...	...	15	12	
Kendrapara	...	...	...	19	11	
Banki	...	...	...	18	6	

Balasore.—Rainfall at Sadar ·06. *Sarad* being weeded. Harvesting of jute and *aus* continues. Insect-pest damaging *sarad*. Sugarcane thriving well. More rain wanted. Rice sells from 14 to 24 seers per rupee in the interior, and at 16 to 17 seers at Balasore and Bhadrak respectively. Cattle-disease reported from some villages. Fodder sufficient.

Angul.—Rainfall at Angul ·13 and at Bissipara ·83. Prospects of crops good. Rice selling at 20 seers per rupee at Angul and 13½ seers at Bissipara.

Puri.—Rainfall at Sadar nil, Khurda ·15. *Sarad* being re-weeded. *Laghu* ripening and being cut in places. Prospects of sugarcane, *arhar*, and other miscellaneous crops good. Fodder and water sufficient. Cattle-disease reported from different parts of the district. Common rice sells as follows:—

	Srs.	ch.	
Puri	15	12	per rupee.
Khurda	14	7	
Interior of district	14 to 18	2 to 6	

Hazaribagh.—Rainfall nil. Weather clear. Another shower wanted, and will do good to the standing crops. Rice selling at 11 to 14 seers per rupee.

Lohardaga.—Harvesting of *gora dhan* continues. State of standing crops good. Rice sells at Ranchi 16 seers per rupee, and in the interior from 16 to 20 seers. Cattle-disease continues in the interior. Fodder and water sufficient. Grain in stock sufficient.

Palamau.—Rainfall nil. Weather hot. Rain urgently wanted for upland paddy and *rabi* sowings. Rice selling from 12 to 17 seers per rupee.

Manbhum.—Rainfall nil. Weather seasonable. Prospects of crops excellent. Cattle-disease reported from thana Purulia. Fodder and water sufficient. Average price of common rice at Sadar 14½ seers and at Gobindpur 13 seers per rupee. Supply sufficient.

Singhbhum.—Rainfall nil. Prospects of all standing crops excellent. Rice sells at 14 to 16 seers per rupee.

General Summary.—There were some scattered showers of rain, but the weather generally was clear and hot throughout the week. The general prospects of the crops are favourable except in the flooded tracts, where both the *bhadoi* and winter rice have suffered considerably. Want of rain for the rice crop on high lands is beginning to be felt in some parts. In parts of Midnapore and Balasore the rice crop has been damaged by insects. The cultivation of lands for the *rabi* crops is proceeding, and the sowing of pulses has begun. The harvesting of the *bhadoi* crops and jute is almost over. There has been little change of importance in the price of common rice since the last report. Some difficulty in procuring fodder is still experienced in some of the flooded tracts; elsewhere the cattle are in good condition.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT,
The 11th October 1898.

M. FINUCANE,
Secretary to the Govt. of Bengal.

STOCKS OF RICE IN AND AROUND CALCUTTA.

***No. 751 Statis.*—The following is published for general information.**

M. FINUCANE,
Secy. to the Govt. of Bengal.

STATISTICAL DEPARTMENT,
The 11th October 1898.

M. FINUCANE,
Secretary to the Government of Bengal.

Abstract of the Results of Meteorological Observations taken at the Alipore Observatory in the month of September 1898.

	Inches.	Date.	Hour.
The mean pressure of the month	29·702		
The average pressure of September from 24 years' registers ...	29·682		
The highest pressure in the month	29·915	28th	10
The lowest pressure in the month	29·472	13th	16
The range of pressure	0·443		
	Hours.		
The total number of hours of bright sunshine during the month	156·4		
The maximum possible number of hours of sunshine ...	367·0		
	⊖		
The mean temperature of the month	82·5		
The average temperature of September from 24 years' registers	83·3		
The highest temperature in the month	90·9	30th	
The lowest temperature in the month	75·5	20th	
The range of temperature during the month	15·4		
The mean daily range of temperature	9·5		
The greatest range of temperature in one day	12·4	23rd	
	Per cent.		
The mean humidity of the month	88		
The average humidity of September from 24 years' registers ...	85		
	Inches.		
The mean vapour tension of the month	0·972		
The average vapour tension of September from 9 years' registers	0·987		
The mean cloud proportion of the month	7·09		
The average cloud proportion of September from 21 years' registers	6·96		
	Ins.		
The total rainfall of the month	8·00		
The total rainfall indicated by a Beckley's self-registering rain-gauge (mouth of the gauge about 52 feet above the ground)	7·50		
The average fall of September from 48 years' registers ...	10·18		
The greatest fall in 24 hours	1·94	14th	
	Days.		
The number of rainy days in the month	20		
The average number of rainy days in September from 24 years' registers	21		
The mean maximum equilibrium temperature of solar radiation during the month	⊖ 148·2		
The mean difference of sun and air temperatures	60·9		
The greatest sun temperature	155·5	10th	
The greatest excess of sun over air temperature	69·2	20th	
The mean temperature of the nocturnal radiation thermometer on woollen cloth	75·4		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground	2·4		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature	4·4	27th	
	Miles.		
The mean movement of the wind per day	94·2		
The greatest movement of the wind in one day	278·0	14th	
The greatest movement of the wind in one hour	18·0	13th, 11 to midnight.	

The number of hours with winds from each of the 8 points—
N. 10, N.E. 10, E. 88, S.E. 95, S. 188, S.W. 160, W. 32, N.W. 22, Calm 115.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore ·003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently equal; and, finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0·6 higher than the Kew Standard thermometer, which is the standard of reference at the present Observatory.

G. W. KUCHLER,

The average fall of the corresponding period for 24 years, Surveyor-General's Office	60·75

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h., and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

RESOLUTION ON THE REPORT ON EXCISE ADMINISTRATION IN THE LOWER PROVINCES FOR 1897-98.

FINANCIAL DEPARTMENT—SEPARATE REVENUE.

Darjeeling, the 11th October 1898.

RESOLUTION—No. 398T.—F.

READ—

The report of the Commissioner of Excise for the year 1897-98, with the observations of the Board of Revenue.

The dominant feature in the excise history of the year 1897-98 was the large fall of revenue, exceeding 6½ lakhs. Allowing for changes of system, the normal annual increase for several years has been about 4 lakhs per annum. In 1896-97 seven-eighths of this were extinguished by the famine then impending, but there remained a small increase of under half a lakh. In 1897-98 the effects of the famine made themselves fully felt, and for the first time since 1891-92 the revenue from excise sank heavily. Five lakhs of the decrease occurred under the head of country spirits, and the bulk of the remainder under ganja and pachwai. Even yet the full effects of the calamity which befel the province last year have not exhausted themselves; for the settlements of the year now current have so far shown a still further decline of more than 1½ lakhs.

Mr. K. G. Gupta, C.S., held the office of Excise Commissioner throughout the year. He had the direct assistance of three Deputy Collectors, one of whom was his Personal Assistant, and two were travelling Inspectors of Excise. In 19 districts, 14 of which have central distilleries, special Deputy Collectors were employed exclusively on excise and income-tax work, one officer doing the work for Hooghly and Howrah, while in 26 districts Deputy Collectors of the ordinary staff were in charge of excise in addition to their regular duties. Eight Sub-Deputy Collectors were in charge of the more important distilleries and 27 kanungoes were employed as Superintendents and Deputy Superintendents of the other distilleries and depôts open during the year. There were also three Railway Sub-Inspectors whose services were utilized in the suppression of excise offences in districts where they had been most prevalent, while a special Sub-Inspector was as usual employed for checking the smuggling of contraband opium and liquor to and from Chandernagore. In the executive branch of the Subordinate Establishment and among the clerks in the office branch the numbers remained the same as in the two previous years, viz., 201 and 141 respectively, while two of the old excise darogas were replaced by men of a superior class.

2. *Inspections.*—The Excise Commissioner, who spent 106 days on tour as against 139 days in the previous year, explains that he was unable to give more time to excise inspection owing to pressure of work in connection with the reorganization of the Salt Department, which has been placed under his charge. The two Inspectors of Excise were out on tour for 198 and 250 days respectively. Every district and sadar distillery in the Province was visited either by the Excise Commissioner himself or by one of the Inspectors; but in future, as the Board suggest, the Inspectors should, if possible, inspect every subdivisional office in their respective circles, and the distilleries, spirit depôts, and ganja and siddhi warehouses at subdivisions. With regard to inspections by Collectors, it is reported that the sadar excise office in the district of Balasore and the distillery at Dumka were not inspected at all, and that the depôt at Mymensingh was inspected only three times during the year, whereas the rules require that the sadar excise office should be inspected every half-year and the distillery or depôt at head-quarters once every month. The explanations furnished by the Collectors of the defaulting districts are insufficient. It is satisfactory to observe that in all the districts in which special Deputy Collectors were employed the minimum number of days prescribed for inspections in the interior (150) was attained or exceeded. For Deputy Collectors of the ordinary staff who supervise excise, the minimum period of touring is fixed at 90 days. In 16 out of the 26 districts in which there is no special Deputy Collector, the full amount of touring prescribed was done; in six districts the deficiency varied from 3 to 17 days; and is generally attributed to the inability of Collectors to spare their officers from head-quarters owing to the press of criminal and other work. In Jalpaiguri only 23 days' touring was done, and the deficiency is said to be due to the heavy criminal work and also to the fact that the Excise Deputy Collector, who was also the Senior Deputy Collector, had to remain in charge of the office during the Deputy Commissioner's tour. In Singhbhum only one day's touring was done. In answer to an enquiry made by the Board, it came to light that the Deputy Commissioner had only two first class Magistrates and a junior officer, to whom the Excise Commissioner was unwilling to entrust excise work. As the two former could not be spared for touring, the result has been an absence of all outdoor supervision over excise work. The deficient inspection in the Sonthal Parganas during 1896-97 was unfavourably commented on last year; but no improvement has taken place during the year under review. The state of affairs in these three districts is most unsatisfactory, and the Lieutenant-Governor is certainly desirous that the Board should, as suggested, at once call on the Deputy Commissioners concerned either to re-distribute the work so as to allow of the prescribed amount of touring being done, or to submit for the information of Government a full explanation why this is impossible, so as to admit of proper action being taken in the matter.

In Darjeeling the Excise Deputy Collector is only required to be on tour as often as he can be spared.

3. *Revenue and charges.*—The excise revenue was, as in previous years, realised from fees on licenses for the wholesale and retail sale of distilled and fermented liquors and drugs, distillery fees, and duty on the actual quantity of country rum, country spirit prepared in central distilleries, opium, and hemp drugs that passed into consumption. Duty on imported liquors is an item of the Imperial Customs revenue. The following statement shows the gross excise revenue, the charges, net revenue, and percentage of charges on gross revenue for the last five years:—

Period.	Revenue.	Charges.	Net revenue.	Percentage of charges.
1	2	3	4	5
	Rs.	Rs.	Rs.	
1893-94	1,21,37,096	6,47,740	1,14,89,356	5·3
1894-95	1,25,67,855	6,37,858	1,19,29,997	5·07
1895-96	1,33,77,705	6,74,582	1,27,03,123	5·04
1896-97	1,34,10,577*	6,83,351*	1,27,27,226	5·09
1897-98	1,27,48,012	6,77 393	1,20,70,619	5·3
Difference of the past two years	—6,62,565	—5,958	—6,56,607	+·21

* Revised figures.

In order, however, to obtain the true figures for the net revenue derived from excise, there should be added to the charges here given Rs. 12,998 on account of refunds and Rs. 11,095 for the excess of rewards distributed over fines realized. This raises the expenditure to Rs. 7,01,486 and reduces the net revenue to Rs. 1,20,46,526 against Rs. 1,26,94,005 in 1896-97. For the check to the growth of the revenue, the famine of 1896-97 is responsible. Mr. Gupta estimates, by a comparison of the actual figures of revenue for the past seven years, that the real loss of excise revenue due to the famine during 1896-97 and 1897-98, amounted to 3½ lakhs and 14 lakhs respectively; and he considers that, as bids at annual sales are regulated not so much by the prospects of the ensuing year as by the results of the year that is about to close, the future loss to revenue from this cause may not be inconsiderable. It is, however, hardly probable that the effects of the famine of 1896-97, will be felt beyond the current financial year. Calculated on the population ascertained at the Census of 1891 (after allowing for natural increase at the rate of 7 per thousand per annum), the incidence of excise revenue per head of population during the year under review amounted to 2 annas and 8 pies, against 2 annas and 11 pies in 1896 97. The corresponding incidence, without allowing for increase of population, during 1896-97 in the Bombay Presidency, was 8 annas 8 pies, and in the Madras Presidency 6 annas 8 pies. The decrease of Rs. 5,958 in charges is nominal, being mainly due to the retransfer, with effect from the 1st April 1897, of excise buildings to the Public Works Department, the result being that all charges for their construction and repair were debited to that department instead of to Excise. On the other hand, there was a large increase under "Travelling Allowance" (Rs. 12,334), which is ascribed to the increased activity of the detective and inspecting establishment, and under "Salary of District Executive or Inspecting Establisment" (Rs. 8,804), mainly due to promotions, leave and acting allowances and to grain

compensation allowance to the menial establishment for dearness of food-grains.

4. *Revenue by Divisions.*—Distributed according to Divisions, the gross receipts for the last five years are shown thus:—

Divisions.	1893-94.	1894-95.	1895-96.	1896-97.	1897-98.	1897-98 compared with 1896-97.	
						Increase.	Decrease.
1	2	3	4	5	6	7	8
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Burdwan	11,72,100	12,32,386	13,30,348	13,30,767	13,32,065	.....	4,702
Presidency	34,40,854	36,15,302	38,42,186	38,78,369	37,76,707	...	1,01,662
Rajshahi	9,48,572	10,00,540	10,73,235	11,12,238*	10,44,479	. .	67,759
Dacca	8,09,567	8,21,166	8,67,351	9,05,270	9,03,785	... ..	1,485
Chittagong	2,67,548	2 88,837	3,41,931	2,74,724	2,73,190	. ..	1,235
Patna	26,33,381	26,36,784	27,38,209	26,34,836	24,30,675	.....	2,04,161
Bhagalpur	13,30,030	14,02,917	14,70,888	14,89,130	14,89,215	. ...	2,915
Orissa	6,12,853	5,88,204	6,27,629	6,83,071	6,96,146	13,075	... .
Chota Nagpur	9,08,401	9,80,620	10,55,618	11,06,151	7,84,150	.. ...	3,21,701
Total ...	1,21,37,093	1,25,67,855	1,33,77,705	1,34,10,577	1,27,44,012	43,075	7,05,640
					Decrease ...	6,62,565	

* Revised figures.

It will be seen that the decrease was shared by all the Divisions except Orissa, which shows an increase of Rs. 43,075 in receipts, mainly under "ganja" and "opium" which yield the bulk of the revenue in that Division. Nearly half of the total decrease occurred in Chota Nagpur alone; and the Board, in explaining the reasons for this, remark:—

"In this Division there had been a large increase of revenue under the head of country spirits in the preceding year, and as the licensees must have suffered heavy losses in that year on account of the scarcity and the high price of *mahua*, competition for the outstills in the next year necessarily fell off, and 60 of the sanctioned shops remained unsettled."

The largest receipts were obtained, as usual, in the Presidency Division, including Calcutta, and the smallest in the Chittagong Division. The Presidency and Patna Divisions, which between them contribute about half the excise revenue of the Province, showed a decrease of 1 lakh and 2 lakhs respectively in the gross revenue collected.

5. *Revenue and consumption.*—The relation of the growth of consumption to the growth of revenue is illustrated by the following statistics of the four chief articles of excise:—

	Revenue.		Percentage of difference.	Consumption.		Percentage of difference.
	1896-97.	1897-98.		1896-97.	1897-98.	
1	2	3	4	5	6	7
	Rs.	Rs.		L. P. gallons.	L. P. gallons.	
Country spirits ... { Distillery ...	28,47,924	27,30,064	—3·7	478,140	442,104	—7·5
Outstill ...	32,32,537	25,40,949	—12·1	... ...	.....	.....
Country rum	4,18,780	4,14,665	—·9	80,898 Mds.	77,879 Mds.	—3·6
Opium	23,25,603	23,18,598	—·3	2,110	2,086	—1·1
Ganja	27,31,522	26,57,152	—2·7	5,003	4,650	—7·1

The consumption of exciseable articles diminished in a larger proportion than the revenue derived therefrom—a fact which shows that the accepted principle of raising a maximum of revenue from a minimum of consumption was carefully kept in view in the administration of excise during the year.

6. *Sources of revenue.*—Classified according to articles, the gross excise revenue of the past five years was as follows:—

Articles of Excise.	Revenue.					1897-98 compared with 1896-97.	
	1893-94.	1894-95.	1895-96.	1896-97.	1897-98.	Increase.	Decrease.
1	2	3	4	5	6	7	8
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Country spirit	52,52,835	55,61,516	59,11,840	60,80,461	55,81,013	.....	4,99,448
Rum	4,35,308	4,32,227	4,66,206	4,18,780	4,14,665	.....	4,115

Charas	10,770	15,899	17,965	18,691	19,032	341	.....
Sidhi, sabzi or bhang	58,752	55,394	59,498	65,504	64,083	.....	1,421
Majum	2,069	2,110	1,710	1,495	1,482	.....	13
Madak	78,379	80,439	77,332	.....	.....	.....	.....
Chandu	24,476	27,624	30,360	.....	.....	.....	.....
Spirits used in arts	337	380	1,097	812	126	.....	686
Ganja	25,35,045	24,92 755	26,80,819	27,34,522	26,57,452	.....	74,070
Opium	21,54,267	22,13,721	23,03,123	23,25,605	23,18,598	.....	7,005
Miscellaneous	10,910	12,468	13,844	17,862	13,240	.....	4,622
Total ...	1,21,37,696	1,25,67,855	1,33,77,705	1,33,10,579	1,27,48,012	4,296	6,66,863
					Net decrease ...	6,62,567	

Out of a total demand of Rs. 1,28,22,218, Rs. 1,27,48,012, or 99·4 per cent. (the same percentage as in 1896-97), were realised. Rupees 21,905 only were remitted, of which over Rs. 20,000 were due on account of *tari* and country spirits alone. The remissions under country spirits have risen from Rs. 2,415 in 1896-97 to Rs. 7,889 in the year under review.

The revenue shows a falling off under all the heads except *tari*, beer and charas;—country spirit, pachwai and ganja contributing the bulk of the decrease. Country spirits continue to bring in the largest revenue (44·3 per cent.), followed by hemp drugs (22·2), opium (18·5), *tari* (7·8), rum (3·1), and pachwai (2·5). This order is the same as that of the preceding year, except that rum and pachwai have changed places. The fluctuations under each separate head are discussed in detail below.

7. *Current settlements.*—The settlements for the current year, as made up to the end of May last, show a net decrease of Rs. 1,61,591 as compared with the year under review, the most marked decrease (Rs. 2,14,395) again occurring in the Chota Nagpur Division. The causes of this decrease have been explained in paragraphs 3 and 4 above. It is, however, reported that some of the unsettled licenses have since been taken up, and the Excise Commissioner hopes that with the settlement of the remainder the loss will, to a great extent, be made up.

8. *Country spirit.*—No article of excise contributes so largely to the revenue as country spirit. In the past year the receipts from this source amounted to Rs. 55,81,013, or 44·3 per cent. of the total excise revenue. Country spirit is manufactured either at central distilleries which are maintained by Government and in which stills are worked by distillers, and the liquor is passed out, after the levy of the distillery fee and the duty, for sale at licensed shops; or at outstills which are licensed at monthly fees, no separate duty being charged. Of the total revenue from country spirit, Rs. 27,40,064 were contributed by the central distilleries and the shops dependent on them under the three heads of license fees (Rs. 10,13,325), still-head duty (Rs. 16,73,122), and distillery fees (Rs. 53,617), while Rs. 28,40,949 were derived from outstills. The income from distillery liquor decreased by Rs. 1,07,860 and that from outstills by Rs. 3,91,588. The number of outstills sanctioned fell from 2,101 in 1896-97 to 2,096 in the year under review, and the number settled from 2,097 to 2,018, while the number of shops sanctioned for the sale of distillery liquor rose from 1,197 to 1,199 and the number settled from 1,191 to 1,193. The Board draw attention to the fact that in spite of decreasing sales, the license fees of distillery shops have risen steadily during the past two years. In the Burdwan Division, throughout which, with the exception of certain wild tracts in Bankura and Midnapore, the central distillery system is

in force, there was an increase of Rs. 14,887 in revenue which was shared by all the districts except Howrah, where there was a small decline owing chiefly to the stoppage of certain railway works. The employment of a special detective force in Bankura and in the Jahanabad subdivision of Hooghly for preventing illicit distillation in those tracts has resulted in a satisfactory increase of consumption of duty-paid liquor. Two important cases of illicit distillation were detected in the Burdwan Division The Presidency Division, where the central distillery system also prevails, shows a decrease of Rs. 62,308 in revenue, of which nearly Rs. 52,000 were contributed by Calcutta alone, the cause assigned being the high price of food-grains. In a case of illicit distillation prosecuted in Calcutta, it was discovered that distillation had been systematically carried on in a jungle in the suburbs by means of two stills of the native pattern. An important case of illicit introduction of spirits from Chandernagore was also detected in Calcutta, but the prosecution of the principal offender ended in acquittal owing to some legal technicalities. The Excise Commissioner has taken steps to remedy the defects brought to light. In the Rajshahi Division, and in the districts of Purnea and Malda, belonging to the Bhagalpur Division, throughout which area the outstill system prevails, there was a small decrease of Rs. 16,803 in revenue which was shared by all districts except Bogra and Purnea. The central distillery system is in force throughout the Dacca Division. Though there was a rise of Rs. 3,145 in the revenue derived from the Dacca district, there was a net decrease of Rs. 419 throughout the Division, towards which all the remaining districts contributed. In the Chittagong Division, where the consumption of spirit is very limited, the revenue rose during the year by Rs. 851, owing chiefly to better settlements of licenses. The Patna Division, which for excise purposes is taken to include the districts of Monghyr, Bhagalpur, and Hazaribagh, and is under the dual system of central distilleries and outstills, yields the largest revenue from country spirits; the amount realised in the past year being Rs. 18,95,727 against Rs. 21,16,240 in 1896-97, a decrease of Rs. 2,20,513, which occurred in both the distillery and outstill areas. The lower classes in these districts are much addicted to drink, but the liquor consumed is ordinarily weak, and there is also a very large consumption of *tari*, which is still weaker. From the fact that within this division the decrease in revenue was heaviest in the Patna and Gaya districts, where there was no actual famine, while in the other districts where relief works were opened the decrease was comparatively very small, the Excise Commissioner presumes that a portion of the funds spent on famine relief found its way back as excise receipts. The Lieutenant-Governor agrees with the Board in thinking that this is not likely to have happened to any considerable extent. A decrease of Rs. 1,341 is returned from the Sonthal Parganas, in which the distillery system is in force. The central distillery system is also in force in the Orissa Division, with the exception of a portion of the hilly tracts of Cuttack, and the Angul and Khondmals districts, which are under the outstill system. This division shows an increase of Rs. 4,161, which was shared both by outstills and distilleries. With the exception of a small portion of Hazaribagh and Manbhum, the outstill system is in force throughout the Chota Nagpur Division, which, excluding Hazaribagh already dealt with, shows the largest decrease in revenue (Rs. 2,17,963) of all the divisions. The causes at work have already been explained. The Excise Commissioner suspects that in this division spirits are illicitly distilled from *pachwai*, which is largely manufactured at home by the aboriginal tribes under the concession granted to them, and the Lieutenant-Governor awaits the Board's report on this point.

As compared with 1896-97, the revenue from country spirit during the year under review fell very largely, but it is still in advance of that in 1887-88,* when the revenue was larger than that of any previous year, except 1883-84. In 1891-92 the revenue from country spirit commenced to rise, and after steady yearly progress attained the highest figure on record (Rs. 60,80,461) in 1896-97. The famine and the scarcity of *mahua* and its extensive use as food at the time that famine was most severe has thrown the revenue in 1897-98 back to a little above the figure obtained in 1894-95 (Rs. 55,61,516).

		Rs.
* 1887-88	...	52,05,042
1897-98	...	55,81,013

With their letter No. 1320Ex., dated 19th March 1898, the Government of India forwarded a memorandum containing a very interesting review of the

consumption of outstill and distillery liquor in different districts of the Province, and of the proportion of revenue brought in by vend license fees compared with duty. The comparison thus made led the Government of India to the conclusion that illicit distillation and sale must be widely prevalent in certain districts, and also the smuggling of outstill liquor into distillery tracts. The important questions raised in this memorandum have been referred to the Board of Revenue for a report, which has not yet been received. The Lieutenant-Governor notices, however, that no analysis of the relative consumption of liquor in the two areas seems ever to have been made in the annual reports of the Excise Commissioner, and he would be glad if the Board would consider whether some examination of the kind should not be included in future.

9. *Changes in the management of Central Distilleries and Outstills.*—An additional spirit depôt was open during the year at Chuadanga in the district of Nadia in consequence of the revival of that subdivision from 1st April 1897. The experiment tried in Gaya of fixing a maximum price for the retail sale of weak distillery liquor, to which reference was made in the two previous years' Resolutions, has been abandoned since 1st April 1898, the local authorities having reported in unfavourable terms on its working.

10. *Sites of shops.*—The rules regarding sites of shops, which require that no liquor shop should be opened in a bazar, on high roads, or close to places of public resort, seem to have been carefully attended to. The sites are selected in consultation with the magisterial and other local authorities, changes being made in deference to their views and the opinion of respectable residents. During the year one outstill in Jalpaiguri was not allowed to be re-opened, and another in Champaran was closed, at the instance of planters; one outstill in Singhbhum, some tari shops in Patna and Hooghly and a ganja shop in Nadia were removed in deference to public opinion; and in Gaya the site of a tari shop was changed because it was suspected to have been resorted to at night by people of bad character.

11. *Country rum.*—The rum produced in the Province was, till recently, charged with a duty of Rs. 5 per gallon L. P., but this rate has been increased to Rs. 6 per gallon with effect from the 10th January 1898. The Government of India have further directed that the same rate of duty shall also be charged by the Government of the North-Western Provinces and Oudh on all Shajahanpur rum cleared for consumption in Bengal, and that rum and other similar spirits manufactured in India after European methods shall in future be exported from the North-Western Provinces under bond alone, the duty thereon being payable on issue at the rate in force in the Province to which they are consigned. The total quantity of rum which passed into consumption from the distilleries in Sibpur and Sakri (in Darbhanga) and by importation from Shajahanpur in the North-Western Provinces, and Aska and Arkot in the Madras Presidency, was 77,979 gallons L. P. (57,028 gross gallons) against 80,898 gallons L. P. (60,814 gross gallons) in 1896-97, showing a net decrease of 2,919 gallons L. P., which was confined to Madras and Sibpur rum. It is remarked that the decrease would have been still greater but for the large clearances made in anticipation of the enhancement of duty above referred to. The bulk of the trade in rum is carried on through Calcutta, where the quantity imported during the year amounted to 54,992 gross gallons. Excluding 8,351 gross gallons exported to Assam and Port Blair, the actual consumption in Bengal itself was 46,641 gross gallons, out of which 34,237 gallons were consumed in Calcutta and 12,404 in the mufassal. Besides the imports from Calcutta the mufassal districts further received 2,033 gross gallons direct from Shajahanpur.

12. *Imported liquor.*—The excise revenue from imported liquor is made up entirely of fees for licenses for wholesale vend, and for licenses for retail sale in shops, at hotels, dâk bungalows and railway refreshment-rooms and on steamers. The first license for the sale of imported liquors in a railway dining car was granted during the year to Messrs. Kellner & Co. for the car running between Howrah and Burdwan. There was an increase in the number of licenses of all kinds except those for hotels and dâk bungalows. The total receipts amounted to Rs. 2,91,635 against Rs. 2,94,420 in 1896-97. About one half of the excise revenue from imported liquors is collected in

Calcutta, where the decrease amounted to Rs. 7,353. This decrease is, however, only nominal, being due to the fact that the previous year was the first year of a triennial settlement, and that two months' advance fees on account of the retail licenses had therefore been included in the receipts for that year. The Excise Commissioner notices with satisfaction the further decline in the importation of cheap German spirit, mostly distilled from potatoes, which, after being coloured and flavoured locally, is sold at absurdly low prices as brandy or whisky.

13. *Tari.*—The receipts from *tari*, the revenue from which is derived from license fees for the sale of both fermented and unfermented *tari* advanced from Rs. 10,10,481 in 1896-97 to Rs. 10,14,217 during the year under review; the increase being most marked in Gaya, followed by Monghyr, Cuttack, Purnea, Midnapore, Bhagalpur, Champaran, Saran, Howrah, Hooghly and Puri. More than half of the total revenue from *tari* is collected in the Patna Division, where the receipts fell from Rs. 5,62,690 in 1896-97 to Rs. 5,56,309. The decrease is, however, nominal, being due to the non-realisation of advance fees in March 1898. The number of licenses for the sale of *tari* in the Province shows a decrease of 486, which occurred almost wholly in licenses for unfermented *tari*.

14. *Pachwai.*—The number of licenses for the retail sale of *pachwai*, which includes both the rice beer that is consumed chiefly in the districts of Western Bengal and the millet (*marua*) beer drunk in the Darjeeling hills, declined from 1,663 to 1,592, and the revenue from Rs. 4,10,202 to Rs. 3,37,811—a heavy fall after the steady increase in receipts which had been maintained during the last eleven years. The district of Burdwan, which contributes about three-fourths of the entire pachwai revenue collected in the Province, alone showed a decrease of Rs. 32,294, which is attributed to the high price of rice. There were also heavy decreases in Birbhum (Rs. 15,566) and the Sonthal Parganas (Rs. 8,217), due more or less to the prevailing scarcity. The revenue derived from license fees for home-brewing yielded Rs. 33,032 against Rs. 33,279 in the previous year. In Singhbhum and Murshidabad there appears to be a considerable consumption of illicit pachwai; and the detective staff must be kept on the alert to reduce it to a minimum.

15. *Ganja.*—Ganja is grown under close supervision in a compact area in the district of Rajshahi. The revenue from ganja is derived from license fees and duty which varies according to quality. The following statement shows the main statistics relating to ganja revenue in the last three years:—

	Licenses sanctioned.	Licenses issued.	Quantity consumed.	Revenue.
	No.	No.	Mds.	Rs.
1895-96 ...	2,707	2,696	5,202	26,80,819
1896-97 ...	2,708	2,688	5,008	27,31,522
1897-98 ...	2,712	2,706	4,651	26,57,452

The area of land brought under ganja cultivation during the year decreased by 402 bighas. The demand for Rajshahi ganja is increasing for various reasons, chief among which may be mentioned the prohibition of cultivation of the plant in the Tributary States of Orissa. In view of this increasing demand the gradual diminution of the supply demands serious consideration, and the Lieutenant-Governor awaits the report which the Board have called for from the Excise Commissioner on the subject of extending the area under cultivation so as to ensure that the supply shall not fall short of the demand. The revenue from duty shows a decrease of Rs. 88,764 against an increase of Rs. 14,694 in license fees. The decrease in the total receipts is due almost wholly to the introduction of the system of exporting ganja under bond to the North-Western Provinces and Oudh without prepayment of duty. The Board report that the introduction of the system of supplying Rajshahi ganja to the Tributary States, alluded to in last year's Resolution, has already been attended with much success. The Superintendent, however, deplores the half-hearted interest taken by the Chiefs in the suppression of the local cultivation of ganja. With regard to the two instances of reported cultivation of ganja in the residence and private garden of the Chiefs of Nayagarh and Boad States respectively, the Board should submit a separate report to Government. The building of the new public golas at Naugaon has been further delayed

owing to the difficulty of finding local contractors to undertake the brick-making, and the foundations of the buildings have not yet been laid. The Lieutenant-Governor desires that the work may be expedited. The following statement illustrates the production of ganja and its export from Rajshahi during the past year :—

	Mds.
Production—	
Balance of previous years	322
Crop of 1897, less amount exported in 1896-97	5,242
Crop of 1898	5,793
Total to be accounted for ...	11,357
Export—	
Of crop of 1897 and previous years	4,711
Ditto 1898	1,255
Quantity destroyed under sanction	17
Total ...	5,983
Balance in hand of cultivators—	
Crop of 1897 and earlier years	836
Crop of 1898	4,538
Total ...	5,374

The distribution of the drug after leaving Rajshahi is shown below :—

	Mds.
Balance in district golas on the 1st April 1897	1,354
Imported from Rajshahi	5,965
Total to be accounted for ...	7,320
Consumed in Bengal	4,265
Exported to North-Western Provinces	321
Ditto Nepal	218
Ditto London	65
Ditto Mauritius	68
Ditto Natal	7
Ditto Sikkim	1
Ditto Assam	678
Ditto Cooch Behar	70
Ditto Mourbhanj	17
Ditto Nilgiri	2
Ditto Other Garhjat States	44
Total ...	5,756
Quantity destroyed as refuse	447
Wastage	147
Total accounted for ...	6,350
Actual quantity in stock on 1st April, 1898	970

The Board consider that the decrease of 80 maunds in the exports to the North-Western Provinces is partly attributable to recent orders under which all traders from that province are required to obtain supplies from Rajshahi direct instead of from the Patna Division as heretofore; and it has been proposed to open a *gola* in Patna for the storage of ganja intended for export up-country. This matter is under the consideration of Government. The exports to Nepal, which of late years have been steadily increasing, show a decrease of 57 maunds, which is attributed to the high price demanded for Rajshahi ganja.

16. *Bhang, Majum and Charas.*—The number of licenses for the sale of *bhang*, which is also known under the name of *siddhi* and *sabzi*, rose from 322 to

330, but the revenue declined from Rs. 65,564 to Rs. 64,083 and the consumption from 1,005 maunds to 964 maunds. The revenue from *majum*, a sweet preparation of *bhang*, which, as reported last year, is gradually losing favour, decreased from Rs. 1,495 to Rs. 1,482. *Charas*, which is the essence of ganja in its greatest purity and strength, and which is imported into Bengal from the Panjab and the North-Western Provinces, shows an increase of Rs. 341 in the revenue yielded.

17. *Opium.*—The following statement illustrates the demand for excise opium during the year under review:—

	Licenses.	Consumption.	Revenue.
	No.	Mds.	Rs.
1895-96	3,127	2,159	23,65,129
1896-97	3,180	2,110	23,25,603
1897-98	2,990	2,086	23,18,598

The figures for licenses include permits to licensed druggists to sell opium and its preparations for medical purposes only, and licenses for the sale of poppy-heads. The number of licenses of the two latter classes decreased by 176, whereas the number of ordinary licenses decreased by 14. The decrease (24 maunds) in the consumption of opinion, which is proportionately much less than the decrease in the consumption of ganja, is generally ascribed to the impoverished condition of the people on account of the famine, the effects of the earthquake, and depression in the jute trade. Two reasons are assigned by the Board for the comparatively slight effect produced by these causes on the consumption of opium, (*a*) that the drug is more generally used by the well-to-do classes, and (*b*) that the opium habit when once acquired is not easily dropped. The question of the smuggling of opium to Burma has engaged the attention of the Board and the Excise Commissioner; and their report has been received by the Government of Bengal. In accordance with the wishes of His Excellency the Governor-General in Council, this report, together with His Honour's opinions thereon, will be shortly forwarded for the consideration of the Government of India. It is reported that there is little or no smuggling of duty-paid opium into Assam.

18. *Methylated spirit.*—Methylated spirits are either imported by sea or methylated locally. The quantity passed out fell from 66,611 gallons to 66,448 gallons, but there was a small increase in revenue from Rs. 4,495 to Rs. 4,612. To stop the consumption of methylated spirit for drinking, which is an abuse of the law, rules have been introduced for the use of caoutchoucine as the methylating ingredient, instead of wood naphtha, but these were not enforced till after the close of the year under review.

19. *Offences against the Opium and Excise Laws.*—While the number of licensees prosecuted for infringing the conditions of their licenses rose from 250 to 311, the number of other persons prosecuted fell from 3,898 to 3,323. The percentage of convictions declined from 88·1 to 87·7. The arrests made both by the police and the excise officers show a considerable decrease, and in the case of the latter it is reported to be due to their having had to take part in relief operations. The percentage of convictions in the cases instituted by excise officers was 88·4 against 86·7 in those instituted by the police. There has been a marked decrease in the number of arrests for illicit distillation: the decline being most noticeable in the Sonthal Parganas and Angul. In Calcutta there was a marked decrease in the number of arrests for smuggling opium, due, it is said, to the energetic preventive measures taken; but the total disappearance of such arrests in Champaran, and the sudden arrest of 54 persons in Gaya, where in the previous year not a single arrest for this offence had been made, seem to call for further investigation. As regards foreign excisable articles, the activity shown by the special excise force deputed to watch Chandernagore has considerably increased the number of arrests in Hooghly. The amount of fines imposed for breaches of the excise laws and rules was Rs. 66,528, of which Rs. 42,520, or 63·9 per cent., were realised. A sum of Rs. 53,615 was distributed in rewards to police and excise officers and informers, as against Rs. 65,237 in the previous year.

20. The thanks of Government are due to Mr. K. G. Gupta for his successful administration of the department and to the Board for their supervision during the year. The Excise Commissioner comments favourably on the work of the district officers generally, including the Hon'ble Rai Durgagati Banerjee, Bahadur, C.I.E., Superintendent of Excise Revenue, Calcutta, whose services are also acknowledged by the Board. The names of the officers specially mentioned by Mr. Gupta will be communicated to the Appointment Department.

By order of the Lieutenant-Governor of Bengal,

E. N. BAKER,

Offg. Secy. to the Govt. of Bengal.

RESOLUTION ON THE ANNUAL GENERAL ADMINISTRATION REPORT OF THE BURDWAN DIVISION FOR THE YEAR 1897-98.

GENERAL DEPARTMENT—(MISCELLANEOUS).

Darjeeling, the 16th October 1898.

RESOLUTION No. 3082.

READ—

The Annual General Administration Report of the Burdwan Division for the year 1897-98.

Mr. Stevenson was in charge of the Division throughout the year, except for a period of one month, during which Mr. Buckland officiated. The Report has been submitted by Mr. Kennedy. Some of the figures given are incomplete, and complaint is again made by the Commissioner, as last year, of inaccuracies and discrepancies in the district statements.

Although there were changes of District Officers in every district, with the exception of Howrah, practically all but Midnapore were in charge of one person for the greater part of the year. Of the eleven subdivisions, there were changes during the year in the officers in charge in all but four.

2. *Tours and Inspections.*—Mr. Stevenson was on tour for 89 days, and Mr. Buckland for 5. The three subdivisions of Midnapore and that of Jahanabad in Hooghly were not visited by the Commissioner.

The duration of tours of District Officers was approved by the Commissioner, and as no special mention is made to the contrary, it is understood that the tours actually made complied with the requirements. It is represented that the period of 60 days fixed under Government Order No. 92T.G., dated 14th June 1892, for the Magistrate of Howrah to remain in camp is unnecessarily long. The Lieutenant-Governor considers that the case of Howrah may be governed by the general orders contained in Government Resolution No. 749, dated 18th February 1896, that is to say, that the duration of the tour should be fixed annually by the Commissioner in consultation with the District Magistrate in consideration of the needs of the district and the previous knowledge of it already possessed by the officer in charge. In Bankura, Mr. Manisty spent the large number of 251 days in camp; in a district of that size, such a period might ordinarily be considered excessive, but the necessity for the personal supervision by the Collector of the famine relief operations was an exceptional circumstance. The tours of Subdivisional Officers are reported to have been sufficient.

The necessary inspections appear to have been made, but at Burdwan, Midnapore and Howrah the treasuries were only inspected once by the District Officers.

3. *Weather and Crops: Prices and material condition of the people: Public Health.*—The rainfall in all districts was in excess of that of the previous year, with the exception of Midnapore and Howrah, where, however, it was in no way deficient. The fall was also well distributed, differing in this respect from that of the previous year, with the result that the crops in the Division as a whole were excellent. Some damage was done in the districts of Bankura and Howrah by the floods of the Damudar river.

Prices, which had risen abnormally in 1896-97, fell considerably with the harvesting of the winter rice, although not to the level of previous years. Common rice, which stood at 10½ seers to the rupee on 31st March 1897, was selling at 13½ seers on the corresponding date of the current year. Various reasons are assigned by the Commissioner for the failure of prices to return to the normal level—the exhaustion of stocks by the heavy exportations of the previous year, increased population, improved communications which encourage export, and the depreciation of the rupee are all suggested. Wages at the same time have not risen in a corresponding proportion, and the year was a hard one, especially during the first half of it, for the lower middle classes, artizans and day-labourers. Consequent, too, on the short crops of the two preceding years 1895-96 and 1896-97, the material condition of the community as a whole was seriously affected in the early part of the year, though it improved towards its close. The distribution of charitable relief was organised in Burdwan and to a small extent in Birbhum and Midnapore. The only district in which famine was declared

was Bankura in which relief operations were started in April and continued till October: 855,204 persons in terms of one day received gratuitous relief, and 318,608, similarly calculated, were relieved by other methods, the total cost amounting to Rs. 1,21,552. A sum of Rs. 30,861 was also distributed in charitable relief. The results of the operations have been separately reviewed at length. In Hooghly and Howrah the employment offered by the mills and the assistance of private charity were found sufficient.

The year was, on the whole, a healthy one, and the death-rate per mille decreased from 31·7 in 1895 and 32·8 in 1896 to 29·1 in the year under report. Fever and cholera were less prevalent than in the preceding year. The statement that there were no deaths from bowel-complaints in Bankura appears to be incorrect, and is probably due to some error in classification which should be rectified. There was an increase of small-pox in Burdwan, where difficulty is said to be experienced in inducing the local Muhammadan population to accept vaccination. A similar complaint is made as regards the Muhammadan mill hands in Howrah, and vaccination operations in the Division as a whole were less extensive than in the preceding year, although there was a considerable increase in Midnapore, and to a less extent in Hooghly. There was an outbreak of the disease at Howrah. Severe epidemics of cholera prevailed in parts of Birbhum, Bankura and Midnapore, and fever of a severe type affected the town of Howrah and the right bank of the Hooghly between Bally and Ulubaria, though fortunately not extending to the interior.

Information as to the improvements in sanitation effected by local bodies is not very complete. Statistics regarding the available sources of water-supply and their condition are said to have been collected, but have not been summarised. A drainage scheme for the Howrah Municipality is under consideration, and an extension of the water-works was effected, while a partial scheme for the improvement of the drainage is contemplated in the Bally Municipality.

4. *Emigration.*—In the Resolution of last year the steady decline in emigration under the provisions of Act I of 1882 was noticed, the figures having fallen from 4,510 in 1895-96 to 922 in 1896-97. This year there has been a still further fall to 517. This gradual dwindling of registered emigration is especially noticeable in Burdwan, where the corresponding figures of the three years were 2,947, 91, and 8 respectively. At the same time, free emigration increased during the year under report; a fact which is attributed to the prevailing high prices and scarcity, and a growing preference of employers for free labour. The various depôts and rest-houses were regularly inspected, and their condition is generally satisfactory.

5. *Manufactures and Mines: Trade and Commerce.*—Complete figures not being available, the progress of the large industries, such as the jute and cotton mills and rope factories of Hooghly and Howrah, and the different iron-works and papers mills in the Division, is not susceptible of accurate appraisement, but the general results point to an increase of prosperity. The out-turn from the pottery-works at Raniganj also increased. Favourable prices stimulated the trade in shellac, but the manufacture of indigo in this Division appears steadily declining. The weaving of silk and *tussar* continues, but the struggle with the competition of cheaper fabrics is a hard one, and the cotton-weavers of the Bankura district felt the stress of the prevalent scarcity severely. The collieries of Burdwan and Bankura are steadily gaining in importance. The output during 1897 is reported to show an increase of 13 per cent. over that of the previous year, while the annual output has doubled during the last seven years. There were three serious accidents during the year, one in which the pit caught fire, and two cases of subsidence, in one of which two lives were lost.

The total import traffic in the principal staples carried by rail, river and canal amounted to 77,59,243 maunds in comparison with 76,28,788 maunds in the previous year, and the export traffic to 6,20,35,440 maunds, against 4,91,77,238 maunds during 1896-97. As a result of the cessation of the famine, there was a decrease in the net export of food grains from the Division from 72,75,386 maunds during the preceding year to 64,36,272 maunds, but the total is still enormous. The export of rice fell similarly from 53,89,969 maunds to 47,77,076 maunds, and of paddy from 28,99,718 maunds to 26,64,984 maunds.

6. *Civil Justice.*—Complete information as to the number of civil cases instituted has not been furnished, but there was an increase in the number of cases disposed of in all districts except Burdwan, the total amounting

to 102,228 in comparison with 95,348 in the previous year. The number of witnesses examined by the superior Courts increased from 13,783 during 1896 to 13,806, but the percentage of those detained over two days fell from 9·3 to 8·1. In the Courts of Munsifs 98,180 witnesses were examined in comparison with 97,157 in the previous year, the number of those kept in attendance over two days (16·9 per cent.) remaining practically stationary.

7. *Crime: Police: Criminal Justice.*—The total number of cognisable cases reported during the year and investigated by the police rose from 21,800 to 23,618, or, excluding breaches of sanitary regulations, from 13,448 to 19,123. The fact, however, that the figures for the year under report include cases subsequently declared non-cognisable or false, affects the comparison. The high price of food-grains is advanced as a cause of the increase, but this factor was operative to a still greater extent in the preceding year. Other causes assigned for the increase are better reporting and the occurrence of numerous thefts in Birbhum of paddy while the crops were still standing and an influx of strangers seeking employment on the new railway line in Midnapore. The number of non-cognisable cases was practically stationary, amounting to 20,979. Of cases reported at the thana and sent up for trial by the police after enquiry, 59·2 per cent. ended in conviction; in the case of those taken up direct by Magistrates or referred to the police by them, the corresponding percentage was 17·5 only, a fact which appears to call for explanation. Prosecutions under section 211, Indian Penal Code, were instituted in 11·2 per cent. of the cases declared maliciously false, and a larger proportion of convictions was obtained than in the previous year. The Commissioner remarks that the provisions for the award of compensation to the accused in cases found to be false were but seldom used. Eighteen thousand two hundred and four cases were disposed of by Stipendiary Magistrates, and 11,017 by Honorary Magistrates, the corresponding figures during 1896 being 17,071 and 9,985 respectively. Notwithstanding an increase in the total number of witnesses examined, the proportion of witnesses detained over two days showed a satisfactory improvement in both classes of Courts, the figures being 4·7 and 8·4 per cent. respectively. The numbers unduly detained in the Burdwan Sadar Courts both by Stipendiary and Honorary Magistrates were large, the hearing of a number of important and lengthy cases being alleged in explanation. The results were also poor at Jahanabad. The rate of disposal of police cases by Honorary Magistrates showed a decided falling off, 7·04 per cent. being adjourned six times and over, as against 4·02 per cent. in 1896. The attendance of Honorary Magistrates improved, and is, on the whole, fair, though it was not good at Howrah and Burdwan. It is observed by the Magistrate of Midnapore that Honorary Magistrates sitting singly dispose of the cases with fair promptitude; it is where Benches are concerned that delays arise.

Rupees 1,43,319 were imposed as fines during the year, which opened with an outstanding balance of Rs. 25,967. The sum of Rs. 1,28,781 was collected, Rs. 11,846 were remitted and Rs. 28,659 remain unrealised. The outstanding balances at the Sadar stations of Burdwan and Howrah were very heavy.

Thirteen thousand one hundred and twenty-seven out of 13,927 gun licenses applied for, were granted or renewed in comparison with 11,966 in the previous year. This increase is ascribed to a panic caused by an outbreak of dacoity and the apprehension of lawlessness as the result of the scarcity. The proportion of licenses refused or cancelled was 5 per cent. only

The conduct of the police during the year is, on the whole, reported to be satisfactory. The Commissioner remarks:—"Their moral character cannot be expected to be much in advance of the public opinion of the population. I think myself it is in advance of that public opinion, and though bad bargains appear from time to time in the force just as they do in other bodies of men, the police force undoubtedly does very hard and thankless work on the whole successfully." The special police staff stationed at Raniganj for the detection of dacoity, succeeded in securing the conviction of one gang with excellent results, but the Lieutenant-Governor regrets to observe that two of the new class of passed Sub Inspectors turned out unsatisfactorily at Howrah. The introduction of Part II of the Village Chaukidari Act was in progress throughout the Division. Excluding the district of Howrah, 24,768 bighas of chakran lands were transferred during the year, although 197,105 bighas still remain to be dealt with in the other districts of the Division, which, at the close of the year, con-

tained 20,233 regulation chaukidars and 11,290 under Act VI of 1870. In Howrah, although the work in the Sadar subdivision is almost complete, the progress made at Ulubaria was not satisfactory. Much remains to be done everywhere in this respect, the only district where the introduction of the Act is practically complete, being Bankura. Mr. Duke is of opinion that the lands in Howrah have been assessed at needlessly low rates, and attention should be paid to this point elsewhere.

8. *Registration.*—There was an increase of 30,806 in the number of deeds registered, which amounted to 231,432. The continued high prices are assigned as one of the causes, but the Commissioner is of opinion that the increase is also due to growing appreciation of the advantages of registration and expansion of business, and not to increased poverty. A case at Suri revealed great laxity in the system of taking thumb impressions, this important duty being left to an office daftari, who, to avoid leaving blanks in the register, filled it up with impressions taken from the first person available. In the Administration Report of the Dacca Division a case was instanced where these impressions had been allowed to be tampered with, and the special attention of the Inspector-General of Registration will be drawn to this point; it is obvious that, unless the circumstances under which the impressions are taken can be accepted by Courts of law as above suspicion, their whole value as evidence vanishes. The conduct of the Sub-Registrars concerned in both cases is deserving of severe censure.

9. *Land Revenue.*—In permanently-settled estates the standard percentage of 99 per cent. of current collections on current demand was reached in all districts, with the exception of Midnapore (93·58) and Hooghly with Howrah (98·12). In both cases large sums received by remittance transfer receipt were credited after the close of the year, thus affecting the percentages. The proportion of collections to the current demand in estates of other classes in comparison with the prescribed standards, is exhibited below :—

District.	Temporarily-settled estates.	Estates held direct by Government.
Standard	95·	90·
Burdwan	37·99	83·16
Birbhum	100·	91·65
Bankura	57·42	87·87
Midnapore	75·28	88·65
Hooghly with Howrah ...	70 24	87·97

In Birbhum and Bankura the demand on account of these classes of estates is small. The collections in Government estates were, on the whole, good, but the bad results in temporarily settled estates in Burdwan, Bankura and Hooghly, to which attention was drawn last year, show little sign of improvement. There is a marked falling off in Midnapore also, which in the previous year achieved a percentage of collections of 92·4 in this class of estates. The special attention of the Commissioner is again drawn to this matter.

There was an increase of Rs. 67,680 in the demand on account of road and public works cesses, chiefly due to the fact that effect was given to the revaluation proceedings in the district of Midnapore with effect from 1st April 1897. The collections of cesses were fair, but the results of the current collections of road cess in Midnapore (75·39 per cent.) and Hooghly with Howrah (73·82 per cent.), together with those of realisations of the current demand of embankment cess in Midnapore (59 41 per cent.) were poor.

The Pataspur settlement in the Midnapore district was completed during the year, resulting in an increase of Rs. 8,147 in the Government demand. It is anticipated that the settlement of ghatwali lands in Bankura will be completed by the close of the current year. The numbers of certificates pending at the close of the year, on account of the realisation of cesses in the districts of Burdwan, Bankura and Hooghly (with Howrah), were large, but the disposals of these cases in Midnapore was very creditable, in view of the numerous certificates filed. On account of the acquisition of land for different tramway and railway projects and the water-works reservoir at Howrah, the work in this branch was heavy, and six Special Deputy Collectors were employed.

10. *Wards' Estates.*—There were only four estates in the Division under the management of the Court of Wards, of which the most important was the Burdwan Raj. The Lieutenant-Governor regrets to observe that the clear orders given last year for a thorough examination of the outstanding balances in the khas mahals held by the Raj, with a view of writing off demands that are irrecoverable or unjustifiable, appear to have had no appreciable result, and the outstanding balances on account of rent and cesses amounted to no less than 14·5 per cent. of the current demand. Further information on this point will be asked for from the Board. The management of the Nayagram Estate, in Midnapore, has resulted in the restoration of the estate to solvency, after the repayment of Rs. 8,02,725 in debts.

11. *Excise: Stamps: Income-tax.*—There was a decrease of Rs. 4,702 in the income derived from excise, but that from the sale of stamps again showed an increase of Rs. 1,02,508 under all heads except receipt stamps. The final demand on account of income-tax showed an increase of Rs. 23,481 and of 446 assessees. The collections continued good.

12. *Communications.*—The earthwork on the Calcutta-Cuttack section of the Bengal-Nagpur Railway was pushed on during the year, but the construction of the bridge over the Rupnarain river at Kola is the most important factor in the progress of the line. The Howrah-Amta and Howrah-Seakhalla Tramways were opened for traffic during the year, though the former has not quite been completed to its terminus. The increase in the number of railway accidents in the Burdwan district from 14 to 70 is noticeable.

13. *Education.*—The details of the educational statistics in the body of the Report are unfortunately in several instances incomplete. A decrease of 165 in the total number of schools was accompanied by an increase of 1,898 in the aggregate number of pupils attending them. The decrease was practically entirely among primary schools, which are the first to feel the effect of bad years. The total expenditure on education rose from Rs. 13,09,401 to Rs. 13,21,741 during the year under report, of which approximately 25 per cent. was borne by Provincial, District Board and Municipal Funds. The percentage of boys at school to boys of school going age varied from 62·6 per cent. in Midnapore to 43·5 per cent. in Birbhum.

14. *Hospitals and Dispensaries.*—The working of the dispensaries in the Division presented no new feature. Their total income decreased by Rs. 1,683 owing to a decrease in the Government grants, but the income from private subscriptions showed a satisfactory increase of some Rs. 10,000. There was an increase of 15,231 in the total number of patients treated. The want of a small-pox hospital at Howrah is specially noticed.

15. *Local Self-Government Institutions.*—District Boards continued to work efficiently and smoothly, but, as noticed last year, little value is attached to the work done by Local Boards. The duties entrusted to Union Committees are small, and the method of their performance was indifferent. One Union, the funds of which had been misused, was abolished, and Local Boards generally are reported to take but little interest in their working. The most important municipality in the Division is that of Howrah. The efforts of the Chairman, Mr. Duke, to bring about an equilibrium in its finances are acknowledged by the Commissioner, but the expenditure on precautionary measures against plague introduced a new and disturbing element.

16. *Conduct of Zamindars.*—The names of Raja Ranjit Singh Bahadur of Nasipur in the Birbhum district, and of the Raja of Mohisadal and Babu Upendro Nath Maity in Midnapore, have been brought to the notice of Government as examples of liberal and enlightened landlords.

17. The Lieutenant-Governor desires to express his thanks to Messrs. Buckland and Stevenson for their efficient administration of the Division, and to Mr. Kennedy for his careful report from which the following extracts are published for general information.

By order of the Lieutenant-Governor of Bengal,

M. FINUCANE,

Secretary to the Govt. of Bengal.

Extracts from the Annual General Administration Report of the Burdwan Division for the year 1897-98.

* * * * *

III.—WEATHER AND CROPS.

20. The following table compares the average rainfall in each district during the past three years:—

District.	Rainfall in inches in—		
	1895-96.	1896-97.	1897-98.
1	2	3	4
Burdwan	41·31	49·11	60 33
Birbhum	42·23	42·21	49·89
Bankura	40·61	48·35	57·45
Midnapore	38·49	58·27	49·89
Hooghly	41·61	52·73	56·03
Howrah	37·00	52·45	52·37
Divisional average ...	40·21	50·52	54·32

As compared with the preceding year, the rainfall was more copious in all the districts of this Division, except Midnapore and Howrah, where it was less.

Burdwan.

21. The rainfall was seasonable as well as abundant and well distributed. As a natural consequence, there was a bumper winter rice crop, the like of which had not been seen for many years, followed by an excellent *rabi* crop.

Birbhum.

22. The rainfall was evenly distributed throughout the rainy season, but there was very little rain from November to the end of the year. The winter crop was very good throughout the district, the Sadar subdivision having produced even more than the Rampur Hát subdivision. The cessation of the rains during the winter affected the *rabi* crop. The average outturn was, however, 15 annas.

Bankura.

23. The distribution of the rainfall was satisfactory, the result being a good outturn of the crops to the great relief of the poor people in some parts of the district, who had suffered considerably during the early part of the year. The only portion of the district which does not appear to have shared in the general prosperity is that affected by the flood of the Damudar which was unusually severe in July last. The *aus* crop in this tract was much damaged, and about four to five thousand bighas of rich soil were buried under sand. Some villages were washed away with everything in them, but fortunately there was no loss of life. The outturn of the early paddy crops, locally called *telko* and *chati*, as also of the *aus*, was good, the yield being on an average 16 annas. *Nuan* paddy cultivated in the high lands in the Sadar subdivision also produced an average 16 annas crop. The outturn of *aman* was 17 annas, or a little above the average, and but for several breaks in the monsoon, the crop would have been a bumper one. What little *rabi* is grown in the district did well and yielded a 16-anna outturn. Owing to want of rain after October, wheat, pulses, gram, mustard, barley and oilseeds did not succeed so well as the *rabi*, the produce being 13 to 14 annas. The unusually heavy rainfall of August and September affected millets grown on the high lands by Santhals and Bauris, the yield being a 12-anna crop. Indigo also suffered from the heavy rains in August, when the plant was ripe, and the result was a 14-anna crop.

Midnapore.

24. Though the total average rainfall of the district was less than in the preceding year, the agricultural results of the year under report were on the whole satisfactory. The rainfall being evenly distributed and seasonable, the crops were excellent. The *aman* harvest is reported to have been seriously damaged by grasshoppers in the Ghatal subdivision.

Hooghly.

25. The outturn of paddy and the staple food-crops appears to have been considerably better than that during the two preceding years, and the same remark applies to the other crops grown in the district.

Howrah.

26. The rainfall was so evenly distributed that the most grumbling cultivator could hardly find a fault, except that the rainfall in May was rather short for the germination and early growth of jute. In the middle of July there was a sudden rise of the river Damudar, and the water which overflooded its western bank above the Gaighata khal found its way into the Rupnarain, thereby causing serious breaches in the zamindari *bánds*. The last-named river was also in flood but for three days only. With the exception of a little child accidently drowned, there was no loss of life, nor was any great damage done to houses. But the *son* crop was totally destroyed, and *aus* and jute suffered partially. The damage was, however, more than counterbalanced by the rich deposit of silt left on the fields by the flood, and the plentiful harvest they yielded on being replanted with paddy immediately after the subsidence of the water.

IV.—PUBLIC HEALTH.

27. The subjoined table compares the number of deaths from different diseases in the districts of the Division during the past three years:—

District.	Population.	Number of deaths from fever.			Number of deaths from cholera.			Number of deaths from bowel-complaints.		
		1895.	1896.	1897.	1895.	1896.	1897.	1895.	1896.	1897.

Total ...	3,069	2,022	2,204	49,767	47,009	47,911	244,365	252,506	225,782	31·7	32·8	29·1

The general health of the Division was better than what it was in the previous year. It is satisfactory to note that the death-rate for the districts individually shows an appreciable decrease during the year, markedly so in the case of Hooghly (31·9 against 38·8 per mille of population). Deaths from small-pox and from other causes were slightly more numerous in the Division than in 1896-97.

Burdwan.

28. Deaths from fever and cholera show a considerable falling off. There was an increase in the number of deaths from small-pox, the bulk occurring in March. The chief outbreak was traced to infected persons coming from the North-Western Provinces. Active measures were taken to stamp out the disease. A few villages in Mangalkot and Katwa thanas exclusively inhabited by Muhammadans suffered the most, as there is a strong aversion among the inhabitants to allow their women to be vaccinated by male vaccinators. In this district the months of March, April and May were the most unhealthy as regards cholera, due probably to the impurity of the water available during those months. It is reported that the practice of throwing half-burnt dead bodies into the river continued in the

Katwa subdivision in spite of a successful prosecution. The Kalna Municipality have stopped the practice, and also that of steeping jute in public reservoirs.

Birbhum.

29. The health of this district was comparatively speaking good during the year. Cholera of a virulent type prevailed during the months of March to June in thanas Bolpur, Nalhati and Maureswar, and caused many deaths. Unfortunately a requisition for a Civil Hospital Assistant for special cholera duty could not be complied with by the Medical Department. Deaths from small-pox were fewer than in the previous year, the majority occurring in thanas Rampur Hát, Sakulipur and Maureswar. It is remarkable that thana Suri enjoyed perfect immunity. The death-rate from fever was decidedly low—a result due, according to the Magistrate, in some measure to the light character and even distribution of the rainfall throughout the monsoon of 1897, following the short rainfall of the two preceding seasons. As is most unusual, fever was distributed almost equally throughout all the months of the year, save that a slight increase was observable in March and April, due, it is reported, to influenza. Thanas Rampur Hát, Manreswar, Bolpur and Suri contributed largely to the mortality under this head.

Bankura.

30. In this district, too, there was less fever and less small-pox, the latter occurring sporadically and disappearing as usual after the unprotected people had been vaccinated. There was, however, an increase in the mortality from cholera which raged in parts of thanas Onda and Khatra. Many of the cases are attributed to scarcity of food and defective water-supply caused by the prolonged drought of the previous year. The District Board and the municipalities took steps to arrest the progress of the disease in their respective areas. It is strange that this district shows no deaths from bowel-complaints.

Midnapore.

31. During the latter half of the year malarial fever broke out epidemically, the largest mortality occurring in November and the tracts which suffered most being thanas Naraingarh, Midnapore, Daspar, Paskura, Contai and Golliballavpur. Cholera prevailed throughout the year, causing the heaviest mortality in March, July and April. The largest number of deaths occurred in thanas Nandigram, Bhagwanpur, Contai, Dantun and Panskura. The disease was widely prevalent in the Tamluk and the Sadar subdivisions from the end of May to the end of October, and two native doctors were employed to treat the sufferers. Steps were taken to arrest the progress of the disease in the neighbourhood of the Bengal Nagpur Railway lines under construction, the principal preventive measures adopted in the district being—

(*a*) fumigation of houses and localities with sulphur, &c.;
(*b*) action under section 199A of the Bengal Municipal Act as to water-supply;
(*c*) free distribution of cholera pills in affected localities through the police.

There was a decrease in the mortality from small-pox. The disease prevailed badly from February to May, the largest number of deaths occurring in March. The localities which suffered most were Pataspur, Nandigram and Khedgri. Sub-inspectors of vaccination and extra vaccinators were deputed to to the affected areas to arrest the spread of the disease.

Hooghly.

32. As already noticed, malarial fever was moderately prevalent during the year, cholera appearing in small outbreaks. The latter disease lingered for a longer period than usual in parts of the Jahanabad subdivision without assuming a virulent type. Steps were taken to check the spread at its outset whenever practicable. Mortality from small-pox was greater during the year than in 1896-97. Bowel-complaints claimed many victims, especially among the Beharies who congregated to this district in quest of employment.

Howrah.

33. The health of the town of Howrah was worse than usual, small-pox and fever being largely prevalent. Fever affected the right bank of the Hooghly the whole way from Bally to Uluberia, and assumed a severe form, although the interior enjoyed greater immunity from it than usual. A local epidemic of

small-pox broke out in the town in January 1897, and spreading to the surrounding villages, invaded a considerable portion of the district, disappearing only when the rains set in. The town of Bally enjoyed better health during the year than in 1896-97. There was a marked diminution in deaths from cholera. The decrease, so far as the Howrah town is concerned, is no doubt due to the opening of the water-works.

Sanitary works.

34. The Burdwan Municipality spent Rs. 511 in extending the supply of filtered water, Rs. 167 in constructing a plague hospital, and Rs. 441 in completing the construction of a ward for female cholera and small-pox patients. A sum of Rs 283 was spent by the Kalna Municipality in constructing a latrine, and Rs. 222 in improving the burning ghât, besides Rs. 122 on a plague hospital. The Katwa Municipality spent Rs. 184 in constructing a plague hospital, which was not completed within the year. Dainhat spent Rs. 500 for the re-excavation of tanks, and Rs. 89 for the erection of latrines. In Raniganj Rs. 1,190 were spent in sinking a well and constructing a drain; Asansol spending Rs. 231 in providing latrines and Rs. 433 in erecting a slaughter-house. The Burdwan District Board spent Rs. 3,391 in improving water-supply by sinking wells in different parts of the district.

35. In the Suri Municipality, in the district of Birbhum, a few extra coolies were entertained with a view to improve the conservancy of the town, as a precautionary measure against the plague. Tanks and wells were reserved for drinking purposes. As regards village sanitation, the District Magistrate, while on tour, took occasion to call the attention of the villagers to the desirability of reserving a particular tank for drinking purposes without apparent success.

36. The sanitary condition of the Bankura district is naturally good on account of its good natural drainage, the ground in most parts being undulating. In the matter of water-supply, a good deal of improvement is needed; but as the funds at the disposal of the local bodies were limited, all that could be done was to sink wells where the supply was found to be defective.

37. No information has been furnished as to what has been done in this matter in the Midnapore district. The sanitation of the Hooghly district is generally speaking defective, and the remark applies equally to rural and urban areas, though the latter has improved to a certain extent in consequence of the introduction of the Plague Regulations. The Magistrate notices the paucity of prosecutions and the want of deterrent punishment for committing nuisances in the streets, which go undetected, chiefly because there is no system of patrol during the day. The scheme for supplying filtered water to the riparian municipalities on the right bank of the Hooghly is still under consideration. The Hooghly District Board contemplates improving the water-supply of the district by taking up three thanas every year, thus completing the entire district in four years. In the year under report they selected the three thanas of the Sadar subdivision, but were late in taking up the project. They have since made a beginning. Some wells in the Serampore and Jahanabad subdivisions, which were left unfinished in the previous year, were completed during the year under report. Difficulty is reported to have been experienced in inducing private owners of tanks to agree to the stringent conditions of reservation, without which the Board very properly refuses to take in hand the improvement of a tank.

38. The drainage of the town of Howrah being defective, the services of Mr. Hodges, the Engineer to the Calcutta Corporation, were last year engaged for the preparation of a drainage scheme. His report has not yet been received. The important sanitary work executed by the Howrah Municipality during the year was the extension of the water-works to the foreshore road and to a few lanes, the market and slaughter-houses being also at the same time improved. The Commissioners of the Bally Municipality intend carrying out partially a scheme, prepared in 1894-95, for improving the drainage of the town. They have acquired lands, and have opened a new road by filling up certain low lands and filthy *dobas*. For want of funds the Howrah District Board were unable to take any action towards improving the drainage of the rural area. They, however, spent Rs. 2,635 in the improvement of water-supply. The tube-wells are reported in many cases to have failed, owing partly to the unsuitability of the soil and partly to stupidity or wanton mischief on the part of the villagers.

Vaccination.

39. The following table shows the vaccination operations in the districts of the Division during the past three years:—

District.	Number of persons vaccinated.			Number of successful operations in 1897-98.	Percentage of successful operations to total number of persons vaccinated in 1897-98.
	1895-96.	1896-97.	1897-98.		
1	2	3	4	5	6
Burdwan ...	32,119	42,380	38,933	38,130	97·9
Birbhum ...	20,820	26,222	19,636	19,462	99·11
Bankura ...	36,263	45,763	33,935	31,733	93·5
Midnapore ...	61,421	67,031	74,069	72,503	97·0
Hooghly ...	21,341	22,189	24,687	24,337	98·5
Howrah ...	20,296	25,067	22,219	21,072	94·83
Total ...	192,260	228,652	213,578	207,237	97·03

The total number vaccinated shows a decrease as compared with that operated on during the previous year. This decrease is shared by all the districts, except Midnapore and Hooghly, where an increase is observable. Vaccination was not performed for the first time in any thana of the Burdwan district, having been carried on in all in previous years—a fact which apparently accounts for the decrease. In Birbhum the decrease is, in the opinion of the Magistrate, in a great measure due to slackness on the part of the vaccinators, and to some extent to inadequate supervision of their work. In the Bankura district the operations performed during 1896-97 in thanas Onda, Vishnupur and Sonamukhi, where vaccination had been unknown before left few villages unprotected. In Howrah difficulty is experienced in vaccinating the mill operatives, mostly Muhammadans. The increase in the Midnapore district, the highest on record for some years past, is due partly to an increase in the number of vaccinators and partly to strict supervision exercised by the Civil Surgeon. A further increase in the staff of vaccinators (135 during the year) is considered by the Magistrate to be necessary for the requirements of the district. The increase in Hooghly is said to be the result of an appreciation on the part of the people of the advantages of vaccination. The percentage of successful operations to the total number of persons vaccinated in the Bankura district is comparatively low. The provisions of some of the sections of the Compulsory Vaccination Act were extended to the town of Rampurhat in Birbhum, during the year under report. In this district difficulty is experienced in realizing the vaccinators' fees, which to some extent retarded progress. Generally speaking, vaccination may be said to be making steady progress in the Division, the people having begun to perceive its advantages. The quarters from which opposition chiefly comes are the Muhammadans and upcountry-men, who object to it on religious grounds. Though vaccination is compulsory within municipal limits, this class of mill-workers in Howrah is reported to refuse it altogether, and resort to riotous resistance. The Magistrate mentions that the managers of mills were asked by the Civil Surgeon to make vaccination a condition of employment, but they have so far desisted from acceding to the request, under the apprehension that such a step would dislocate labour or lead to a strike on the part of the mill hands. The Civil Surgeon, however, when certifying the ages of children, gets all the unprotected ones vaccinated in his presence.

Calf vaccination.

40. In twenty localities in the Midnapore district, including the towns of Midnapore, Tamluk and Ghatal, calves were vaccinated in 157 cases, of which 152 proved successful; 8,554 persons were vaccinated, and 382 re-vaccinated. The total expenditure incurred was Rs. 185 odd.

MATERIAL CONDITION OF THE PEOPLE.

41. The short crops of 1895-96 and 1896-97, and the high prices of food-grains consequent thereon, as well as on the large exports made to districts suffering from the stress of famine, affected materially the condition of certain sections of the people. Those who suffered most were the lower ranks of the middle class of limited means, who, with traditions to maintain and appearances to keep up, are daily finding their position untenable. Small cultivators, artizans, such as weavers, braziers, &c., day-labourers far away from the centres of trade and industry, and all those who subsist on private charity, also found the year a very trying one.

42. In Burdwan, although acute distress or famine did not prevail, it was found necessary to undertake relief measures in certain tracts. A sum of Rs. 11,580, out of funds partly granted by the Bengal Branch of the Indian Famine Charitable Relief Committee and partly raised by subscriptions, was spent in affording relief to the needy and the distressed, while a kitchen was opened for the benefit of the large gangs of emaciated and half-starved up-country coolies who daily passed through the district along the Grand Trunk Road, as well as to a limited number of the blind, the halt and the lame. The Magistrate notices that no difficulty was experienced by the labouring classes in finding work, that the wages did not fall, and that business in the colliery area was in full swing.

43. In Birbhum, advances under the Land Improvement Loans Act, granted during the early part of the year and the latter part of 1896-97, served to provide able-bodied labourers with employment, while numbers of those incapacitated from work and the respectable poor received assistance from the Famine Charitable Relief Fund at a cost of Rs. 1,300.

44. Bankura is the only district in the Division which was declared affected by famine. The distress in certain tracts was so acute that it was found necessary to start relief operations in April 1897, and to continue them till the 13th October last, during which period the average number of persons who received gratuitous relief, reckoned in terms of one day, was 855,204, while the number of those who obtained relief in other forms was 318,605, the total cost being Rs. 1,21,552, contributed partly by Government and partly by the District Board. Besides this, a sum of Rs. 24,000 from the Indian Charitable Famine Relief Fund, and Rs. 3,066 realized from subscriptions, were spent under objects I to IV of the Provincial Committee's Circular No. 1, dated the 29th January 1897, in asisting 7,680 persons computed in the manner mentioned above. In addition to these amounts Rs. 3,795, forming part of the money allotted to this Division by the Provincial Committee referred to, were distributed among 1,386 persons whose houses had been washed away by the Damodar.

Some of the landlords of the district provided employment for the labouring poor by excavating tanks or reservoirs. Among others who took an active part in relieving distress, the most prominent is Rai Rambandhu Chatterjee Bahadur of Konchka, in the jurisdiction of the Saltora outpost, who spent Rs. 6,000 on relief works and Rs. 3,000 on gatuitous relief.

45. In Midnapore, thana Binpur was the only tract where it was found necessary to administer relief, and 1,215·48 persons were relieved there, for a period of one month and a half, at a cost of Rs. 1,288-7-7.

46. In Hooghly and Howrah the mills afforded sufficient work to the labouring classes, but the first half of the year was a very trying period to people with small fixed incomes. The Magistrate of Hooghly specially commends the open-handed liberality of Rai Khirod Prosad Pal Bahadur of Sikederpur in Jahanabad, who opened an *annochatra* for the benefit of the poor of his native village and its neighbourhood, and fed 6,000 persons daily during the three days of the Durga Puja, and subsequently 2,000 every day for about two months, at a cost which is said to have exceeded Rs. 16,000.

47. The famine prevailing in the different parts of the country, and the high prices caused thereby, appear to have immensely stimulated the export traffic in rice and paddy, and grain-dealers and persons who possessed reserves of these articles are reported to have realized enormous profits, some idea of which may be formed from the fact that the exports from this Division alone amounted during the year to 26,64,084 maunds of paddy and 47,77,076 maunds of rice.

The abundant *aman* harvest reaped during the year seems to have had the effect of greatly improving the condition of the people. But the Magistrate of Bankura mentions that they have not yet completely recovered from the severe strain resulting from the agricultural depression by which the years 1895-96 and 1896-97 were characterized.

VI.—EMIGRATION AND IMMIGRATION.

48. As in the previous year, emigrants were registered in the districts of Burdwan, Bankura and Midnapore.

The statement given below shows the number of emigrants registered in each district during the last two years :—

District.	For the Colonies.						For Tea Districts.					
	1896-97.			1897-98.			1896-97.			1897-98.		
	Coolies.	Dependants.	Total.	Coolies.	Dependants.	Total.	Coolies.	Dependants.	Total.	Coolies.	Dependants.	Total.
1	2	3	4	5	6	7	8	9	10	11	12	13
Burdwan ...	...	...	...	...	...	...	91	20	111	8	5	13
Birbhum ...	...	...	...	...	...	...	...	...	...	...	...	...
Bankura ...	...	...	...	...	...	...	252	219	471	113	91	204
Midnapore ...	...	...	...	...	...	...	204	136	340	155	145	300
Hooghly ...	...	...	...	...	...	...	...	...	...	...	...	...
Howrah ...	...	...	...	...	...	...	...	...	...	...	...	...
Total ...	...	...	...	...	...	...	547	375	922	276	241	517

The number of emigrants registered shows a steady falling off which is said to be due to the growing preference of employers for free labour.

49. The number of emigrant coolies registered in the district of Burdwan fell from 91 in 1896-97 to 8 only in the year under report. Considering the fact that the number was so large as 2,947 in 1895-96, it appears that free emigration will at no distant date supplant the system of registered emigration. The Magistrate of Burdwan observes that under the free emigration system there is no check on emigration, as no official record is kept of the number of free emigrants passing through the district. 28,894 coolies are reported to have passed through the several depôts in the district, against 16,588 in the preceding year. The increase is said to be due to the prevalence of scarcity in the recruiting districts.

50. A large number of coolies, it is reported, passed through Rampur Hát, in the district of Birbhum, during the year, on their way to labour districts; but no reliable statistics are available, as no coolies are registered in that district. The Magistrate of Birbhum adds that there were also emigrants under the free recruiting system, but the exact number cannot be determined.

51. As in Burdwan, there was in Bankura a marked decrease in the number of persons who emigrated to the tea-gardens during the year as compared with 1896-97, but a large number of free emigrants are reported to have left the district without registration.

Of the total number of emigrants registered in Bankura during the year, 20 with 5 dependants were brought for registration by professional recruiters employed by contractors in Calcutta, against 17 coolies with 4 dependants in 1896-97, and 93 with 86 dependants were registered by garden sardars, against 235 emigrants with 215 dependants in the previous year. The recruitment by garden sardars was thus far more successful than by contractors' agents, whom the people continue to look upon with distrust.

52. In Midnapore, the number of registered cooly emigrants continues to decrease, 300 such persons having been registered during the year, against 340 in 1896-97. Here also the garden sardars are described as having done more

work than the contractors' recruiters, who registered 17 coolies only, against 283 registered by the former.

No coolies were registered in the districts of Hooghly and Howrah. Mr. Duke, Magistrate of Howrah, writes :—

"In fact, no regular emigration is carried on from this district, although to my knowledge some inhabitants of Howrah wander very far afield."

53. The largest number of criminal cases connected with emigration occurred in Burdwan and Bankura. In Birbhum only four cases were instituted during the year, against 17 in the previous year. In the opinion of the Magistrate, the decrease is due to high prices of food-grains, which, it is added, probably rendered more persons willing to emigrate, and hence obviated the necessity for recruiters using force or stratagem.

54. As regards abuses, the following remarks by the Subdivisional Officer of Raniganj, Mr. Walmsley, quoted by the Magistrate, are reproduced :—

"There is no change to record in the manner in which coolies are recruited. The average Arkati is a rogue with little regard for the inclinations of any one whom he has marked as a suitable cooly. The cases that come into court would alone be enough to prove the rascality that attends the recruitment of free coolies, even if one made no allowance for the fact that these cases are but a very few out of many. On the other hand, the great majority of coolies quite understand what they are doing and where they are going."

The Magistrate of Bankura, Mr. De, observes that free emigration which is not under proper contract, except under the Inland Emigrants Health Act, is open to abuses.

55. There were altogether 36 depôts and rest-houses in this Division, against 46 in the previous year. The decrease is mainly due to the closing of a depôt and some rest-houses in the Midnapore district, and to the fact that, acting under the spirit of Government Resolution No. 75T.G., dated 23rd May 1895, the Magistrate of Birbhum included in his return only 3 out of 8 so-called rest-houses existing in his district, the other 5 being insignificant and little frequented.

The depôts in Burdwan were very regularly inspected. The Assistant Superintendent of Emigration at Raniganj and Asansol visited the Raniganj and Asansol depôts about three times a week, and the Subdivisional Officer of Raniganj once or twice a month. Particular attention was paid to the sanitation of the depôts, and the free use of disinfectants insisted on. The quality of food supplied to the emigrants is reported to have been good and the quantity sufficient. The water-supply of the depôts was also satisfactory, each depôt having a well which was disinfected during the year with permanganate of potash. It is added that the coolies were supplied with warm clothes during the cold weather, and that every depôt is furnished with wooden *machans* in the sleeping sheds, which are overlaid with mats or blankets. The Magistrate has made it a rule not to grant licenses until such *machans* are provided.

The Assistant Superintendent of Emigration, Raniganj and Asansol, is highly spoken of both by the Subdivisional Officer of Raniganj and the District Magistrate.

IMMIGRATION.

56. There was no registered immigration into the districts in this Division. As usual, labourers in large numbers came to the Division from the North-Western Provinces and Bihar, in quest of work in the brick-fields, mills, factories and on the railways, to say nothing of inter-district cold-weather movements of labourers with the same object.

VII.—PRICES OF FOOD AND LABOUR.

57. The average price of common rice, which had risen abnormally in 1896-97, fell from 10 seers 7 chitaks per rupee, the rate prevailing during the last fortnight of that year, to 13 seers 9 chitacks during the corresponding period of 1897-98. The high prices caused considerable suffering to the poorer classes, but things rapidly mended with the advent of the new rice. The rate per rupee was, however, still higher than what it was seven or eight years ago, which may be due either to the fact that the stocks have not yet been fully replenished, or to the depreciation of the rupee. It is, I fancy, mainly the latter cause which affects the price, and it is extremely unlikely that prices will

ever go back to the old level. Increased population and improved means of communication must also affect the price of all food-grains.

There was a fall in the average prices of wheat and gram in all the districts of the Division, except Midnapore, where the latter article was dearer than it was in 1896-97, namely, 8 seers 12 chitaks against 9 seers 15 chitaks. Salt was dearer in Bankura and Birbhum, and cheaper in the remaining districts, the average price for this Division being 10 seers 5 chitaks against 10 seers 3 chitaks in 1896-97.

58. Notwithstanding a considerable fall in the price of rice, the staple food-grain of the people of this Division, the wages of labour did not change appreciably save in the case of superior blacksmiths in the Hooghly district, who earned Re. 1 daily, against annas 12 in 1896-97. Custom is the prime factor in preventing rapid fluctuations in these wages, but when once they rise they do not fall soon, which is illustrated by the fact that the pay of menial servants and maidservants, which went up with the rise in the price of food-grains in 1896-97, has not come down since.

VIII.—MANUFACTURES AND MINES.

59. The principal articles of manufacture in this Division are silk and tasar, jute, cotton, molasses, shellac, rope, iron, brass, bell-metal and hardware, indigo, paper, pottery, bone-meal, mats and chemicals.

Silk and tasar.

60. In Burdwan the total quantity of cloth produced rose from 47,585 yards in 1896 to 53,905 in 1897, and the value thereof from Rs. 43,481 to Rs. 53,288. This industry is carried on in Mankar, Memari and two other villages in the Sadar, and in the villages of Bagtikari, Musthali and Ghoranash in the Katwa subdivision. In Birbhum the total outturn was 43,000 lbs. against 40,080 in 1896-97. The two silk filatures at Ganutia and Bhadrapur, with two branch factories, continued to work as before. In Bankura the manufacture of mulberry silk thread and cloth is carried on to some extent in the town of Vishnupur and at Birsinga, a village lying eight miles north of the former. Silk-worms are also reared, but on a limited scale, in some parts of the district, and the quantity of silk-cocoons locally obtained being small, considerable quantities of these are imported from Midnapore in order to meet the demand of the local manufacturers. Vishnupur continues to produce the finest silks, which have, however, been superseded by the cheaper fabrics produced in other parts of the country. The manufacture, is therefore, on the decline. That of *kutni*, a mixture of silk and cotton, is almost extinct, as the demand for it, formerly existing in the North-Western Provinces, has almost ceased. 3,840 pounds of raw silk were manufactured at the Nimtala factory in the Ghatal subdivision. There is a French concern at Gureli, in the same subdivision, for reeling tasar and yellow silk from cocoons. Silk is also reeled at the Moheshpur Factory. Damasked silk scarfs, wrappers and handkerchiefs manufactured by the native weavers of Ghatal, Nimtala, Radhanagar and Khirpai are exported to Calcutta, Bombay, Madras and other places for sale. Silk *dhuties* and *erendi* cloth manufactured in thana Daspur are largely in request. These are also manufactured on a smaller scale at Anandpur in the Sadar subdivision. Silk fabrics are produced in the Jahanabad subdivision of Hooghly, but the weavers are unable to compete with the cheaper goods turned out by machinery, and the business is in a state of decline. It is reported that the tasar made in the Katwa subdivision from wild cocoons brought from the jungles of the Santhal Parganas, continues to maintain its ground in the Calcutta market as the best of its kind, and that the article is exported in large quantities to Madras, where it is in great favour with ladies of the upper classes. Tasar is also manufactured in the villages of Karidha, Tantipara, and Bisingpur of Birbhum. It is woven from cocoons imported from Singhbhum, Manbhum and the Santhal Parganas, and reeled by hand. The industry is, however, languishing. In Bankura, although tasar is manufactured in some villages, the town of Bankura and the village of Birsingpur form the chief centres of the industry. Tasar cocoons are reared in some parts of thanas Khatra, Raipur and Bankura; but owing to the prevailing scarcity there was very little demand for tasar cloth, and the manufacture was carried on on a very limited scale during the year.

Tasar fabrics are reported to have been most extensively manufactured in the villages of Anandapur and Kasiari, in the sadar subdivision of Midnapore. Such stuffs are also turned out in the Jahanabad subdivision of Hooghly, but the weavers find it hard to compete with machine-made goods.

Jute and cotton.

61. There are several large jute and cotton mills in the districts of Hooghly and Howrah, in which gunny-bags, cotton fabrics and cotton-yarn are manufactured on an extensive scale. The figures available are useless for purposes of comparison, but there seems no doubt that these factories are doing a good business.

Cotton-cloth is manufactured in all the districts of this Division, but it is gradually being ousted from the market by cheap Manchester fabrics. Many weavers in Burdwan and Midnapore are reported to have given up their looms and betaken themselves to agriculture and other occupations. In Bankura this business almost ceased for a time during the prevalence of the famine and there was considerable distress among the weavers in consequence. Fine cotton cloths, with silk, silver and gold embroideries, made at Nimtala in Midnapore, are said to be in great demand in Bombay. Cotton-cloths of various kinds are manufactured in the Midnapore Central Jail.

Molasses.

62. The manufacture of molasses from sugarcane is common to all districts of this Division, but that from the juice of the date-palm is produced on an extensive scale in the districts of Burdwan, Hooghly and Howrah only. In Burdwan, the Behia mills are extensively used for pressing sugarcane. Some factories at Raipur in Birbhum continued to manufacture cane-sugar, the production and consumption of which was, however, very limited, imported refined sugar of a superior quality being cheaper.

Shellac.

63. This article is manufactured in Birbhum and Bankura. The outturn in the former district rose from 238 maunds in 1896-97 to 605 maunds, and in the latter from 4,200 maunds to 10,655 maunds in the year of report. The marked increase in Bankura is attributed to a slight rise in the price, which stimulated the business. The number of factories at work in the district during the year was 28 against 18 in 1896-97, and the total quantity of stick-lac imported rose from 8,000 maunds in 1896-97 to 13,883 maunds.

Rope.

64. Rope is manufactured on a large scale in Hooghly and Howrah. In the absence of statistics for the year under report, a comparative review of the state of the trade is hardly possible.

Iron.

65. In the Barakar Factory, in Burdwan, pig-iron, as well as pipes and various kinds of castings, are produced. The outturn, which had decreased from 17,455 tons in 1895-96 to 5,233 tons in 1896-97, owing to the smelting furnace having got out of order, rose to 21,631 tons during the year under report. There are four iron-works in Howrah, none of which has furnished the statistics asked for.

Brass, Bell-metal and Hardware.

66. These articles are manufactured in all the districts of this Division. In Burdwan the estimated outturn of the year 1897 was 8,974 maunds, against 9,313 maunds in 1896. At Kanchannagore, a suburb of the town of Burdwan, knives and scissors, to the value of Rs. 4,800, were manufactured in 1897, against Rs. 3,604 in 1896. In Bankura the manufacture of brass and bell-metal ware suffered considerably in consequence of the scarcity and the high prices of food-grains. Brass and bell-metal utensils are still largely prepared in the Sadar and Jahanabad subdivisions of Hooghly, the estimated outturn being 8,450 maunds, against 8,138 maunds in 1896-97. But the cheaper enamelled ware from Europe is beginning to supersede these articles. This industry is carried on on an extensive scale at Kharar, where brass and bell-metal plates to the value of Rs. 12,81,020 are said to have been manufactured during the year, against Rs. 16,45,602 in 1896-97, giving employment to nearly 5,000 men, and necessitating the importation of 29,950 maunds of raw materials such as copper, tin and zinc. Brass jugs made in Tamluk are much prized and find a ready sale.

Indigo.

67. The outturn of this article decreased in Bankura from 138 maunds in 1896-97 to 130 maunds, and in Midnapore from 859 maunds to 624 maunds. This industry is on

the decline in the former district, in which there exists only a few factories, most of which belong to Messrs. Gisborne and Company. In Burdwan and Birbhum the business is carried on on a very limited scale, the factories being small and the profits inappreciable.

Paper.

68. There are two paper mills in this Division, one at Raniganj and the other at Bally. Statistics for the latter have not been supplied. The former produced 2,581 tons of paper, valued at Rs. 9,57,000, against 2,500 tons, worth Rs 9,50,000, in 1896-97. Hand-made paper is still prepared in Serampore, but machinery has gradually ruined the industry.

Pottery.

69. The principal articles manufactured at Messrs. Burn and Company's pottery works at Raniganj are glazed drain pipes, bricks, tiles and ornamental fancy goods. The value of the outturn rose from Rs. 4,68,398 in 1896 to Rs. 5,68,599 in 1897. Bricks, tiles and pan tiles are also largely manufactured in the districts of Hooghly and Howrah, partly for the Calcutta market and partly to meet the requirements of the residents of the riparian municipalities. Earthen pots made in the Ghatal subdivision are extensively exported to Calcutta.

Bone-meal.

70. There are two bone mills, one at Uttarpara and the other at Magra. The former turned out 10,900 tons of meal and the latter 286 tons only.

Chemicals.

71. A large quantity of sulphuric acid was manufactured at Messrs. Waldie and Company's chemical works at Konnagore, which gives employment daily to about 175 persons.

Mats.

72. Mats are made in Jahanabad and in every subdivision of Midnapore, the best kinds of *maslands* being produced at Raghunathbati in the Tamluk subdivision and Kiser chak in Ghatal.

Miscellaneous articles.

73. Jute twists, fishing nets, iron safes, *hukkas* and bamboo baskets are manufactured in large quantities in the district of Howrah. Ebony wood is worked in Jahanabad, and the pipes (*nulchas*) and mouth-pieces for *hukkas* produced there find a ready market in Calcutta. Trade in dried fish is carried on in the Contai subdivision on a large scale by boatmen from Arakan, the estimated value of the exports during the year being Rs. 60,000.

Wooden furniture is manufactured in the Hooghly-Chinsura town, and exported in large quantities to Calcutta, where there is a great demand for these articles.

The following table shows the outturn of some of the principal articles of manufacture. The statement is not complete, as many of the factories have not furnished the information asked for:—

Coal mines.

71. Coal mines are worked in the districts of Burdwan and Bankura. The number of collieries in the Raniganj subdivision is very large, and this industry has lately gained much importance. As compared with 1896, the output in 1897 shows an increase of about 13 per cent., and during the last seven years the annual output has doubled, or risen from about 1,000,000 tons to 2,000,000 tons in round figures, the average value of the coal being about Rs. 2-8 per ton. The price is reported to have risen since December last. The European companies are all doing good business, as is evident by the share quotations in the daily papers. Of the Native companies, a few are successful, but the rest are reported to have been handicapped by want of sufficient capital and an excessive eagerness for immediate profit. The accidents which took place during the year were comparatively few, and were mostly due to carelessness on the part of the persons injured. Of the accidents to mines three deserve mention. The Damuda Coal Company's pit at Bamandihi caught fire, and the pit head gear was burnt. The fire was put out by throwing down earth, but the loss to the Company was serious. Mylne and Company's pit at Pitani subsided, and the rush of air caused the death of two coolies employed at the mouth of the incline. The Inspector of Mines could not visit the place, and without the opinion of an expert it is not possible to say whether the owners were to blame for carelessness or not. Another serious subsidence took place in the Bengal Coal Company's pit at Egara. Fortunately no one was below at the time, and with wide galleries and several ventilating shafts the rush of air found an outlet, but the report and reverberation were felt a mile away.

IX.—TRADE AND COMMERCE.

75. As reported in previous years, almost all the important trade centres and marts in this Division enjoy special facilities of export and import by rail, river, and canal. Birbhum has the advantage of the railway. The districts of Burdwan, Hooghly and Howrah are served both by rail and river, while Midnapore enjoys the benefit of the canal system and the rivers Rupnarain and Silye. Bankura, though worst off in the matter of communications, has good roads to carry its traffic by means of carts to the East Indian Railway. The necessity for crossing the Damuda is, however, a serious drawback. The Howrah-Ampta and Howrah-Sheakhala Tramway lines opened during the year serve portions of Howrah and Hooghly.

76. The principal articles of trade in this Division are—

EXPORTS.

Rice, paddy, pulses, gunny-bags, sugar, coal, paper, hides, oilseeds, brass and bell-metal utensils, shellac, tasar and silk.

IMPORTS.

European piece-goods, gram and pulses, raw jute, gunny-bags, mustard seeds, sugar, tobacco, salt, kerosine-oil, cocoa-nuts, ghee.

77. The following table shows in a combined form the total traffic in 24 principal articles of merchandise imported into and exported from this Division by rail, steamer and country boats:—

Articles.	IMPORTS.								EXPORTS.

Total	83,87,327	37,845	4,63,280	89,18,458	12,88,920	185	5,51,671	18,40,755	79,92,272	98,735	13,068	81,04,092	5,11,71,191	1,555	27,98,002	5,39,30,748

It will be seen that the total imports by rail during the year amounted to 66,76,256 maunds against 5,91,63,463 maunds imported in 1896-97. The largest exports were in rice, paddy, gunny-bags and coal, and the most considerable imports in gram and pulses, raw jute, mustard-seed, sugar, tobacco, European piece-goods, salt and kerosine-oil.

78. The net traffic both up and down was—

	Mds.
Imported by rail (columns 2 + 6)	66,76,256
Ditto rivers and canals (columns 3 + 4 + 7 + 8) ...	10,82,987
Total of imports ...	77,59,243
Exported by rail (columns 10 + 14)	5,91,63,463
Ditto rivers and canals (columns 11 + 12 + 15 + 16)	28,71,977
Total of exports ...	6,20,35,440

The exports were thus enormously in advance of the imports, the difference being 5,42,76,197 maunds, though a comparison of the figures for the past two years shows that there was an increase under both heads, the exports arising from 4,91,77,238 maunds to 6,20,35,440 maunds, and the imports from 76,28,788 maunds to 77,59,243 maunds. The Magistrates have not, except in a few instances, analysed the figures and explained the variations. The details given below are, therefore, necessarily meagre.

79. In imports the increase under the head of gram and pulses was marked. That in the case of sugar (refined and unrefined), cotton goods and kerosine-oil was moderate. As regards exports, the increase was marked in gunny-bags and coal and coke, while there was an appreciable decrease in rice

and paddy, as will be seen from the figures noted in the margin. The increase in gunny-bags is attributable to an increased demand for the article, in consequence of the excellent harvests of the year having stimulated trade in other districts. The abnormally large exports of rice and paddy which took place in 1896-97, and the consequent exhaustion of the stocks, account for the falling off in the exports in these articles during the year under review. The reason assigned by the Magistrate of Burdwan for the increase under the heads of coal and coke is that a larger quantity of coal was raised owing to an increase in the number of labourers employed in the mines. But this does not explain why more labourers were employed, whether to meet an increased demand or whether labour was cheaper, not being stated.

	1896-97.	1897-98.
	Mds.	Mds.
Gunny-bags ...	1,76,605	2,12,644
Coal and coke ...	4,04,24,160	5,41,43,227
Rice	53,89,969	47,77,076
Paddy	28,99,718	26,64,084

80. The Magistrate of Midnapore mentions that the statement furnished by the Executive Engineer, Cossye Division, showing the canal-borne traffic of the district, does not include the traffic by Messrs. Hoare, Miller and Company's steamer, or that passing direct from Calcutta into the district by other routes. Statements Nos. VIII and IX, showing exports to and imports from Calcutta, are not, therefore, quite accurate. So far as the exports to Calcutta are concerned, there was an increase in the case of rice and paddy (taken together), other food-grains, raw jute, raw silk, refined sugar, tobacco (unmanufactured and manufactured), coal and coke, and a decrease in all other articles shown in Statement No. VIII. With reference to imports there was an increase in Indian cotton piece-goods, salt and gunny-bags, and a decrease in the remaining articles shown in Statement No. IX.

* * * * * * *

XXIII.—RAILWAYS AND OTHER PUBLIC WORKS.

167. The Calcutta-Cuttack section of the Bengal-Nagpur Railway, passing through the districts of Midnapore and Howrah, was under construction during the year. Earthwork was pushed on, the work of acquiring lands for the line has nearly been finished, and station sites selected. Mr. Duke justly points out that the progress of the line depends more on the completion of the bridge over the Rupnarain at Kola than on anything else. The Howrah-Ampta and the Howrah-Seakhala tramways were opened for traffic during the year, the former up to Majee, within a distance of ten miles from Ampta, and the latter up to Seakhala, its terminus. These two lines run for more than a mile along the side of public and much frequented streets in the town of Howrah. They are in effect railways as regards the length and weight of trains, the character of engines and also of permanent-way, and are liable to accidents, as in the absence of efficient brakes it is impossible to stop the trains within a moderate distance, owing to their great momentum. Complaints have been received against the promoters, Messrs. Martin and Company, for their neglect to comply with the orders of Government as regards providing smokeless and noiseless engines, and running at the rate of not more than six miles an hour within the town of Howrah. The matter has been reported to Government in the Public Works Department, in this office No. 1641L.S.-G. of 2nd April 1898, for orders.

168. The canal system in the district of Midnapore consists of distributaries of which the total length is 283 miles, and which command an area of 125,000 acres, and of three main canals with a total length of 113 miles. One of them, viz. the Midnapore Canal, is useful as a means both of navigation and irrigation. The other two, that is, the Hidjili Tidal Canal and a portion of the Orissa Coast Canal, are intended purely for purposes of navigation. The total collection on account of the water-rates and miscellaneous canal revenue amounted to Rs. 1,33,377 against Rs. 1,10,818 obtained in 1896-97.

Of the projects mentioned in paragraph 169 of the last Divisional General Administration Report, the following are still under consideration:—

(1) The construction of two lines, one from Burdwan to Katwa, and the other from the latter town to Hooghly *vid* Kalna, the survey of which was completed some time ago.

(2) A line from Bhagalpur to Ahmedpur.
(3) A line from Midnapore, through Bankura district, to Murralia, on the Bengal-Nagpur Railway, the survey of which was made during the year.

169. The following table shows the accidents on railways and resulting casualties during the last two years:—

District.	Persons—				Trains—			
	Killed.		Wounded.		Accidents.		Obstructions.	
	1896-97.	1897-98.	1896-97.	1897-98.	1896-97.	1897-98.	1896-97.	1897-98.
1	2	3	4	5	6	7	8	9
Burdwan	35	42	34	33	14	70	4	...
Birbhum	1	12	...	2	...	2	1	...
Bankura	...	...	...	...	...	...	....	...
Midnapore ...	2	4	7	7	...	...	...	1
Hooghly	11	19	15	13	9	13	2	7
Howrah	8	19	7	73	...	10	...	6
Total ...	55	95	56	128	23	95	7	14

In Burdwan the number of accidents rose from 14 to 70, but the number of persons killed increased by seven only, and of those wounded decreased by one. The Magistrate of Burdwan reports that many of the accidents were due to carelessness on the part of people trying to cross the railway line while shunting is going on, and many were suicides. Two goods trains collided at the Saktigarh station. The driver of the train, which entered the station at high speed, was prosecuted, but he was acquitted, as the Court found that he had obeyed the existing rules and committed no offence. Two other goods trains collided at Memari. The driver of one of them was prosecuted, but without success. Subsequently another collision occurred at the above station between two similar trains, the result of the three accidents being that the system under which the line from Howrah to Khana Junction had hitherto been worked has been considerably modified. A passenger train collided with an empty train in the Howrah yard, when some of the passengers received slight injuries. The driver was prosecuted, but he was acquitted by the jury, who distrusted the evidence. In Midnapore an attempt is reported to have been made to wreck a ballast train, but not only was no evidence forthcoming, but the culprits could not be traced. None of the other occurrences shown in the above table require special mention.

170. Besides the construction of roads and bridges and the excavation of tanks and wells by District Boards and Municipalities, the only public work deserving special notice is the construction of a bathing ghât at Salkea, by Babu Mohan Lal Khetri, at a cost of Rs. 16,679.

XXIV.—COMMUNICATION.

171. As remarked last year, this Division is well off in the matter of communications, the only exceptions being the head-quarters of the Bankura district and the two outlying subdivisions of Vishnupur and Jahanabad.

The East Indian Railway connects the district head-quarters of Howrah, Hooghly, Burdwan and Birbhum, and the subdivisional head-quarters of Serampore, Raniganj and Rampur Hát. At Seoraphuli, a branch 22 miles long takes off from the main line and ends at Tarkessar, and from Tarkessar the line of the Bengal Provincial Railway Company rejoins the main line at Mugra, in the Hooghly district. From near Hooghly station the junction line crosses the Hooghly by the Jubilee Bridge, connecting with the Eastern Bengal State Railway at Naihati. The use of the bridge is, however, minimised for travellers

by the timing of the branch trains, which carefully avoid all connection with the trains on the Eastern Bengal State Railway.

The riparian tracts of the districts of Burdwan, Hooghly and Howrah are served by a line of steamers which carry both passengers and goods to Calcutta. The canal system serves the district of Midnapore. The Calcutta-Cuttack section of the Bengal-Nagpur Railway is under construction. When the Asansol-Bankura-Midnapore line is constructed all the districts of this Division will be traversed by rail.

172. In Burdwan no original work of importance was executed during the year under review. 103 miles of the Provincial roads under the control of the District Board were maintained during the year at a cost of Rs. 44,630, or an average of Rs. 433·3 per mile. A sum of Rs. 77,844 was spent in repairing 172 miles of metalled and 246 miles of unmetalled district roads, the above expenditure including Rs. 12,779 spent on village roads, which continued to be managed by Local Boards.

During the year under report, land was acquired for the construction of a feeder road from the Debipur railway station to the village of Debipur, a distance of three miles, and the work of construction was taken in hand.

Since the proposal of constructing a railway line from Burdwan to Katwa was started, the District Board has practically neglected the metalled district road from Burdwan to Katwa, the result being that the road has been so seriously damaged as to require an expenditure of about Rs. 70,000 to put it into really good order. An enquiry has been addressed to the Agent of the East Indian Railway Company as to whether the proposed line is likely to be constructed and, if so, when, so that the Board may come to a decision as regards the steps to be taken to improve the road.

Tenders have been invited by the Burdwan District Board for the construction of a steam tramway over the existing district road from Memari to Chakdighi, with the prospect of extending it up to Tarkessar. The Magistrate of the district is not, however, in favour of the project.

173. In Birbhum the outlay incurred by the District Board for the maintenance of roads was Rs. 12,062 on account of original works, Rs. 39,812 under the head of repairs, and Rs. 1,655 under that of village roads, which are looked after by Local Board. The roads were in good order during the year 1897-98. No new railway feeder or any other new communication was opened during the year.

174. In Bankura the budget grants under the heads of "Original Works" and "Repairs" amounted respectively to Rs. 9,217 and Rs. 36,361, and the expenditure incurred under the heads was Rs. 9,180 and Rs. 26,623 respectively. The important works executed were the following:—

(1) The construction of the unfinished portion of the Taldangra and Raipur road, from a little beyond Simlapal to Raipur, the total expenditure on the road being Rs. 5,642-14-3, viz. Rs. 5,000 paid to the Collector of the district for the purpose of acquiring lands, and Rs. 642-14-3 spent in excavation of earthwork.

(2) The construction of the Raipur and Salboni road, which has been only partially finished owing to want of funds.

(3) The construction of some small culverts on the Patroshiro to Mirzapur road, at a cost of Rs. 222-12-6.

During the famine, relief works, 50 miles of new roads were constructed and some of the existing roads were repaired. Owing to all available funds having been diverted to famine relief, the allotment for village roads had to be considerably reduced the total outlay under this head during the year amounting to Rs. 874-13-9. The total length of such roads repaired was 28 miles and 1,267 yards.

175. The Midnapore District Board were unable to provide for original works more than it did during the previous years, owing to the urgent and extensive repairs which the roads under it required during the year under review. The expenditure incurred by the Board on original and repair works during that period was Rs. 18,694 and Rs. 84,073 respectively, the most important original works completed during the year being the construction of seven bridges on the different district roads.

The Tamluk to Contai road and the Ghatal to Vishnupur road were metalled during the year.

The total allotment for village roads in the district was Rs. 13,500, of which Rs. 11,460 were expended in maintaining 1,359 miles of roads.

In 1895-96 the roads in the district could not be properly maintained for want of funds caused by a deficit of Rs. 40,000 which occurred in that year, as noted in paragraph 176 of the Divisional General Administration Report, 1896-97. A very large amount was, therefore, set apart for repairs during the year under report.

176. The cost of repairing metalled roads in the district of Hooghly is very high, so that the amount spent annually for maintaining the metalled roads absorbs most of the funds at the disposal of the Board. The Provincial roads, which were for the last nine years under the control and management of the District Board, were transferred to the Executive Engineer, 2nd Calcutta Division, with effect from 1st April 1897, under orders of Government, Public Works Department, No. 111E., dated the 12th January 1897.

The total length of the metalled and bridged roads in the district is 71 miles, and the total outlay incurred in maintaining them amounted to Rs. 29,787, or Rs. 420 per mile. A sum of Rs. 16,881 was expended on the repair of 423 miles of unmetalled and bridged roads, at the rate of Rs. 40 per mile.

The original works constructed during the year were—

(1) A light iron bridge over the Shybona Jala, on the road from Myapur to Jagatpur, estimated to cost Rs. 2,264, of which Rs. 986 were spent during the year.

(2) A light iron bridge over the Kharigatchee khal, which is under construction, and on which Rs. 501 were spent during the year.

(3) An inspection bungalow at Tarkessur, the expenditure incurred thereon during the year being Rs. 2,516.

Repairs to village roads were carried out by the different Local Boards, under the supervision of the District Engineer's staff, at a cost of Rs. 5,411-13-9.

177. The Howrah-Sheakhala Steam Tramway, which was opened during the year, and the Howrah-Ampta line, which is nearly completed, have much improved the means of communication with the interior of the district. The Calcutta-Cuttack section of the Bengal-Nagpur Railway, which is under construction, will, when completed, remove the difficulty felt by the people living in the interior of the Ulubaria subdivision in coming to the district head-quarters. The condition of the district roads is reported to be satisfactory, but this remark does not apply to village roads, which are described as almost impassable during the rains, many of these communications being intersected by khals or water-courses, where foot-bridges should be constructed. The funds at the disposal of the Board do not, however, admit of such works being taken in hand unless the cost is partially met by local subscription.

178. The subjoined statement shows the length of roads maintained by the District and Local Boards and by Municipalities in each district :—

District.	Description of roads.	By whom maintained.				Remarks.
		District Board.	Local Board.	Municipality.	Total.	
1	2	3	4	5	6	7
		Miles.	Miles.	Miles.	Miles.	
Burdwan ...	Metalled ...	275½	Nil	54	329½	
	Unmetalled ...	246⅞	267½	40	554⅜	
	Total ...	522⅜	267½	94	883⅞	
Birbhum ...	Metalled ...	126	.....	14½	140½	* Represent village roads under the two Local Boards maintained and paid for during the year.
	Unmetalled ..	308	*17	.....	308	
	Total ...	434	17	14½	448½	
Bankura ...	Metalled ...	220	21	28½	269½	
	Unmetalled ...	331	103	7½	441½	
	Total ...	551	124	36	711	
Midnapore ...	Metalled ...	.....	.....	.....	.....	
	Unmetalled ...	.....	.....	.....	.....	
	Total ...	.....	.....	.....	.....	
Hooghly ...	Metalled ...	71	.....	.....	.....	† The municipalities have not furnished the length of metalled or unmetalled roads maintained by them.
	Unmetalled ...	163	260	†.....	.....	
	Total ...	234	260	.....	.....	
Howrah ...	Metalled ...	20	.....	66	86	
	Unmetalled ...	61	.....	20	81	
	Total ...	81	.....	86	167	

179. The marginally-noted statement shows the amount spent on arboriculture in the various districts of this Division.

Arboriculture.

	Rs.		Rs.
Burdwan ...	4,050	Midnapore ...	90
Birbhum ...	1,320	Hooghly ...	378
Bankura ...	...	Howrah ...	499

In Burdwan 1,149 new trees were planted at a cost of Rs. 1,509, and a sum of Rs. 2,541 was spent in maintaining trees already planted, a fact which illustrates the keen interest taken in tree-planting by the Magistrate, Mr. Fisher, to whom every credit is due for what he has already done in this direction. Much useful work under this head was also done in Birbhum, where the planting of trees along the whole length of the Suri-Saithia road is reported as likely to be completed this year, and where Rs. 1,300 have already been allotted for the purpose, and a further allotment of Rs. 900 will shortly be made. In Midnapore the decrease of expenditure under this head is due to the fact that a large number of trees having already grown up are no longer in need of *malis* to look after them. No new trees have been planted for some years past in this district, as most of the district roads, which are now without trees, have no side lands. In Hooghly only 40 new trees were planted. In Howrah about 182 trees were planted, partly by the Howrah Municipality and partly by the District Board.

* * * * * * *

XXX.—LOCAL SELF-GOVERNMENT INSTITUTIONS.

District Boards.

201. The District Boards are reported to have discharged their duties in a satisfactory manner during the year, and to have rendered useful assistance to District Officers as consultative bodies, a special feature of their working being an entire absence of factious oppositions and party spirit. The attendance of the members, too, appears to have been on the whole satisfactory.

The following gentlemen deserve special mention for the good work done by them:—

Babu Banwari Lal Hati, Vice-Chairman, Burdwan District Board.
Rai Lalita Mohon Sinha, Bahadur, Vice-Chairman of the Hooghly District Board.

Local Boards.

202. As regards Local Boards, the attendance of members at meetings in the districts of Burdwan, Birbhum and Bankura was small. The Magistrate of Birbhum brings to notice the fact that eight scheduled roads, which had been transferred to the Rampur Hât Local Board for up keep, could not be managed by them properly, and that, therefore, they had to be transferred back to the District Board, and observes that "Local Boards, so far as this district is concerned, might with advantage be eliminated."

The Magistrate of Bankura is of opinion that the usefulness of these bodies is marred by their want of "sufficient powers and scope of work." In the Midnapore district the average attendance of members of the Local Boards appears to have generally improved during the year. But the work done under their direction has been generally bad. The Magistrate writes:—

"The money spent on village roads is to a great extent wasted; pound administration is very elementary; with no staff and enormous territories under them, the Local Boards are really very helpless."

The Magistrate of Hooghly has offered no remarks on the working of the Local Boards in his district. The Local Boards in the Howrah district were charged with the management of pounds, ferries, village roads and primary education, and their working is described as having been tolerably good. The Ulubaria Local Board has dispensed with the services of the Subdivisional Officer as Chairman, a fact which the Magistrate remarks is not at all to the advantage of that body, on the ground that there is no one else who has the same facilities for seeing the country, and the Local Board road work needs a deal of checking. Mr. Stevenson has left the following remarks on District and Local Boards:—

"My general views are unchanged as regards their utility; pound management generally defective."

Union Committees.

203. No Union Committees exist in the districts of Birbhum and Bankura. The number of these Committees in the Burdwan district was six, as in 1896-97. They have been entrusted with the control of village roads and the inspection of primary schools. During the year under report the Daspur union, in the Ghatal subdivision of the Midnapore district, was abolished under the orders of Government, it being found that the chairman and the members had dealt with the money entrusted to them in an extremely unscrupulous manner. Of the remaining five Union Committees in this district, Panskura and Contai worked satisfactorily during the year. Nawada and Pingla took increased interest in their duties. Jara was too timid of responsibility to do any useful work. The attitude of the Local Boards towards these small rural committees was, it is stated, one of apathy and indifference. The Union Committees in the Howrah district are still infant institutions, and difficulty is often experienced in finding suitable men to serve on these Committees. Mr. Duke writes:—

"Slight as is the account work required of them, it is difficult to get it performed. My impression is that they repair village tracks in a rather lavish manner, and take little or no interest in sanitation, water-supply or anything else."

My own impression is that both Local Boards and Union Committees are institutions much in advance of the times. Their funds are small compared with the work to be done and it requires a great deal of public spirit to attend to the small every-day matters which alone come up before the members, and out of which no particular reputation is to be got.

Municipalities.

204. In the Burdwan district the municipalities continued to work well, and increased attention was paid to sanitation. In the newly-formed Municipality at Asansol, considerable difficulty was at first experienced in collecting the taxes, but two successful prosecutions had had a good effect on the rate-payers. Several latrines

have been erected, and the condition of the bazar has been improved. Altogether the Municipality, with the Subdivisional Officer of Raniganj as Chairman, promises to be a success, the railway members taking an interest in its management. The Suri Municipality in the Birbhum district appears to have worked successfully, the Commissioners in general paying proper attention to its affairs. A general revision of taxes resulted in an increased income. The interests of primary education was carefully looked after, and much was done in furtherance of water-supply and drainage, new wells being sunk where needed, and a portion of a *kutcha* drain made *pucka*. The municipalities in the Bankura district generally are well spoken of. There was an accretion to the income of the Bankura Municipality, caused by the donation of Rs. 1,000 by Rai Ram Bandhu Chatterjee Bahadur for the construction of a ward in the local dispensary. The town, however, is not, the Magistrate adds, so clean as it should be. The elective system is not in force in the Sonamukhi Municipality, as in the two other Municipalities of Bankura and Vishnupur. An improvement in the percentage of attendance is reported as regards the last two bodies, and a falling off in this respect as regards the first. The Tamluk Municipality in the Midnapore district is described to have been managed by its non-official Chairman with considerable zeal. In Chandrakona and Khirpai also a great deal of interest is said to have been taken by the non-official members. Ghatal and Midnapore were fairly well managed, though in the latter there was room for improvement. The working of the Kharar Municipality was anything but satisfactory, but during the year under report the Subdivisional Officer was appointed Chairman, a change from which the Magistrate anticipates good results. This is the only Municipality in which a general election was held during the year. With the exception of the Hooghly-Chinsura Municipality, the District Magistrate, Mr. D. B. Allen, Hooghly, made a thorough and exhaustive inspection of all the municipalities in the district, and his orders and suggestions were of great use in improving the collections and bringing the offices into order. The question of improving the Rishra *basti*, which forms part of the Serampore Municipality and stands on Government land settled with Messrs. Birkmyre and Company, and which has become highly insanitary, has formed the subject of a long correspondence. The matter is now pending with the municipal authorities, who have called upon Messrs. Birkmyre and Company, under section 246 of the Bengal Municipal Act, to carry out the required improvements. The general condition of the municipalities in the district was much the same during the greater part of the year as before. The Magistrate mentions that towards the close of the year the attention of these bodies was drawn, in view of apprehension of the plague, to the necessity of keeping roads, drains and latrines clean, and using disinfectants, with the result that steps have been taken in this direction in all the towns. With regard to the Hooghly-Chinsura Municipality, Mr. Stevenson has left the following remarks :—

"The Chairman does his best, but the obstructionists among the Commissioners are too strong for him."

The following observations of Mr. Duke are reproduced as explaining the difficulties of municipal administration at Howrah, the most important Municipality in the Division, and containing suggestions for improvement :—

"The Howrah Municipality has had a somewhat troubled existence, owing partly to the difficulty of keeping the expenditure within the income, and also in great measure to troubles and contentions regarding the management of the water-works.

"The financial trouble is not likely to be relieved until the Calcutta Municipal Consolidation Act Amendment Bill becomes law, for the Commissioners are resolute not to increase the general rate beyond 7½ per cent., although they are willing to adopt the Calcutta license-tax system if made applicable to coolies. A revaluation relieved the pressure somewhat, and with close economy and great forbearance on the part of Government in exacting payment of instalments of loans, some sort of equilibrium had been established. The threatened visitation of plague has, however, thrown everything out of gear by causing heavy extraordinary expenditure; recourse will have to be had shortly to the Emergencies Loans Act, and if a longer period of payment than two years cannot be allowed, it is hard to see how the Municipality can be kept going.

"The office management of the Municipality is extremely unsatisfactory and extremely difficult to improve, for, although on important questions the Commissioners are ordinarily extremely reasonable, yet when it comes to interfering with the status or emoluments of some petty clerk, it is found that he has a number of supporters amongst the Commissioners, and that any attempt to deal with him will be fiercely opposed. The Secretary of the Municipality is the only person who is really in a position to initiate reforms in the office, and he is made to feel that if he attempts it a great proportion of the Commissioners will become his enemies.

"The difficulties are perhaps principally inherent in the municipal constitution under the present law, and would be diminished if appointments, and still more if dismissals, were withdrawn from the control of the Commissioners."

205. Mr. Duke appears to have done much towards bringing about an equilibrium between the expenditure and the income of the Municipality, and in the notes left by him, Mr. Stevenson freely acknowledges the Magistrate's efforts in this direction. One of the matters now engaging the serious attention of the Commissioners is that of placing the water-works, which have been found to be faulty both in design and execution, on a satisfactory basis, with the assistance of Mr. Hughes, Engineer to the Calcutta Corporation his services having been engaged for the purpose with the sanction of Government. The management of the Bally Municipality, which was most unsatisfactory at the beginning of the year, has, since the present Chairman assumed office, markedly improved.

* * * * *

XXXVII.—GENERAL REMARKS.

234. Having taken charge of the Division after the close of the year, my remarks under this head must necessarily be brief and perfunctory. As noticed elsewhere, the most prominent feature in the history of the year is the seasonable and well-distributed rainfall, which not only dispelled the apprehensions entertained during the early part of the period under review, but produced a harvest the like of which has not been reaped for several years past. The immediate result of the advent of the new rice was a reduction in the prices of food-grains and an appreciable improvement in the condition of the lower classes, among whom there had been considerable pinching. The effects of the strain they had undergone are, however, discernible in many directions. Great numbers left their houses in quest of employment. The excise revenue decreased to the extent of Rs. 4,702, principally under the head of pachwai, but this apparently was owing to a change in the rules. The number of sales and mortgages increased, as did that of deeds registered. The revenue from the sale of stamps advanced. The increase in crime was marked specially in the case of offences against property. Judging from figures, the considerable increase in imports, particularly under the heads of grain and pulse, cotton goods and European piece-goods, the improvement in the revenue derived from the income-tax, and the larger attendance at fairs, may be mentioned as evidence of the return of better times.

Another satisfactory point in the record of the year is its exceptional healthiness. Fever, which annually claims the largest number of victims, was unusually sparing in its ravages. The inroads of cholera were sensibly diminished, and the mortality from small-pox, though somewhat higher than in 1896, was decidedly lower than in 1895. With the exception of Local Boards and Union Committees, the local bodies appear to have administered their affairs with success during the year, and increased attention was paid to water-supply, while some improvement was made in sanitation within urban areas, in view of apprehensions of the plague.

235. Speaking for the whole Division, fair progress was made in the work of transferring chaukidari chakran lands to the zamindars under section 80 of the Chaukidari Act. The ghatwali settlements in Bankura seem to have been duly proceeded with.

236. The most remarkable event of the year was the earthquake of 12th June 1897, the severest experienced within the memory of living men, and resulting in serious damage to Government and private buildings all over the Division.

RESOLUTION ON THE REPORT OF THE BOARD OF REVENUE ON THE LAND REVENUE ADMINISTRATION OF THE LOWER PROVINCES FOR THE YEAR 1897-98.

REVENUE DEPARTMENT—LAND REVENUE.

Darjeeling, the 16th October 1898.

RESOLUTION.—No. 3234L R.

READ—

The Report of the Board of Revenue on the Land Revenue Administration of the Lower Provinces for the year 1897-98.

THE Report was submitted to Government with fair punctuality (30th August).

COLLECTION OF LAND REVENUE.

2. *Financial results.*—The current demand on account of the land revenue in Bengal for the past five years is shown below:—

CLASS OF ESTATES.	1893-94.	1894-95.	1895-96.	1896-97.	1897-98.
1	2	3	4	5	6
	Rs.	Rs.	Rs.	Rs.	Rs.
I.—Permanently-settled estates ...	3,22,65,396	3,22,61,833	3,22,82,525	3,23,02,286	3,23,03,784
II.—Temporarily-settled estates ...	28,10,713	28,21,520	28,35,046	28,94,880	29,17,553
III.—Estates held direct by Government	34,08,777	34,84,498	35,25,890	35,55,897	36,96,820
Total ...	3,84,85,386	3,85,67,851	3,86,43,461	3,87,53,063	3,89,18,157

There was an increase in the total current demand of Rs. 1,65,094, shared by all three classes of estates, the largest fluctuation being in class III, which is mainly due to the settlement of the Kolhan Estate in Singhbhum. The increase in class II was due to new settlements, resettlements, and settlements at progressive rates, of which the most important were of certain tea estates in Jalpaiguri, of several Sundarbans lots in the 24-Parganas, and of two Government fisheries in Malda.

3. The demands, collections, and balances of land revenue for the same period are shown in the following table:—

YEAR.	DEMAND.			COLLECTIONS.			Remissions.	BALANCES.			Percentage of total collections on total demand (column 7 on column 4).	Percentage of total collections on current demand (column 7 on column 2).	Percentage of current collections on current demand (column 5 on column 2).
	Current.	Arrear.	Total.	Current.	Arrear.	Total.		Current.	Arrear.	Total.			
1	2	3	4	5	6	7	8	9	10	11	12	13	14
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.			
1893-94 ...	3,84,85,396	16,11,646	4,00,97,034	3,72,03,505	12,39,743	3,84,43,259	1,31,405	12,65,118	3,67,288	15,32,376	95·87	99·89	96·66
1894-95 ...	3,85,67,851	15,66,095	4,01,33,946	3,72,10,347	12,99,076	3,85,09,423	92,741	13,37,463	3,10,418	16,47,881	95·93	99·54	96·48
1895-96 ...	3,86,43,461	12,72,463	3,99,15,924	3,75,73,616	9,49,576	3,85,23,192	87,220	10,44,892	2,10,020	12,55,512	96·63	99·81	97·23
1896-97 ...	3,87,53,063	13,02,153	4,00,55,216	3,74,98,106	9,06,531	3,84,04,637	1,73,303	12,13,473	1,85,644	13,99,076	95·97	99·30	96·73
1897-98 ...	3,89,18,157	14,50,231	4,03,48,381	3,74,92,944	11,56,411	3,86,49,355	1,49,254	13,31,146	2,28,626	15,49,772	95·79	99·31	96·34

4. *Collections, balances, and remissions.*—The current demand increased by Rs. 1,65,094 in comparison with that of 1896-97, and the current collections rose by Rs. 6,838, with the result that the percentage of current collections on current demand fell from 96·73 to 96·34. It was remarked in the Resolution on last year's report that the punctuality shown in the payment of Government revenue, in spite of general shortness and in extensive areas, almost total failure of crops, afforded a remarkable indication of the large reserve resources in these Provinces. During the first-half of the year now under report the effects of scarcity and famine continued to be felt, and the latter half of it was embarrassed by a cyclone and an earthquake. Good crops were, however, reaped, and there is everywhere evidence of returning prosperity. The arrear collections amounted to Rs. 11,56,411,—or 80·86 per cent. of the arrear demand, against a percentage of 76·55 in 1896-97. The arrear balances rose from Rs. 1,85,644 to Rs. 2,28,626,—a higher figure than they have stood at since 1893-94. The short collections, where they were short, were mainly attributable to the cyclone and storm-wave of the 24th October 1897 in Chittagong, to large remissions owing to failure of the crops in the Khurda Government Estate in Puri, and to the delay in realising the arrears of Government revenue in the estate of Kotdesh, the circumstances of which were peculiar and have been separately reported to Government. The collections in Government estates were also affected by the prevailing scarcity. The total balance, arrear and current, outstanding at the close of the year represented a percentage of 3·84 on the total demand as compared with 3·49 in the previous year. Of this, 94 per cent. was good and recoverable.

The total amount of land revenue remitted during the year was Rs. 1,49,254, of which the greater part, as usual, was in estates held direct by Government. The remissions of grace, amounting to Rs. 18,580, were considerably less than in the preceding year, when they had been granted to the extent of Rs. 88,151. They were sanctioned chiefly in the districts of Backergunge (Rs. 5,650), Patna (Rs. 3,640), and Cuttack (Rs. 2,203), to the tenants of Government estates on account of failure of crops. On the other hand, remissions of right rose from Rs. 38,603 during 1896-97 to Rs. 1,20,452, of which no less than Rs. 84,513 were on the Government estate of Khurda in Puri, where remissions on account of failure of crops are classified as of right, partly because the leases provide that remissions are to be granted for loss of crops. They were also heavy in Backergunge (Rs. 21,296). The nominal remissions amounted to Rs. 10,222, of which Rs. 2,567 represented the rent of vacant godowns in the Orphanganj market.

5. *Permanently-settled estates.*—Out of a total demand, current and arrear, from estates in class I of Rs. 3,26,19,028, the sum of Rs. 3,21,94,228 was realised. The percentage of the collections on the demand, after excluding from the demand, sums the recovery of which was in suspense and adding to the collections, sums realised but not credited during the year, amounted to 99·11 per cent. as against 99·21 in the preceding year and 98·91 in 1895-96. The current collections fell short of the standard of 99 per cent. in 16 districts, of which 6, however, collected more than 98 per cent. The districts which collected less than 98 per cent. of the current demand were Saran, Muzaffarpur, Khulna, Nadia, Manbhum, Shahabad, Palamau, Chittagong, Singhbhum, and Darjeeling. In Darjeeling, as in the previous year, excluding a fictitious demand of Rs. 474, the true balance was nil. The current balance in Saran amounts to Rs. 26,218, of which nearly half was on account of the last kist of the year. Out of Rs. 21,142 due in Muzaffarpur, Rs. 16,014 represented the arrears of the March kist, for the realisation of which coercive measures could not be taken before the close of the year, and in Khulna, out of a balance of Rs. 11,327, the sum of Rs. 10,440 has been realised since the close of the year. Rupees 20,221 out of the total balance of Rs. 20,708 in Nadia were received by remittance transfer receipt, but could not be credited in the accounts within the year, and in Manbhum the whole balance of Rs. 2,532 was due from the Patkum Encumbered Estate. In Shahabad the percentage of current collections improved slightly, but the balance outstanding, viz. Rs. 64,187, was still large; the short collections are attributed partly to the scarcity and partly

to the fact that the raiyats could not sell their opium until after the March kist, on account of which the greater part of the balance is due. In Palamau Rs. 2,402 were due from the jagirdari tenures which, though raised to the status of estates, could not be dealt with under Act XI of 1859, owing to the non-completion of the Land Registration proceedings. The large balance (Rs. 50,778) in Chittagong was chiefly the result of the destruction wrought by the cyclone and storm-wave. Rupees 2,100 in Singhbhum were due from the Porahat Estate on account of police contribution, and were recovered after the close of the year.

The realisations of the arrear balances were less than 99 per cent. in 15 districts, of which, however, the collections in the 24-Parganas, Chittagong, Midnapore, and Burdwan exceeded 98 per cent., and in Dacca, Murshidabad, and Noakhali the arrears were trifling. Out of the total arrear balances of Rs. 45,103, no less than Rs. 41,535 is outstanding in the Patna Division, the largest defaulter being the district of Shahabad (Rs. 24,391). Balances of over Rs. 1,000 were also due in the districts of Patna, Bhagalpur, and Bankura.

The total amount of land revenue due from Wards' estates at the close of the year was Rs. 27,662 in comparison with Rs. 7,192 in 1896-97 and Rs. 12,243 in 1895-96. The largest amounts were due from estates in Shahabad, Jessore, Chittagong, Saran, Backergunge, and Champaran. In Shahabad the Mahula Ward's Estate was in arrears to the extent of Rs. 9,058, owing, it is reported, to the famine, but this estate was unpunctual in its payments during the previous year also. The arrears due from the Sridharpur Estate in the districts of Jessore and Backergunge remained unpaid, with the sanction of the Board, all available funds being required to prevent the sale of a portion of it on account of non-payment of patni rents and in execution of a decree. The balance of Rs. 4,319 in Chittagong, which has since been realised, was attributable to the effects of the cyclone. It is reported that the balance outstanding in the Saran district will be paid as soon as funds are available, and the arrears due in Champaran have since been realised. The Lieutenant-Governor observes that the amount due from wards' estates was larger than it has been for some years past. This was no doubt due to the scarcity, but he desires to repeat what has been often said before that there can be seldom adequate reason for a ward's estate failing to pay its revenue punctually on the due date.

6. *Temporarily-settled estates.*—The total demand, current and arrear, from temporarily-settled estates amounted to Rs. 31,99,444 against Rs. 31,31,078 during the previous year, and the total collections to Rs. 28,78,277 in comparison with Rs. 28,51,637 in 1896-97. The percentage of total collections on the total demand was 89·96 against 91·08 in the previous year and 93·32 during 1895-96. The results of collections in each subdivision of this class during the year under report as well as for the preceding year are exhibited below:—

Classification of Estates.	Years.	Percentage of current collections on current demand.	Percentage of arrear collections on arrear demand.	Percentage of total collections on total demand.
1	2	3	4	5
II (*a*) Settled for periods with the proprietors.	1896-97 ...	94·99	81·84	94·38
	1897-98 ...	92·35	96·59	92·59
II (*b*) Private estates leased to farmers for periods.	1896-97 ...	81·73	90·51	83·44
	1897-98 ...	84·81	84·09	84·70
II (*c*) Government estates leased to farmers for periods.	1896-97 ...	82·62	75·18	81·48
	1897-98 ...	83·53	76·52	82·29
Total ...	1896-97 ...	92·01	79·67	91·08
	1897-98 ...	90·29	86·56	89·96

The percentage of collections shows a falling off in class II (*a*), and an improvement in classes II (*b*) and (*c*), but the general result is worse than in the preceding year. The unsatisfactory results in the case of Government and private estates leased to farmers formed the subject of special comment in the Resolution of the previous year. The improvement now shown is very slight, and a special consideration of the subject is promised by the Board, who have called for the reports from Commissioners on it. The Lieutenant-Governor is very gravely impressed with the defects of the farming system, defects which have been noticed again and again. He trusts that the Board will go thoroughly into the matter, and will be glad to see reports furnished to them with any comments or orders the Board may pass upon them. The districts of Burdwan, Hooghly, Dacca, and Faridpur have failed to collect 50 per cent. of the current demand in estates of this description, all of them having been unfavourably noticed last year. Collections in Gaya and Muzaffarpur, which were similarly noticed, have improved, though in Gaya they are still poor. The current collections in the districts of Burdwan and Palamau in the case of Government estates let out in farm also fell short of 50 per cent. The standard of 95 per cent. fixed for current collections in temporarily-settled estates of all classes, was reached or exceeded in 17 districts only, of which 5, namely, Birbhum, Jalpaiguri, Chittagong, Darjeeling, and Manbhum, realised their demands in full. In Puri the large balance of Rs. 81,075 is due from the Kotdesh Estate, which was sold for arrears in 1896, and which it was not considered advisable to sell again for arrears that have subsequently accrued pending the decision of a suit to set aside the first sale. In Midnapore, Khulna, Backergunge, and Shahabad the outstanding balances are also large. The collection of arrears was specially poor in the case of Government estates leased to farmers in the districts of the 24-Parganas (20·85 per cent.) and Shahabad (23·28 per cent.), and of private estates similarly held in Gaya, where, however, the total balance outstanding was small.

7. *Estates held direct by Government.*—During the year under report there were altogether 2,739 estates held direct by Government, of which 2,495 were owned by Government as proprietor and 244 were private estates under Government management. The current demand increased from Rs. 35,55,897 to Rs. 36,96,820, and the total demand from Rs. 42,24,976 to Rs. 45,29,909, out of which Rs. 35,76,850, or 78·96 per cent., were collected and Rs. 1,43,829 remitted, leaving an unrealised balance of Rs. 8,09,230, or Rs. 4,355 less than in the previous year.

The general results are compared below with those of the previous year in each subdivision of this class:—

Classification of Estates.	Years.	Percentage of current collections on current demand.	Percentage of arrear collections on arrear demand.	Percentage of total collections on total demand.
1	2	3	4	5
(*a*) Managed for proprietors.	1896-97 ...	80·27	53·29	72·12
	1897-98 ...	80·45	82·02	80·77
(*b*) Owned by Government as proprietor.	1896-97 ...	79·12	69·24	77·91
	1897-98 ...	79·19	76·26	78·66
Total ...	1896-97 ...	79·34	63·92	76·90
	1897-98 ...	79·37	77·15	78·96

There was improvement under all heads in both classes of estates as compared with the previous year, though the results fell considerably short of the prescribed standards. This was due to the distress that prevailed during the first-half of the year, and the Lieutenant-Governor hopes that the

effect of good harvests will be manifested in the collections of the arrears during the current year. The standard of 90 per cent. for current collections in both classes was reached or exceeded in 14 districts against 12 in 1896-97, while in one other district against 5 in the previous year it was exceeded in one class of estates only. The results were very poor in Murshidabad, where the percentages of current collections on the current demand were only 39·01 in the case of estates managed for proprietors, and 52·07 in that of Government estates. In Jalpaiguri the aggregate of collections, current and arrear, was large, amounting to Rs. 4,15,155, or 111 per cent. on the current demand, but the current arrears amounted to Rs. 1,38,226, the percentage of current collections being 62·96. The arrear balances were, however, nearly all paid up. This result shows great improvement on that of the previous year. The Lieutenant-Governor hopes, however, that the large balance still due will be reduced in the current year. In Midnapore collections continued to improve, and the percentage of current realisations also rose in Jessore and Khulna, which were unfavourably noticed last year, though in Shahabad, Balasore, and Palamau they still continued to leave much to be desired. The largest amount outstanding was in Chittagong, where, out of a total current demand of Rs. 5,01,410, there was an unrealised balance of Rs. 1,56,567 in consequence of the cyclone and storm-wave, and the lenient treatment extended to the tenants in consideration of their reduced circumstances. Arrear collections were worst in the districts of Midnapore, Faridpur, Tippera, Puri, and Lohardaga. There was a marked increase in the collections of miscellaneous revenue, due almost entirely to the large recoveries of survey and settlement charges, amounting to Rs. 7,56,270, principally in the districts of Saran, Champaran, and Muzaffarpur. The progress of realisations has been most satisfactory, the balance outstanding at the close of the year on this account from estates on which demands were made, being Rs. 9,404 only.

8. *Sale of Government lands.*—Owing to the expense and inconvenience of their management, 43 petty Government estates with an area of 5,047 acres and an annual rental of Rs. 6,611 were sold during the year under report, subject to a revenue fixed in perpetuity equal to the annual rental. The prices realised were Rs. 41,477, or rather over six times the annual rental. These were less than in the preceding year, but the fact that six times the existing rent was paid for a settlement in perpetuity at that rent, shows that rents in these Government estates were moderate.

9. *Particulars of estates held direct.*—Particulars of estates held direct by Government, classified by Divisions, and showing the demands, cost of management, and total collections during the year are given below:—

Division.	Government Estates.		Private Estates.		Total.		Cost of management.	Percentage of cost on current demand.	Current collection.	Percentage of current collection on current demand.
	Number.	Current demand.	Number.	Current demand.	Number.	Current demand.				
1	2	3	4	5	6	7	8	9	10	11
		Rs.		Rs.		Rs.	Rs.		Rs.	
Burdwan	283	65,124	6	2,35,369	289	3,00,493	28,694	9·6	2,66,251	88·60
Presidency	211	3,43,003	41	13,923	252	3,56,935	16,309	5·7	2,90,986	83·43
Rajshahi	71	5,11,963	33	18,738	104	5,30,720	42,977	7·9	4,08,337	72·82
Dacca	634	3,88,107	106	1,21,491	740	5,09,598	27,019	5·3	4,52,500	88·80
Chittagong	236	6,97,562	28	15,029	264	7,12,591	63,341	9·48	5,26,609	73·90

Total in 1896-97 ...	2,411	30,40,820	242	5,15,017	2,653	35,55,837	2,36,646	6·05	28,31,436	79 34

In 11 districts, namely, Birbhum, Darjeeling, Bogra, Pabna, Tippera, Noakhali, Patna, Gaya, Shahabad, Darbhanga, Cuttack, against 10 in the previous year, the cost of management exceeded 10 per cent. on the current demand. The Lieutenant-Governor is aware that the Board have given special attention to the question of reducing the cost of management to 6 per cent.,

and that there are special causes which make it impracticable to do so everywhere.

10. *Road and Public Works Cesses.*—The following table shows the demands, collections, remissions, and balances on account of the road and public works cesses during the year under report as compared with the figures for the two preceding years :—

Year.	Net demand after excluding reductions and remissions.			Collections (including advance collections).	Percentage of collections on current demand.	Balances.	Percentage of balances on gross demand.	Remissions.
	Current.	Arrear.	Total.					
1	2	3	4	5	6	7	8	9
	Rs.	Rs.	Rs.	Rs.		Rs.		Rs.
1895-96 ...	84,88,612	14,80,123	99,68,735	82,58,761	97·2	17,27,671	17·3	84,859
1896-97 ...	86,61,682	17,24,415	1,03,86,097	86,16,072	99·4	17,91,576	17·2	63,283
1897-98 ...	89,56,309	17,82,378	1,07,38,687	88,71,693	99·0	18,75,440	17·4	81,813

The current demand shows an increase of Rs. 2,94,627, due mainly to the revaluation of the districts of Midnapore, Patna, Monghyr, and Bhagalpur, and to partial revaluations in the districts of Jessore, Dacca, Mymensingh, Backergunge, Tippera, and Singhbhum. Both the cesses were levied at the maximum rate of one anna in the rupee in the 43 districts in which Act IX (B.C.) of 1880 is in force. While the gross rental or valuation in these districts amounts approximately to slightly over sixteen crores of rupees, the current land revenue demand is little more than 3¼ crores. Ninety-nine per cent. of the current demand was realised during the year under report as against 99·4 in the previous year. In 27 districts the current collections were below 90 per cent. on the current demand, and in 13 districts the proportion of arrear collections to the demand was below 60 per cent. The aggregate collections were higher in amount than in any preceding year, but the percentage of collections on the demand was somewhat less than in 1896-97. This is attributed generally to the effects of the recent scarcity.

11. *Remittance of Land Revenue and rent by means of money-orders.*—There was an increase in the number of money-orders issued for the payment of revenue and cess, from 189,502 to 193,819, and in the amount covered by them, from Rs. 17,23,411 to Rs. 18,24,014. The system, it is stated, is becoming more appreciated by owners of petty estates, while owners of large properties prefer payments through their agents at head-quarters. The largest numbers of orders were sent in the districts of Chittagong, Hooghly, Faridpur, and Dacca.

The following table gives the available statistics of the working of the system of payment of rent by money-orders during the last five years :—

Year.	Number of money-orders issued for rent.	Amount.	Number of such orders refused.	Amount.
1	2	3	4	5
		Rs.		Rs.
1893-94 ...	43,206	6,17,146	16,959	1,59,606
1894-95 ...	40,834	5,87,371	13,772	1,45,695
1895-96 ...	43,708	6,20,097	14,503	1,59,890
1896-97 ...	50,488*	7,40,526*	14,070*	1,73,724*
1897-98 ...	51,224	6,90,094	11,120	1,22,001

* These are the corrected figures.

12. *Operation of the Sale Laws.*—The working of the Sale Laws during the last five years is shown below:—

Year.	Number of estates and shares and interests liable to sale.	Sold.				Percentage of column 6 on column 2.	Revenue demand of estates sold.	Amount of defaults.	Amount realised by sale.
		Estates.	Shares.	Interests.	Total.				
1	2	3	4	5	6	7	8	9	10
							Rs.	Rs.	Rs.
1893-94	16,239	991	438	...	1,429	8·7	1,43,659	45,051	10,72,584
1894-95	15,275	950	516	...	1,466	9·6	1,93,872	73,634	11,11,334
1895-96	16,237	966	539	2	1,507	9·2	2,08,232	2,38,031	12,85,081
1896-97	20,272	1,114	492	1	1,607	7·9	2,00,650	85,008	9,80,406
1897-98	20,977	1,109	536	...	1,645	7·8	1,80,477	73,466	10,96,928

20,977 estates, shares, and interests became liable to sale for non-payment of revenue, of which 1,645, or only 7·8 per cent. on the number that became liable to sale, were actually sold, as against 7·9 in 1896-97. The number of estates sold (1,109) represents only ·6 per cent. of the total number of estates in Bengal (179,750). The prices realised by sale rose from 4·9 to 6·07 times the revenue demand on the properties sold. Out of 314 appeals preferred to the Commissioner against sales, 66 were successful, and recommendations for the annulment of the sales were made to Government in 21 cases on the ground of hardship. The figures are noteworthy.

Defaults were most numerous in Shahabad (5,848), Muzaffarpur (1,343), Saran (1,256), Chittagong (1,125), Darbhanga (1,115), and Mymensingh (1,069). In the Resolution of last year the opinion was expressed that the sale law in the Shahabad district had been worked with undue leniency, and in the year under report, though the total number of sales increased, the proportion of sales to defaults was, as in the preceding two years, very low, being only 3·5 per cent. This leniency is ascribed to the existence of famine in pargana Chainpur, and may be justifiable in the special circumstances of the year, but the Lieutenant-Governor observes that the proportion of defaults to the number of estates and shares on the revenue roll in this district was as high as 42·4 per cent., while in Darbhanga, for instance, where the stress of famine throughout the district was many times more severe, the corresponding percentage was 6·9 only. The Commissioner is again requested to give particular attention to this subject, specially in Shahabad. With regard to Chittagong the Commissioner remarks that, considering the bad circumstances of the year, the estates and tenures brought to sale were very few.

The Lieutenant-Governor again observes that there were excessive delays in holding sales for arrears of each kist in Burdwan, Bogra, Patna, Saran, Bhagalpur, and Purnea. A similar state of things was noticed last year in connection with the sales in all these districts, with the exception of Bogra. There may be good reasons for not proceeding to sale at all, but once that measure is decided to be necessary, no advantage of any sort is gained, least of all to the owner, by a procedure, which is halting and uncertain. The usual difficulties in connection with the working of the new Tauzi Rules are assigned as the cause, but as remarked last year if there be difficulties in the way of understanding the new Tauzi Manual they would affect all districts, and there is no reason why if they have been overcome in some of them they should not be overcome in all. The Lieutenant-Governor agrees with the Board that if the ministerial officers are incapable of understanding the rules, their services must be dispensed with.

13. *Working of the Public Demands Recovery Act, I (B.C.) of 1895.*—In consequence of the alterations made in the certificate procedure by Act I (B.C.) of 1897, a revised Certificate Manual has been prepared by the Board and has since been submitted to Government for approval. Complaints have been made in the Burdwan, Patna, and Presidency Divisions that the provisions of section 21 of Act I (B.C.) of 1895, as amended by Act I (B.C.) of 1897, have interfered with the holding of certificate sales, and by discouragement of bidders increased the difficulty in the realisation of public demands.

By the section referred to the debtor is enabled to deposit the amount due with a penalty within 30 days of the sale and so get the sale set aside. The new Act only came into operation on 31st March 1897, and the Lieutenant-Governor agrees with the Commissioner of Burdwan in thinking that it is too early to pronounce any opinion on the working of the section. His Honour, however, desires that the matter may form the subject of special consideration in the report for 1898-99.

The following statement shows the number of certificate cases instituted and disposed of during the year under the different classes of public demands:—

Classification of demand.	Number of cases pending from last year.	Number filed during the year.	Total.	Disposed of during the year.	Pending—		
					More than six months.	Less than six months.	Total.
1	2	3	4	5	6	7	8
I.—Demands of all kinds under section 5 ...	359	1,358	1,717	1,309	142	266	408
II.—Arrears of rent due to Government, clause ( ), section 7	5,320	25,662	30,982	23,800	1,037	6,145	7,182
III.—Embankment dues, section 60, Act VI (B.C.) of 1873	1,137	6,633	8,070	5,526	456	2,088	2,544
IV.—Water-rates, Act IX (B.C.) of 1876 ...	217	2,405	2,622	2,544	46	32	78
V.—Cesses, Act IX (B.C.) of 1880	52,516	101,663	154,179	109,596	14,945	29,728	44,673
VI.—Demands of the Court of Wards, clause (b), section 7	7,033	5,458	12,490	8,542	2,439	1,509	3,948
VII. All other demands under section 7 ...	11,928	29,621	41,549	29,368	5,085	10,098	13,181
Total ... 1897-98...	78,809	172,800	251,609	179,596	22,148	49,866	72,014
Total ... 1896-97...	59,302	174,572	233,874	155,005	21,004	57,805	78,809

There was a net decrease of 1,772 in the number of certificates filed. The increase of 7,270 cases filed for realisation of arrears of rent due to Government was due to stricter measures taken to enforce the payment of demands in Chittagong, Midnapore, and Jalpaiguri. All the four last classes show a decrease. The decrease in class V—"Cesses" (101,663 as against 104,822) occurred chiefly in the Patna Division, mostly in Gaya. In the Chittagong Division the release of the Sarail Estate from the management of the Court of Wards, and the death of the ward, in consequence of which institutions were kept in abeyance pending registration of the names of his heirs, resulted in the filing of fewer cases under class VI. The decrease of 3,194 cases in class VII is chiefly due to the fact that almost all the costs of settlement of the Dakhin Shahbazpur Estate in Backergunge had been previously recovered, and that fewer certificates were issued against the tenants of the Banaili Estate in the district of Bhagalpur for the realisation of survey and settlement costs. The proportion of certificates disposed of to the total number for disposal rose from 66·3 per cent. in the previous year to 71·3 per cent. The number of certificates filed on account of the realisation of water-rates shows a steady and satisfactory decline from year to year. The proportion of cases disposed of was highest in the Orissa Division and lowest in Chota Nagpur.

In the Resolution on the report of the preceding year, the serious attention of the officers concerned was drawn to the unsatisfactory state of the certificate work in the Burdwan Division. During the year under review the percentage of disposals rose from 54·0 to 65·3, but the percentage (59·5) of the cases pending for over six months was still higher than in any other Division. It is reported that explanations were submitted of the state of affairs previously noticed, but there is still room for much improvement. In the Burdwan district the number of cases pending over six months increased from 1,852 to 3,335, or a percentage of about 50 on the total number remaining for disposal. The majority of these cases are for arrears of cesses and Court of Wards' demands. In Hooghly there was a satisfactory increase of 5,904 in the number of cases disposed of, but the number of cases pending over six months nevertheless increased, and was no less than 7,442 at the close of the year. In Bankura, too, there are heavy arrears of old cases. In the Patna Division more than two thousand cases were pending over six months in the districts of Shahabad and Saran at the close of the year. The number of cases instituted during the year and pending at its close in Saran was noticeably

high. The Lieutenant-Governor joins with the Board in hoping that the new sliding scale of establishment recently sanctioned may prevent the accumulation of undisposed of cases in future.

14. *Compulsory measures for realisation.*—Of the cases in which the demand was realised, 29·2 per cent. were disposed of on issue of notice, 50·6 per cent. after attachment of property, and 2·8 per cent. after actual sale; the corresponding figures in the previous year were 32·4, 51·7 and 3·1 per cent. In Backergunge sales were required in one-fourth of the cases disposed of. The good effect of preliminary post-card notices appears to be wearing off in Chittagong, where it was once most effectual. The number of persons imprisoned for non-payment of public demands decreased from 37 to 22, of whom 15 were released without payment of the debt.

Administration of Land Revenue.

15. *Management of Government Estates.*—The grant at the disposal of the Board, calculated at the rate of 9½ per cent. on the collections for the management of Government estates during the year, and for miscellaneous and sanitary improvements in connection with them, amounted to Rs. 4,71,579: the expenditure incurred is shown below:—

	Allotment, 1897-98.	Expenditure, 1897-98.	Allotment, 1896-97.	Expenditure, 1896-97.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
Grant of—				
(*a*) Management proper ...	4,71,579	2,42,664 (*a*)	4,20,000	2,36,646 (*a*)
(*b*) Sanitary improvements ...		60,316 (*b*)		35,633 (*b*)
(*c*) Miscellaneous and agricultural improvements.		1,38,089		1,11,236 (*c*)
Total ...	4,71,579	4,41,069	4,20,000	3,83,515

In the previous year the Lieutenant-Governor had occasion to remark that the failure to make a full use of the grants allotted had not been satisfactorily explained. The results of the year under report in this respect are still less satisfactory. Out of a total of Rs. 2,28,915 available for agricultural, miscellaneous and sanitary improvements, the amount expended was Rs. 1,98,405 only, leaving a saving of Rs. 33,586. No explanation of the failure to spend the full allotments has been given. As was remarked in the Resolution of last year, when funds are available for miscellaneous and sanitary improvements, which are so much required, failure to spend them in a year of partial distress should be explained. The saving was common to four Divisions: Bhagalpur (Rs. 1,343), the Presidency Division (Rs. 4,000), Rajshahi (Rs. 9,000), while in the Patna Division Rs. 17,285 remained unspent out of Rs. 37,660 provided for expenditure. The Lieutenant-Governor requests that a special report may be submitted explaining the difficulties experienced in giving effect to the wishes of Government in this matter. Of the total sum expended, the largest amount was spent on tanks and wells and drainage and embankments. The grant of 1 per cent. on collections made over to the Director of Public Instruction for educational purposes in connection with Government estates amounted to Rs. 47,281, but the amount actually spent was Rs. 61,950. The excess is explained to be due to the fact that separate accounts have not in all cases been maintained in respect of the sums allotted, which have been supplemented by grants by the District Boards and from other sources. Details are given of the expenditure involved, and the allotment is reported generally to have been satisfactorily utilised. The 1½ per cent. grant on roads and communications amounted to Rs. 61,545, but it is stated that for similar reasons it is not possible to show separately the expenditure incurred in connection with Government estates. The same point was noticed last year, and it was then reported that attempts would be made to procure the

information. The Lieutenant-Governor would be glad if further details could be furnished in future. Granting that separate accounts are not kept and that the expenditure from the allotment is merged in the expenditure from other sources, there should be no difficulty in ascertaining what roads in connection with Government estates are maintained by the District Board and what sums were spent upon them during any particular year. The special allotment for agricultural and sanitary improvements, amounting to 3 per cent. on collections, yielded Rs. 1,41,676; the expenditure amounting to Rs. 1,43,978. The subject of introducing new staples and improved agricultural machinery will be dealt with in detail separately, but the reports generally are said to show a record of failure.

16. *Inspection of accounts.*—The usual inspections were made of the registers and accounts of the Government estates, but no material irregularities were detected. The working of the revised rules of management introduced in the previous year has not been specially noticed.

17. *Condition of the raiyats.*—In common with the rest of the Province, the tenants of Government estates suffered in parts from the scarcity of the first-half of the year, though their condition generally had improved towards its close. Noticeably in Orissa and Chota Nagpur relief in various forms had to be given, but by the end of the year the outward signs of distress had mostly disappeared. In Bankura the raiyats had not recovered from the effects of the scarcity by the end of the year, but in Jessore and Khulna and in the Patna Division the good harvests of 1897-98 had made amends for the drought of 1896-97. In Malda the crops on the Government estates are reported to have been poor for some time past, but the cold-weather harvest was good. In Murshidabad the raiyats suffered from the failure of the mulberry crop, and in the Rajshahi Division from the low price of jute. A large area bordering on the Jumna was rendered sterile by deposits of sand in the Pabna district, and the same effect was produced in parts of Mymensingh by the earthquake of June 1897. A gradual deterioration in the condition of the khas mahal raiyats in Noakhali is reported as the result of a series of bad years, marked by the occurrence of drought, salt-water inundation, betel-nut plague and cattle-disease. The cyclone in Chittagong affected the raiyats of Government estates along with those of private zamindars.

18. *Survey and settlements.*—The leading features of the year in the settlement of Government and temporarily-settled and private estates under the control of the Director of Land Records are shown below, though the survey and settlement work in the Province generally has as usual been separately reviewed in detail for the year ending 30th September 1897 in Government Resolution No. 1491, dated 4th April 1898:—

Government and temporarily-settled estates.

Name of estate or tract under settlement.	Estimated area in square miles under settlement of revenue or rent.	Total number of villages.	Area cadastrally surveyed during the year. It has been decided to postpone for a year the resurvey and revision of rents in the Majnamutha and Jalamutha estates in Midnapore. A proposal for the entertainment of a surveyor at an annual cost of Rs. 1,200 or Rs. 1,500 for the maintenance of the map of the town of Calcutta, which was prepared at a total expenditure of Rs. 2,38,063, after a survey ending in 1894, was accepted during the year; half the cost will be borne by Government and half by the Corporation.

114 original settlements, 176 resettlements and 225 summary settlements were completed during the year, with a net increase of revenue amounting to Rs. 1,47,717. The settlement of the Kolhan Government estate in Singhbhum was completed in 1896-97, and the final report has since been reviewed by Government. The total rental of the estate was raised from Rs. 64,829 to Rs. 1,77,300, the increase of Rs. 1,12,471 (or 173 per cent.) being chiefly due to extension of cultivation and to the assessment for the first time at a low rate of high lands locally termed *gora*. The collection of the current demand during 1897-98, as fixed by the new settlement, was 100 per cent., and the Lieutenant-Governor agrees with the Board that this was a satisfactory justification of the settlement. Good progress was made in the settling of rents in Orissa, and the completion report of the operations in Chittagong will be shortly submitted. The collection of the new revenue in the Palamau Government estates, the settlement of which had been completed in the previous year, was satisfactory, amounting to about 96 per cent. of the demand. The final reports of the settlements of the Darjeeling Terai and the Patashpur estates in Midnapore are in course of submission. In Bankura the total area of ghatwali lands under settlement is 271 square miles. The settlement, which is being conducted on an amicable basis, was practically completed during the previous year in the ghats which pay quit-rent direct to Government or which pay no quit-rent at all. The papers were, however, revised during the year. In the ghats paying quit-rent through the zamindars survey and record-writing have been completed during the previous year, and that under report in 91½ out of a total area of 183 square miles.

The progress made in the smaller settlements under the Bengal Tenancy Act conducted under the supervision of the Commissioners of Divisions is shown below:—

ESTATES.	Estimated area in acres.	Total number of villages.	Area surveyed in acres during the year under report.	Total area surveyed in acres up to the end of the year under report.	Number of villages of which attestation has been completed.	Number of villages of which the final records have been published under section 105 (2) of the Tenancy Act.	Cost during the year.
1	2	3	4	5	6	7	8
Government estates in the districts of Midnapore, the 24-Parganas, Nadia, Murshidabad, Khulna, Patna, Faridpur, Tippera and Monghyr.	86,796	277	29,473	79,184	100	61	Rs. 15,301
Private estates in the districts of Midnapore, Jessore, Rangpur, Pabna, Dacca, Mymensingh, Faridpur, Noakhali and Patna.	69,648	271	7,575	67,245	174	147	4,796

In the usual forecast of increases of revenue expected from revision of settlements and other causes for the six years ending 1901-1902, a total increase of Rs. 5,50,724 was anticipated in the demand of the year under review, but the actual increase obtained was only Rs. 1,65,094 as compared with an increase of Rs. 1,09,602 in the previous year. The causes of this difference are explained by the Board, the principal reason being that the sum of Rs. 2,50,000, estimated as the increase of revenue in the districts of Cuttack, Puri, and Balasore, was not realisable till 28th April 1898. No operations, moreover, were, it is stated, undertaken in Angul, and the revision of the khas mahal rent-rolls in Chittagong yielded an increase considerably less than the forecast. The reference to Angul is not understood, and the total increase of revenue in Chittagong was in excess of anticipations, though the whole of it may not have been obtained in the year 1897-98.

There were a considerable number of petty settlements pending in the Presidency, Dacca, and Chittagong Divisions, but the Lieutenant-Governor is glad to observe that the Board report that greater interest is now taken by District Officers in the completion of these settlements, with the result that there has been some improvement in the disposal of pending cases.

19. *Land Registration.*—The statement for the past three years, showing the total number of interests registered under initial registration in each Division since the commencement of the operations, the number of mutations effected during the year, and the percentage on the total number of interests registered, is given in the same form as last year, although the Board explain that the figures in column 2 being inaccurate, no correct deductions can be drawn from the percentages deduced from columns 6, 7, and 8. Orders were passed during the year with the view of obtaining correct figures of initial registrations, including the registrations effected since the introduction of the Act and previous to the year under report, but great difficulty has been experienced in collecting the figures, and the old form has therefore been adhered to. The Lieutenant-Governor hopes that no time will be lost in the revision of the statement, without which its value is greatly lessened. If the figures of mutations reported were correct, they would indicate that approximately all changes of proprietary interests are registered, which is *a priori* unlikely to be the case and is indeed shown not to be the fact by the high

percentage of mutations in Dacca, where special measures were taken to ensure improvement in registration:—

Division.	Total number of interests registered under initial registration (section 38).	Number of applications under section 42 filed during the year—			Percentage of column 5 on column 2.	Percentage during 1896-97.	Percentage during 1895-96.
		On account of succession by inheritance, whether under will or otherwise.	On account of succession by purchase, gift, or otherwise.	Total of columns 3 and 4.			
1	2	3	4	5	6	7	8
Burdwan ...	50,055	1,866	2,001	3,867	7·7	7·3	7·2
Presidency ...	65,574	2,071	1,363	3,434	5·2	6·5	4·8
Rajshahi ...	27,016	1,400	634	2,034	7·5	7·7	7·0
Dacca ...	99,623	6,261	4,961	11,222	11·2	11·6	11·2
Chittagong ...	184,636	2,432	4,568	7,300	3·9	4·4	5·0
Patna ...	287,642	11,281	12,965	24,246	8·4	8·7	8·4
Bhagalpur ...	99,209	1,837	1,696	3,533	3·5	4·0	3·0
Orissa ...	168,798	4,869	5,526	10,395	6·1	7·7	6·6
Chota Nagpur ...	4,214	284	292	526	12·4	5·2	4·8
Total ...	986,767	32,251	34,306	66,557	6·7	7·3	6·9
Total for 1896-97 ...	975,977	37,022	34,324	71,346	7·3	...	...

There was a decrease of 4,789 in the number of applications for mutation filed, though it is still above the average of the last five years. The figures of cases disposed of show an increase of 2,718. The rewriting of Register D of intermediate mutations has now been completed in 22 districts. The work in the remaining districts should be expedited.

20. *Partitions.*—Partition work is of greatest importance in the three Divisions of Patna, Bhagalpur, and Dacca, and the statistics of cases instituted and disposed of are given below:—

Division.	Pending at close of—		Instituted during—		Total for disposal during the year—		Disposed of during—		Pending at the close of—
	1895-96.	1896-97.	1896-97.	1897-98.	1896-97.	1897-98.	1896-97.	1897-98.	1897-98.
1	2	3	4	5	6	7	8	9	10
Patna	1,052	999	296	267	1,348	1,266	349	349	917
Bhagalpur	131	124	24	56	155	180	31	54	126
Dacca	430	476	192	137	622	613	147	187	426

The number of cases instituted decreased in the Patna Division by 29 and in the Dacca Division by 55. The disposal of cases showed an improvement in Bhagalpur and Dacca. The work of the Special Deputy Collector at Patna is reported to have been unsatisfactory, and the employment of the Batwara Deputy Collector in Saran on magisterial and miscellaneous duties, contrary to the orders of the Board, retarded the disposal of cases in that district.

The new Estates Partition Act, V (B.C.) of 1897, came into force on 8th December 1897, and 75 applications in the Dacca Division and 17 in Monghyr are reported to have been struck off under the provisions prescribing the limitations of Government revenue payable by shares forming the subject of partition. Similar information should have been furnished for other districts.

In the Resolution on the Report for 1896-97 attention was drawn to the variations in the costs of partition per acre in different districts, and it is reported that the subject has now been noticed by District Officers, but not fully. Some explanations have been furnished, but the Lieutenant-Governor requests that the point may be discussed in greater detail in future reports.

The Lieutenant-Governor regrets to observe the statements made as to the unsatisfactory condition of the accounts of the Batwara Department in

several districts. In Monghyr, where it was noticed last year that the work had been grossly mismanaged by the Deputy Collector in charge, a special auditor has been deputed, who is reported to have found great difficulty in reconciling the accounts owing to the confusion they were in. Audit is said to be required in other districts also, but the Lieutenant-Governor agrees with the Board that the duty of maintaining correct accounts rests primarily on the local officers concerned. It is hoped that partition proceedings will be expedited under the new Act, that the expenses of them will be reduced, and that the accounts will be carefully and accurately kept.

21. *Land Acquisition.*—The quantity of land acquired during the year under the Land Acquisition Act of 1894, the department for which it was acquired, and the cost of acquisition were as follows:—

Purpose for which land was taken up.	Area of land taken.	Revenue abated.	Cash compensation paid, including other charges.
1	2	3	4
	Acres.	Rs.	Rs.
Government ...	1,021	62	1,69,648
Irrigation ...	256	150	35,905
Municipalities ...	64	10	58,767
Railways ...	6,565	1,802	10,46,186
District Boards ...	181	13	17,763
Port Commissioners ...	...	...	863
Total ...	8,087	2,037	13,28,232

The average cost per acre amounted to Rs. 164, or, omitting projects of a specially costly nature, to Rs. 129: the corresponding figures of the previous year were Rs. 311 and Rs. 154, the decrease in the year under report being attributable to the acquisition of large areas of lands at low rates in Orissa, Midnapore, and Singhbhum. The quantity of land acquired during the year was largely in excess of the total for 1896-97, which amounted to 1,674 acres only. The acquisition of land for numerous railway and tramway projects contributed towards this result, the most important schemes in progress at the end of the year being the Cuttack-Midnapore-Calcutta extension of the Bengal-Nagpur Railway, the East Coast Railway, the Sultanpur-Bogra-Kaliganj and Rajbari-Faridpur extensions of the Eastern Bengal State Railway, the Mymensingh-Jamalpur-Jagarnathganj extension of the Dacca-Mymensingh Railway, the work in connection with the Assam-Bengal Railway in Chittagong, the South Bihar and Mogulserai-Gaya Railways, and the Segouli-Raxaul, the Bettiah-Bagaha, the Hajipur-Katihar, and Sakri-Jainagar extensions of the Tirhut State Railway. Important projects in connection with the drainage and improvement of Calcutta were in progress, 512 acres being taken up, for which Rs. 5,07,972 was paid as compensation for the land and buildings thereon, or nearly a thousand rupees per acre. Proceedings were also held in connection with the Tribeni and Dhaka Canals in North Bihar, which had originally been undertaken as famine-relief works.

22. *Kanungos and patwaris.*—The reorganisation of the patwari establishments in Orissa and in the Patashpur estates in Midnapore, in order that the record of rights may be maintained by their agency, is under consideration.

23. *Advances under the Land Improvement Loans Act.*—Out of a total amount of Rs. 6,18,115 applied for by the Collectors for advances under the Land Improvement Loans Act, XIX of 1883, the sum of Rs. 4,82,467 was allotted for distribution, of which Rs. 3,58,510 was actually disbursed, Rs. 1,67,305 were advanced under the special famine conditions, and Rs. 1,91,205 on account of payment of instalments of loans previously granted as they

became due, and in Chittagong as a measure of relief in consequence of the cyclone.

The progress made in the realisation of outstanding advances is shown below:—

Outstanding advances.	Demand (principal *plus* interest) falling due during the year.	Collections (principal *plus* interest) during the year.	Percentage of collections on demand.	Remissions.	Balance at the close of the year.
1	2	3	4	5	6
Rs. 8,47,149	Rs. 1,75,580	Rs. 1,22,761	69·9	Rs. 100	Rs. 52,719

The Collectors were quite right in mitigating their demands during bad seasons. Greater punctuality may now be expected.

The following amounts were advanced during the year under the modified rules for famine conditions: the details for the Patna Division are wanting:—

		Rs.			Rs.
Bankura	...	2,000	Puri	...	15,000
Nadia	...	36,475	Hazaribagh	...	9,776
Murshidabad	...	10,038	Palamau	...	32,024
Khulna	...	24,695	Manbhum	...	33,147
Rajshahi	...	2,550			
Pabna	...	1,600	Total	...	1,67,305

By far the largest amount in any one district was advanced in Chittagong, where Rs. 1,15,631 was distributed among 414 applicants for the reconstruction of embankments destroyed by the storm-wave.

24. *Advances under the Agriculturists' Loans Act.*—The prevalence of famine conditions in many districts during the first-half of the year led to a large increase in the sums lent to raiyats under the Agriculturists' Loans Act, XII of 1884. Altogether Rs. 11,93,115 was advanced in comparison with Rs. 2,61,017 in the previous year. Advances were made in every district of the Province with the exception of Midnapore and Hooghly, varying in amount from the petty sum of Rs. 270 in Darjeeling to Rs. 2,37,987 in Saran. In the districts in which the existence of famine was declared, the following sums were disbursed:—

		Rs.			Rs.
Bankura	...	20,587	Muzaffarpur	...	1,75,291
Nadia	...	23,579	Darbhanga	...	351
Murshidabad	...	28,155	Bhagalpur	...	29,764
Khulna	...	59,741	Sonthal Parganas	...	15,349
Shahabad	...	50,966	Puri	...	16,924
Saran	...	2,37,987	Hazaribagh	...	36,000
Champaran		2,19,343	Palamau	...	22,999
Manbhum		... Rs. 41,492			

In Jessore also, where distress was felt, though not to the extent of famine, more than Rs. 50,000 was advanced during the year. As in the previous year, practically no loans were given in Darbhanga, where, although

famine was severe, the Collector did not consider them required. Advances to the extent of Rs. 3,397 were granted for the construction of wells which had collapsed during the earthquake.

The demands, collections, and balances on account of advances in this and previous years, are shown below:—

Outstanding advances.	Demand (principal *plus* interest) falling due during the year.	Collections (principal *plus* interest during the year.	Percentage of collections on demand.	Remissions.	Balance at close of the year.
1	2	3	4	5	6
Rs. 15,15,564	Rs. 5,18,283	Rs. 2,79,194	53 8	Rs. 103	Rs. 2,38,986

The percentage of collections is considerably higher than the corresponding figures of the previous year, when 39·5 per cent. only of the demand was realised, collections having been suspended in several districts owing to the famine. The Lieutenant-Governor hopes now that bountiful harvests have put the peasantry at ease, no time will be lost in recovering the amounts due.

Of the balances outstanding at the close of the year, the Patna and Chota Nagpur Divisions are responsible for Rs. 1,20,588 and Rs. 87,074, respectively.

Rent.

25. *Relations between landlord and tenant.*—Notwithstanding that scarcity prevailed during a considerable portion of the year over the greater part of the Province, the relations between landlord and tenant were not seriously affected, and continued generally satisfactory. In some instances the zamindars materially assisted their tenants to tide over the distress, and exercised leniency in the collection of rent. To this general rule, however, there were the usual individual exceptions. In Burdwan a zamindar was killed by the tenants of a newly-purchased village whom, it is alleged, he was attempting to oppress. The murderers were not discovered, and precautionary measures have since been necessitated, as the state of tension still continues. In Midnapore the attempt of the non-resident zamindar of one estate to collect rent at enhanced rates led to disputes with the tenants, and in the Contai subdivision a dispute between a patnidar and the tenants for the ejection of the latter resulted in a riot. The tenants have since been maintained in possession. In the Kandi subdivision in Murshidabad the efforts of a landlord to enhance rents by coercive measures led to the institution of several criminal cases. In Khulna, where most of the zamindars are non-resident, and in Nadia, where there is an absence of influential landholders, and attempts to enhance rents illegally are frequently made, the relations between the landlords and their raiyats are not, it is reported, satisfactory. In Khulna most of the zamindars being absentees, little material help was rendered by them to their tenants during the scarcity. In the district of Tippera the gradual absorption of the old grazing grounds by cultivation is reported to lead to disputes. The condition of affairs in the Patna Division generally does not call for special notice. The assistance rendered during the famine by the Maharaja of Darbhanga and by the Court of Wards in the Hatwa and Bettiah estates has already been gratefully acknowledged by Government. In the Barh subdivision of the Patna district there

was bad feeling between some landlords and tenants, resulting in a riot. There was a considerable number of indigo disputes in the districts of Bhagalpur and Monghyr, which appear to call for attention. The hope expressed last year that the state of affairs in killa Al was improving does not appear to have been fulfilled, while in the Jajpur and Bhadrak subdivisions the relations between landlords and tenants are reported to be specially strained. In the Chota Nagpur Division, with the exception of the district of Palamau, the relations between the zamindars and their raiyats remain unsatisfactory. It is as yet too early to judge of the effect of recent legislation for the commutation of predial services. The levy of illegal cesses on the occasions of new settlement or of landlords visiting their properties, and that of contributions for marriages and other ceremonies continue, but the tenants, it is said, generally pay them without objection to secure the good-will of the landlords and their servants. In the Patna Division the custom is said to be gradually dying out as the tenants become better acquainted with their legal liabilities, and this is reported to be a striking proof of the value of the settlement proceedings in that Division in making known to them the provisions of the law.

26. *The Bengal Tenancy Act.*—The working of the Bengal Tenancy Act presents no new features. The generally expressed opinion is one of disappointment that its provisions are not more largely used; but, as remarked in the previous year, the preventive effect of the Act in checking disputes and abuses, while less obvious, is perhaps of as high importance as the active application of its sections. It is admitted that the Act has worked smoothly. With the previous sanction of the Government of India and the Secretary of State, a Bill to amend sections 30, 31, 39, 52, and 119 and Chapter X of the Act was introduced into the Bengal Legislative Council on 3rd April 1897, and after some revision was passed after the close of the year.

The working of some of the most important sections of the Bengal Tenancy Act in the various divisions of the Province is shown below:—

1	2			3	4	5	6	7	8	9	10	11	12
Division.	Transfer of Tenures.												
	(a) Voluntary, section 12 (3).	(b) By decree sale, sections 13 (2) and 14.	(c) By succession, section 15.	Commutation of rent payable in kind, section 40.	Appraisement or division of produce where rent is paid in kind, sections 69 and 70.	Registration of improvements, section 80.	Certificates of Collectors as to acquisition of land for building or other purposes, section 84.	Notices of resumption of land by landlords, section 87 (2).	Written permission to landlords to measure land under section 94.	Applications by Collectors for appointment of common Manager under section 93.	Applications made for a survey and record of rights under Chapter X.	Applications made for survey and record of proprietors' private lands under Chapter XI.	Local enquiries held by order of a Court, section 158.
Burdwan	3,469	116	198	754	43	21	..	35	...	...	13	5	2
Presidency	5,388	284	400	..	6	17	...	5	...	...	10	...	1
Rajshahi	531	93	50	...	1	...	...	11	...	...	1	...	...
Dacca	1,771	1,177	431	...	...	65	5	16	...	1	21	...	1
Chittagong	2,196	850	449	...	...	7	...	7	...	...	...	...	16
Patna	939	...	4	45	529	217	2	809	...	1	1	...	21
Bhagalpur	1,311	...	13	1	637	17	..	33	...	...	...	...	2
Orissa	...	...	...	...	...	2					1	...	...
Grand Total for 1897-98	15,105	2,526	1,545	800	1,316	336	7	918	...	2	46	5	37
Ditto for 1896-97	16,592	3,930	1,635	161	347	251	3	632	...	1	36	...	55

The decrease in the number of voluntary transfers of tenures registered is attributed to the fact that the registration of transfers of occupancy rights is no longer considered obligatory under the Act. The most noticeable fluctuations were in the numbers of proceedings for commutation and appraisement: the former were practically confined to the districts of Midnapore and Shahabad, and the variation was more apparent than real, applications of several tenants having in previous years been tried as one case instead of separately. The increase in proceedings for appraisement is partly ascribed to a similar cause and partly to the good crops in the latter part of the year. The reluctance of landlords to accept landlords' fees continues.

27. *Rent suits.*—The number of suits tried in Revenue Courts under the provisions of Acts X of 1859 and I (B.C.) of 1879 during the years 1896-97 and 1897-98 are compared below:—

District.	Number of cases instituted.		Increase.	Decrease.
	1896-97.	1897-98.		
1	2	3	4	5
Darjeeling ...	54	53	...	1
Jalpaiguri ...	3,406	5,290	1,884	...
Cuttack ...	4,149	4,757	608	...
Puri ...	2,146	2,679	533	...
Balasore ...	2,201	3,287	1,086	...
Hazaribagh ...	2,581	2,697	116	...
Lohardaga ...	6,863	5,184	...	1,679
Singhbhum ...	538	597	59	...
Manbhum ...	6,222	5,711	...	511
Palamau ...	371	297	...	74
Total ...	28,531	30,552	4,286	2,265

The increase in Jalpaiguri was mostly under the head of suits for arrears of rent, and is attributed to the scarcity prevailing during 1896-97. In Balasore the increase was in the number of rent suits and miscellaneous cases, chiefly arising out of applications for deposits of rent. The decrease in Lohardaga occurred in miscellaneous applications, execution cases, and appeals. The attachment of *bhadoi* crops in execution of decrees without special permission was temporarily stopped by the Deputy Commissioner, except in suits about to be barred by limitation, on the ground that after a year of scarcity the raiyats were dependent on this harvest for food.

28. *Miscellaneous.*—765,704 cases of all kinds were instituted during the year, and 157,135 cases were pending from the previous year. The cases disposed of numbered 792,691. The corresponding figures for the previous year were 820,918 and 790,533.

29. *Training of Junior Civilians in survey-settlement work.*—A systematic course, extending over two months, for the training of junior Civilians in survey-settlement work has been drawn up by Mr. Stevenson-Moore, Settlement Officer in North Bihar, in communication with the Superintendent of Settlement-Surveys and the Commissioner of Patna. The requirements of other work somewhat interfered with the deputation of junior officers, but the Lieutenant-Governor hopes that with the cessation of the famine similar interruptions may not be experienced during the next cold weather.

30. *General.*—The thanks of the Lieutenant-Governor are due to the Board for their habitually careful supervision of the revenue administration of the Province and for their generally ample report. In connection with the sudden death of Mr. H. G. Cooke, late Commissioner of the Orissa Division, just after the close of the year, the Lieutenant-Governor wishes to repeat and endorse the remarks made by the Board that "the care, local knowledge, and consideration for the people shown by his work, particularly in connection with the Orissa settlement, as well as its clearness and able treatment, testify to the loss sustained by the Land Revenue Administration in his death." The paragraphs relating to the several district and subordinate officers mentioned as deserving of special commendation will be communicated to the Appointment Department.

By order of the Lieutenant-Governor of Bengal,

M. FINUCANE,

Secretary to the Govt. of Bengal.

WEATHER AND CROP REPORT.

For the week ending the 17th October 1898.

Burdwan.—Rainfall at Sadar 3·22, Kalna 5·62, Katwa 6·89, Raniganj 3·13. Weather fine. Rain has done great good to *aman*. Harvesting of *aus* nearly over. Common rice selling as follows:—

	Srs.	
Sadar	13 to 16	per rupee.
Kalna	12 to 13	
Katwa	14	
Raniganj	16	

Birbhum.—Rainfall at Sadar 3·99, Rampur Hât 2·72. Weather cloudy and rainy. Prospects of crops good. Price of common rice at Sadar 15 seers and at Rampur Hât 15·8 seers per rupee. Fodder sufficient.

Bankura.—Rainfall at Bankura 2·57, Vishnupur 2·00. Weather cloudy and seasonable. There was sufficient rainfall generally all over the district. *Aman* paddy and sugarcane doing well. No cattle-disease reported. Fodder and water sufficient. Common rice selling as follows:—

	Srs.	
Bankura	16	per rupee.
Vishnupur	15	

Midnapore.—Rainfall at Sadar 5·45, Contai 11·39, Tamluk 8·70, Ghatal 5·28. Prospects of standing crops favourable. Damage by grass-hoppers reported from Kessiari outpost. Common rice sells as follows:—

	Srs.	
Sadar	12½	per rupee.
Contai	14 to 15	
Tamluk	12	
Ghatal	12 to 14	

Hooghly.—Rainfall at Sadar 6·36, Serampore 6·22, Jhanabad 3·90. Prospects of *aman* good. Cattle-disease prevails. Common rice sells from 11 to 12 seers per rupee.

Howrah.—Rainfall at Sadar 4·49, Ulubaria 7·12. Weather threatening till 14th. The recent rainfall has much improved the condition of *aman* both in Sadar and Ulubaria. Harvesting of *aus* nearly finished. Fodder and water sufficient. Common rice sells at 11 to 14 seers per rupee.

24-Parganas.—Rainfall at Sadar 5·05, Barasat 5·73, Basirhat 6·17, Diamond Harbour 9·25. Weather cloudy and rainy. Prospects good. The recent rainfall has done much good to the *aman* crop. Cutting of *aus* and steeping and washing of jute going on. Cattle-disease reported from the Hasanabad police-station in the Basirhat subdivision. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	11 to 12	per rupee.
Barasat	15⅞	
Basirhat	12 3/16	
Diamond Harbour	13	

Nadia.—Weather cyclonic in Kaliganj and some other thanas till the 15th. Rainfall at Sadar 4·44, Kushtia 3·03, Meherpur 3·24, Chuadanga 3·19, Ranaghat 3·62. Prospects of *aman* good. Sowing of *rabi* crops continuing. Common rice selling at 12 to 14 seers per rupee. Fodder and water sufficient. No cattle-disease reported.

Murshidabad.—Rainfall at Sadar 9·18, Jangipur 2·41, Kandi 9·09. Weather seasonable. The recent rain has done much good to the standing crops. *Aman* plants, sugarcane, and mulberry doing well. Cutting of jute nearly finished. Fodder insufficient in places. Common rice sells as follows:—

	Srs.	
Sadar	15	per rupee.
Jangipur	16	
Kandi	16½	

Jessore.—Weather cloudy, rainy, and windy. Rainfall at Jessore 4·74, Jhenida 8·69, Magura 7·72, Narail 7·89, Bangaon 3·81. Ploughing and sowing of winter crops and of indigo commenced. Floods subsiding in Bongaon. No cattle-disease reported. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	16 to 17	per rupee.
Jhenida	17 to 18	
Magura	18 to 20	
Narail	17-12½ chs.	
Bangaon	16	

Khulna.—Rainfall at Sadar 6·22, Bagirhat 7·29, Satkhira 7·18. Weather cloudy with heavy showers of rain. Transplantation of *aman* over. Prospects good. Fodder and water sufficient. Common rice sells as follows :—

	Srs.	
Sadar	14 to 18	per rupee.
Bagerhat	16	
Satkhira	15	
	21 (new *aus*)	

Rajshahi.—Rainfall at Sadar 8·60, Nator 11·11, Naugaon 9·14. Prospects of crops good. No cattle-disease. Fodder and water available. Rice sells from 12 to 23 seers per rupee.

Dinajpur.—Average rainfall 1·73 Weather cool. Standing crops good. No cattle-disease. Fodder and water ample. Rice 15 seers a rupee.

Jalpaiguri.—Rainfall at Sadar 1·41, Alipur Duars 1·84. Weather seasonable, but last three days cloudy with high wind and showers. Steeping of jute going on. Prospects of standing crops good. Fodder and water sufficient. Common rice sells from 8 to 16 seers per rupee.

Darjeeling.—Rainfall at Darjeeling 1·41, Kurseong 2·10, Siliguri 1·37. Weather seasonable. *Hills—Hamanti dhan, bara marua, kalai* and *phaphar* progressing. *Terai*—jute being cut; *haimanti* paddy and *kalai* progressing. Coarse rice sells as follows :—

	Srs.	
Hills	8 to 10	per rupee.
Terai	11 to 14	

Bhutta sells at Darjeeling 16 seers and at Kalimpong 44 seers per rupee.

Rangpur.—Rainfall at Sadar 5·26, Kurigram 7·23, Gaibanda 11·42, Nilphamari 1·4. Steeping of jute going on. Transplantation of *aman* over. Lands are being prepared for tobacco and potatoes. Prospects fair. Common rice selling at 12 seers per rupee. Fodder and water sufficient.

Bogra.—Average rainfall 11·77. Heavy rain has fallen all over the district. Transplantation of *aman* finished. Preparation of land for *rabi* crops retarded for floods. Prospects good. Common rice sells from 13½ to 16½ seers a rupee. Supply of fodder and water sufficient.

Pabna.—Rainfall at Sadar 2·40, Sirajganj 10·59. Weather cloudy and rainy. Prospects of crops very good. Price of common rice 13 to 16 seers a rupee.

Dacca.—Rainfall at Sadar 6·49, Manikganj 8·00, Munshiganj 5·46, Narainganj 4·94. Weather rainy during greater part of week. Harvesting of jute and *aus* rice continues. Prospects of *aman* rice good. Fodder available. No cattle-disease. Common rice 12 to 16 seers per rupee.

Mymensingh.—Rainfall at Sadar 12·96, Kishorganj 4·99, Netrokona 3·89. Weather rainy. Prospects of paddy crop favourable. Harvesting of jute nearly over. Cattle are healthy. Fodder and water sufficient. Rice selling from 12 to 14 seers per rupee.

Faridpur.—Rainfall at Sadar 14·18, Goalundo 6·60, Madaripur 3·27. Heavy rain. Prospects good. Rice 14 to 20 seers per rupee.

Backergunge.—Rainfall at Sadar 6·47. Weather stormy. Prospects of crops good. Common rice sells from 10 to 17 seers (*aman*) and from 15 to 21 seers (*aus*) per rupee.

Tippera.—Rainfall at Sadar 9·19, Brahmanbaria 5·84, Chandpur 5·53. Clear after a very cloudy and cyclonic weather. Harvesting of jute nearly completed The rain has done much good to the standing *aman* crop. Fodder available. Rice sells at 12 to 20 seers per rupee.

Noakhali.—Rainfall at Sadar 10·26, Feni 4·04. Weather rainy. Heavy rain has done good to crops. Prospects satisfactory. Cattle-disease reported from Ramganj. Fodder not good. Water sufficient. Price of rice—*aman* 11 to 14 seers and *aus* 16 to 20 seers per ample.

Chittagong.—Rainfall 3·30. Weather seasonable. *Aman* still being transplanted. Prospects good. Prices steady. Water and fodder sufficient.

Patna.—Rainfall at Sadar 2·26, Barh ·48, Bihar 1·20, Dinapur, 5·06, Hilsa 1·55, Bikram ·68. Lands are being prepared for *rabi* crops. Sowing of mustard and castor seeds in progress. Prospects of paddy fair. Prices almost stationary. In Patna common rice sells at 16 seers a rupee. Fodder and water for cattle sufficient.

Gaya.—Rainfall at Sadar 2·05, Jhanabad ·94, Aurangabad 1·34, Nawada ·43. Prospects of paddy favourable. *Rabi* being sown. Common rice selling at 16 seers per rupee.

Shahabad.—Rainfall at Sadar 1·26, Bhabua ·18, Sasaram ·14, Buxar ·20. Weather cloudy with easterly wind. More rain wanted. Ploughing for *rabi* sowings continues. Rice sells at Arrah 14 seers per rupee.

Saran.—Rainfall at Sadar ·59, Gopalganj ·40. *Aghani* paddy generally doing well. Ploughing for *rabi* continues, and sowing has begun. Average prices are—Common rice 14 seers 11 chitaks, and *makai* 23 seers 10 chitaks per rupee.

Champaran.—Rainfall at Motihari ·58, Bettiah ·10, Barharwa ·24. *Bhadoi* harvesting almost over. Lands being prepared for *rabi* crops. Wheat is being sown. Prospects of winter rice good, but rain wanted for high lands. Cattle-disease in Mainatand outpost. Fodder sufficient. Price of common rice 15 seers and of maize 23½ seers per rupee.

Muzaffarpur.—Rainfall at Sadar ·61, Hazipur 2·31, Sitamarhi ·85. Standing crops in good condition. Lands being prepared for *rabi* sowings. No cattle-disease. Prices are—Common rice 11 to 14 seers, wheat 15 to 18 seers, barley 19 to 20 seers, maize 22 to 35 seers, gram 14 to 17 seers, *rahar* 20 to 21 seers, and *marua* 25 to 27 seers per rupee.

Darbhanga.—Rainfall at Sadar 1·64, Samastipur ·97, Madhubani 1·64. Weather cloudy and hot. Paddy doing well. Fields being prepared for *rabi*. Tobacco and sweet potatoes being planted. Difficulty for fodder still felt in the flooded tracts. Rain has much benefited paddy on high lands, and prospects continue good. Common rice selling at Sadar 12 seers per rupee.

Monghyr.—Rainfall at Sadar 1·74, Begusarai ·77, Jamui nil. Weather hot in the beginning of the week, but latterly cloudy and cool. Rapeseed and *rabi* are being sown. Standing crops doing well. Rain wanted for winter paddy and *rabi* cultivation at Begusarai late. *Makai*, *rahar*, &c., were damaged to 30 per cent., and pepper crop to 50 per cent. by floods in north of the Begusarai subdivision. No cattle-disease. Common rice selling at Monghyr 13 seers, Begusarai 14 seers, and Jamui 15 seers per rupee.

Bhagalpur.—Weather seasonable. Rainfall at Sadar ·25, Banka 1·40, Madhipura nil, Supaul ·02. Standing crops doing very well. No cattle-disease except at Pratapganj. Fodder and water sufficient. Prices nearly stationary.

Purnea.—Rainfall at Sadar 1·49. Weather cloudy with strong easterly wind. Prospects of *aghani* rice good. *Rabi* sowings commenced. Harvesting of jute still going on. Cattle-disease still continues in Araria. Two fresh cases of *kaladukh* reported from Kishanganj. Fodder and water sufficient. Common rice sells as follows:—

Sadar	...	...	...	17	seers per rupee.
Kishanganj	...	...	...	18	„
Araria	...	...	...	21	„

Malda.—Rainfall at Sadar 3·89, Shibganj 4·15, Gajole 5·24. Weather getting cool. Prospect of winter paddy continues satisfactory. Sowing of *kalai* progressing. Lands are being prepared for *rabi* crops. Coarse rice selling at 18 seers per rupee. Fodder sufficient.

Sonthal Parganas.—The very welcome rain (average 1·89 inches) has done immense good. Prospects of all crops excellent. Price of rice 14 to 18½ seers, and of maize 32 to 45 seers per rupee.

Cuttack.—Rainfall at Sadar 7·50, Jajpur 8·11, Kendrapara 11·14, Banki 6·43. Weather showery and cloudy. Harvesting of *beali* nearly over. *Laghu sarad* in ear. *Guru sarad*, *birt*, *mug*, and *arhar* growing well. Cotton being plucked. Jute being cut. Sugarcane maturing. Condition of cattle generally good, but disease prevails in places. Fodder and water sufficient. Common rice sells as follows:—

				S.	ch.	
Cuttack	...	...	...	17	1	per rupee.
Jajpur	...	...	...	17	1	
Kendrapara	...	...	...	19	11	
Banki	...	...	...	18	6	

Balasore.—Rainfall at Sadar 12·69. *Sarad* being weeded. Harvesting of jute and *asu* continues. Insect-pest damaging *sarad*. Sugarcane thriving well. Rice sells from 14 to 24 seers per rupee in the interior, and at 16 seers at Balasore and Bhadrak. Fodder and water sufficient.

Angul.—Rainfall at Angul 3·45. Prospects of crops good. Rice selling at 20 seers per rupee at Angul.

Puri.—Rainfall at Puri 10·52, Khurda 6·49. *Sarad* progressing well. *Laghu* ripening and being cut in places. State of sugarcane, *arhar*, gram, and other miscellaneous crops good. Fodder and water sufficient. Cattle-disease reported from different parts of the district. Common rice sells as follows:—

	Srs.	ch.	
Puri	15	12	per rupee.
Khurda	14	7	
Interior of district	14 to 18	2 6	

Hazaribagh.—Drizzling rain. Rainfall at Sadar 2·11, Giridih 1·13. The rain has much improved the state of the standing crops. Full rice crop is expected. Rice selling at 10 to 13 seers per rupee.

Lohardaga.—Rainfall 2·40. Harvesting of *gora dhan* continues. State of standing crops good. Rice sells at Ranchi 16 seers per rupee, and from 13 to 16 seers in the interior. Cattle-disease continues. Fodder and water sufficient. Grain in stock sufficient.

Palamau.—Rainfall at Sadar ·94. Weather seasonable. Rain very beneficial for winter paddy and *rabi* sowings. Rice sells from 15 to 22 seers per rupee.

Manbhum.—Rainfall at Sadar 3·22, Gobindpur 1·88. Weather seasonable. Prospects of crops excellent. Cattle-disease not reported. Fodder and water sufficient. Average price of common rice at Sadar 14 seers 1 chitak and at Gobindpur 13 seers per rupee. Supply sufficient.

Singhbhum.—Rainfall 3·28. Prospects good. Rice sell sfrom 12 to 16 seers per rupee.

General Summary.—There was heavy rain generally throughout the week in Bengal Proper and Orissa; in Bihar and Chota Nagpur the fall was less heavy. This has on the whole been beneficial for the winter rice crop, but high lands in parts of Bihar require more rain. A pest of insects is reported from parts of Midnapore and Balasore. The cultivation of the *rabi* crops is progressing, and oil-seeds and pulses are being sown. Cattle are generally in good condition except in a few flooded tracts, where the fodder-supply is still insufficient. Prices remain about the same as in the previous week. New *aus* rice and *makai* are selling cheap,

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT,
The 18th October 1898.

M. FINUCANE,
Secretary to the Govt. of Bengal.

The total fall from 1st January to 15th October 1898	59·51
The average fall of the corresponding period for 24 years, Surveyor-General's Office	61·87

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h., and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF SEPTEMBER 1898.

As not unfrequently happens during the monsoon season, an apparent reversal occurred in the rainfall distribution in September as compared with that of August. In the latter month, as may be seen in a subsequent table, rainfall was above the normal in the southern districts, while over a tract of country extending from the east of North Bengal westward over North Bihar, there was a considerable defect. In September the heaviest rainfall was in North Bengal and Bihar, and the only division where the fall was below the normal was Orissa. A rainfall distribution of this kind shows that the monsoon current moving northwards over Burma or the eastern districts of the Province turned westward over North Bengal, instead of being deflected westward across the north of the Bay of the south of the Province.

There was only one cyclonic storm of any importance. It occurred about the middle of the month, and moving northwards from the north-west angle of the Bay towards Bihar broke up on reaching the Himalayas. Throughout its course it caused heavy rain, and the falls were, as usual, very heavy along the hill districts after the depression filled up. As in August, a shallow residual depression formed over Bengal, and after remaining fairly stationary for some time moved towards the north-west. This shallow depression maintained the rainfall over the north of the Province, and it was not till the 22nd that the general rainfall, which commenced with the approach of the original depression, to a large extent ceased.

The only other disturbances during the month were generally of small importance. A shallow depression formed over the northern districts in the early days of the month, causing heavy rainfall in North Bengal and North Bihar; and towards the end another shallow depression commenced in the south-east of the Bay. It moved northwards into Burma, where it filled up. But the inrush of monsoon winds which followed it northwards reached East Bengal, and caused showery weather about the beginning of the fourth week.

As cloudy rainy weather was more frequent than usual, temperature on an average was below the normal, though not by large amounts, except in the north. The difference from the normal maximum temperature varied from excess of 1° in Orissa to defect of 4° in part of Bihar, and the difference in the case of night readings was about 1°.

At the beginning of the month the pressure distribution over the Bay was not favourable for the prevalence of ordinary monsoon weather. Pressure was increasing in the north, and a small excess had accumulated there, whereas towards the south there was defect. The gradient was in consequence less steep than usual at the beginning of September. Only a few scattered showers were falling in Bengal except in North Bengal, especially in the Jalpaiguri district, where heavy rainfall was general. Temperature was above the normal over the Province and the Bay. On the 2nd a fall of pressure began in the north, and continued on the 3rd, a very shallow low-pressure area forming along the hills. Though the pressure differences were very slight, the resulting interaction of the light irregular winds caused rainfall over a steadily widening area, until on the 5th general rain was falling in all parts of the Province except Orissa. The slight depression moved towards the west, but it was not till the 8th that it ceased to influence weather in the extreme north. Many stations in North Bengal and North Bihar received heavy falls on the 7th and 8th.

On the 9th the pressure distribution was similar to that at the beginning of the month. The excess over Bengal was smaller, but there was still a low-pressure area over the south of the Bay. Within this area the depression of the middle of the month probably began to develop, but it was not till the 11th that it became well defined, and it was then approaching the north of the Circars, where pressure was lowest. It was a diffused depression extending over the whole area and apparently shallow at the centre, the greatest defect reported on the 11th being less than ·1 inch in the Circars. Very little change of position was shown on the 12th, but the depression was deeper; and as pressure was rising in the south of the Bay, the gradient was considerably more steep to the south-east of the centre. Winds were strengthening at Diamond Island, and weather had probably become squally over the east and centre of the Bay. The disturbance developed considerably between the 12th and 13th, during which time a rapid fall of pressure occurred in the north-west of the Bay, the greatest reported being ·16 inch from the Orissa stations. The depression was then moving northwards, the centre was to the east of Puri, probably at no great distance from the Orissa coast, and the gradient was steepest towards the east. The variation from the normal in the central area was about ·25 inch.

The centre of the depression crossed the coast to the south of Balasore, and on the morning of the 14th was near Chaibassa, where the barometric reading was 29·23 inches. Weather had been stormy over the north of the Bay, and as the centre of the disturbance moved northwards, heavy rainfall became general. On the 14th the heaviest falls were in

Orissa and South-West Bengal, but many stations in East Bengal also reported falls of more than 1 inch. On the 15th the centre was near Dehri with but little change in the depth. Strong winds with heavy rain prevailed in the north of the Province during the 15th; and though the winds were moderating on the 16th after the depression had filled up, there was still very heavy rainfall in North Bihar and North Bengal.

During the 15th rapid changes of pressure occurred in the western districts, over which the area of lowest pressure passed. They varied from a rise of ·3 inch at Chaibassa to a fall of the same amount at Dehri. The depression remained undiminished as to depth, and caused stormy weather in the north of the Bay and over the whole Province between the 13th and 16th.

Pressure continued to rise rapidly in Bihar on the 16th and 17th, and the distribution had then become very nearly normal. The rapid increase in the west had given rise to a shallow residual depression over Bengal—a feature of cyclonic disturbances which has been very noticeable during the present monsoon season. Remaining stationary over Bengal, they have caused general and, in some cases heavy, rainfall for several days, owing to the indraught towards the area of low pressure. On the 17th and 18th rainfall was more scattered, but as the residual depression remained and gradually deepened, the falls became more general. On the 20th moderate to heavy rain was falling in every part of the Province.

The depression on that date was well defined over Lower Bengal with a defect of more than ·1 inch in the central parts, and was moving towards the north-west. The gradient was steeper than usual over the north of the Bay, and a strong monsoon was blowing across the Bengal coast and maintaining the rainfall, which continued in most districts till the 22nd, and was very heavy in Bihar on the 21st. On that date the area of lowest pressure was over South Bihar, a rapid rise of pressure having occurred in the east of the Province. The rise extending westward, the depression had disappeared by the 22nd.

During these two last days pressure had been falling in the south-east of the Bay, a depression forming over the south of Burma. It remained shallow and moved northwards into Burma, causing moderately heavy rain in the districts over which it passed. It was felt slightly in the east of the Province on the 24th, and caused fairly general rain in East Bengal Pressure then rose, and was in considerable excess over the Province and the north of the Bay, remaining normal farther south. In consequence the distribution of pressure was more uniform than usual, and westerly winds prevailed during the closing days of the month with an almost entire absence of rain in places, and nowhere more than scattered showers.

Pressure without differing much from the normal was during a great part of the month favourable for the continuance of monsoon winds. At the beginning and end of the month there was a small to moderate excess, while at other times there was usually a small defect. The only occasion of a difference from the normal greater than ·1 inch was on the 14th and 15th, while the cyclonic storm was passing over the western districts. Within the central area defect was about a third of an inch.

On an average for the whole month the differences from the normal are very small. They vary from excess of ·01 inch in East Bengal to defect of ·02 inch in the west of Bihar.

Temperature.—Owing to the cloudy weather, which was prevalent during September, temperature was frequently below the normal—most so in the middle of the month. Means for the month were normal in South-West Bengal and Chota Nagpur, and about half a degree above in Orissa, but elsewhere there was defect—greatest in Assam, North Bengal, and Bihar, where it was upwards of 1°.

The defect in mean maximum temperature ranged up to 3° in the northern districts, the difference in the case of minima being much smaller and rarely more than 1°.

Rainfall—was more continuous than usual in September, and though scattered in the early part of the month and again towards the end, no marked break occurred. All the large divisions received more than the average except Orissa, where there was a deficiency of 18 per cent. The heaviest falls were in Bihar and North Bengal—in the former 224 and the latter 161 per cent. of the normal. There was a small excess in Lower Bengal, and a moderate excess in Chota Nagpur.

In Chota Nagpur, Orissa, and a considerable part of Lower Bengal the falls at the individual stations varied from 7 to 10 inches. Towards the north the amounts increased rapidly. In South Bihar and the central districts of Bengal proper they ranged from 10 to 20 inches, while in North Bengal and Bihar they were generally over 20 inches, and in places between 30 and 40 inches.

The difference from the normal ranged from defect of 5 inches on the Orissa coast to excess of 5 inches on a line running almost east and west across the central districts. To the north of this line excess varied from 5 inches to 10 inches in South Bihar and the southern half of North Bengal. In the extreme north it was between 10 and 20 inches.

The following table gives a condensed summary of the rainfall statistics of the present year up to date for each meteorological division, the first nine columns giving the actual average falls in each division for each month expressed as a percentage of the normal, while

the tenth column gives the actual rainfall of the first nine months as a percentage of the normal rainfall for that period :—

Meteorological Divisions.	January.	February.	March.	April.	May.	June.	July.	August.	September.	Actual rainfall of first nine months of 1898 expressed as a percentage of the normal fall for the period.

Chota Nagpur ..	2	116	3	55	47	150	98	109	133	109

The following table contains full data for the comparison of the actual and normal rainfall of the month of September in all districts of the Province. The figures are derived from the average and actual rainfall of the rain-recording stations in each district, due allowance or weight being made for the area which each station represents. This gives a more accurate average than the arithmetical means given in the monthly meteorological tables The first column gives the normal or average district rainfall as determined from the rainfall observations of the past 25 years; the second column gives the actual district rainfall as determined from the weighted actual rainfalls of the month at the reporting stations in each district; the third column expresses the ratio of the actual district fall of the past month to the normal rainfall as a percentage; and the fourth column states as a percentage how much the district rainfall for the month varied from the normal:—

Percentage Table for September 1898.

RESOLUTION ON THE REPORT OF THE BOARD OF REVENUE ON THE ROAD AND PUBLIC WORKS CESS OPERATIONS FOR THE YEAR 1897-98.

FINANCIAL DEPARTMENT.—ROAD AND P. W. CESS.

Darjeeling, the 21st October 1898.

RESOLUTION—No. 419T.F.

READ—

The Report of the Board of Revenue on the Road and Public Works Cess operations for the year 1897-98.

THE Road and Public Works Cesses were levied at the maximum rate of one anna in the rupee during the year under review in all the 43 districts in which Act IX (B.C.) of 1880 is in force. The following table compares the main results of the working of the Act during the past two years:—

			1896-97.	1897-98.
(1)	Current net demand	Rs.	86,61,682	89,56,309
(2)	Arrear „ „	„	17,24,415	17,82,378
(3)	Total „ „	„	1,03,86,097	1,07,38,687
(4)	Total collections	„	86,16,072	88,71,693
(5)	Remissions	„	63,283	81,813
(6)	Net balance	„	17,91,576	18,75,440
(7)	Percentage of total collections on current demand.	„	99·4	99·0
(8)	Percentage of current collections on current demand.	„	82·8	84·3
(9)	Percentage of arrear collections on arrear demand.	„	82·2	80·2
(10)	Number of revenue-paying estates assessed		234,835	246,638
(11)	Number of revenue-free estates and rent-free tenures assessed.		140,775	145,271
(12)	Number of tenures assessed		1,476,126	1,521,897
(13)	Number of recorded shareholders in estates		1,433,810	1,465,359
(14)	Number of recorded shareholders in tenures		2,546,100	2,606,190
(15)	Current demand of land revenue ...	„	3,83,83,326	3,85,33,272

2. The year opened with a current demand of Rs. 86,04,920 against Rs. 85,50,597 in 1896-97, an increase of Rs. 54,323, which was principally the result of revaluations in the districts of Jalpaiguri, Rangpur, and Patna, which came into effect from the 1st April 1897. During the year the additions to both the arrear and current demands amounted to Rs. 4,24,047, of which Rs. 3,63,016 were added by the districts of Burdwan, Midnapore, Jessore, Dacca, Mymensingh, Patna, Monghyr, and Bhagalpur. The increase in Burdwan was due to the assessment of mines, and in the remaining districts to revaluations. The total collections show an increase of Rs. 2,55,621 over the figures of the previous year, but owing to the enhanced demand, the balance outstanding at the close of the year increased from Rs. 17,91,576 in 1896-97 to Rs. 18,75,440. The percentage of total collections on the current demand was 99·0 against 99·4. Having regard to the effects of famine and earthquake from which the province suffered during the year, the result is remarkable.

3. For the purpose of examining the percentages of current and arrear collections, districts are grouped in the following four classes, figures for three years being given to better indicate the districts which consistently show good or bad results :—

I.—Districts in which current collections are above 90 per cent. and arrear collections above 80 per cent.

II.—Districts in which current collections are above 90 per cent. and arrear collections below 80 per cent.

III.—Districts in which current collections are below 90 per cent. and arrear collections above 80 per cent.

IV.—Districts in which current collections are below 90 per cent. and arrear collections below 80 per cent.

4. The following districts succeeded in attaining the standard of cess administration necessary to qualify for the first class :—

District.	Percentage of current collections on net current demand.			Percentage of arrear collections on net arrear demand.		
	1897-98.	1896-97.	1895-96.	1897-98.	1896-97.	1895-96.
1	2	3	4	5	6	7
Singhbhum ...	100·	99·9	99·6	100·	100·	83·3
Jalpaiguri ...	99·7	99·7	99·7	100·	100·	88·2
Darjeeling ...	99·7	99·8	91·0	94·4	100·	100·
Puri ...	97·2	96·6	97·3	100·	99·0	90·6
Malda ...	96·7	97·5	97·3	99·2	99·2	99·5
Dinajpur ...	95·7	94·7	95·3	100·	99·9	99·6
Bogra ...	94·8	95·7	93·9	100·	99·9	98·0
Hazaribagh ...	94·4	96·3	93·4	93·8	97·6	99·8
Birbhum ...	94·3	94·7	93·1	99·3	98·1	96·8
Noakhali ...	92·4	92·4	92·5	96·7	96·5	91·7
Rangpur ...	91·8	92·2	90·5	99·4	98·3	96·7
Rajshahi ...	91·6	92·4	93·2	98·3	96·9	90·2
Dacca ...	90·0	90·7	90·9	90·3	90·6	80·2

All of these districts, except Singhbhum and Rajshahi, showed equally good results during the previous three years, and the results are creditable to the officers concerned. Though Dacca, Hazaribagh, and Darjeeling retain their former position, they show a decrease in both the current and arrear collections. No explanation has been furnished of this falling off. Both current and arrear demands were realized in full in Singhbhum, while the districts of Jalpaiguri, Puri, Dinajpur, and Bogra succeeded in collecting the whole arrear demand. Nadia and Mymensingh have descended during the year from Class I

to Class III, while Purnea, which in the preceding year rose to this class from Class III, has fallen to Class IV.

5. The districts which fall in the second class are the following:—

District.	Percentage of current collections on net current demand.			Percentage of arrear collections on net arrear demand.		
	1897-98.	1896-97.	1895-96.	1897-98.	1896-97.	1895-96.
1	2	3	4	5	6	7
Balasore ...	93·4	95·8	93·3	67·0	73·2	73·1
Pabna ...	92·3	90·1	90·4	72·3	72·1	84·0
Burdwan ...	90·5	90·3	91·1	47·0	53 0	49·9

The list has decreased by one district, Khulna having fallen to Class III owing, it is said, to the failure of the crops in 1896-97. The decrease in both the current and arrear collections in Balasore is also attributed to the deficient harvests of 1896-97. In Burdwan the current collections are stationary notwithstanding an increase in the current demand, and the Board of Revenue ascribe this in part to the fact that the assessment of coal mines in the latter part of the year rendered the realization during the year of the cess due from them impossible. The diminution of 6 per cent. in arrear collections is attributable to the difficulty experienced in serving notices upon petty co-sharers owing to the properties changing hands.

6. The districts of the third class are the following:—

District.	Percentage of current collections on net current demand.			Percentage of arrear collections on net arrear demand.		
	1897-98.	1896-97.	1895-96.	1897-98.	1896-97.	1895-96.
1	2	3	4	5	6	7
Lohardaga ... 99·8	86·0	76·1	68·9	100·	100·	100·
Palamau ... 87·2	75·0	81·7	85·3	99·6	99·7	99·8
Champaran 60·9	60·9	60·3	77·7	98·4	95·9	97·3
Backergunge 93·5	85·0	85·6	80·7	97·7	98·7	98·5
Nadia ... 85·2	84·5	90·2	84·3	97·3	96·0	97·8
Jessore ... 95·7	81·5	82·0	81·6	97·3	90·0	93·6
Midnapore ... 79·4	75·3	82·7	79·8	95·7	87·1	87·4
Mymensingh 87·8	88·2	90·1	93·2	93·0	87·6	95 7
Tippera ... 90·4	82·0	86·4	87·5	92·4	91·3	91·1
Chittagong* ...	79·0	82·0	83·9	89·5	79·0	95·7
Manbhum ... 86·4	76·7	50·1	59·6	89·4	99·5	99·9
Patna ... 82·7	73·6	74·8	74·4	88·6	87·1	79·7
Gaya .. 85·5	76·3	74·0	62·6	89·2	84·6	60 4
Khulna .. 95·6	89·2	91·4	91·7	86·1	78·5	90·8
Muzaffarpur 72·7	67·3	68·2	69·7	84·8	83·7	84·9
Darbhanga 91·0	84·9	84·8	79·8	83·7	90·6	76·3
24-Parganas 88·2	84·0	85·0	85·4	80·4	87·8	83·5

* The last kist (25th February) of the year in this district became payable on the 12th of March 1898.

The figures in the first column of the above statement represent the percentages of current collections on the net current demands of the districts against which they are noted, after eliminating the sums affected by the period of grace, which ended after the close of the year, for the realization of which no coercive measures could be taken within the year. The balance thus arrived at is the true arrear, for the collection of which the District Officer is responsible. Cuttack, Faridpur, Bhagalpur, and Monghyr have descended to Class IV, while, as stated before, Nadia and Mymensingh have come down to this class from Class I, and Khulna from Class II, and Chittagong has gained a step from Class IV. The number of districts in this class, therefore, remains the same as in 1896-97. Eliminating the amounts affected by the 15 days' grace, Lohardaga, Backergunge, Jessore, Tippera, Khulna, and Darbhanga reached the standard prescribed for current collections during the year under review. The short collections in the districts of Palamau, Champaran, Nadia, Jessore, Patna, Gaya, Khulna, Muzaffarpur, and Darbhanga are generally ascribed to the prevalence of scarcity in the first six months of the year, which prevented voluntary payments being made before the close of the year. This explanation can scarcely be valid as regards Gaya, which was little affected by scarcity. In Champaran it is stated that the Bettiah Raj and other zamindars paid their tax after the close of the year. In Nadia a sum of Rs. 17,062 was realized after the close of the year, which, if taken into account, would bring the percentage of current collections above the prescribed standard. About a quarter of the outstanding balance in Gaya is due from the seven annas Tikari Raj, which, it is reported, has for several years been responsible for a considerable portion of the balance unrealized at the close of the year; while evasion of payment by the proprietors of petty estates, in the hope of their dues being paid by their co sharers, coupled with the increase of assessment owing to revaluation, is said to have occasioned the poor results in Darbhanga. The short collections in Manbhum are reported to be chiefly due to defaults by the encumbered estates managed under Act VI of 1876. The Board of Revenue have rightly impressed on the Deputy Commissioner that the demand of cesses due to Government is a first charge on the moneys received by the managers of the estates, and an improvement in this year's collection is looked for. The poor results in Chittagong are due to the cyclone of October 1897. In explanation of the short collections in Midnapore, it is observed that orders sanctioning the revaluation of the district were received late, and demand notices could not, in the majority of cases, be served in time. The percentage of current collections in this district has declined from 82·7 in 1896-97 and 79·8 in 1895-96 to 75·3 in the year under review, and energetic measures must be taken to put matters on a proper footing. In Backergunge the proprietors took advantage of the period of grace in making payments, and there were errors of procedure in the Certificate Department, which were, however, detected and remedied by the Collector. The poor results in Mymensingh are attributed to defaults by some of the large zamindars and to payments being made in many cases according to the former unrevised rates. The explanations given in the case of the two latter districts are considered by the Board to be unsatisfactory, and they agree with the Commissioner in thinking that the short collections are due to preventible causes. In the 24-Parganas the reason assigned is that petty defaulters availing themselves of the concession granted in 1895, whereby the levy of interest for petty arrears was forbidden, withheld payment of cesses until the issue of attachment and sale notices. In Tippera the short collections were due to the delay made by the Raja of Tippera and the Receiver of the Paitkara Estate in paying their dues.

7. The following are the districts of the fourth or lowest class. The list has grown considerably in the year under review, the number having risen from 6 in 1896-97 to 10 in 1897-98:—

District.	Percentage of current collections on net current demand.			Percentage of arrear collections on net arrear demand.		
	1897-98.	1896-97.	1895-96.	1897-98.	1896-97.	1895-96.
1	2	3	4	5	6	7
Murshidabad 89·7	89·7	89·2	83·1	60·9	59·3	59·6
Purnea 90·9	89·7	93·3	88·1	35·0	91·4	83·1
Bankura 90·4	87·1	87·4	88·2	59·7	52·7	51·1
Bhagalpur 92·5	86·1	88·9	86·3	76·7	83·0	93·5
Shahabad 93·7	85·5	82·4	81·6	77·3	76·7	70·1
Cuttack* ...	84·7	81·6	80·0	79·8	90·5	81·5
Monghyr 85·5	79·4	78·4	79·7	79·2	81·5	70·1
Faridpur 86·0	76·9	79·3	79·3	75·6	84·7	92·6
Hooghly 77·3	73·8	63·7	65·6	48·8	53·2	50·0
Saran 67·7	63·9	56·2	65·2	68·8	79·3	78·8

* There is no March kist in this district.

The figures in the first column give the same information as the figures in the first column of the statement for third-class districts. Murshidabad, Bankura, and Shahabad have appeared in this list for at least five years; while Saran and Hooghly have figured in it since 1894-95. Compared with the previous year's figures, arrear collections fell off in all the districts except Murshidabad, Bankura, and Shahabad, the most marked decrease being in Purnea, where the percentage fell from 91·4 in 1896-97 and 83·1 in 1895-96 to 35·0 in the year under review. The explanation given is that assessees, under a mistaken impression that the new, which is also a reduced assessment, had effect in 1896-97, made payments accordingly, whereas it only came into effect from the beginning of 1897-98. The poor results in Murshidabad are ascribed to the perfunctory nature of the valuation of rent-free lands, to the difficulty experienced in ascertaining the boundaries of such lands for taking steps to put them up to sale, and in tracing the successors of deceased owners of the lands. The Board have under their consideration a proposal, which appears to be very necessary, for the revaluation of rent-free lands in this district, and the Lieutenant-Governor awaits their report on the subject. It is most unsatisfactory that there should be any question as to the propriety of the amount of the cess. In Purnea a sum of Rs. 13,591 was struck off from the demand of 1897-98, but it was not shown in the accounts until after the close of the year. Had this deduction been made in time, the percentage of current collections would, it is stated, have been above the prescribed standard. The short collections in Bhagalpur are attributed to the temporary confusion in the Cess Department caused by the introduction of the new valuation, which was not sanctioned till June 1897. In Shahabad scarcity prevailed in the first six months of the year, and the Surajpura Estate failed to pay the cesses for the March kist before the close of the year. The explanation is not sufficient, but it is noted that there has been a considerable improvement on the results of the previous year; and the Board think that the collections are now well in hand. The falling off in Cuttack is ascribed to the delay in the Certificate office in filing certificates before the close of the year; while the short collections in Monghyr are attributed to a bad harvest, to the evasion of payment by proprietors of petty estates in the hope of their dues being paid by their co sharers, to the incomplete state of land registration, and to the payment of cesses by large zamindars through banks or agents, who, while getting the chalans passed in the Road-Cess office before the expiry of the period of grace, do not make payment until the arrear list is filed, and thus appropriate the difference between the high interest they are able to obtain by lending in the open market and the low interest they have to pay to Government for late payments. The result of the further report called for by the Board on the suggestions made to check this delay is awaited. The bad results in Faridpur were chiefly due

to laxity in both the Cess and Certificate Departments. The Lieutenant-Governor trusts that the Collector will exert himself to secure better success in future. The reasons assigned in Hooghly are the disinclination of the proprietors to pay the cesses owing to high prices of food-grains, the abortive results of certificate cases, the unwillingness of co-sharers to pay their share of dues, and the difficulty experienced in realizing by the certificate procedure the demands of about 24,000 rent-free holdings. Prevalence of scarcity in the first half of the year and the unsatisfactory state of land registration account for the short collections in Saran; but the Board agree with the Collector in thinking that the failure to reach the prescribed standard is chiefly attributable to defects in the Cess office, and it is trusted that these will be removed at an early date.

8. Arrears amounting to Rs. 1,306 became barred by limitation in five districts, against Rs. 12,891 in nine districts in 1896-97. Patna heads the list with Rs. 666, followed by Darbhanga, Midnapore, Hooghly, and Jessore with Rs. 469, Rs 113, Rs. 54, and Rs. 4, respectively. These amounts, with the exception of that against Darbhanga which is under recovery by certificate, have all, of course, been remitted.

9. The following statement illustrates the working of the certificate procedure in the realization of the cesses during the last two years:—

	1896-97.	1897-98.
Certificates pending from the previous year ...	36,034	52,493
Filed during the year	104,645	101,410
Total for disposal	140,679	153,903
Cancelled on objection	1,781	1,601
Struck off	3,246	5,210
Fully discharged	83,165	102,517
Pending at the close of the year	52,487	44,575
Sales effected	2,353	2,866
Sales set aside	50	51

It is satisfactory to notice that there was a decrease both in the number of certificates filed during the year and in the number of pending cases. The former fell off by 3,235 and the latter by 7,912. The largest number of certificates was filed in the districts of Saran (9,728), Hooghly (8,339), Gaya (7,826), Darbhanga (6,030), Monghyr (5,868), and Chittagong (5,390). The number of objections filed against certificates was 7,658 against 7,279 in 1896-97. In 1,601 cases certificates were cancelled on objection, and reductions in the amount certified were made in 458 cases. In Gaya, Hooghly, Saran, Monghyr, Dacca, and Bhagalpur, the number of cancellations was 389, 249, 188, 150, 137, and 76 out of 1,086, 814, 702, 499, 391, and 167 objections disposed of respectively. In Gaya most of the certificates cancelled were on account of rent-free lands in respect of which there were double assessments or in cases where the lands or their holders could not be traced. The defective state of land registration is the chief cause of the large number of cancellations in Saran, Dacca, Monghyr, and Bhagalpur.

10. The second complete revaluation of the district of Patna, which was sanctioned in October 1893 and commenced in February 1894, was brought to a close during the year. The result of the work was an increase in the cess demand of the district from Rs. 3,56,005 to Rs. 4,62,303. The net cost after deducting fines, searching fees, and stamp receipts was Rs. 25,606, which is about 25 per cent. of the increase in the annual demand. The good work done by the Cess Deputy Collector, Babu Gopikrishna Lal, has been noted. The first valuation of the district of Mymensingh, consisting of 6,171 estates, was carried out in 1875. Partial revaluations of 2,151 estates were made from time to time from 1880-81 to 1893-94. The number of estates remaining to be revalued was therefore 4,020. With a view to complete the revaluation of the whole district, sanction was accorded in February and May 1894 to the revaluation of 4,611 estates, composed of the abovementioned 4,020 estates, 487 estates which though they had been revalued, were taken for a second revaluation as having been revalued more than five years ago, and 104 estates which had resulted from partition effected in some of the preceding 487 estates. The

operations commenced from the 1st August 1894, and their results show an increase in the valuation of these estates from Rs. 43,20,564 to Rs. 53,86,228, which is reported to be due to the increase in the value of the lands, to the judicious selection of tenures by the revaluation officers for their valuation on returns, to the proper assessment of *nij-jote* lands which were undervalued at first, and to the local enquiries made by the kanungos especially employed for the purpose. The net cost, after deducting Rs. 24,454 realized on account of fines and stamp-fees, was Rs. 34,518, which is about half the annual increase obtained in the cess demand. Notice has been taken of the good work done by Babu Purna Chunder Nag in connection with this work. Partial valuations and revaluations were also completed in the districts of Nadia, Khulna, Dinajpur, Bogra, Pabna, Dacca, Chittagong, Shahabad, and Purnea.

11. Statement VI, appended to the Report, compares the gross rental in each district for 1897-98, calculated from the returns under the Cess Act, with the gross rental ascertained on the same basis when the road cess was first introduced, and the gross rental of the preceding year. The results for the province are as follows:—

		Rs.
Gross rental at first assessment	... ...	13,11,68,432
Ditto in 1896-97	... ...	15,94,99,305
Ditto in 1897-98	... ...	16,31,49,222

The increase up to date amounts to Rs. 3,19,80,790 on the rental when the road cess was introduced, but it is to be noted that over 2½ lakhs of this represent the road cess now levied in Singhbhum—a district which was not valued when the Cess Act was first introduced. The largest proportionate increase has been in Bankura, where it was 155 per cent. The increase exceeded 50 per cent. in Jalpaiguri, Muzaffarpur, Monghyr, Birbhum, Balasore, and Hazaribagh. Only the districts of Murshidabad and Jessore showed a decrease of gross rental in 1897-98, as compared with the gross rental at the first assessment, the decrease in Jessore being due to a portion of the district having been separated to form the new district of Khulna. The decrease in Murshidabad is said in the previous year's report to have been due to the transfer of some estates to Birbhum.

12. The names of the Deputy Collectors whose work is favourably noticed by the Board will be communicated to the Appointment Department.

13. The Lieutenant-Governor's thanks are due to the Board of Revenue for their careful and efficient administration of the Department.

By order of the Lieutenant-Governor of Bengal,

E. N. BAKER,

Offg. Secy. to the Govt. of Bengal.

No. 5191A.

Government of Bengal.

PUBLIC WORKS DEPARTMENT.

ACCOUNTS.

Dated Calcutta, the 25th October 1898.

RESOLUTION.

Purchase of Stores in England and locally by the General and Irrigation Branches of the Public Works Department of the Government of Bengal, during 1897-98.

READ—

(1) Letter from the Government of Bengal, Public Works Department, No. 5051A., dated the 29th September 1898, submitting to the Government of India, Public Works Department, the statement of expenditure on stores in the General and Irrigation Branches of the Public Works Department of the Government of Bengal for the year 1897-98.

(2) Letter from the Government of India, Finance and Commerce Department, No. 1426S.R., dated 29th March 1895, pointing out that, as it is understood, that several of the principal engineering firms in India now possess the apparatus necessary for the proper testing, both of the raw material and of the finished product, the fullest use should be made, subject to the prescribed precautions, of the liberty to procure supplies in India.

(3) Resolution on the operations of the Public Works Department, Bengal, in 1896-97 in respect of purchases of stores in England and locally.

REMARKS.—The following information is published, showing the operations of the Public Works Department of this Province in 1897-98 in respect of purchases of stores in England and locally.

2. The total cost of stores entirely obtained from England was Rs. 87,104 as against Rs. 1,44,100 in 1896-97. The following is a list of the principal items:—

	Rs.	
Steel flange rails ...	2,249	This was required by the 1st Calcutta Division for use in the Akra Brick Factory.
Rolled iron joists ...	6,586	These were required for use in the extension of the Out-patients' Department, Campbell Hospital, Scaldah; special repairs to Jail buildings at Hooghly, and to No. 3, Church Lane, Calcutta; and quadrennial repairs to various Imperial and Provincial buildings in the 2nd Calcutta Division.
Rolled steel joists ...	8,661	These were required for the Subdivisional Court, Patuakhali; Magistrate's Court, Burdwan; Munsif's Court, Araria; Telegraph Office, Comilla; Chemical Block, Medical College, Calcutta; and other works in the 1st Calcutta Division.
T-iron	1,441	These were obtained for the extension of the Out-patients' Department, Campbell Hospital, Scaldah, and the construction of a cast-iron spiral staircase, &c., in the Foreign Office, Calcutta; and for works in the Nadia Rivers Division.
Wrought-iron Tees ...	3,573	These were required for Magistrate's Court at Burdwan and Telegraph Office at Comilla.
Wrought-iron B. B. Tees.	1,484	These were required for constructing Subdivisional Court at Netrokona.
Wrought-iron bars ...	3,883	These were required for Chemical Laboratory Block, Medical College, Calcutta.

	Rs.	
Corrugated-iron sheets	9,212	These were obtained for various works and repairs executed in connection with Government buildings
Wrought-iron bed-plates.	1,013	
White glazed square tiles and angle heads.	6,520	These were required for use in the Out-patients' Department, Medical College, Calcutta.
Iron angle bar flat	2,410	These were required for works carried out in the Buxar Central Jail.
Wrought-iron plates	1,360	These were brought on to stock of the Balasore Division when sent out, and were used on works in connection with the establishment of the Ordnance Proof Department at Balasore.
Round iron ...	1,556	
Mild steel sheets ...	1,632	These materials were brought on to stock when sent out, and were used as required on various works executed at the Government Workshops at Jobra.
Wrought-iron galvanized channels.	2,171	
Iron of sorts ...	2,577	
Iron chains ...	1,532	These were obtained for stock in Dehri Workshops Subdivision.
Candles	2,410	These were obtained for use in the Jabloe khoff system of lighting in the Eden Gardens, Calcutta.
Syde's floor tiles ...	9,210	These were required for the office of the Comptroller of Post Offices, Calcutta.
Copper tape ...	1,831	These materials were obtained for use in the various new works and repairs executed to Government buildings.
Cement ...	7,365	
Paints ...	8,425	

None of the articles detailed above could have been entirely manufactured in India, nor are they, as far as Government knows, even sent out in a rough state to be finished at workshops in this country.

3. The total cost of stores of European manufacture purchased in India, on the score of urgency was Rs. 1,74,965, as against Rs. 1,02,264 in 1896-97. The principal items which make up this total are the following:—

	Rs.	
Rolled steel joists ...	43,833	These were urgently required for earthquake damage repairs to High Court building, Calcutta, and civil buildings throughout the Nadia Rivers and Dacca Divisions; quadrennial repairs to St. John's Church; construction of Chemical Laboratory, Medical College; Victoria Zanana Hospital; office of the Comptroller of Post Offices; East Block, Indian Museum; Out-patients' Department, Medical College, Calcutta; cook-house in Reformatory School, Alipore; annual repairs to Belvedere; thorough repairs to Watgunge thana, Kidderpore; construction of the new Secretariat buildings at Darjeeling.
Rolled iron joists ...	2,329	These were urgently required for gun-shed, Proof Range, Balasore, and other works in progress in the Balasore Division.
Wrought-iron bed-plates.	3,357	These were urgently required for office of the Comptroller of Post Offices; Victoria Zanana Hospital; Chemical Laboratory, Medical College; earthquake damage repairs to High Court building, Calcutta.
Corrugated-iron sheets	3,656	These were urgently required for remodelling the latrine and improving the drainage in the compound of the Sanskrit College, Calcutta; constructing Donaldson's patent latrine in the cutcherry compound at Alipore; supplying and fixing cast-iron screens over the partitions in the north and north-east walls of Howrah Subsidiary Jail; constructing the female ward in the compound of the Campbell Hospital, Sealdah.
T-iron	29,340	This was urgently required for Victoria Zanana Hospital; Chemical Laboratory, Medical College; new office for the Comptroller of Post Offices, Calcutta; cook-house in the Reformatory School at Alipore; and female ward in the Campbell Hospital, Sealdah; special repairs due to earthquake damages in the High Court, the Sanskrit College, the Foreign Office, the Board of Revenue Office, Calcutta, and the civil buildings throughout the Nadia Rivers and Dacca Divisions; and putting up a flat terrace roof in the Alipore Collectorate.

	Rs.	
T-iron bars ...	2,231	These were at once required for special repairs to the buildings damaged by earthquake in the Dacca Division.
Kodalies ...	64,718	These were urgently required for Famine Relief Works in Behar.
Picks	2,839	
Galvanized-iron pipes	5,052	These were urgently required for different works in the 1st Calcutta Division.
Wrought-iron gates, (Bostwick.)	4,791	These were urgently required for Out-patients' Department in the Medical College, Calcutta.
Fire grates ...	1,050	These were urgently required for the construction of the new Cutcherry building at Darjeeling.
Wrought iron gratings	1,506	These were urgently required for constructing the Barrack No. 3, Bhagalpur Central Jail.
Portland cement ...	5,851	This was urgently required for constructing female ward in the Campbell Hospital, Sealdah; for urgent repairs to Barrack buildings at Chinsura; and for quadrennial repairs to Salt golas, Sulkea, in the 2nd Calcutta Division; for works in progress in Sikkim; and for meeting emergent demands of other Divisions.
B. H. P. oil engine with Gould's pump and suction delivery pipes.	2,765	These were urgently required for introducing pumping engine apparatus in the Imperial Secretariat building, Calcutta.
Treble barrel 4 inch deep well pump.	1,632	The pump was very urgently required for water-works in the Central Jail, Hazaribagh.

Taking the India Office prices and adding freight and other incidental charges, the cost of these articles, if purchased in England, would have been only Rs. 1,43,165, so that Government paid 22·21 per cent. more through buying them in India than it would have paid in England. The corresponding loss in 1896-97 was 3·55 per cent. The large loss was principally due to the excessive value of kodalies purchased for Famine Relief Works and of Portland cement purchased for Sikkim works.

4. The total cost of stores manufactured in India, partly from imported material and partly from indigenous material, and substituted for stores formerly imported, was Rs. 38,726, as against Rs. 1,07,537 in 1896-97. The principal items were as follows:—

	Rs.	
Built girders ...	3,081	These were required for the Chemical Laboratory, Medical College, Calcutta.
Wrought-iron main trusses.	5,565	These were required for the Female Ward, Campbell Hospital, Sealdah.
Cast-iron columns ...	7,046	These were required for the new office for the Comptroller of Post Offices, Calcutta; the Victoria Zanana Hospital, Calcutta; the Chemical Laboratory in Medical College, Calcutta; the Female Ward and the extension of the Out-patients' Department, in Campbell Hospital, Sealdah; and for repairing earthquake damages to the Board of Revenue Office, Calcutta.
Cast-iron columns ...	1,421	These were made at the Dehri Workshops for record-racks of the Muzaffarpur Collectorate.
Wrought-iron works for record racks.	2,937	These were made at the Dehri Workshops for the Muzaffarpur Collectorate.
Wrought-iron record-racks.	2,946	These were made at the Dehri Workshops for the Bankipore Collectorate.
Wrought-iron gates, folding.	1,347	These were obtained for the Office of the Comptroller of Post Offices and the Out-patients' Department in the Medical College, Calcutta.
Staircase, complete ...	4,601	This was required for the office of the Comptroller of Post Offices, Calcutta.
Cast-iron railings ...	2,534	These were required for the extension of the Out-patients' Department in the Campbell Hospital, Sealdah, and for the upper storey of the treble munsifi at Howrah.
Three-and-a-half tons cast-iron reversible ballast road rollers.	1,100	These were required for use in the 2nd Calcutta Division.
Bolts and nuts ...	1,103	These were made at the Jobra Workshops for miscellaneous works.
Iron castings ...	3,100	
Brass castings ...	1,945	

5. The policy prescribed by the Government of India in their Resolution No. 1426S.R. of 25th March 1895, quoted above, continues to receive the attention of the Local Government.

ORDER.—Ordered, that a copy of this Resolution be published in the Supplement to the next issue of the *Calcutta Gazette*.

Ordered, also, that a copy of this Resolution be forwarded to the Bengal Chamber of Commerce; the Calcutta Trades' Association; and the Bengal National Chamber of Commerce.

By order of the Lieutenant-Governor of Bengal,

R. B. BUCKLEY,

Secretary to the Government of Bengal.

WEATHER AND CROP REPORT.

For the week ending the 24th October 1898.

Burdwan.—Rainfall only at Raniganj ·11. Weather seasonable. *Aman dhan* is coming into ear. Cultivation and sowing of *rabi* crops in progress. Fodder and water sufficient Common rice selling as follows :—

	Srs.	
Sadar	13 to 16	per rupee.
Kalna	11 to 13	
Katwa	14	
Raniganj	15	

Birbhum.—No rain. Weather seasonable. Prospects of crops favourable. Price of common rice at Sadar 15 seers per rupee. Fodder sufficient.

Bankura.—No rain. Weather seasonable. Sugarcane and winter rice crops are doing well. Fodder and water sufficient. Common rice sells at Bankura 17½ seers and at Vishnupur 15 seers per rupee.

Midnapore.—No rain. Prospects of standing crops good. Damage by grass-hoppers still reported from Naraingarh police-station. Prices of common rice :—

	Srs.	
Contai	14 to 16	per rupee.
Tamluk	13 to 13½	
Ghatal	12 to 14	

Hooghly.—No rain. Prospects of paddy favourable. Common rice sells from 10 to 12 seers per rupee.

Howrah.—Rainfall nil. Weather seasonable. Prospects of *haimanti* paddy good Harvesting of *aus* paddy nearly over. Fodder and water-supply sufficient. Common rice sells at 11 to 14 seers per rupee.

24-Parganas.—Rainfall at Sadar ·01. Weather seasonable. Prospects favourable. Ploughing and sowing of *rabi* crops have commenced. No cattle-disease reported. Fodder and water sufficient. Common rice sells as follows :—

	Srs.	
Sadar	11¾ to 14	per rupee.
Basirhat	12 to 13	
Diamond Harbour	13	

Nadia.—Rainfall only at Sadar ·02. Weather seasonable. Prospects of *aman* good. Sowing of *rabi* crops continuing. Common rice sells at 12 to 15 seers per rupee. Fodder and water sufficient.

Murshidabad.—Rainfall only at Jangipur ·02. Weather seasonable. *Aman* and *kalai* plants are doing well. State of sugarcane and mulberry seems good. Cutting of jute almost finished. Indigo and *rabi* crops are being sown. Some destruction of *aus* crop and lowland *aman* crop caused by heavy flood, but the result of the flood will be good for *rabi* crops. Fodder insufficient in Sadar and Kandi subdivisions. Common rice sells at Sadar 15 seers, Jangipur 16 seers and Kandi 17 seers per rupee.

Jessore.—Rainfall only at Bangaon ·07. Weather fine. Ploughing and sowing of winter crops and indigo have begun. Harvesting of jute almost over. No cattle-disease reported. Fodder sufficient except in Bangaon subdivision. Water sufficient. Common rice sells as follows :—

	Srs.	
Jessore	16 to 18	per rupee
Jhenida	17 to 18	
Magura	18 to 21	
Narail	17-12¼ chs.	
Bangaon	16	

Khulna.—Rainfall nil. Weather seasonable. Transplantation of *aman* over. Prospects good. Fodder and water sufficient. Common rice sells as follows :—

	Srs.	
Sadar	14 to 17	per rupee.
Bagerhat	17	
Satkhira	15	
	21 (new *aus*)	

Rajshahi.—No rain. Prospects of crops good. No cattle-disease. Fodder and water plentiful. Rice sells from 12 to 23 seers per rupee.

Dinajpur.—Rainfall nil. Weather cool. Standing crops good. No cattle-disease. Fodder and water ample. Rice 15 seers a rupee.

Jalpaiguri.—Rainfall at Sadar ·07, Alipur Duars ·69. Weather seasonable. Steeping of jute still going on. *Haimanti* paddy in progress. Lands are being prepared for tobacco and *rabi* crops. Fodder and water sufficient. Price of rice stationary.

Darjeeling.—Rainfall at Darjeeling ·10, Siliguri 1·39. Weather seasonable. *Hills*—*Haimanti* paddy, *bara marua*, *kalai*, and *phaphar* progressing. *Terai*—*Haimanti* and *kartic sali* paddy and *kalai* doing well; *tori* being sown. Coarse rice sells as follows:—

	Srs.	
Hills	8 to 10	per rupee.
Terai	12 to 14	

Bhutta sells at Darjeeling 16 seers and at Kalimpong 44 seers per rupee.

Rangpur.—Rainfall only at Kurigram ·09. Lands are being prepared for tobacco and potatoes. Prospects fair. Common rice selling at 11 to 14 seers per rupee. Fodder and water sufficient.

Bogra.—Average rainfall ·17. Preparation of land for *rabi* crops going on. Prospects good. Common rice sells from 13 to 18 seers a rupee. Supply of fodder and water sufficient.

Pabna.—Rainfall nil. Weather fine and cool. Prospects of crops good. Price of rice 12 to 16 seers per rupee.

Dacca.—Rainfall nil. Weather seasonable. Prospects of standing crops good. Fodder available. No cattle-disease. Common rice 12 to 16 seers per rupee.

Mymensingh.—Rainfall at Sadar nil. Weather seasonable. Prospects of paddy good. Harvesting of jute over. Cattle are healthy. Fodder and water sufficient. Rice selling from 12 to 15 seers per rupee.

Faridpur.—Rainfall at Goalundo ·78. Weather seasonable. Prospects good. Rice 14 to 20 seers per rupee.

Backergunge.—Rainfall at Sadar nil. Weather seasonable. Prospects of crops good. Common rice sells from 11½ to 17 seers (*aman*) and from 15 to 21 seers (*aus*) per rupee.

Tippera.—Harvesting of jute completed. Prospects of crops reported hopeful. Fodder sufficient. Price of rice 12 to 20 seers per rupee.

Noakhali.—Rainfall at Sadar ·52. Transplantation of *amun* finished. Lands are being cultivated for *rabi* crops. Prospects good. Fodder fair. Water good. No cattle-disease. Price of rice—*aman* 11 to 16 seers and *aus* 16 to 20 seers per rupee.

Chittagong.—Rainfall ·14. Weather seasonable. Transplantation of *aman* finished. Prospects good. Prices steady. Water and fodder sufficient.

Patna.—Rainfall nil. Lands are being prepared for *rabi* crops. Sowings commenced in places. Prospects of paddy fair. Prices showing a tendency to fall. Common rice sells at 16½ seers per rupee. Fodder and water sufficient.

Gaya.—No rain. Paddy doing well. *Rabi* being sown. Common rice selling at 14 seers per rupee.

Shahabad.—No rain at Sadar; rain at Dehree ·20. Nights cool. Westerly wind with clear sky. *Rabi* sowing commenced. Rice sells at Arrah 14 seers per rupee.

Saran.—*Aghani* paddy generally doing well. *Rabi* sowing continues, and early sowing germinating. Average prices—Common rice 15·9 seers and *makai* 23·15 seers per rupee.

Champaran.—No rain. *Bhadoi* harvest over. *Rabi* sowings in full swing. Prospect of winter rice favourable, but rain is wanted for the high lands. Fodder and water sufficient. Cattle-disease reported. Price of common rice and maize 15 seers and 23½ seers per rupee respectively.

Muzaffarpur.—Rainfall only at Sitamarhi ·12. Prospects of standing crops good. *Rabi* sowings commenced in places. No cattle-disease. Prices are—Common rice 11 to 14 seers, wheat 13 to 16 seers, barley 17 to 20 seers, maize 22 to 37 seers, gram 16 to 18 seers, *rahar* 20 to 21 seers, and *marua* 27½ seers per rupee.

Darbhanga.—No rain. *Rabi* sowing in progress. Seeds germinating well. Paddy in flower. Transplantation of tobacco and sweet potatoes nearly completed. Prospects good. Some difficulty for fodder still felt in the flooded tracts. Common rice selling at Sadar 10½ seers per rupee.

Monghyr.—No rain at Sadar; rain at Begusarai ·36 and Jamui ·48. Days hot, but nights getting cool. Sowing of rape-seed and *kalai* nearly completed. Prospects of standing crops good. No cattle-disease. Common rice sells as follows:—

Sadar	...	...	...	13 seers	per rupee.
Begusarai	...	...	...	12 to 14	„
Jamui	...	...	...	15	„

Bhagalpur.—Rainfall nil. Weather seasonable. Standing crops doing well. Rice selling at 15½ seers per rupee.

Purnea.—Rainfall at Sadar nil; Araria 1·01. Mornings cool, days hot. Prospect of *aghani* paddy good. *Rabi* sowing continues. Harvesting of jute in progress. Cattle-disease in Araria. Fodder and water sufficient. Common rice sells as follows:—

Sadar	...	...	...	17	seers per rupee.
Araria	...	...	...	20	„
Kishanganj	...	...	...	18	„

Malda.—No rain. Weather seasonable. Prospect of winter rice favourable everywhere. *Rabi* crops are being sown. Ordinary rice sells at 18 seers a rupee. Leg-sore among cattle reported from Nawabganj thana. Fodder ample.

Sonthal Parganas.—No rain, but weather still warm. Prospects of winter rice and sugarcane good. Ploughing for *rabi* going on. Price of winter rice 14 to 18 seers and of maize 32 to 45 seers per rupee.

Cuttack.—Rainfall nil. Weather hot. *Laghu sarad* in ear. *Guru sarad*, *biri*, *arhar*, and *mug* growing. Locusts are reported to have damaged the *sarad* crops in some places. Condition of cattle generally good, but disease prevails in places. Fodder and water sufficient. Common rice sells as follows:—

				S.	ch.	
Cuttack	...	...	...	17	1	per rupee.
Jajpur	...	...	...	17	1	
Kendrapara	...	...	...	19	11	
Banki	...	...	...	18	6	

Balasore.—No rain at Sadar. Weeding of *sarad* finished. *Sarad* in flower in places. Harvesting of jute and *asu* continues. Sugarcane thriving well. Rice sells from 14 to 24 seers per rupee in the interior, and at 16 seers in Balasore and Bhadrak. Fodder and water sufficient.

Angul.—Rainfall at Angul ·85. Prospects of crops good. Rice sells at Angul 20 seers per rupee.

Puri.—No rain. *Sarad* in ear. *Laghu* ripening and being cut in places. *Kolthi*, mustard, and linseed being sown. Prospects of sugarcane, *arhar*, and other miscellaneous crops good. Fodder and water sufficient. Cattle-disease reported from certain parts of the district. Price of common rice almost stationary.

Hazaribagh.—Rainfall at Sadar ·62. Weather seasonable. Winter rice doing well. *Rabi* fields being sown. Rice 10 to 13 seers per rupee.

Lohardaga.—Harvesting of *gora dhan* finished. Sowing of mustard and wheat commenced. State of standing crops good. Rice sells at Ranchi 17 seers, and in the interior from 17 to 24 seers per rupee. Fodder and water sufficient. Grain in stock sufficient.

Palamau.—Rainfall nil. Weather fine. *Rabi* sowings in progress. Standing crops excellent. Rice sells from 15 to 23 seers per rupee.

Manbhum.—No rain. Weather seasonable. Prospects of crops on the ground are excellent. Cattle-disease not reported. Fodder and water sufficient. Average price of common rice at Sadar 14 seers per rupee. Supply sufficient.

General Summary.—There were slight showers of rain in a few districts, but the weather generally was fine throughout the week. This has proved very beneficial for the sowing of the *rabi*, which is everywhere in progress. Pulses and oilseeds already sown are germinating well. Prospects of winter rice are generally favourable, but some damage is said to have been done in Cuttack by locusts and in Midnapore by grass-hoppers. Winter rice is coming into ear. Sugarcane is growing and promises well. No important change in the price of rice is reported. Cattle are generally in good condition, but some disease among them is reported from a few districts. Insufficiency of fodder-supply is still reported from some of the flooded tracts.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT,
The 25th October 1898.

M. FINUCANE,
Secretary to the Govt. of Bengal.

The average fall of the corresponding period for 24 years, Surveyor-General's Office	0·78
The total fall from 1st January to 22nd October 1898	59·52
The average fall of the corresponding period for 24 years, Surveyor-General's Office	62·65

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h., and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

⌓, dew; =, fog; d, drizzling rain.

Grand Total ...	1,80,923	1,69,174	1,64,158	1,53,611	1,55,217	1,62,499	1,67,732	1,79,024	1,68,826	2,[illegible]4,716

2. The receipts during the year amounted to Rs. 1,80,923, showing an increase of Rs. 11,749 over those of the previous year. The receipts from Railway traffic were Rs. 1,51,408, against Rs. 1,33,811 in 1896-97.

3. The total expenditure amounted to Rs. 1,67,666, showing an excess of Rs. 9,672 over that of the year before. This was due mainly to the heavy charges on account of repairs. The wearing surface of the roadway and the superstructure of the bridge and the pontoons were kept in thorough repair; the iron-work was cleaned, oiled and painted; the fenders and sheathings kept in good order; the draw bridge girders were strengthened and beams renewed as required, and all other work, found necessary to maintain the bridge in order, was carried out. The Lieutenant-Governor is glad to see that such thorough care is taken of the bridge. The bridge sustained but very slight damage during the severe earthquake of the 12th June 1897.

4. As in the previous years, in addition to the ordinary receipts, the following sum, which may be classed as extraordinary, was received:—

	Rs.
Interest on Government securities of Pontoon Renewal Fund ...	1,750
The corresponding expenditure under the same head was—	
Sinking Fund on loans	4,280

5. The cost of lighting the bridge with electricity was Rs. 9,823, against Rs. 10,395 in 1896-97, showing a reduction of Rs. 572. The arrangement of having the engines at the Commissioners' Howrah Workshop continued to work well.

6. The bridge was opened for the passage of vessels on 149 occassions, of which 104 were on the ordinary fixed days of the week, and 45 on Sundays on special application. The number and description of vessels, which passed through the bridge on these occasions, are shown below:—

Vessels.	1897-98.	1896-97.	1895-96.	1894-95.	1893-94.	1892-93.	1891-92.	1890-91.	1889-90.	1888-89.
1	2	3	4	5	6	7	8	9	10	11
Sea-going vessels	235	326	241	282	291	309	264	414	362	380
Inland steamers and flats ..	1,364	1,[illegible]81	1,116	1,[illegible]05	1 060	1,129	1,400	1,069	941	878
Steam-tugs	792	712	677	667	549	453	566	540	491	456
Port Commissioners' vessels ...	20	53	38	45	161	183	66	92	53	20
Government steamers and flats ...	1	2	1	2	2	...	...	5	16	7
Total ...	2,412	2,324	2,073	2,201	2,063	2,074	2,086	2,110	1,863	1,741

7. No sea-going vessel collided with the bridge. There were 129 cases of collision, of which 93 were casualties to cargo and other boats. The number of casualties during the three preceding years was 109, 78 and 81 respectively.

By order of the Lieutenant-Governor of Bengal,

A. D. McARTHUR, *Col.*, R.E.,

Secretary to the Govt. of Bengal.

WEATHER AND CROP REPORT.

For the week ending the 31st October 1898.

Burdwan.—No rain. Weather seasonable. Prospects of winter rice excellent. Common rice selling as follows:—

	Srs.	
Sadar	13 to 16	per rupee.
Kalna	13	
Katwa	15	
Raniganj	16	

Birbhum.—No rain. Weather seasonable. Prospects of crops good. Price of common rice at Sadar 15 seers and at Rampur Hât 16 seers per rupee. Fodder sufficient.

Bankura.—No rain. Weather seasonable. Prospects of *aman* excellent. Harvesting of *nuan* paddy and sowing of *rabi* have commenced. No cattle-disease reported. Fodder and water sufficient. Price of common rice at Sadar 17½ seers and at Vishnupur 15 seers per rupee.

Midnapore.—No rain. Prospects of standing crops very good indeed. Damage by grass-heppers reported from Benapura and Kesiari police-stations. Prices of common rice:—

	Srs.	
Sadar	13 to 15	per rupee.
Contai	14 to 16	
Tamluk	13 to 13½	
Ghatal	13 to 16	

Hooghly.—Rainfall nil. Prospects of *aman* good. Cattle-disease prevails. Common rice sells from 11 to 12 seers per rupee.

Howrah.—Rainfall nil. Weather cool. Harvesting of *aus* nearly finished. Prospects of *aman* good. Fodder and water sufficient. Common rice sells at 11 to 13 seers per rupee.

24-Parganas.—Rainfall nil. Weather seasonable. Prospects of crops good. Ploughing and sowing of *rabi* crops going on. Cattle-pox reported from Chaital in the Basirhat subdivision. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	11 to 12	per rupee.
Barasat	15	
Basirhat	13½	
Diamond Harbour	13	

Nadia.—No rain. *Aman* paddy doing well. Sowing of *rabi* crops progressing. Common rice selling at 12 to 15 seers per rupee. Fodder and water sufficient. Cow-pox at Patherghata in thana Tehatta.

Murshidabad.—No rain. Weather seasonable. *Aman* and *kalai* plants doing well. State of sugarcane and mulberry seems to be good. Sowing of indigo and *rabi* crops going on. Cutting of jute finished. Fodder insufficient in Sadar and Kandi subdivisions. Common rice sells as follows:—

	Srs.	
Sadar	15	per rupee.
Jangipur	16	
Kandi	16	

Jessore.—No rain. Weather fine and seasonable. Ploughing and sowing of winter crops going on. Prospects of standing crops good. No cattle-disease reported. Fodder-supply insufficient at Bangaon. Common rice sells as follows:—

	Srs.	
Jessore	15 to 18	per rupee
Jhenida	17 to 18	
Magura	19 to 21	
Narail	17-12¼ chs.	
Bangaon	17¼	

Khulna.—Rainfall nil. Weather seasonable. Lands being prepared for winter crops. *Aman* paddy doing well. Prospects good. Fodder and water sufficient. Common rice sells as follows :—

	Srs.	
Sadar	... 16 to 18	per rupee.
Bagerhat	... 18	
Satkhira	17 and 21 (new *aus*)	

Rajshahi.—No rain. Prospects of crops good. *Rabi* sowings in progress. No cattle-disease. Fodder and water available. Rice sells from 12 to 18 seers per rupee.

Dinajpur.—Rainfall nil. Weather cool; hot during day. Standing crops good. No cattle-disease. Fodder and water ample. Rice 17 seers a rupee.

Jalpaiguri.—Rainfall nil. Weather seasonable. *Haimanti* paddy doing well. Fodder and water sufficient. Common rice sells from 8 to 15 seers a rupee.

Darjeeling.—Rainfall nil. Weather seasonable. *Hills*—Wheat and barley being sown; *bara marua, phaphar, kalai*, and *haimanti* paddy progressing. *Terai*—*Haimanti* paddy doing well; potatoes and mustard being sown. Coarse rice sells as follows :—

	Srs.	
Hills	... 9 to 11	per rupee.
Terai	... 13 to 16	

Bhutta sells at Darjeeling 19 seers and at Kalimpong 44 seers per rupee.

Rangpur.—No rain. Lands are still being prepared for tobacco and potatoes. Prospects fair. Common rice selling at 12 to 14 seers per rupee. Fodder and water sufficient.

Bogra.—Rainfall nil. Preparation of lands for *rabi* crops going on. Prospects of standing crops good. Common rice sells from 13 to 18 seers a rupee. Supply of fodder and water sufficient.

Pabna.—Rainfall nil. Weather fine. Prospects of crops good. Price of rice 12 to 16 seers per rupee.

Dacca.—Rainfall nil. Weather seasonable. Prospects of standing crops good. Fodder available. No cattle-disease. Common rice 13 to 20 seers per rupee.

Mymensingh.—Rainfall nil. Weather seasonable. Harvesting of jute and sowing of *rabi* continue. Prospects of *aman* good. Common rice sells at 15 to 19 seers per rupee Fodder and water sufficient.

Faridpur.—No rain. Weather seasonable. Prospects of crops good. Rice 14 to 20 seers per rupee.

Backergunge.—Rainfall nil. Weather seasonable. Prospects of crops good. Common rice sells from 11½ to 18 seers (*aman*) and from 15 to 21 seers (*aus*) per rupee.

Tippera.—No rain. Weather seasonable. Prospects of standing crops hopeful. Fodder sufficient. Rice sells at 12 to 20 seers per rupee.

Noakhali.—Rainfall nil. Lands are being cultivated for *rabi* crops. No cattle-disease. Condition of fodder fair. Water good. Price of rice—*aman* 12 to 16 seers and *aus* 16 to 21 seers per rupee.

Chittagong.—Rainfall nil. Weather seasonable. Prospects of crops good. Prices steady. Water and fodder sufficient.

Patna.—Rainfall nil. Sowing of *rabi* going on, and that of tobacco and potatoes in progress. Prices almost stationary. In Patna common rice sells at 18 seers per rupee. Fodder and water for cattle sufficient.

Gaya.—No rain. Prospects of paddy good. Sowing of *rabi* in progress. Common rice selling at 15½ seers per rupee.

Shahabad.—No rain. Weather cold. *Rabi* sowings in rapid progress. Standing crops good. Rice sells at Arrah 14 seers per rupee.

Saran.—No rain. Paddy generally doing well. Sowing of *rabi* continues; early sowings doing well. Average prices are—Common rice 15 seers 6 chitaks and *makai* 24 seers 12 chitaks, against 14 seers 15 chitaks and 23 seers 4 chitaks, normal prices.

Champaran.—No rain. Weather cool. Sowing of *rabi* crops progressing. Oilseeds and pulses being sown. Prospects of standing crops good except on high lands, where rain is wanted. No cattle-disease Fodder and water sufficient. Price of common rice 15½ seers and maize 23 seers per rupee.

Muzaffarpur.—Rainfall nil. Prospects of standing crops fair. *Rabi* sowings in progress. No cattle-disease. Prices are—Common rice 11 to 14 seers, wheat 12 to 16 seers, barley 18 to 20 seers, maize 25 to 37 seers, gram 16 to 18 seers, *rahar* 20 to 21 seers, and *marua* 37½ seers per rupee.

Darbhanga.—No rain. Nights cool. Paddy where not damaged is flourishing. Prospects good. Transplantation of tobacco and sweet potatoes completed. Sowing of *rabi* in progress. Fodder available. Common rice selling at Sadar 12 seers per rupee.

Monghyr.—No rain. Days hot, but nights cool. *Rabi* being sown. Prospects of standing crops good. Sugarcane doing well. No cattle-disease. Common rice sells as follows:—

	Srs.	
Monghyr	13	per rupee.
Jamui	15	
Begusarai	13½	

Bhagalpur.—Rainfall nil. Weather seasonable. State of crops good, but more rain is wanted in the Banka subdivision. No cattle-disease except at Partapganj. Fodder and water-supply sufficient. Prices stationary.

Purnea.—Rainfall nil. Weather seasonable. Crop prospects good. Jute being steeped. Cattle-disease at Araria. Fodder and water sufficient. One death from *kaladukh* reported from Kishanganj. Common rice sells as follows:—

	Srs.	
Sadar	17	per rupee.
Kishanganj	19	
Araria	20	

Malda.—No rain. Weather cool and clear. Prospects of winter rice very good. Sowing of *rabi* crops continues. Coarse rice selling at 18 seers a rupee. Fodder sufficient.

Sonthal Parganas.—No rain. Winter rice and sugarcane doing well. *Rabi* sowings going on rapidly. Prices—rice 15 to 17 seers and maize 32 to 45 seers per rupee.

Cuttack.—Rainfall nil. Weather seasonable. *Laghu sarad* in ear. *Guru sarad*, *biri*, *arhar*, and *mung* growing, but locusts are reported to have damaged *sarad* crops slightly. Condition of cattle generally good, but disease prevails in places. Fodder and water sufficient. Common rice sells as follows:—

	S.	ch.	
Cuttack	17	1	per rupee.
Jajpur	17	1	
Kendrapara	21	0	
Banki	18	6	

Balasore.—No rain. Harvesting of *beali* continues. *Sarad* in ear. Sugarcane thriving well. *Rabi* crops being sown. Rice sells from 14 to 24 seers per rupee in the interior, and at 16 and 17 seers per rupee at Balasore and Bhadrak respectively. Fodder and water sufficient.

Angul.—Rainfall at Angul nil. Weather seasonable. Prospects good. Rice selling at Angul 20 seers per rupee.

Puri.—No rain. *Sarad* in ear. *Laghu* ripening and being cut in places. *Kulthi*, mustard, and linseed being sown. Prospects of sugarcane, *arhar*, and other miscellaneous crops good. Fodder and water sufficient. Cattle-disease reported from certain parts of the district. Common rice sells as follows:—

	S.	ch.	
Puri	15	12	per rupee.
Khurda	14	7	
Interior of district	13 to 18	2 to 3	

Hazaribagh.—No rain. Weather cold. 18—anna rice crop expected. *Rabi* being sown. Rice 10 to 13 seers per rupee.

Lohardaga.—Rainfall nil. Sowing of wheat and barley continues. State of standing crops good. Rice sells at Ranchi 18 seers, and in the interior of the district from 18 to 20 seers per rupee. Cattle-disease continues. Fodder and water sufficient. Grain in stock sufficient.

Palamau.—No rain. Weather seasonable. Sowing of *rabi* continues. Paddy and other crops doing well. Cattle-disease reported from Satihar thana. Rice sells at Sadar 19 seers per rupee.

Manbhum.—Rainfall nil. Weather seasonable. Prospects of crops on the ground are excellent. Cattle-disease not reported. Fodder and water sufficient. Average price of common rice at Sadar 15 seers and at Gobindpur 14 seers per rupee. Supply sufficient.

Singhbhum.—Rainfall nil. Rice plentiful—20 to 22 seers per rupee.

General Summary.—The weather remained fine throughout the week, no rain falling. Reports of the winter rice crop are generally favourable, but certain high lands in Champaran and in the Banka subdivision of Bhagalpur require rain. The sowing of the *rabi* and other cold-weather crops is in active progress. The price of rice is reported to have fallen in some districts. Some cattle-disease is reported, but the condition of the cattle on the whole is good. The fodder-supply is everywhere sufficient except in parts of Murshidabad and Jessore.

The average fall of the corresponding period for 24 years, Surveyor-General's Office		64·35

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

D dew.

WEATHER AND CROP REPORT.

For the week ending the 7th November 1898.

Burdwan.—No rain. Weather seasonable. *Aman* paddy very good. Cultivation of *rabi* crops has begun. Common rice selling as follows:—

	Srs.	
Sadar	13 to 16	per rupee.
Kalna	13 „ 15	
Katwa	15	
Raniganj	16	

Birbhum.—No rain. Weather cloudy Prospects of crops good. Price of common rice at Sadar 15 seers and at Rampur Hât 16 seers per rupee. Fodder sufficient.

Bankura.—No rain. Generally fair; cold weather setting. Sowing of *rabi* in progress. Sugarcane and winter rice doing well. Fodder and water sufficient. Price of common rice at Sadar 17½ seers and at Vishnupur 15½ seers per rupee.

Midnapore.—No rain. Prospects of standing crops very good. Cattle-disease reported from Nayagram. Prices of common rice:—

	Srs.	
Sadar	13 to 15	per rupee.
Contai	14 „ 16	
Tamluk	13 „ 13½	
Ghatal	13 „ 16	

Hooghly.—No rain. Weather cloudy. Prospects of crops good. Cattle-disease prevails Common rice sells from 10 to 12 seers per rupee.

Howrah.—Rainfall nil. Weather seasonable. Prospects of *aman* good. Harvesting of *aus* nearly finished. Fodder and water sufficient. Common rice sells at 11 to 14 seers per rupee.

24-Parganas.—Rainfall nil. Weather seasonable. Prospects of standing crops good. Ploughing and sowing of *rabi* crops going on. No cattle-disease. Fodder and water sufficient. Common rice sells as follows :—

		Srs.	
Sadar	... ...	11 to 12	per rupee.
Barasat	...	15	
Basirhat	... ...	13 7/8	
Diamond Harbour	... ...	13	

Nadia.—No rain. Winter rice doing well. Ploughing of lands and sowing of *rabi* crops going on. Common rice selling at 12 to 15 seers per rupee. Fodder and water sufficient. Cow-pox at Shailmari in thana Tehatta.

Murshidabad.—No rain. Weather seasonable. *Aman* and *kalai* doing well. State of sugarcane and mulberry seems good. Sowing of indigo and *rabi* crops still going on. Fodder insufficient in Sadar and Kandi. Common rice sells as follows :—

		Srs.	
Sadar	... ...	15½	per rupee.
Jangipur	... ...	17	
Kandi	... ...	18½	

Jessore.—No rain. Weather seasonable. Ploughing and sowing of winter crops and indigo going on. Harvesting of jute over. No cattle-disease reported. Fodder and water sufficient. Common rice sells as follows :—

		Srs.	
Jessore	... ...	16 to 20	per rupee.
Jhenida	... ...	17 „ 18	
Magura	... ...	18 „ 21	
Narail	... ...	20	
Bangaon	... ...	17¾	

Khulna.—Rainfall nil. Weather seasonable. Sowing of *rabi* crops commenced. *Aman* paddy progressing well. Prospects good. Fodder and water sufficient. Common rice sells as follows :—

		Srs.	
Sadar	...	16 to 20	per rupee.
Bagerhat	...	18 6/16	
Satkhira	17 and 18 (new *aus*)		

Rajshahi.—No rain. Prospects of crops good. *Rabi* sowings in progress. Condition of cattle good. Fodder and water plentiful. Price of rice ranges from 12 to 18 seers per rupee.

Dinajpur.—Rainfall nil. Weather cool and cloudy at times. Standing crops good No cattle-disease. Fodder and water plentiful. Rice 16 seers a rupee.

Jalpaiguri.—Rainfall at Sadar ·03 and at Alipur Duars ·30. Weather seasonable. *Haimanti* paddy in progress. Transplantation of tobacco commenced. Fodder and water sufficient. Price of common rice stationary.

Darjeeling.—Rainfall at Darjeeling ·41 and at Siliguri ·26. Weather rainy and cool. *Hills*—Wheat, barley, and mustard being sown; *haimanti* paddy, *bara maruo*, *phaphar* and *kalai* flourishing. *Terai*—Potatoes and mustard being sown; *haimanti* paddy doing well. Coarse rice sells :—

		Srs.	
Hills	... ...	9 to 11	per rupee.
Terai	... ...	13 to 14	

Bhutta sells at Darjeeling 19 seers and at Kalimpong 20 seers per rupee.

Rangpur.—No rain. Lands being prepared for tobacco and potatoes. Prospects of standing crops good. Common rice selling at 12 to 15 seers per rupee. Fodder and water sufficient.

Bogra.—Rainfall nil. Ploughing of lands for *rabi* crops continues. Prospects of standing crops good. Common rice selling from 15 to 20 seers a rupee. Supply of fodder and water sufficient.

Pabna.—Rainfall nil. Weather fine and cool. Crop prospects good. Price of rice 12 to 16 seers per rupee.

Dacca.—Rainfall nil. Weather seasonable. Prospects of standing crops good. Fodder available. No cattle-disease. Common rice 13 to 20 seers per rupee.

Mymensingh.—Rainfall nil. Weather seasonable. Prospects of crops good. Condition of cattle good. Fodder and water ample. Common rice (old) 12 seers and (new) 15 to 19 seers per rupee.

Faridpur.—No rain. Weather cloudy and hot. Prospects of crops good. Reaping of *digha* and *asrini* paddy commenced. Rice 17 to 20 seers per rupee.

Backergunge.—Rainfall nil. Weather close. Prospects of crops good. Common rice sells from 11¼ to 17½ seers (*aman*) and from 14¾ to 21 seers (*aus*) per rupee.

Tippera.—No rain. Weather variable. Prospects of standing crops good. Fodder sufficient. Common rice sells at 12 to 22 seers per rupee.

Noakhali.—Rainfall nil. Prospects of crops good. Cattle-disease reported from Companyganj. Fodder and water-supply good. Price of rice—*aman* 12 to 16 seers and *aus* 17 to 21 seers per rupee.

Chittagong.—Rainfall nil. Weather seasonable. Prospects of crops good. Prices steady. Water and fodder sufficient.

Patna.—No rain. *Rabi* sowings in progress. Prospects of paddy and sugarcane good. Prices of food-grains falling. Common rice in Patna sells at 19 seers per rupee. Condition of cattle good. Fodder and water for cattle sufficient.

Gaya.—No rain. Paddy doing well. *Rabi* sowings in progress. Common rice selling at 15½ seers per rupee.

Shahabad.—No rain. Weather seasonable. *Rabi* sowings progressing. Paddy being cut in places. Rice sells at Arrah 14 seers per rupee. Fodder and water sufficient.

Saran.—No rain. Weather cloudy. Paddy doing well. *Rabi* sowing continues; early sowings doing well. Average prices are—Common rice 15·4 seers and *makai* 24·6 seers per rupee.

Champaran.—No rain. Sowing of *rabi* continues and that of pappy begun. Rice prospects on the whole favourable. Common rice sells at 15 seers and maize at 23 seers per rupee.

Muzaffarpur.—Rainfall nil. Prospects of standing crops fair. *Rabi* sowings in progress. No cattle-disease. Prices are—Common rice 11 to 17 seers, wheat 13 to 15 seers, barley 20 to 22½ seers, maize 25 to 30 seers, gram 17 to 20 seers, *rahar* 21 seers, and *marua* 27½ seers per rupee.

Darbhanga.—No rain. Weather cool. Prospects of standing crops good. *Rabi* is being sown. Paddy attaining maturity in places. Common rice selling at 11 seers per rupee at Sadar.

Monghyr.—No rain. Weather seasonable. Prospects of standing crops good. *Rabi* sowings are being vigorously carried on. No cattle-disease. Common rice sells as follows:—

	Srs.	
Monghyr	13	per rupee.
Begusarai	13 to 15	
Jamui	15 „ 16	

Bhagalpur.—Rainfall nil. Weather seasonable. Prospects of standing crops continue favourable, but more rain wanted in parts of Banka. Sowing of *rabi* crops in progress. Fodder and water sufficient. No cattle-disease except in parts of Supaul. Common rice sells at 17¾ seers per rupee; otherwise prices are stationary.

Purnea.—No rain. Weather seasonable. Standing crops doing well. *Rabi* sowings progressing well. Cattle-disease abating in Araria. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	19	per rupee.
Kishanganj	20	
Araria	21	

Malda.—Rainfall nil. Weather seasonable. Winter rice coming in ears. *Rabi* sowing continues. Common rice selling at 18 seers a rupee. No cattle-disease. No want of fodder.

Sonthal Parganas.—Rainfall nil. Weather seasonable. Prospects of winter rice good; harvesting begun on high lands. *Rabi* sowings progressing rapidly. Prices are—Rice 14 to 20 seers and maize 32 to 45 seers per rupee.

Cuttack.—Rainfall nil. Weather seasonable. *Laghu sarad* ripening. *Guru sarad* in ear. *Biri*, *mung*, *kulthi*, and sugarcane are growing. Condition of cattle generally good, but disease still reported from some places. Fodder and water sufficient. Common rice sells as follows:—

	S.	ch.	
Cuttack	17	1	per rupee.
Jajpur	17	1	
Kendrapara	19	11	
Banki	19	6	

Balasore.—Rainfall nil. Harvesting of *beali* continues. *Sarad* in ear. Sugarcane thriving well. *Rabi* crops being sown Rice sells from 14 to 22 seers per rupee in the interior, and at 16 and 18 seers at Balasore and Bhadrak respectively. Insect-pest and cattle-disease reported from Dhamanagar and Chandbali respectively. Rain wanted. Fodder sufficient.

Angul.—No rain. Weather seasonable. Common rice selling at 20 seers per rupee.

Puri.—No rain. Weather cloudy. Rain wanted. *Sarad* in ear. *Laghu* being cut. *Kolthi*, mustard, and linseed being sown. Prospects of sugarcane, *arhar*, and other miscellaneous crops good. Fodder and water sufficient. Cattle-disease reported from certain parts of the district. Common rice sells as follows:—

	S.	ch.	
Puri	15	12	per rupee.
Khurda	14	7	
Interior of district	13 to 17	2 1	

Hazaribagh.—Rainfall nil. Weather cloudy. Harvesting of rice in progress. *Rabi* being sown. Rice 12 to 16 seers per rupee.

Lohardaga.—No rain. Sowing of wheat and barley finished. Harvesting of lowland paddy commenced. Rice sells at Ranchi 17 seers, and in the interior from 17 to 20 seers per rupee. Cattle-disease continues in the interior. Fodder and water sufficient. Grain in stock sufficient.

Palamau.—No rain. Weather cold. *Rabi* sowing in progress. Paddy in good condition. Rice sells at Sadar 19 seers per rupee.

Purulia.—Rainfall nil. Weather seasonable. Prospects of crops on the ground are excellent. Cattle-disease not reported. Fodder and water sufficient. Average price of common rice at Sadar 14 seers and at Gobindpur 15 seers per rupee. Supply sufficient.

General Summary.—There was no rain during the week with the exception of slight showers in Darjeeling and Jalpaiguri. Reports of the winter rice and other standing crops are generally good, but rain is needed in parts of Bhagalpur, Balasore, and Puri. A pest of insects is reported from Balasore. The sowing of the *rabi* and other cold-weather crops is proceeding, and the earlier sowings are coming up well. Prices remained practically stationary. The fodder-supply is everywhere reported ample except in parts of Murshidabad. Cattle generally are in good condition, though slight outbreaks of cattle-disease are reported in some districts.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT,
The 8th November 1898.

F. A. SLACK,
Offg. Secretary to the Govt of Bengal.

STOCKS OF RICE IN AND AROUND CALCUTTA.

No. 775 Statis.—The following is published for general information.

F. A. SLACK,

Abstract of the Results of Meteorological Observations taken at the Alipore Observatory in the month of October 1898.

	Inches.	Date.	Hour.
The mean pressure of the month	29·843		
The average pressure of October from 24 years' registers ...	29·832		
The highest pressure in the month	30·013	28th	10
The lowest pressure in the month	29·672	14th	16
The range of pressure	0·341		
	Hours		
The total number of hours of bright sunshine during the month	226·1		
The maximum possible number of hours of sunshine ...	359·1		
	°		
The mean temperature of the month	78·9		
The average temperature of October from 24 years' registers ...	81·5		
The highest temperature in the month	91·2	3rd	
The lowest temperature in the month	63·1	29th	
The range of temperature during the month	28·1		
The mean daily range of temperature	12·8		
The greatest range of temperature in one day	19·4	29th	
	Per cent.		
The mean humidity of the month	84		
The average humidity of October from 24 years' registers ...	79		
	Inches.		
The mean vapour tension of the month ...	0·828		
The average vapour tension of October from 24 years' registers...	0·854		
The mean cloud proportion of the month	3·14		
The average cloud proportion of October from 21 years' registers	3·85		
	Ins.		
The total rainfall of the month	6·48		
The total rainfall indicated by a Beckley's self registering rain-gauge (mouth of the gauge about 52 feet above the ground)	6·03		
The average fall of October from 48 years' registers ..	5·61		
The greatest fall in 24 hours	3·10	14th	
	Days.		
The number of rainy days in the month	8		
The average number of rainy days in October from 24 years' registers	10		
The mean maximum equilibrium temperature of solar radiation during the month	° 140·4		
The mean difference of sun and air temperatures	54·9		
The greatest sun temperature	154·4	6th	
The greatest excess of sun over air temperature	68·2	15th	
The mean temperature of the nocturnal radiation thermometer on woollen cloth	68·3		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground	4·5		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature	8·2	29th	
	Miles.		
The mean movement of the wind per day	42·8		
The greatest movement of the wind in one day	196·0	14th	
The greatest movement of the wind in one hour	15·0	14th, 1 to 2 P.M.	

The number of hours with winds from each of the 8 points—
N. 123, N.E. 44, E. 56, S.E. 38, S. 26, S.W. 45, W. 50, N.W. 71, Calm 291.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore ·003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 0·8 lower; and, finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0·6 higher than the Kew Standard thermometer, which is the standard of reference at the present Observatory.

G. W. KUCHLER,

METEOROLOGICAL OFFICE, GOVT. OF INDIA, *For Meteorological Reporter to the Govt. of India.*
Calcutta, the 7th November 1898.

Results of the Meteorological Observations taken at the Alipore Observatory from 30th October to 5th November 1898.

	%
The mean relative humidity	75
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	·74
	Inches.
The total fall of rain from 30th October to 5th November 1898	Nil
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0·38
The total fall from 1st January to th November 1898	59·52
The average fall of the corresponding period for 24 years, Surveyor-General's Office	64·73

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph and from observations made at 6h., 10h., 16h., and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

D dew.

DISTRICT ROAD FUND.

No. 5114R.C.

Road Cess.

Dated Calcutta, the 12th November 1898.

RESOLUTION.

READ—

Letter from the Accountant-General, Bengal, No. 961L.F., dated the 17th October 1898, submitting an abstract of receipts and expenditure of the several District Road Committees in Bengal for the quarter ending 30th June 1898.

RESOLUTION.—The Lieutenant-Governor directs that the accounts of the receipts and expenditure of the several District Road Committees in Bengal for the first quarter of the year 1898-99 be published in the *Calcutta Gazette* and circulated to the officers concerned.

ORDER.—Ordered that a copy of this Resolution, together with a copy of the abstract of receipts and expenditure, be published in the Supplement to the *Calcutta Gazette*.

Ordered also that a copy of this Resolution, and of the abstract referred to, be forwarded for information to the Commissioners of the Rajshahi, Chittagong, Bhagalpur, and Chota Nagpur Divisions; Superintending Engineer of the Northern Circle; Inspectors of Works, Eastern and Western Circles; and Financial Department of this Government.

By order of the Lieutenant-Governor of Bengal,

R. B. BUCKLEY,

Secretary to the Government of Bengal.

W. H. Michael,

Offg. Accountant-General, Beng

RESOLUTION ON THE ADMINISTRATION REPORT OF THE COMMISSIONERS OF CALCUTTA FOR THE YEAR 1897-98.

MUNICIPAL DEPARTMENT—MUNICIPAL.

Calcutta, the 15th November 1898.

RESOLUTION—No. 6486M.

READ—

The Administration Report of the Commissioners of Calcutta for the year 1897-98.

Read again—

The Report for the year 1896-97 and the Resolution recorded by Government thereon.

This Report was not received by Government until 7th October, although due on 31st July. This delay of nearly two and-a-half months is to be regretted, but it is explained as having been mainly due to the pressure of urgent work in connection with plague measures.

2. There were two changes during the year in the office of Chairman of the Corporation. Mr. H. C. Williams, who took furlough on 19th May 1897, subsequently resigned, and was succeeded by Mr. W. R. Bright, who held the post until 7th March 1898, when he also was compelled by ill-health to take leave. Mr. R. T. Greer has since been acting as Chairman, and the present Report is submitted by him. Babu Nilambara Mukarji continued to hold the office of Vice-Chairman throughout the year, and the post of Engineer to the Corporation was, as in the previous year, filled by Mr. A. J. Hughes, C.I.E. Dr. W. J. Simpson, the Health Officer, retired on 6th September 1897, but it was not till 21st December of that year that the Commissioners selected a successor. The candidate chosen was Dr. Nield Cook, the Health Officer of Madras, who took over charge of his duties on 7th January 1898. In the meantime the Assistant Health Officer, Dr. Sen, carried on the work of the office. Among the nominated Commissioners Syed Hazoor Mirza was appointed by Government in place of Maulvi Abdul Jubber, Khan Bahadur, C.I.E., who resigned, and Dr. C. Banks in place of Lieutenant E. W. Petley, C.I.E. The periodical election of Commissioners was held on 12th March 1898, and resulted in the re-election of 38 out of 50 Commissioners. The elections were contested in 13 out of the 25 wards. From the tables appended to the Report, it appears that out of a total population of 681,560, there were 13,890 registered voters, of whom 10,143 were Hindus, 2,030 were Europeans, 1,501 Muhammadans, and 216 others. Owing to the existence of plural voting, the voting power differs from the above. The total voting power amounts to 58,476 votes, of which 41,381 belong to Hindus, 10,720 to Europeans, 5,391 to Muhammadans, and 984 to other classes. Lawyers as usual obtained a larger share of representation than any other class, winning 20 seats out of 50.

3. *Meetings and attendance of Commissioners.*—The total number of meetings of all kinds held by the Commissioners was 241 against 248 in the previous year. General meetings numbered 37 as compared with 45 in 1896-97; Standing Committees met 125 times, Special Committees 32 times, and Sub-Committees 47 times. The number of Commissioners who attended more than 50 meetings fell from 26 to 19. Babu Nalin Behari Sircar, who attended 154 meetings, heads the list; next come Babu Priya Nath Mallik and Mr. Ghosal with 117 attendances, Babu Kally Nath Mitter with 106, and the Hon'ble Babu Norendro Nath Sen with 105. The average percentage of attendance among the elected Commissioners was 52 against 50 in the previous year; that among the appointed Commissioners remained the same, viz. 46; while that among the Commissioners representing the Port Commissioners, the Bengal Chamber of Commerce and the Calcutta Trades Association rose to 51 against 47 in 1896-97.

4. *Proceedings of Commissioners.*—The chief subjects discussed by the Commissioners in general meeting during the year were matters connected with the new drainage works, the question of electric tramways, the grant of land required by the Bhowanipur Hospital, the disposal of the Port sewage, the reorganization of the Warrant Department of the Municipality, the construction of a new Municipal office, and the measures to be taken to prevent the introduction of bubonic plague, and to combat it on its appearance. The progress

made towards the completion of the new drainage works is described below. The Committee which was appointed in January 1897 to consider the possible arrangements for the introduction of mechanical traction on the Calcutta tramways submitted proposals in June of that year, but these, after being discussed by the Commissioners, were returned by them for further consideration. After seven more meetings, the Committee drew up another report, which was accepted in November 1897. These terms were, however, rejected by the Tramways Company, who submitted counter-proposals. Subsequent to the close of the year, a fresh offer was made to the Company, but this also has been refused, and the negociations have been finally broken off. The condition of the tramway lines in many parts of the town is deplorable, and constitutes a patent breach of the obligations imposed on the Company by Act I (B C.) of 1880. The Corporation has acted with much forbearance towards the Company in the past in the hope that with the introduction of electric traction a great public improvement would be effected. But now that there has ceased to be any immediate hope of this, it is incumbent on the Commissioners to take prompt and vigorous action to compel the Company to fulfil its long-neglected obligations. The Lieutenant-Governor has noticed with satisfaction the steps that are being taken to this end.

Certain land to the north-east of the hospital at Bhowanipur, mention of which was made in last year's Resolution, was made over to Government free of cost, on condition that the hospital, which had hitherto been known as the South Suburban, should bear the name of the Shambhu Nath Pandit Hospital. A scheme for the disposal of the Fort sewage by establishing a pail depôt in Clive's Ravelin, to be connected with the Municipal sewer in the Esplanade Road, was received in June 1897 from the Executive Engineer, Fort William. This was approved by the Commissioners, but has not been carried out, as the terms on which the work was to be done are still under the consideration of Government. The organization of the Warrant Department, which had for years been inefficient, was taken up and thoroughly examined by a Special Sub-Committee. The latter was not unanimous in its recommendations, but eventually a scheme was drawn up which was sanctioned by the Commissioners in the third quarter of the year. The changes effected by this scheme provide for the introduction of well-paid and well-educated officers to check the collections, and the department, as reorganized, has been working since December 1897. It now includes the Arrear Department, which has been absorbed. It has not been stated whether the new system provides for the issue of notices of demand at an earlier stage of the proceedings. This suggestion has twice been brought to the notice of the Commissioners by Government, and the Lieutenant-Governor desires that he may be informed what action has been taken regarding it. Under the new system improvement was at first slow, but towards the end of the year became very marked. No sensible impression has, however, yet been made on the heavy accumulation of arrears, and it is to be hoped that during the current year the reorganized department will be more successful in this respect. The Commissioners accepted the proposals of another Special Committee on the subject of a new Municipal office for the Corporation. A site was selected and plans and estimates prepared, according to which the total cost for land and buildings will amount to about 7 lakhs.

5. *Loans.*—The loan liability of the Corporation at the commencement of the year was as stated below :—

	Rs.	A.	P.
Unpaid balance of the 6 per cent. Debenture Loan of 1866	5,000	0	0
5 per cent. Debenture Loans	1,44,01,900	0	0
4½ " " "	30,48,300	0	0
4 " " "	18,00,000	0	0
3½ " " "	20,00,000	0	0
	2,12,55,200	0	0
Balance of consolidated loans from Government ...	43,29,756	6	2
Total ...	2,55,84,956	6	2

A new loan of 20 lakhs, bearing interest at 4 per cent. and repayable in 21 years, was floated during the year; but owing to the unfavourable state of the market the full amount was not subscribed, and the total sum deposited only reached Rs. 14,70,700. Of the consolidated loans from Government, Rs. 2,83,277-4-6 were repaid, and the loan liability of the Corporation at the close of the year was Rs. 2,67,72,379-1-8. Against this they had in their reserve funds, and in the special fund for the repayment of the loan of 1866, a total sum of Rs. 21,37,004-0-4. After the close of the year the Corporation obtained the sanction of the Government of India to the raising of a further loan of 30 lakhs, bearing interest not exceeding 4½ per cent. and repayable in 19 years.

In the section of the Report dealing with the two reserve funds, which include the assets of the sinking fund to meet the loan liabilities of the Corporation, it is said that these include "Government Promissory Notes for Rs. 8,05,800, value Rs. 8,42,669-9," and again "Promissory Notes for Rs. 96,400, value Rs. 1,00,867-6." It is not understood how these figures of value have been arrived at. If they represent the sums actually paid for the securities, when the market value was above par, it is plainly necessary to write them down now to their present value. The Lieutenant-Governor desires that a report on the point may be submitted.

6. *Income and expenditure.*—The following statement compares the receipts and expenditure of the Municipality for the past two years:—

RECEIPTS.

	1896-97.	1897-98.
	Rs.	Rs.
General rate at 9½ per cent. ...	17,92,531	17,79,106
Sewage „ 2 „ ...	3,77,408	3,74,540

Lighting „ 2 „ ...	3,77,375	3,74,540
Total of consolidated taxation, 19½ per cent.	36,79,437	36,51,807
Taxes on trades and professions, carriages and animals, &c.	5,52,574	5,31,809
Municipal market receipts	1,34,890	1,33,556
Receipts from the sale of water ...	1,46,950	1,55,219
Conservancy receipts	70,446	64,790
Road Department receipts	35,254	34,975
Slaughter-house receipts	37,971	41,148
All other receipts	1,40,776	1,37,756
Total ...	47,98,298	47,51,060

EXPENDITURE.

	1896-97.	1897-98.
	Rs.	Rs.
Interest on loans	5,72,648	5,99,209
Contribution for repayment of loans ...	2,29,460	2,44,615
General establishment	4,07,941	4,02,025
General office expenditure	99,383	1,04,384
Road Department	4,30,613	3,60,446
Street watering	89,668	98,278
Gowkhana	2,00,188	2,17,501
Conservancy	1,55,139	1,57,616
Busti cleaning	97,153	80,231
Sewer cleaning and relaying charges ...	93,398	1,28,480
Hospital and vaccination charges ...	78,634	67,102
Suburban improvements	1,40,862	37,834
All other expenditure from the general fund	3,85,335	4,40,682
Sewage rate charges	2,84,162	2,72,006
Water „	11,65,803	11,79,085
Lighting „	4,45,949	4,56,098
Total ...	48,76,336	48,45,592

The total income, as compared with the previous year, decreased by Rs. 47,238; receipts from the general rate falling off by Rs. 13,425, from the sewage rate by Rs. 2,868, from the water rate by Rs. 8,502, and from the lighting rate by Rs. 2 835. The decrease under the general rate is ascribed to the consequences of the earthquake, as explained below. A decrease also occurred under licenses, fines, conservancy receipts, receipts from the municipal market, hospitals, and vaccination, while, on the other hand, cart registration fees, the municipal railway, house drainage, and general miscellaneous receipts show a slight increase. The total expenditure was Rs. 30,744 less than in the preceding year. The chief item of decrease, Rs. 1,03,028, was in the amount spent on suburban improvements; this is due to the increased charge for interest and sinking fund on account of works executed in the suburbs out of loan funds. The total annual expenditure is required by law to be not less than 3 lakhs, and as the capital charge increases, a smaller sum is required to be spent from revenue. It appears from paragraph 11 of the report that in nine years the Commissioners have spent Rs. 28,32,205 on suburban improvements, their legal obligations extending to 27 lakhs only.

7. *Financial position.*—The year opened with a net cash balance of Rs. 2,08,781 to the credit of the Revenue Funds, and a net credit balance of Rs. 15,92,135 in the Capital Funds. During the year the total receipts of the Revenue Funds, as shown in the preceding paragraph, amounted to Rs. 47,51,060 and the expenditure to Rs. 48,45,592, leaving a net balance of Rs. 1,14,249 to be carried to account, while the receipts of the Capital Funds, added to the opening balance, amounted to Rs. 31,02,436 and the expenditure to Rs. 23,18,685, leaving a net credit balance of Rs. 7,83,751.

From paragraph 10 of the Report it appears that the net income and expenditure of the Municipality, after excluding capital expenditure and payments for interest and sinking fund, during the past three years have been as follows:—

	Net income.	Actual expenditure less interest and sinking fund.
	Rs.	Rs.
1895-96	31,30,131	32,92,603
1896-97	31,78,212	32,54,023
1897-98	30,50,029	31,47,179

From these figures it appears that for three years in succession the Commissioners have been exceeding their available income, and have been drawing on their cash balances, which are now reduced to a little over a lakh of rupees. As a consequence of this depletion of the balance, coupled with the expenditure incurred unavoidably by apprehension of plague, it became necessary for the Commissioners, early in the current year, to apply for a temporary advance from Government to enable them to carry out their current duties. This state of things cannot continue. No material reduction of expenditure is likely to be possible at present, and unless the Commissioners can succeed in improving their collections, an increase in the rates will very shortly become imperative.

8. *Assessment and collection of the consolidated rate.*—The revaluation of houses, lands, and bustis during the year, after the disposal of appeals filed under section 138 of the Municipal Act, resulted in a net increase of Rs. 4,37,926 per annum. The assessed annual valuation of the town on 31st March 1898 stood, therefore, at Rs. 2,08,54,467 against Rs. 2,04,16,541 on 31st March 1897. The number of objections against enhanced assessments, including 1,045 remaining from the previous year, was 2,744. Of these, 1,462 were disposed of, leaving 1,282 pending at the close of the year.

The current demand of the consolidated rate was Rs. 39,42,653 against Rs. 38,75,914 in the previous year, showing an increase of Rs. 66,739, due to the revision of assessments. There was an outstanding balance of Rs. 5,20,002, and the gross demand for the year was Rs. 44,62,655. The gross collections amounted to Rs. 36,48,505 against Rs. 36,67,467, the amount realised in the previous year. The percentage of collections on the gross demand was 81·75 against 83 91 in the previous year. The incidence of the consolidated rate per head of the population of Calcutta was Rs. 6-1-1 against Rs. 5-15-5 in

the previous year, and that of the total municipal taxation Rs. 6-15 against Rs. 6-13-10.

9. The collections made in the Collector's Department during the year amounted to Rs. 27,88,830 against Rs. 28,07,212 in the previous year, and the percentage on the demand fell from 86·94 to 85·22. It is explained that, owing to the damage done by the earthquake, many tenants were compelled to leave the houses they rented, and it was found difficult in many cases to trace their addresses. Owners of houses are also stated, in consequence of their heavy expenses for repairs, to have been more remiss in paying their dues, while the middle and poorer classes were affected by the scarcity and high prices that prevailed during the year and were therefore more reluctant to pay than usual.

In the Joint-Collector's Department, the collections rose from Rs. 6,25,655 to Rs. 6,29,209, but here, again, the percentage on the demand fell from 81·78 to 80·22. The amount realised by the Warrant Department for consolidated rate bills was Rs. 2,30,465 against Rs. 2,34,599 in the previous year. It is observed that during the first three months of the year all bills in the hands of the bailiffs were withdrawn and collections suspended for the purpose of stock-taking. The figures for the fourth quarter show a decided improvement, being Rs. 93,340 against Rs. 76,320, Rs. 70,975, and Rs. 52,236 in the corresponding quarter of the three preceding years. A considerable increase is, therefore, to be hoped for in the collections of the current year.

10. *License and Registration Department.*—The following statement compares the gross receipts under the several heads in this department for the past two years:—

	1896-97.			1897-98.		
	Rs.	A.	P.	Rs.	A.	P.
I.—Tax on trades and professions ...	3,44,908	7	9	3,34,204	7	1
II.—Tax on carriages and animals ...	1,49,008	3	3	1,40,287	3	10
III.—Cart registration fees	80,126	4	0	80,643	4	0
IV.—Fees for the removal of trade refuse	65,818	4	0	58,867	0	0
V.—License fees for cow-sheds, &c. ...	135	8	0	218	0	0
VI.—Registration fees for hackney carriages, &c.	19,455	8	6	16,549	9	4
VII.—Miscellaneous receipts	773	3	0	1,037	14	9
VIII.—Fines under section 90 of the Calcutta Municipal Act.	7,843	4	0	10,388	14	2
IX.—Fines under section 80 of the Calcutta Municipal Act.	1,095	0	0	1,304	8	0
Total ...	6,69,243	10	6	6,43,500	13	2

The total receipts, as compared with the previous year, show a decrease of Rs. 25,743. The number of licenses for professions, trades and callings fell from 26,881 to 25,198, and it is under this head that the chief diminution is to be found. It is explained that, owing to the scarcity of money and the high rate of interest, and owing also to the dislocation of trade with Bombay caused by the plague, a large number of firms and shop-keepers failed during the year, and many of the small shop-keepers were unable to pay their tax. The number of licenses issued for carriages fell from 5,205 to 4,914, and licenses for animals from 6,273 to 5,736. The number of carts registered was 20,196 against 20,056 in the preceding year, and the number of hackney carriages registered was 2,988 against 3,636, a decrease being observable under each class of carriage.

11. *Survey.*—In twenty-one cases survey plans were made during the year in connection with projects of improvement and boundary disputes, and for the sale of land. Enquiries were made in 342 cases concerning encroachments and demarcation of boundaries, and also in 619 miscellaneous cases.

12. *Market, lighting and printing.*—A sum of Rs. 1,32,117 was realized from the Municipal Market during the year against Rs. 1,32,232 in 1896-97. The decrease is small considering the unfavourable character of the year. It was found necessary to spend Rs. 14,894 on general repairs, in consequence of the earthquake, and Rs. 18,515 on new meat carts, and in consequence of this expenditure the net profit derived by the Commissioners only came to Rs. 84,197 against Rs. 1,06,077 in the preceding year.

The number of gas lamps in Calcutta, including the added area, on 31st March 1898 was 6,548, and the number of oil lamps 2,169, against 6,391 and 2,061, respectively, on the same day of the previous year. The total cost of lighting in the town and suburbs was Rs. 4,15,448, an increase of Rs. 11,941 over the Rs. 4,03,507, which, it now appears, is the figure that correctly represents the cost in 1896-97. The rise was due to the increased number of lamps and to the lighting of gas lamps during extra hours in the town and suburbs. The electric lighting of Harrison Road, the contract for which was granted to Messrs. Kilburn and Company, was in the course of the year inspected by the Government Electrician, who reported favourably on the working. The Printing Department appears to have worked satisfactorily. The net profit shown is, however, only Rs. 1,806, against Rs. 2,581 in the preceding year and Rs. 4,488 in the year before that.

13. *Litigation.*—Thirty-six fresh civil suits were instituted by the Corporation during the year, of which 35 were for the recovery of the consolidated rate, involving a sum of Rs. 12,500. Of these, 29 were decreed, one was withdrawn, and five remained pending at the end of the year. There were also 21 cases pending from the preceding year, in 18 of which decrees were obtained, and the remaining three were withdrawn. The number of suits instituted by the Warrant Department was only 35 against 38, 80 and 121, respectively, in the three preceding years. This decrease is very singular, considering the heavy arrears which remain unrecovered by the Department. It appears also from the statement given in paragraph 229 of the Report that in a large majority of cases in which decrees have been obtained, nothing has yet been realised. This is very discreditable to the Warrant Department, and the Lieutenant Governor requests that the Chairman will cause a vigorous effort to be made to recover the money due to the Corporation.

Of two suits which were brought against the Corporation during the year, one was compromised and the other withdrawn. There were 11 appeals to the Small Cause Courts under section 137 of the Municipal Act against the enhanced valuation of property; two were compromised, one was dismissed with costs, four were withdrawn, and in four the assessment was reduced. The number of cases instituted by the Corporation in the Police Court rose from 25,778 to 30,798, an increase being shown in the prosecutions conducted by every Department except the Conservancy Department. It is observed that the fines inflicted are altogether inadequate and non-deterrent in their effect, and, in fact, that the punishments imposed by Honorary Magistrates in many instances tend to offer a direct premium for the infringement of Municipal law. It is certainly remarkable that, in spite of the increased number of prosecutions, the total amount of the fines inflicted should have fallen from Rs. 43,132 to Rs. 28,412. The Commissioners have not, however, made any application to Government under section 422 of the Municipal Act for the appointment of any Magistrate to try these offences. The cost of litigation was Rs. 17,400 against Rs. 14,255 in the preceding year.

Prosecutions instituted by the License Department under section 90 of the Act numbered 14,139 against 8,761 in the previous year. It is explained that the receipts from license fees would have been greater but for the block in the prosecutions in the Calcutta and Alipore Police Courts, the number of prosecutions pending disposal on 31st March 1898 being 3,416, involving license fees to the amount of Rs. 31,232, while on 31st March 1897 the number was 2,894, involving Rs. 28,085. The attention of Government has lately been drawn to the cause of the arrears in these Courts, and it has been ascertained that no less than 14,416 license prosecution cases were instituted in the month of June 1898 and 10,148 in the month of June 1897 evidently to prevent their being barred by limitation. It is apparent therefore that it is the License Department which is primarily responsible for the block in the Courts. Still more serious evidence of the inefficiency of the present arrangements is given by the figures in paragraph 200 of the Report. Out of 14,139 cases instituted, 96 were dismissed, 6,744 were struck off or withdrawn for various causes (without payment of the license fees), and 5,993 were "compromised on the recommendation of the Court or on its recommendation upon the payment of license fees." Only 986 cases, or less than 7 per cent., ended in the imposition

of a fine. It is plain from these figures both that there have been dilatoriness and laxity in the management of the Department for which there is no apparent excuse, and that a large proportion of these so-called prosecutions must be prosecutions only in name. It appears to the Lieutenant-Governor that the Criminal Courts are not an appropriate agency for the recovery of municipal dues; and it will be considered in connection with the legislation now pending whether a more direct and efficient machinery cannot be provided.

14. *Education.*—During the year the Corporation spent Rs. 2,801 in aid of primary education within the amalgamated portion of the suburbs against Rs. 2,939 in the previous year. This sum was distributed by the Suburban Improvement Committee among 64 schools in different wards of the town.

15. *Town and busti improvement.*—The total amount spent on town and busti improvement was Rs. 57,340 against Rs. 52,576 in the preceding year. The Capital Fund from which this expenditure is met opened the year with a balance of Rs. 73,475. The receipts during the year only amounted to Rs. 6,353 against Rs. 73,066, a decrease of which no explanation is given, and the balance at the end of the year fell to Rs. 33,725. Exclusive of the outlay on latrines, &c., the total sum expended was Rs. 46,103, of which Rs. 37,917 was absorbed by town improvements, the chief items of which were the construction of new roads by Furriapuker Street, Mohun Bagan, the compensation paid to owners for setting back, and the cost of land required for the improvement of certain town roads. Only Rs. 8,185 could be spared for the usual items of busti improvement, the construction of busti roads, the making of bathing platforms, and filling and improving tanks. It is explained however, and the explanation is reasonable, that the heavy expenditure that is being incurred on drainage and water-works has lessened the funds available for extensive busti improvements.

16. *Engineer's Department.*—The daily supply of filtered and unfiltered water was 26,100,035 against 26,169,476 gallons in the previous year. About 2½ miles of pipe were added to the distribution system for filtered water, making the entire length of filtered water main 314·62 miles. The number of premises connected during the year was 591. The daily average consumption of filtered water was 20,638,212 gallons against 20,786,655, and the daily consumption per head was 38·10 gallons in the town and 11·26 in the added area against 41·42 and 10·94 in the previous year. The daily unfiltered water-supply was 5,461,823 gallons, giving a daily consumption per head of 12·51 gallons. A scheme for the extension of the unfiltered water-supply in the town area was carried out during the year by Messrs. Martin and Company, at a cost of Rs. 5,46,254, the work being completed in March 1898. This has resulted in an extension of the unfiltered water main by more than 15½ miles, the total length of pipe now amounting to 96·50 miles, with which are connected 1,906 premises, 135 public conveniences, 320 sewer or flushing chambers, and 2,973 ground hydrants: 86 bathing platforms, which were formerly connected, have since been severed and connected with the filtered main. Besides this, a second project for extending the unfiltered water-supply in the suburbs is also being carried out by Messrs. Martin and Company. The length of new pipe is estimated to be 221,700 feet and the cost Rs. 4,93,514. Some delay in carrying out the scheme has occurred, partly in consequence of the state of the roads during the rains, partly because of the necessity of a new alignment in the neighbourhood of the Docks, and partly because it was found necessary to await the acquisition of some land in Hazra Road, and the construction of a new sewer in Russa Road, North. Pipes have, however, been laid along 175,882 feet. A site for the pumping station for the suburban unfiltered water-supply was chosen, and the works are being constructed. In the town area one new Worthington pumping engine and a portion of another were erected at Mullick's Ghat pumping station; two more it was decided should be erected at the Tallah station.

The new drainage works under construction, the foundation stone of which was laid by Sir Alexander Mackenzie at the end of the year 1896, consist of three sections—works for the improvement of the storm water and sewage outfall of the city proper, works for the drainage of the suburban area south of Tolly's Nullah, and works for the drainage of that part of the suburban area which lies between the Canal and the Circular Road. The contracts for the

first two sections were let out to Messrs. Martin and Company, and it is reported that the work was vigorously pushed on, and satisfactory progress made during the year. In the third area greater difficulty was experienced. This contract was let out to Messrs. Burn and Company, but for various reasons operations could not be commenced till October 1897, when the work of pipe crossing under Tolly's Nullah was taken in hand. The Canal authorities sanctioned the closure of the nullah from 1st December, and the south dam was successfully completed on the 15th. On the 17th, however, the Port Commissioners represented that a sufficient water-supply could not be obtained for the Docks. This necessitated the cutting of the bunds and the stoppage of the work, which cannot be attempted again until the cold weather. Difficulty was experienced also in the construction of the main sewer, which carries the drainage of the south added area to the outfall at Ballygunge, owing to the beds of fine sand which extend to a considerable depth, and which, when charged with water, become converted into quicksand. This obstacle is being overcome, but progress is necessarily slow. The temporary project for the suburban drainage has, it is stated, been working successfully: two of the pumping stations have only been at work for three quarters of the year. After the earthquake of 12th June 1897, all the brick sewers in the town were examined, and 1·12 miles were repaired and cement-pointed. In Ward No. 4 an important new road was completed, connecting Gas Street on the south with Juggernath Dutt's Lane and Gurpar Road on the north, and in Ward No. 7 a new road was made, connecting Roop Chand Road with Harrison Road.

17. *Health Department.*—The number of births recorded during the year was 12,584, which is very slightly lower than the 12,608 recorded in the preceding year, and is higher than the figures of any year since 1893. The birth-rate per thousand of the population was 18·4, the same as in 1896, the average for the previous seven years being 17·8. The number of deaths recorded rose from 24,356 to 24,665 and the ratio per thousand from 35·7 to 36·1, which is considerably above the average figures for the five years 1892 to 1896, which are 22,824 and 33·4. The following statement shows the mortality from the various diseases during the past two years:—

Year.	Fever.	Small-pox.	Bowel complaints.	Cholera.	Other causes.	Total.
1	2	3	4	5	6	7
1896 ...	9,564	69	2,967	3,449	8,307	24,356
1897 ...	9,619	161	3,218	2,349	9,318	24,665

There was thus a decrease in the mortality from cholera, but an increase in the deaths due to the remaining causes. Compared with the averages of the previous five years, the figures show a rise in every instance, except in the number of deaths due to small-pox. Deaths from this cause, though more numerous than last year, fell considerably below the average for the eight years from 1889 to 1896, which is 467. The disease broke out in an epidemic form in Howrah at the beginning of 1897, and it was in consequence of this, it is stated, that the number of vaccinations rose from 11,976 to 21,620, a higher figure than that recorded in any previous year except 1895. It is noteworthy that during October, November, and December the town was absolutely free from small-pox. Five hundred and sixty-three anti-choleraic inoculations by M. Haffkine's method were performed during the first three months of 1897, after which time the Corporation discontinued the grant for this purpose. Deaths from cholera were most frequent in February, March and April, the mortality reaching its highest in March, and rapidly declining in May and June. The number of deaths shown as due to fever has only once been exceeded.

18. It was not till after the close of the year under review that plague made its appearance in Calcutta, and the Health Officer's report is therefore only concerned with the precautionary measures devised to guard against the importation of the disease by infected persons and things, and the action taken to prevent the lodgment and spread of plague, should it be found to have broken out. The 17 sanitary circles into which the city had been divided were, in the month of May 1897, reduced to 10, each in charge of a fully-qualified medical man. This officer was called the Medical Inspector, and, according to definite rules which were laid down, was required to make himself acquainted with the sickness prevalent in his district, to examine persons reported or suspected to be suffering from plague, and, if necessary, to arrange for the removal of such persons to hospital, and the segregation of those who had come in contact with them. It was his duty also to visit lodging-houses and grain depôts and to report the existence of insanitary dwellings to the Chief Superintendent of Conservancy or the Assistant Health Officer. During the year the Medical Inspectors examined 1,100 persons, who arrived in Calcutta from places where plague was in existence, enquired into 24 suspected cases which were subsequently held not to be plague, inspected 5,226 lodging-houses, 23,130 other houses, 17 rag depôts and paid 5,017 visits to granaries and 60 visits to cooly-recruiters' depôts in Calcutta. The Maniktola Plague Hospital, which had been partially constructed in the previous year, was completed, and sites were selected for the erection of other hospitals, two of which were subsequently constructed at Marcus Square and the Budge-Budge Road. A hand ambulance of the Bombay pattern was added to the two horse ambulances previously provided; an Equifex stove and steam sprayer were purchased and 40 wooden pumps for disinfection with corrosive sublimate in solution were ordered from Japan. The post of Chief Superintendent of Conservancy was continued, and held throughout the greater portion of the year by Mr. Le Patourel, with a strong special staff of Inspectors, Supervisors, and coolies. In paragraph 36 of the Health Officer's Report an interesting account is given of the work done by this establishment, the results of which were speedily made apparent in the greater cleanness of the city.

Plague was first detected in the town in the month of April in the present year, and continued in sporadic form up to the end of September. The measures taken by the Corporation to meet it belong therefore to the History of 1898-99. At the present date Calcutta has been declared free from plague: and it is the Lieutenant-Governor's sincere hope that, notwithstanding the approach of the season at which its activity has been greatest elsewhere, the efforts made during the last two years will be successful in preventing its reappearance.

19. The special Commission appointed by Government to examine the question of framing suitable building regulations for the town of Calcutta submitted their report during the year. Their suggestions will be taken into consideration in the Calcutta Municipal Bill now pending in the Legislative Council.

By order of the Lieutenant-Governor of Bengal,

E. N. BAKER,

Offg. Secy. to the Govt. of Bengal.

RESOLUTION ON THE REPORT OF THE BOARD OF REVENUE ON WARDS' AND ATTACHED ESTATES IN THE LOWER PROVINCES FOR THE YEAR 1897-98.

REVENUE DEPARTMENT—LAND REVENUE.

Calcutta, the 12th November 1898.

RESOLUTION—No. 2347.

READ—

Report of the Board of Revenue on Wards' and Attached Estates in the Lower Provinces for the year 1897-98.

THE Board's report was received by Government a few days after the date upon which it was due.

The total number of estates of all descriptions under the management of the Board during the year 1897-98 was 141 against 146 in the preceding year, there being a decrease of 2 in the number of wards' estates and 3 in that of attached estates and others. Of these, 71 were wards' estates and 60 estates of which charge was taken under the Chota Nagpur Encumbered Estates Act: of the remaining 10, 6 were trust estates and 4, estates under attachment. Thirteen wards' and 18 attached and encumbered estates were under management for a portion of the year only.

2. *Revenue and cesses due to Government.*—The year opened with an arrear demand on account of revenue and cesses due to Government from the estates under the management of the Board, of Rs. 1,14,425, which with the current demand of Rs. 56,32,373 made up a total of Rs. 57,46,798. Of this Rs. 56,22,659 were paid, and the balance of Rs. 1,24,139 remained outstanding. A considerable portion (Rs. 53,302) of the balance was due from the Bettiah Estate in Champaran, and has been paid up since the close of the year, while it is anticipated that the balance of Rs. 21,666 due by the Sridharpur Estate in Jessore will be paid as soon as a proposed loan of Rs. 50,000 is raised on behalf of the estate. The sum of Rs. 10,951 on account of the Patkum Estate in Manbhum is due from the Patkum Indigo and Trading Company as assignees of Mr. C. B. Gregson, who holds the lease of the greater portion of the estate. The amount is under realisation by the certificate procedure, and a revised scheme has been drawn up for meeting all Government demands. In the Barabhum Estate in Manbhum Rs. 4,276 are due from Mr. Mathewson as assignee of Messrs. Watson and Company, the lessee of the major part of the estate. Government revenue to the extent of Rs. 4,319 was still due from the estate of Fazl Ali Khan in Chittagong, to which great damage was done by the cyclone and storm-wave of 24th October 1897, and in the Mohula estate in Shahabad, and that of Paigambarpur in Darbhanga, considerable arrears remained unpaid for want of funds. In other instances this same cause is assigned as the reason for the arrears. In some cases the sums due from individual estates are nominal. The current demand of the year under report was about five lakhs in excess of that of the previous year, but the unrealised balances rose for the first time during the last five years to over one lakh.

3. *Rent and cesses due to superior landlords.*—From estates that were under the Board's management throughout the year, the current demand of rent and cesses due to superior landlords amounted to Rs. 3,58,779, which with the arrear demand of Rs. 1,18,081 made a total of Rs. 4,76,860 for payment; of this Rs. 3,45,985 were paid and Rs. 189 remitted, leaving a balance of Rs. 1,30,686. There has been a large increase in the unpaid balances; payments having amounted to 96·4 per cent. of the current and 72·5 per cent. of the gross demand, against 98·5 and 83·3 per cent. respectively in the preceding year. More than two-thirds of the balance were, however, due from four estates only—the Sridharpur Estate in Jessore (Rs. 45,940), the Satkhira Estate in Khulna (Rs. 30,572), the Burdwan Raj (Rs. 7,229), and the estate of Muzaffar Ahmad in Chittagong (Rs. 6,928). At the close of the previous

year an almost equal balance was still due from the Satkhira Estate, the greater portion of which was however, adjusted during the year, and of the present amount shown as outstanding only Rs. 17,629 have since been left unpaid for want of funds. The amount due by the Burdwan Raj Estate remained unpaid for want of the names and proper addresses of the landlords and omissions on their part to arrange to receive payment. The balances due from the Sridharpur and Muzaffar Ahmad estates were on account of lack of funds, the latter estate having suffered severely in the cyclone. In the Paigamberpur estate a large sum (Rs. 9,725) was left unpaid for similar reasons.

4. *Collection of rents and cesses.*—The progress made in the collection of rent and cesses due to the estates under the charge of the Board during the five years ending 1897-98 is shown below:—

Year.	Demand.			Collections.			Percentage of—		Remissions.	Balances.
	Arrear.	Current.	Total.	Arrear.	Current.	Total.	Current collections on current demand.	Total collection on total demand.		
1	2	3	4	5	6	7	8	9	10	11
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.			Rs.	Rs.
1893-94	66,78,027	97,32,203	1,64,10,230	29,84,402	64,12,911	93,97,313	65·8	57·2	4,35,740	65,77,177
1894-95	65,50,095	92,85,008	1,58,35,103	28,83,916	61,60,326	91,53,240	66·4	57·8	5,07,884	61,13,979
1895-96	61,59,879	93,44,103	1,55,03,982	29,16,194	59,93,431	89,09,625	64·1	57·4	5,90,112	60,04,245
1896-97	66,16,803	95,98,063	1,62,14,866	32,22,121	59,47,656	91,69,777	61·9	56·8	4,18,543	68,26,546
1897-98	76,63,020	1,19,59,216	1,96,22,242	41,16,084	78,88,778	1,20,04,862	65·9	61·1	3,37,816	72,79,564

The Lieutenant-Governor would himself prefer a comparison between total collections and the current demand. It is on the whole the best comparison, for the allotment of receipts between arrears and current rent varies with very different circumstances, and the arrear balances, as will be presently seen, constantly comprise items which should not be on the roll at all. Judged by this standard, the rent collections under the Court of Wards appear to him generally excellent, and for the year under report remarkable. The figures are—

1893-94	...	...	... 96·5 per cent.
1894-95	...	...	... 98·5 ,,
1895-96	...	...	... 95 3 ,,
1896-97	...	...	... 95·5 ,,
1897-98	...	...	... 100·3 ,,

The increase in the arrear and current demands is chiefly attributable to the assumption of charge of the Bettiah Estate in Champaran. The total collections exceeded a year's rent, and having regard to the unfavourable circumstances of the year were satisfactory. The percentage of current collections on the current demand for all estates was 65 9, and for estates in charge throughout the year, 66·7. These figures show a slight improvement on those of the previous year, as also on the proportion of total collections to total demand. The collections were worst in the Bhagalpur Division, where only 43·9 per cent. of the current demand was realised; the result is partially attributed to the bad collections in the Lugma Estate in Bhagalpur owing to some confusion in the management, and where also the tenants had suffered severely from the scarcity of the previous years. The unsatisfactory results in the Presidency Division are ascribed to the release of the Kasimbazar Estates, confusion in the rent-roll of the Sridharpur Estate, and mismanagement in the Syedpur Estate. Among estates with a rent and cess roll of over Rs. 50,000, only two attained the prescribed standard of a collection of 90 per cent. of the current demand. The proportion in the Paigambarpur Estate (17·3 per cent.) was even worse than in the preceding year, while the results were also poor in the Hatwa Raj (39·7), and the estates of Khagra (33·4), Satkhira (40·2), and Chandra Kumar (38·6). In the Hatwa Estate, however, the Commissioner, considering the fact that famine prevailed during a considerable portion of the year, and that even after the famine unusual demands were made upon the raiyats for advances taken during it, and on account of the cost of the survey and settlement proceedings, is of opinion that better collections could not have been expected.

At the close of the year a total amount of Rs. 72,79,564 was altogether due to the estates under management as compared with Rs. 68,26,546 in the previous year. The large increase from Rs. 10,21,690 to Rs. 24,28,606, in the balance due to estates in the Patna Division, of which charge was held during the whole year, is the result of the inclusion of the figures of the Bettiah Estate which was brought under management during the year, and to the fact that the accounts of the Hatwa Estate, charge of which was assumed during 1896-97, have been shown for a complete year.

The subject of the classification of the arrear balances, with a view to the separation of amounts which are really due and realisable, from sums in reality fictitious and hopelessly irrecoverable, is one to which special attention has now been directed for several years, and orders have been issued that the accounts should be cleared of nominal outstanding demands of the latter description. Special reports were called for by the Board, which were received from all but the Patna and Orissa Divisions, and the Lieutenant-Governor is satisfied that the matter is one to which special consideration is being directed. During the year under report various special circumstances existed which to some extent explain the apparent increase in the balances unrealised during the year. As explained, the figures of the Bettiah Estate now appear for the first time, as also do those of the Hatwa Raj for a complete year; the serious damage done to the crops in Chittagong by the cyclone necessitated the exercise of leniency in the collection of rent, and in the Presidency Division the assumption of the charge of the Sridharpur Estate, with outstanding arrears of Rs. 3,20,098, all tended to swell the figures unduly. At the same time famine prevailed in various parts of the Province during the first-half of the year, and in all districts the effects of the previous scarcity were felt almost to its close. In some instances, however, sufficient attention does not appear to have been paid to the orders of Government, and the Lieutenant-Governor agrees with the Board that it is again necessary to call the special attention of the Commissioners to the subject, and to insist that prompt and energetic action shall be taken to give effect to the instructions already issued. In the Resolution on the Report for the previous year, various estates were instanced in which the balances might be considerably reduced, and in some cases cleared off altogether by the remission of the amounts classified as legally inadmissible or irrecoverable for sufficient cause. The Lieutenant-Governor observes that the accounts of most of these estates still exhibit the same features. The proportions borne by the total balances shown as outstanding in the estates then mentioned and which are still under the management of the Board, to the amounts classified as likely to be recovered, are indicated in the margin. The remainder shown as outstanding is either barred by limitation, under valid objection, or irrecoverable for good reason, and it is evident that much remains to be done before the accounts of these estates can furnish an accurate representation of their true financial position. That is, in itself, an important reason for the excision of these items, but it is far more important that demands which cannot be legally made, should not be kept hanging over the heads of the raiyats of the estates. In the Burdwan Estate as much as Rs. 80,062 barred by limitation is still borne on the rent-roll, and the Commissioner reports that the progress made in clearing off arrears has not been satisfactory. In the Bettiah Raj Rs. 55,772 are said to be under valid objection on the part of the tenants. The arrears outstanding in the Syedpur Estate in Khulna are large, amounting to Rs. 1,11,651, most of which is, however, classed as recoverable. The fact that the date fixed for the sale of patni tenures fell after the year under report was responsible for the non-realisation of Rs. 65,608. The balances of the Sridharpur Estate have not yet been classified, but 24 estates in all still show total balances outstanding, in excess of 100 per cent. of the current demand.

Estate.	Total balance outstanding.	Amount of total balance likely to be realised.
	Rs.	Rs.
Malighati ...	32,865	9,686
Satkhira ...	2,23,050	1,59,402
Tikari ...	4,66,092	2,75,167
Chandra Kumar ...	82,376	30,612
Hatwa ...	9,00,719	7,02,631
Showhar ...	42,210	34,778

5. *Debts due by estates.*—The estates which were under the Board's management for the entire year were indebted to a total amount at the

commencement of the year of Rs. 34,21,249, while additional liabilities to the extent of Rs. 95,02,421 were ascertained to be due or newly incurred during the year, making a total of Rs. 1,29,23,670. After deduction of the payments made, amounting to Rs. 10,59,864, and allowing for a reduction of Rs. 1,23,134 by compromise, a balance of Rs. 1,17,40,672 remained outstanding at the close of the year. The large increase in comparison with the amount due at the close of 1896-97 (Rs. 31,48,377) was mainly due to the inclusion in the figures for the first time of the debts due by the estates of Sridharpur (Rs. 94,197), Bettiah (Rs. 80,15,437), Patkum (Rs. 1,78,554), and Kera (Rs. 92,282). Reductions were effected in the encumbrances of all the most heavily-indebted estates with the exception of those of Khajwa, where an effort to raise a loan at reduced interest having failed, the sale of some of the outlying portions of the estate has been sanctioned; Mobarak Hussein, for which no explanation has been furnished; and Paigambarpur, which felt the effects of the famine severely, and also suffered from mismanagement. In the case of estates taken in charge or released during the year, the total encumbrances amounted to Rs. 2,32,240, of which Rs. 3,373 were paid and Rs. 17,359 reduced by compromise, leaving a balance of Rs. 2,11,508

6. *Management charges and rates.*—During the year the management charges in all Divisions were carefully scrutinised with a view to possible reductions, but, as the Board point out, uniformity among estates managed on widely diverse principles is not possible. Reductions were effected in the Presidency Division, but the apparent decrease in the Patna Division is due chiefly to the low percentage of cost in the Hatwa and Bettiah Estates, large portions of which are held on lease. In other Divisions no great economies are reported to be possible, and several of the apparent fluctuations are the result of temporary accidental causes. The cost of management in the estates under the charge of the Board as a whole, excluding the cost of construction and repairs of office buildings, amounted to 6·9 per cent. of the total current demand for rent and cesses, as against 8·1 per cent. in 1896-97. The charge seems to the Lieutenant-Governor to be on the whole moderate, and he has no desire to press economy to the point of injuring the efficiency of management. The percentage continues to be highest in the Orissa Division, although it was reduced from 17·1 in 1896-97 to 14·6.

The figures for receipts and charges on account of the general and audit rates are reported to be subject to revision after certain discrepancies have been reconciled. The expenditure to be covered by the management rate levied under Act X of 1892 was estimated at Rs. 1,54,000, in addition to which there was an estimated deficit of Rs. 18,931 at the close of the previous year. Including the Bettiah Estate, the charge of which was assumed on 1st April 1897, the gross income of the estates under management was estimated at Rs. 1,23,45,611, and the demand on account of the general rate levied under Act X of 1892, at Rs. 1,77,673, or a surplus of Rs. 4,742 over and above the sum required. The actual demand, however, amounted to Rs. 1,68,695 only, while the deficit at the end of 1896-97 was Rs. 21,344. Taking into account an increase over the estimate of Rs. 3,612 in the actual charges in Government offices, the actual expenditure to be met amounted to Rs. 1,78,956, and the net deficit at the end of the year to Rs. 10,261. In addition to the current demand of Rs. 1,68,695 as above, the year opened with an arrear demand of Rs. 33,310. Of the total of Rs. 2,02,005 thus recoverable, Rs. 1,39,661 were realised and Rs. 28,834 paid in advance, leaving a balance of Rs. 41,510, which is said to have been mostly collected since the close of the year. In the Resolution on the report of last year it was observed that if the rules prescribing the payment of the rate half-yearly in advance were adhered to, it was not understood how arrears had been allowed to accrue. From the explanations received it appears that officers wait until the close of the year to ascertain the actual gross income upon which the rate is leviable, but this as the Board observe is unnecessary, since the rate is leviable on the estimated gross income.

The rate for the professional audit of accounts of estates with annual rent and cess demands of Rs. 50,000 and upwards, was fixed for the year under report at one anna per Rs. 100 of the gross income of the Burdwan Estate,

four annas for the Tikari Estate, and seven annas for the 21 other estates concerned. The demand so calculated amounted to Rs. 17,096, while the actual charges were Rs. 19,482, leaving a deficit of Rs. 2,386. Taking into account, however, the surplus of Rs. 3,936 at the end of last year, there is a surplus at the close of 1897-98 of Rs. 1,550.

In the previous year attention was drawn to the doubtful legality of the practice which was supposed to exist of maintaining a running account of the rates from year to year. It is now explained that this is not in effect done. The rate is paid on receipt of a requisition from the Accountant-General after the audit of the accounts. As the audit of all estates is not completed before the end of the year, the amounts from some estates remain to be realised at its close. In the event of an advance payment having been made, and the estate being released within the year, the sums so paid are refunded to the proprietor.

7. During the last five years the following amounts have been spent on the various descriptions of improvements:—

Year.	Subscriptions and donations to schools.	Subscriptions and donations to dispensaries.	Maintenance in efficient condition of estates, buildings, and other immovable property.	Improvement of land and property and benefit of ward.	Surveys and settlements.	Total.
1	2	3	4	5	6	7
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1897-98	72,948	64,515	3,64,778	2,18,905	2,25,591	9,46,737
1896-97	52,941	44,790	3,89,093	1,78,162	1,13,114	7,78,090
1895-96	52,306	38,699	4,11,228	1,83,880	1,69,240	8,55,353
1894-95	50,217	38,564	1,68,508	1,43,208	1,64,705	5,65,502
1893-94	59,844	46,527	2,45,225	1,58,406	2,01,899	7,12,901

In paragraph 8 of the Resolution on the Board's report for the year 1896-97, it was directed that, as was done in Government estates, solvent estates under the charge of the Court of Wards should contribute 1 per cent. of the annual demand to education, while under previous orders contained in Government Resolution No. 895T.R., dated 9th October 1896, it was similarly directed that at least 3 per cent. of the rental or such larger percentage on the surplus that remains after payment of Government revenue, and cost of management, &c., as the Board may determine, should be set aside for agricultural and sanitary improvements. A statement has been submitted showing how far effect was given to these orders in 47 estates during the year under report, from which the following particulars are taken:—

Division.	One per cent. of the rental.	Three per cent. of the rental.	Expenditure on schools.	Expenditure on works of improvement.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
Burdwan	47,246	1,41,738	26,654	42,431
Presidency	3,594	10,782	2,798	11,239
Rajshahi	1,921	5,763	114	2,645
Dacca	1,563	4,689	197	9,220
Chittagong	2,615	7,845	608	3,775
Patna	21,896	65,688	19,017	39,592
Bhagalpur ...	3,427	10,281	4,483	18,464
Orissa	2,080	6,240	4,115	34,347
Chota Nagpur	899	2,697	1,482	10,476
Total ...	85,241	2,55,728	59,468	1,72,189

In six estates, viz., Khagra, Narainpur, Sankara, Kanika, Dhanwar, and Begoonkoodar, the expenditure, both on schools and works of improvement, reached the prescribed standards. In five other estates, viz., Syedpur, Panameah, Hatwa, Jogearah, and Mirza Mahomed Hossain's, the expenditure on schools was satisfactory, and in ten other estates (including Bhowanipur and Dakhin Shahbazpur) that on works of improvement amounted to the proportion prescribed. Expenditure as regards education is reported to have been especially inadequate in the Malighati and Bhowanipur Estates, and in those of the Rajshahi and Dacca Divisions generally. In the Hatwa Estate, the expenditure on works of improvement was above the standard fixed by Government, if the sum of Rs. 52,118 be included, which has been classified as spent on "Famine Relief," but which was laid out on the excavation of tanks and the repairs of roads. In the Burdwan Raj Estate, the sum devoted to works of improvement attains the standard of 3 per cent. of the rental only after deduction of Government revenue and the cost of management, &c. The Board, however, draw attention to the special conditions of the estate, and consider that the sum so spent is adequate. It is represented that the excavation of tanks and wells and the encouragement of arboriculture are but little required in the Narhan Estate, and that the purchase of landed property would be a more suitable method for utilising the surplus funds. With this view the Board agree. The Lieutenant-Governor, however, remarks that the purchase of landed property is not the kind of agricultural improvement contemplated in the Resolution of the 9th October. Such purchases may be a desirable and useful way of spending surplus funds, but they do not constitute agricultural or sanitary improvements. As a large portion of the surplus proceeds of the Syedpore Trust Estate is spent on Muhammadan education under special orders, the rule requiring expenditure on schools on that estate may be relaxed.

The only experimental farm was, as before, that at Pala, maintained by the Burdwan Raj Estate. Experiments with various crops in different estates met with but partial success. The cultivation of Naini Tal potatoes in Dhanwar and some ten estates in Lohardaga proved successful, but failed in the Kanakshar and Madhupur Estates. English vegetables gave satisfactory results in both the Dinajpur and Purnea circles of the Maldwar Estates, and in the Chakma Raj's Estate in Chittagong. Carrots were cultivated with success in the Bettiah and Khagra Estates, and in the latter Indian-corn and guinea grass also. A dairy farm for the Tikari Estate, was sanctioned during the year, but was not brought into working order.

8. *Survey and Settlement.*—In five estates survey and settlement operations, under the supervision of the Director of Land Records were in progress during 1897-98, and the operations in all were concluded either during the year or shortly after its close, the final reports on the proceedings in the Dakhin Shahbazpur and Srirampur Estates being received by Government. Excluding the estates included in the general operations in Chittagong, Orissa, and North Bihar, there were ten other estates under survey and settlement subject to the supervision of the Board

In the Resolution of last year it was observed that the arrangements for the maintenance of the survey and settlement proceedings, after the completion of operations, appeared in some cases to exist only on paper, and the hope was expressed that satisfactory arrangements might be come to for ensuring that effect would be given to them in practice. The whole subject is one which is at present under the consideration of Government in connection with the working of the Land Records Maintenance Act III (B.C.) of 1895, and may more conveniently be discussed in the Resolution on the annual report of the Director of Land Records and Agriculture, but upon receipt of the Government orders referred to, the Board instituted special enquiries on the point, in connection with the Burdwan, Maldwar, and Dakhin Shahbazpur Estates, the results of which are summarised in their present Report. In the Burdwan Estate a special establishment was employed and the *parchas* opened by the tahsildars were checked and compared with the original *khatians*. Field-to-field attestation was also effected over an area of 14,164 bighas. In Sujanatha the rent-roll is in course of revision with a view to its issue under section 2, Act III (B.C.) of 1895. In the whole estate, where holdings are reported to be not transferable by custom, only 600 transfers were registered in the mahals held direct by the Raj. In Maldwar, where, similarly, the custom of

transferability of holdings is said not to exist, registers and returns have been prescribed, but the work is progressing slowly. Out of 1,043 applications received, only 250 appear to have been disposed of. In Dakhin Shahbazpur the rules were brought into operation, but the field-to-field comparison of maps and khasras made little headway. It is reported that necessary arrangements for the maintenance of the records were made in the Syedpur Estate, and that a peripatetic establishment is maintained for the purpose in the wards' estates in the Sonthal Parganas. Special rules for the Kanika Estate were approved during the year.

9. *Certificates.*—The working of the certificate procedure in wards' estates during the year 1897-98 and four preceding years is shown below:—

Division.	Number pending from last year.	Number filed during the year.	Total.	Disposed of during the year.	Pending more than six months.	Pending less than six months.	Total.	Amount of demand covered by the certificates.	Total amount realised by certificates.
1	2	3	4	5	6	7	8	9	10
								Rs.	Rs.
Burdwan	1,784	633	2,417	829	1,507	81	1,588	80,145	23,106
Presidency	1,684	662	2,346	1,142	914	290	1,204	50,703	22,576
Rajshahi	410	400	810	615	27	168	195	22,700	8,154
Dacca	823	186	1,009	886	131	2	123	25,068	16,379
Chittagong	1,120	1,386	2,506	1,628	115	766	878	68,791	35,498
Patna	350	1,165	1,515	664	707	144	851	69,063	19,865
Bhagalpur	11	183	194	163	19	12	31	4,794	3,787
Orissa	10	2	12	5	5	2	7	383	193
Chota Nagpur...	28	327	355	262	8	85	93	14,870	7,716
1897-98 ...	6,220	4,944	11,164	6,194	3,420	1,550	4,970	3,45,553	1,37,173
1896-97 ..	4,816	8,568	13,414	7,121	3,361	2,932	6,293	1,14,747	1,80,484
Total for ... 1895-96 ..	4,648	8,446	13,094	7,474	2,359	3,261	5,620	5,18,797	2,46,532
1894-95 ..	7,813	7,961	15,774	10,287	2,955	2,532	5,487	5,24,792	1,92,711
1893-94 ...	10,281	7,477	17,758	11,063	4,334	1,761	6,095	6,71,210	2,17,706

NOTE.—The difference between the number of certificates pending at the close of 1896-97 and the number shown as pending at the commencement of 1897-98 is due to the exclusion of 3 certificates of the Kajong Estate and omission of 71 certificates of Sukraj Rai's Estate and inclusion of 1 certificate of the Lugma Estate and 1 of the Koriaug Estate, for which explanations have been called for; also 1 certificate of Tilmi Encumbered Estate released in 1896-97 has been excluded.

There was a satisfactory decrease in the number of certificates filed during the year 1897-98, as compared with the figures for the four preceding years, while the percentage of the total number disposed of remained practically the same as during 1896-97, with the result that there was a decrease of 1,323 in the number of cases left pending at the close of the year. The only Divisions in which more cases were instituted during the year than in that preceding were those of Patna, Bhagalpur, and Chota Nagpur, where the local circumstances of different estates affected the figures. The decrease in the other Divisions is attributed to the greater leniency shown to defaulters, and to the stricter observance of orders prohibiting the use of the certificate procedure in estates in which a record-of-rights has not been prepared. Out of the total demand covered by the certificates filed, only 39·7 per cent. was realised, as compared with 43·5 per cent. during the previous year.

10. *Civil suits.*—Particulars of civil suits for the recovery of rent and cesses due to the estates under management are given below:—

Division.	Number of suits pending from last year.	Number filed during the year.	Total.	Disposed of during the year.	Pending more than six months.	Pending less than six months.	Total.	Amount of demand covered by the suits.	Amount decreed.	Amount recovered.
1	2	3	4	5	6	7	8	9	10	11
								Rs.	Rs.	Rs.
Burdwan	195	444	639	481	4	154	158	69,024	40,950	7,178
Presidency	11	1,184	1,195	1,188	4	3	7	98,152	96,214	44,315
Rajshahi	69	119	188	188	...	...	...	4,312	4,312	146
Dacca	2	21	23	11	6	6	12	10,651	5,405	364
Chittagong	3	...	3	3	...	...	...	1,028	950	401
Patna	307	1,607	1,914	1,832	46	36	82	1,84,908	1,47,766	1,11,834
Bhagalpur	5	58	63	55	4	4	8	17,013	12,556	2,154
Orissa	21	39	60	34	26	...	26	2,819	2,084	590
Chota Nagpur	87	431	518	407	14	97	111	75,341	43,177	14,245
1897-98	700	3,903	4,603	4,199	104	300	404	4,61,878	3,62,903	1,81,665
Total for ... 1896-97	658	3,501	4,159	3,418	431	310	741	3,90,425	2,84,358	1,81,197
1895-96	383	3,686	4,069	3,314	389	366	755	3,91,009	3,05,603	1,60,686

NOTE.—The difference between the number of civil suits pending at the close of 1896-97 and the number shown as pending at the commencement of 1897-98 is due to the inclusion of 41 suits omitted from the previous year's statement and the exclusion of 1 suit of the Dakhin Shahbazpur Estate erroneously shown as pending in the previous statement, and 9 suits of the Lugma Estate and 70 of Sukraj Rai's Estate, for which explanations have been called for; also 1 suit of the Tilmi Encumbered Estate released in 1896-97 has been excluded.

Although the number of suits filed during the year increased, there was a satisfactory decrease in the number of cases left undisposed of at the close of the year, and noticeably of those that had been pending for more than six months. The Lieutenant-Governor observes that the remarks made last year as to the necessity for greater energy in the execution of decrees once obtained have borne but little fruit, the results of this year being even worse than in 1896-97, only 39 per cent. of the demand having been recovered as compared with 46 per cent. in the previous year. He trusts that in this respect better results will be attained during the current year. As matters stand, there seems little use in suing for arrears.

11. *Condition of the tenantry.*—The failure of crops and the distress resulting therefrom occurred in various degrees in most of the estates under the management of the Court of Wards during 1896-97 and also in the first portion of the year under report, but towards the latter half of the year the condition of the raiyats improved generally owing to the good crops then reaped and the high prices obtainable for the produce. Relief operations, apart from the general scheme of relief in districts in which famine was declared to exist, were carried out in several estates. In Cuttack, in the Kujang pargana in the Burdwan Raj, some Rs. 13,000 were advanced as famine loans, and Rs. 1,354 gratuitously. Advances were also given and relief works opened for the benefit of the tenants of the Bhowanipur Estate in the district of Khulna, and operations were undertaken on a very extensive scale in the Hatwa Estate in Saran, where the famine was severely felt, about 6¼ lakhs of rupees being spent on relief, and some 84,000 maunds of rice advanced on loan. The Lieutenant-Governor is pleased to observe the statement that the indigo concerns, who hold a number of villages on lease from the Bettiah Estate, while continuing the regular payment of the sums due to the estate, stopped the collection of rent from their raiyats during the famine. Considerable sums were spent on relief in the Lugma Estate and the Wards' estates in the Sonthal Parganas, and over Rs. 50,000 were so expended in the Kanika Estate in Cuttack. In the Satkhira Estate and in that of Syedpur, during the early part of the year, the condition of the raiyats was unfavourable, while the low price of jute, the occurrence of floods, and an outbreak of cholera caused distress in the Maldwar Estate. The harvests are said to have been insufficient in the estates in Noakhali and in Chittagong, and a cyclone and storm-wave, following on the bad harvests of the previous year, seriously affected the tenants. Both in the Patna and Chota Nagpur Divisions the effects of the famine were severely felt, and the raiyats on Wards' estates suffered in common with those of ordinary zamindars. The harvests of the latter part of the year were, however, favourable, and conditions were steadily improving towards the end of the year. In fact, the high prices prevailing were a distinct advantage to cultivators with crops to dispose of, and it is stated regarding the Narhan Estate that the tenants had more hard cash in their hands than they have had for many years.

12. *Estates with a rent-roll of Rs. 50,000 and upwards.*—As usual, a short account is given of the affairs of each estate with a rent-roll of half a lakh or upwards. The Maharajkumar of Burdwan was married during the year, and the successful management of the estate continues under the able supervision of Raja Ban Behari Kapur. The settlement of police service lands with the estate by Government continued, lands in 454 villages being so disposed of, and the revenue amounting to Rs. 16,890 being fixed. A re-survey of the jungle lands discovered the actual area in possession of the tenants to be more than two and a-half times that mentioned in their *pattas*, which, if assessed at the same rates, would have yielded Rs. 15,120. The amicable settlement made as regards about a third of the land in question would appear to be very lenient, the area assessed having increased 192 per cent., and the rent assessed having been raised by 20 per cent. only. The settlement of ghatwali lands in Bankura was somewhat retarded by the orders of Government directing the grant of *mukarrari* rights to the Ghatwals. The current demand of the estate, amounting to Rs. 46,68,233, showed an increase of Rs. 47,376, and with the arrear demand (Rs. 23,85,353) made a total of Rs. 70,53,586, out of which Rs. 47,46,765, or 101·6 per cent. on the current demand, were collected. Excluding remissions, amounting to Rs. 82,920, the balance outstanding was Rs. 22,23,901, of which Rs. 10,40,000 were collected after the close of the year by proceedings under Regulation VIII of 1819, and claims to Rs. 10,14,568

are good and in process of realisation. In the Resolution on the report for 1896-97 it was directed that the Manager should be called on to report the steps taken to clear the accounts of irrecoverable and fictitious balances. The unrealised arrears, amounting to Rs. 11,83,901, are slightly less than in the previous year, but Rs. 1,11,030 are still borne on the accounts, though described as bad and irrecoverable. Prompt measures should be taken to clear these off. The progress made in the recovery of debts due to the estate was slow, a balance of Rs. 99,174, though mostly covered by decrees and bonds, remaining unrealised out of a total demand of Rs. 1,23,587. While the total receipts by the Raj showed an increase of Rs. 3,41,295, the expenditure rose by Rs. 4,70,282, about half of which was due to the expenses in connection with the marriage of the Maharajkumar. The sum of Rs. 41,234 was spent on improvements as against Rs. 32,738 in the preceding year, or about 6·6 per cent. on the current demand of Rs. 6,19,277 on those portions of the estate which are not permanently leased. The Board consider this expenditure sufficient. The litigation on behalf of the estate was on the whole successful, but only about 29 per cent. of the amounts covered by civil and certificate decrees in favour of the estate was realised or remitted. The Board have drawn the special attention of the Manager to the matter.

As noticed last year, charge was assumed of the Hatwa Raj in October 1896. The estate has lost the valuable services of the Manager, Mr. M. Buskin, who retired on a well-earned pension on 31st March 1898. The demand of Rs. 2,55,246 due to Government on account of revenue and cesses was paid in full, the balance shown being merely nominal. The arrear demand shown as due to the estate at the commencement of the year amounted to Rs 9,64,926, while the current demand was Rs. 10,44,571, of which Rs. 11,10,437, or 106·3 per cent. on the current demand, were realised. Of the balance of Rs. 9,09,719, Rs. 1,92,200 are reported to be irrecoverable or doubtful of recovery, and no time should be lost in submitting the remission statements promised. The closing balance to the credit of the estate amounted to Rs. 18,17,891, and Rs. 18,15,087 were invested in Government securities, of which the estate now holds Rs 27,38,575 in value. The cost of management, including the commissions paid on collections in villages which are in lease, amounted to 12·2 per cent. on the current demand. The outlay on improvements comprised the expenditure of Rs. 5,516 on the construction of new wells and drains, &c., and the purchase of one Hissar bull for breeding purposes; Rs. 52,118 in addition were expended in re-excavating and enlarging old tanks, and in the repair of village roads as relief works during the late famine. In view of the fact that a total sum of Rs. 6,19,240 was spent in connection with the famine, a larger expenditure on improvements proper was not necessary.

In the Tikari Estate the year opened with an arrear demand of Rs. 5,48,061, and a current demand of Rs. 8,89,958, or a total Rs. 14,38,019, out of which Rs. 8,50,104, or 95·5 per cent. on the current demand, were realised, in comparison with 99·1 per cent. in the previous year. The falling off occurred in the North Bihar portions of the estate which were included in the famine area. The outstanding balance of Rs. 4,96,431 was reduced to Rs. 4,66,092, the sum of Rs. 98,898 being written off as irrecoverable; but as Rs. 1,60,036, of which about a third only has been reported for remission, is still classified as bad and irrecoverable, the Lieutenant-Governor would repeat the hope expressed last year that such demands will be written off without delay and a strenuous endeavour made to realise the recoverable balance. Sir John Woodburn is glad to observe that the proportion of the cost of the management to the current demand has been reduced from 18·6 per cent., in the previous year, to 15·6 per cent., but it is still high, and the actual expenditure increased, for which no explanation has been furnished. Attention was drawn in reviewing the report of the preceding year to the apparent decrease in the expenditure on works of improvement from Rs. 35,174 during 1895-96 to Rs. 19,220 in 1896-97. It is now explained that the real expenditure during the previous year was Rs. 66,695, the difference not having been shown, as it had been spent in anticipation of sanction. Unless a similar explanation holds good this year

also (and, if so, it should have been furnished), it is not understood how the expenditure shown in the year under report amounted to Rs. 20,604 only.

The balances outstanding in the Satkhira Estate amounting to Rs. 2,23,050 were very heavy; the estate is not solvent, and was unable to pay in full the demands due to superior landlords. The reduction of the proportion of the cost of management to the current demand from 14·2 to 12 per cent. during 1897-98 was satisfactory, but owing to the financial position of the estate merely a nominal sum could be expended on improvements. The difficulties in the way of expenditure on improvements in the Narhan Estate have already been referred to, but it is noted that the cost of management, which was already high, has increased to 15 per cent. on the current demand.

The collections on the Bhowanipur Estate were good, amounting to 111·2 per cent. on the current demand, but there was a decrease of Rs. 4,491 in the amount spent on improvements, although the estate has a large invested capital of Rs. 1,35,665. There was a falling off in the collections in the Syedpur Estate, but the greater part of the large balance shown as outstanding was due from *patni* tenures for which the sale day fell after the close of the year. The collections on the Maldwar Estate improved, but there is still a large unrealised balance said to be recoverable; the execution of improvements was retarded owing to delay in appointing an overseer, who was also chiefly employed in supervising the erection of a residence for the wards. The Lieutenant-Governor is glad to observe that good progress was made in the Kanika Estate in collecting the arrears which had accrued from the previous year when the collections amounted to 62·1 per cent. only of the current demand, the corresponding percentage in the year under report being 124 per cent. Affairs in the Paigambarpur Estate are still in a most unsatisfactory position. The management has never been efficient, and the estate suffered severely from the effects of the famine. Collections were even worse than in the preceding year, being 37·4 per cent. of the current demand only, as compared with 42·7 per cent. in the previous year. There was a change of managers during the year, and the Bhagalpur portion of the estate, which is the most extensive and difficult of control, was placed under the Collector of Bhagalpur with a special sub-manager, from which much improvement is expected. The expenditure on improvements in the Dakhin Shahbazpur Estate, which was reported last year to have amounted to Rs. 2,602, a sum regarded as insufficient, is now explained to have really been Rs. 7,074 owing to the inclusion of works subsequently completed. The expenditure during the year under report was Rs. 8,644. There was a noticeable improvement in the collections in the Sheohar and Malighati Estates in the districts of Muzaffarpur and Midnapore respectively.

13. Of the 13 estates taken in charge during the year, the Board have separately reviewed the circumstances of 5, and of the 13 estates similarly released, a special account has been given of 11. A brief notice has also been given of 12 estates the charge of which was assumed or relinquished during previous years, but the particulars regarding which had not been incorporated in former reports. The most important estate which came under the control of the Court of Wards during the year was that of Bettiah, charge of which was assumed on 1st April 1897, the proprietress of the estate, the junior Maharani Janki Koer, widow of the late Maharaja Sir Harendra Kishore Singh, K.C.I.E., being declared, under section 6(*a*) of Act IX (B.C.) of 1879, disqualified to manage the estate. The estate comprises lands, houses and temples scattered over 10 districts in the Patna Division and in the North-Western Provinces, though the greater part of the property lies in Champaran. In addition, a conditional deed of sale for Rs. 15,00,000 is held over the Bhoputpore estate, for which it is shortly intended to foreclose. The portion lying in the North-Western Provinces is managed under the supervision of that Government. The total income of the Raj is Rs. 18,78,514, of which Rs. 18,18,194 is from landed property, the rental of the villages held in Champaran alone amounting to Rs. 17,01,156. The state of the rent-roll is reported to be satisfactory; no doubts exist as to the rents payable, which are fair, and in Champaran particularly low. The cadastral survey operations have included the Champaran portion of the estate along with the rest of the district. The rent-rolls

so far received of the settled villages show a general increase on account of extensions of cultivation. The system of letting out villages in lease obtains to a large extent; in Champaran annual rent and cesses amounting to Rs. 5,61,584 are received from indigo planters on account of villages held by them in perpetual lease, and the sum of Rs. 5,95,502 in respect of leases for shorter periods. Rupees 4,68,210 are similarly paid by temporary native lessees. A special report has been called for from the Board of Revenue on the subject of the continuance of the system. There is a large sterling loan upon the property, as security for which promissory notes to the value of Rs. 4,02,000 are held by trustees. The Collector of Champaran has been appointed Managing Collector of the Bengal portions of the estate, and Mr. J. R. Lowis as Manager on a salary of Rs. 1,800 per mensem, with two Assistant Managers under him. The management charges amount to Rs. 1,48,923, or 8·5 per cent. on the current demand of Rs. 17,42,125. A Middle English School and a large female hospital under the Countess of Dufferin Fund are maintained at the cost of the Raj in Bettiah, and, in addition to four outdoor dispensaries about to be opened in different parts of the estate, subscriptions are made to various Government schools and hospitals. Subsequent to the death of the late Maharaja, two suits were filed claiming succession to the estate. That filed in 1895 by Babu Ram Nandan Singh was decided in his favour in July 1897 in the Court of the Subordinate Judge of Tirhut, but execution has been stayed pending the decision of the appeal preferred. The second suit instituted by Babu Girija Nandan Singh, of Sheohar, has been dismissed.

Of the estates released during the year, the largest was that of Kasimbazar in Murshidabad which was restored to the proprietor in September 1897 after being successfully managed for a period of seventeen and-a-half years. The rent-roll which stood at Rs. 2,94,564 at the time of the assumption of charge had risen to Rs. 3,54,974 by the date of the release of the property, owing to the purchase of new villages and the settlement of pargana Sarail. Of the total recoverable demand of Rs. 61,08,022 during the management of the Court, deducting remissions on account of the deaths, desertions, and poverty of the raiyats, 86·3 per cent. was collected. Debts to the extent of one lakh were liquidated, and the property handed over with a balance to its credit of Rs. 2,83,253. Rupees 1,59,434 were expended on improvements during the period of management by the revenue authorities, mostly on the excavation of tanks, wells and irrigation channels, and the construction of roads and bridges, while investments in landed property were made to the extent of Rs. 4,55,525. A cadastral survey and settlement was carried out in pargana Sarail in Tippera belonging to the estate at a net cost of Rs. 1,83,199.

Other extensive estates released during the year were those of Babu Sukraj Rai in Bhagalpur and Shankarpur in Dinajpur. The former had been under the control of the Court of Wards for eight years; the debts due by it, amounting to Rs. 49,345, were practically liquidated, and the estate restored with a balance of Rs. 46,812. It is noticeable that during this time, notwithstanding the accumulation of a considerable balance, only Rs. 2,200 were spent on the improvement of the property. The management of the Shankarpur Estate extended over 25 years. A survey and settlement of the estate was carried out at a cost of Rs. 91,584, of which Rs. 49,208 were recovered from the tenants and co-sharers. Rs. 27,154 were spent on improvements, mostly on increasing the water-supply and the encouragement of arboriculture. The rent-roll was raised by Rs. 26,734, chiefly owing to the survey and settlement proceedings and to reclamations and re-settlements. The balance in hand, when the estate was released, amounted to Rs. 64,810, in addition to promissory notes to the value of Rs. 2,55,500 in deposit in the High Court. A survey and settlement at a cost of Rs. 33,790 was carried out in the Talipabad Estate in Dacca previous to its release, and heavy liabilities appertaining to the estates of Koer Bhagwant Persad in Patna and Namsedag in Palamau were discharged, though not without recourse to the sale of portions of the properties.

14. *Encumbered estates in Chota Nagpur.*—There were 60 estates managed under Act VI of 1876 during the year in comparison with 61 during

1896-97. The collections of rent and cesses due to them are shown below:—

District.	Arrear demand.	Current demand.	Collections.	Percentage of total collections on current demand.	Remissions.	Balances.	Advance collections on account of the ensuing year.
1	2	3	4	5	6	7	8
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Hazaribagh ...	55,136	1,35,388	1,26,632	92·7	5,444	59,448	31,849
Lohardaga ...	64,464	80,471	71,595	88·9	3,266	70,074	203
Palamau ...	8,059	16,992	16,204	95·3	.....	9,447	.....
Manbhum ...	3,12,868	3,73,192	3,41,916	92·4	259	3,40,885	6
Singhbhum ...	1,35,553	88,637	88,265	99·6	18,319	1,17,606	37
Total for 1897-98 ...	5,76,690	6,94,680	6,46,612	93·0	27,288	5,97,460	32,095
Total for 1896-97 ...	4,61,463	6,43,382	5,72,554	88·8	53,928	4,81,160	26,261

The progress made in the repayment of the debts due by the estates is shown in the following statement:—

District.	Due at the commencement of the year.	Ascertained and incurred during the year.	Total.	Payments.	Reductions by compromise.	Balance due at the close of the year.	Total amount provided in the scheme for payment of debts, as shown in the Commissioner's annual report.
1	2	3	4	5	6	7	8
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Hazaribagh ...	6,37,624	1,54,966	7,92,590	68,688	17,359	7,06,543	75,292
Lohardaga ...	2,31,607	66,916	2,98,523	49,110	.....	2,49,413	76,933
Palamau ...	1,12,805	4,138	1,16,943	16,089	.....	1,00,854	17,679
Manbhum ...	10,97,754	3,55,384	14,53,138	46,993	86,903	13,19,242	1,11,717
Singhbhum ...	66,012	1,23,953	1,89,965	37,383	.....	1,52,582	30,929
Total for 1897-98 ...	21,45,802	7,05,357	28,51,159	2,18,263	1,01,262	25,28,634	3,12,550
Total for 1896-97 ...	21,98,189	2,54,488	24,52,677	1,57,969	6,320	22,88,388	2,29,262

The Board are of opinion that, considering the severe scarcity which was felt in the Division during the early part of the year, the improvement in the percentage of collections is creditable; the results were worst in Lohardaga, where for a time at least, the distress was most acute. The revenue demand due to Government was paid in full by all estates with the exception of those of Burrabhum and Patkum. The payments of debts were, as in the previous year, less than the amounts provided in the schemes of management of the different estates, the relative proportions in the two years being about the same (69 per cent.). Explanations of the deficiencies have been furnished by the Commissioner.

15. The thanks of Government are due to the Board of Revenue for the able and successful supervision exercised by them over the several classes of estates under their charge. The names of the officers specially commended by the Board in paragraph 27 of their Report will be communicated to the Appointment Department of this Government.

By order of the Lieutenant-Governor of Bengal,

F. A. SLACK,

Offg. Secretary to the Government of Bengal.

RESOLUTION ON THE ADMINISTRATION REPORT OF THE ORISSA PORTS FOR THE YEAR 1897-98.

No. 2085Marine.

Government of Bengal.

MARINE DEPARTMENT.

Dated Calcutta, the 12th November 1898.

RESOLUTION.

READ—

The Administration Report of the Orissa Ports for the year 1897-98.

The following statement shows the receipts of the year under review, as compared with those of the preceding year:—

PARTICULARS.	1896-97.	1897-98.	Increase.	Decrease.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
Port dues on Vessels	1,772	2,212	440	.....
Ditto on Mail Steamers	14,914	14,301	.....	613
Miscellaneous	110	251	141	.....
Government contribution	24,000	12,500	.. ...	11,500
Total Receipts ...	40,796	29,264	.....	11,532

The large decrease is entirely due to the Government contribution having been reduced from Rs. 24,000 to Rs. 12,500.

2. The expenditure during the year 1897-98, as compared with that during 1896-97, is shown in the subjoined table:—

PARTICULARS.	1896-97.	1897-98.	Increase.	Decrease.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
Establishment	9,353	10,730	1,377	.....
Light-house Establishment	4,534	4,759	225	... .
Vessels and Boats Establishment ...	1,990	1,850	.....	140
Dockyard Services and Supplies ...	4,941	8,042	3,101	.....
Miscellaneous	657	488	.....	169
Other charges	2,378	2,708	330	.....
Total Charges ...	23,853	28,577	4,724	.....

3. The expenditure shows an increase over the figures of the preceding year. Of the items in which there has been an increase, the largest are those on account of "Establishment" and "Dockyard Services and Supplies." In False Point the increase was due to expenditure incurred in repairing the row boat at Hukitola, which was seriously damaged by fire, and in Balasore the increase was due to the value of stores supplied to Shortt's Island

light-house and to the Port Officer, Chandbali. Among these stores was a life-boat supplied to the Shortt's Island light-house establishment. The value and repairing charges of buoys also contributed to the increase. The decrease in the expenditure was small, and calls for no remarks.

4. The following table shows the number and tonnage of vessels that entered and cleared during the year, as compared with those of the preceding year:—

	Year	Entered.		Cleared.	
		Number.	Tonnage.	Number.	Tonnage.
1	2	3	4	5	6
False Point	1896-97 ...	45	74,640	45	74,640
	1897-98 ...	36	70,943	36	70,943
Balasore	1896-97 ...	492	113,881	498	113,951
	1897-98 ...	408	101,620	420	107,919
Puri	1896-97 ...	22	27,937	23	30,094
	1897-98 ...	17	27,464	17	27,464

Four hundred and sixty-one vessels in all entered the ports during the year, of which 388 were steamers, and of these 387 were engaged in the coasting trade. Of the 73 sailing vessels, 4 were engaged in the foreign and 69 in the coasting trade. There was a decrease at all the ports in both the number and tonnage of vessels which entered and cleared during the year under review as compared with the preceding year.

5. The following figures show the value of the trade of the ports during the years 1896-97 and 1897-98 :—

	Private Trade.		Government Stores.		Total.	
	1896-97.	1897-98.	1896-97.	1897-98.	1896-97.	1897-98.
1	2	3	4	5	6	7
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Exports ...	90,20,905	96,10,028	3,160	4,900	90,24,065	96,14,928
Imports ...	65,09,290	80,93,380	97,177	1,62,778	66,06,467	82,56,158
Total ...	1,55,30,195	1,77,33,408	1,00,337	1,67,678	1,56,30,532	1,79,01,086

The total value of the trade of all the ports shows an increase during the year under review, as compared with the year 1896-97, and the cause of the increase, it is explained, is due chiefly to the increase in the value of the trade of Balasore. The increase in the value of the export trade was due to the fact that the foreign trade of Balasore was limited to Mauritius and the Maldives, but during 1897-98 a trade with Colombo sprang up, and some thousand maunds of rice were sent there. The great advance in the value of the year's imports is explained to be due to the import of railway materials for the Bengal-Nagpur Railway Extension, as well as to the import of a larger quantity of kerosene oil and salt.

6. A steamer service was regularly maintained between Calcutta and Chandbali by the India General Steam Navigation Company and Messrs. Macneill and Company. Communication between Chandbali and Balasore was kept up throughout the year.

By order of the Lieutenant-Governor of Bengal,

A. D. McARTHUR, *Col.*, R.E.,

Secretary to the Govt. of Bengal.

WEATHER AND CROP REPORT.

For the week ending the 14th November 1898.

Burdwan.—No rain. Weather seasonable. *Aman* crop excellent. Cultivation of *rabi* crops and potato going on. Cases of cattle-pox reported from thanas Monteswar and Purbasthali. Common rice selling as follows:—

	Srs.	
Sadar	13 to 16	per rupee.
Kalna	13 „ 15	
Katwa	15	
Raniganj	16	

Birbhum.—Rainfall at Sadar ·01. Weather seasonable. Prospects of crops good. Price of common rice at Sadar 16·8 seers and at Rampur Hât 16 seers per rupee.

Bankura.—No rain. Weather seasonable. Sowing of *rabi* crops still continues. *Nuan* paddy being harvested. Prospect of *aman* good. Fodder and water sufficient. Common rice sells at Sadar 17½ seers and at Vishnupur 16 seers per rupee.

Midnapore.—No rain. Prospects of standing crops very good. Cattle-disease reported from Nayagram. Prices of common rice:—

	Srs.	
Sadar	13 to 15	per rupee.
Contai	13 „ 16	
Tamluk	13¾	
Ghatal	13 „ 16	

Hooghly.—No rain. Prospects of crops good. *Rabi* crops are being sown. Cattle-disease prevails. Common rice sells from 10 to 12 seers per rupee.

Howrah.—Rainfall nil. Weather seasonable. Prospects of *aman* good. Harvesting of *aus* finished. Fodder and water sufficient. Common rice sells at 12 to 14 seers per rupee.

24-Parganas.—Rainfall nil. Weather seasonable. Prospects good. Ploughing and sowing of *rabi* crops going on. Harvesting of *aman* paddy has commenced in some places in the Diamond Harbour subdivision. No cattle-disease reported. Fodder and water sufficient. Common rice sells as follows:—

		Srs.	Srs. ch.	
Sadar		11 to	12 0	per rupee.
Barasat			17 0	
Basirhat	*Aman*		15 10	
	Aus		18 13	
Diamond Harbour ...			13 0	

Nadia.—No rain. Winter rice doing well. Ploughing of land and sowing of *rabi* crops going on. Common rice selling at 12 to 16 seers per rupee. Fodder and water sufficient. Cattle-disease in thana Tehatta.

Murshidabad.—No rain. Weather seasonable. Prospects of *aman* and *kalai* favourable. *Rabi* crops still being sown. State of indigo, mulberry, and sugarcane appears to be good. Fodder insufficient in Sadar and Kandi subdivisions. Common rice sells as follows:—

	Srs.	
Sadar	15½	per rupee.
Jangipur	17½	
Kandi	19	

Jessore.—No rain. Weather fine and cold. *Aman* rice ripening. Prospects continue good. Oilseeds and pulses are being sown. No cattle-disease reported. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Jessore	16 to 20	per rupee.
Jhenida	17 „ 18	
Magura	18 „ 22	
Narail	20	

Khulna.—Rainfall nil. Weather seasonable. Cultivation of land and sowing of *rabi* crops going on. Prospect of *aman* paddy excellent. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	16 to 20	per rupee.
Bagerhat	18	
Satkhira	18	

Dinajpur.—Rainfall nil. Weather cool. Standing crops good. No cattle-disease. Fodder and water plentiful. Rice 16 seers a rupee.

Jalpaiguri.—Rainfall nil. Weather seasonable. Prospect of *haimanti* paddy good. Transplantation of tobacco and sowing of mustard going on. Fodder and water sufficient. Common rice sells from 8 to 15 seers per rupee.

Darjeeling.—Rainfall nil. Weather seasonable. *Hills—Bara marua, haimanti* paddy, *phaphar* and *kalai* progressing. *Terai—Haimanti* paddy, mustard, and *kalai* doing well; sugarcane being cut. Coarse rice sells as follows :—

					Srs.	
Hills	...	...	...	...	9 to 11	per rupee.
Terai	...	...	...	...	13 to 14	

Bhutta sells at Darjeeling 19 seers and at Kalimpong 44 seers per rupee.

Rangpur.—Rainfall nil. Weather fine and cool. Cultivation of *rabi* crops and transplanting of tobacco have begun. Prospects good. Common rice selling at 13 to 15 seers per rupee. Fodder and water sufficient.

Bogra.—Rainfall nil. Preparation of land for *rabi* crops still continues. Prospects of crops good. Common rice selling from 15 to 20 seers per rupee. Fodder and water sufficient.

Pabna.—Rainfall nil. Weather fine and cool. Crop prospects good. Price of rice 14 to 16 seers per rupee.

Dacca.—Rainfall nil. Weather seasonable. Prospects of standing crops good. Fodder available. No cattle-disease. Common rice 13 to 20 seers per rupee.

Mymensingh.—Rainfall nil. Weather seasonable. Prospects of crops good. Common rice sells at 16 to 19 seers per rupee. Fodder and water ample. Condition of cattle good.

Faridpur.—No rain. Weather seasonable. Prospects of crops good. Rice 16 to 20 seers per rupee.

Backergunge.—Rainfall nil. Weather seasonable. Prospects of crops good. Common rice sells from 11½ to 18 seers (*aman*) and from 15 to 29½ seers (*aus*) per rupee.

Tippera.—No rain. Weather seasonable. Prospects of standing crops good. *Rabi* crops are being sown. Fodder sufficient. Common rice sells at 12 to 22 seers per rupee.

Noakhali.—Rainfall nil. Prospects of crops good. Lands are being cultivated for *rabi* crops. Cattle-disease reported from Companyganj. Condition of fodder in the Sadar subdivision not good; it is available at Feni. Water good. Price of rice—*aman* 12 to 16 seers and *aus* 16 to 28 seers per rupee.

Chittagong.—Rainfall nil. Weather seasonable. Prospects of crops good. Prices steady. Water and fodder sufficient.

Patna.—No rain. *Rabi* sowing in progress. Prospects of paddy and sugarcane good. Prices stationary. Common rice in Patna sells at 19 seers a rupee. Fodder and water for cattle sufficient.

Gaya.—No rain. Prospects of both winter rice and *rabi* crops good. Common rice selling at 15½ seers per rupee.

Shahabad.—No rain. Weather seasonable. *Rabi* sowings continuing. Standing crops good. Rice sells at Arrah 14 seers per rupee. Fodder and water sufficient.

Saran.—No rain. Weather warm. Paddy and *rabi* doing well. Poppy sowings delayed on account of heat. Average prices are—Common rice 15·13 seers and *makai* 24·15 seers per rupee.

Champaran.—No rain. Weather fine. Crop prospects generally good. *Rabi* and poppy sowings continue. Fodder and water sufficient. Common rice sells at 15½ seers and maize at 23 seers per rupee.

Muzaffarpur.—Rainfall nil. Prospects of standing crops favourable. *Rabi* sowings continue. No cattle-disease. Prices are—Common rice 11 to 17 seers, wheat 15 to 17 seers, barley 24 to 30 seers, gram 18 to 20 seers, *rahar* 21 to 22 seers, and *marua* 27½ seers per rupee.

Darbhanga.—No rain. Weather cool. Paddy attaining maturity. *Rabi* being sown and doing well. Prospects good. Fodder available. Common rice is sold at Sadar 11 seers per rupee.

Mongnyr.—No rain. Weather cool and cloudy. Harvesting of winter rice commenced. *Rabi* sowings going on. State of sugarcane and other standing crops good. Poppy sowings begun and about 8 annas sown. Prospects satisfactory. A shower just now would facilitate the sowings. No cattle-disease. Common rice sells as follows:—

	Srs.	
Monghyr	13	per rupee.
Begusarai	13 to 15	per rupee.
Jamui	15 „ 16	per rupee.

Bhagalpur.—Rainfall nil. Weather seasonable. Standing crops doing well. *Rabi* crops being sown. Cattle-disease reported from Supaul and Partabganj thanas. Prices nearly stationary.

Purnea.—No rain. Weather seasonable. Prospect of *aghani* rice favourable. *Rabi* crops doing well. Cattle-disease still continues in Araria. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	18	per rupee.
Kishanganj	20	per rupee.
Araria	21	per rupee.

Malda.—Rainfall nil. Cold weather has set in. Winter rice excellent everywhere. *Kalai* pulse flowering Sowing of *rabi* crops continues. Price of coarse rice stationary at 18 seers per rupee. No want of fodder.

Sonthal Parganas.—Rainfall nil. Weather bright and cool. Prospects of winter rice good. Harvesting on high lands in progress. Sowing of *rabi* still continuing. Price of rice varies from 16 to 22 seers per rupee, and of maize from 32 to 40 seers per rupee.

Cuttack.—Rainfall nil. Weather seasonable. *Laghu sarad* ripening and in some places being harvested. *Guru sarad* in ear. Sugarcane maturing. *Biri*, *mung*, *kulthi*, and *arhar* in flower and pods. Condition of cattle generally good, but disease reported from some places. Fodder and water sufficient. Common rice sells as follows:—

	S.	ch.	
Cuttack	15	2	per rupee.
Jajpur	17	1	per rupee.
Kendrapara	21	0	per rupee.
Banki	19	6	per rupee.

Balasore.—No rain. Harvesting of *boali* and sowing of *rabi* crops continue. *Sarad* in flower, and is being damaged by insect-pest in Balasore circle. Sugarcane being pressed. Rice sells from 14 to 22 seers per rupee in the interior, and at 16 and 17 seers at Balasore and Bhadrak respectively. Rain wanted. Fodder sufficient.

Puri.—Rainfall at Puri ·53. *Sarad* ripening. *Laghu* being cut. Prospects of sugarcane, *arhar*, and other miscellaneous crops good. Fodder and water sufficient. Cattle-disease reported from certain parts of the district. Common rice sells as follows:—

	S.	ch.	
Puri	15	12	per rupee.
Khurda	14	7	per rupee.
Interior of district	13 to 18	2 to 6	per rupee.

Hazaribagh.—Rainfall nil. Weather seasonable. Harvesting of rice in progress. *Rabi* being sown. Common rice 12 to 17 seers per rupee.

Lohardaga.—No rain. Harvesting of lowland paddy continues. State of standing crops good. Rice sells at Ranchi 18 seers, and in the interior from 18 to 24 seers per rupee. Cattle-disease continues in the interior. Fodder and water sufficient. Grain in stock sufficient.

Palamau.—No rain. Weather seasonable. *Rabi* sowings nearly finished. Rain wanted for *rabi*. Paddy being harvested in places. Cattle-disease prevailing in some villages. Rice sells at Sadar 18 seers per rupee.

Manbhum.—Rainfall nil. Weather seasonable. Prospects of crops excellent. Harvesting in progress. Cattle-disease reported from thana Purulia. Fodder and water sufficient. Average price of common rice (new) at Sadar 22½ seers per rupee. Supply sufficient.

General Summary.—There was slight rain at Puri, where it was needed; elsewhere no rain is reported. The general prospects of the crops are favourable. The winter rice is maturing, and in some districts is being harvested. In Balasore some damage has been done to the crop by a pest of insects. Sugarcane and pulses are doing well. The *rabi* and other cold-weather crops, including poppy, are being sown. In Saran the poppy sowings are said to be delayed on account of heat. Prices are stationary or falling. Except in parts of Murshidabad and Noakhali, the fodder-supply is everywhere sufficient. There is no outbreak of cattle-disease anywhere in an epidemic form, but isolated cases are reported from some districts.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT,
The 15th November 1898.

F. A. SLACK,
Offg. Secretary to the Govt. of Bengal.

Results of the Meteorological Observations taken at the Alipore Observatory from 6th to 12th November 1898.

The mean pressure of the seven days	Inches. 29·900
The average pressure of the corresponding period for 24 years, Surveyor-General's Office	29·939
The total number of hours of bright sunshine	Hours. 53·1
The maximum possible number of hours of sunshine	77·8
The mean temperature of the seven days	° 75·8
The average temperature of the corresponding period for 24 years, Surveyor-General's Office	76·7
The extreme variation of temperature	21·3
The maximum temperature	85·4
The highest velocity of the wind in one hour	Miles. 8
The mean relative humidity	% 77
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	73
The total fall of rain from 6th to 12th November 1898	Inches. Nil
The average fall of the corresponding period for 24 years, Surveyor-General's Office	-
The total fall from 1st January to 12th November 1898	0·37
The average fall of the corresponding period for 24 years, Surveyor-General's Office	59·52
The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h., and 22h.	65·10

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

▲ dew.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF OCTOBER 1898.

During the first few days of October fine settled weather prevailed over the province and the Bay, with a tendency to the development of conditions typical of the change of seasons. In the latter half of the month cold weather conditions, well marked for the season, became established over the province, with clear skies, northerly winds and temperature 2° or 3° below the normal.

There was a period of unsettled weather during the second week. A cyclonic storm which originated in the south or south-east of the Bay moved towards the South Circars coast, the centre of the depression crossing near Masulipatam. It continued to move north-westward for a short time after passing the coast and then began to recurve. Crossing Orissa and Chota Nagpur it then turned eastward across the central districts of Bengal proper, and broke up shortly afterwards in the hilly parts of Assam.

While the main depression was in the neighbourhood of Masulipatam, a shallow low pressure area was shown in the north-west of the Bay, more by the cyclonic winds on the Orissa coast than by the pressure differences. This shallow depression moved northwards over South-West Bengal and was over the centre of the province when the main disturbance, having recurved, was approaching Orissa. The two depressions then united into one of some depth with a centre between Midnapore and Chaibassa at 8 A.M. on the 14th, and with a maximum defect of about ·2 inch. On the 15th the centre was near Sirajganj, and on the 16th the disturbance had almost ceased.

The tendency for depressions crossing the south of the Bay in October is, sooner or later, to follow a curved path and ultimately move in north-easterly or easterly direction. In the case of the depression under consideration, it appears to have divided, the main portion continuing in a westerly direction, while the second and more shallow depression under the influence of causes which produce the usual curved path moved towards the north.

This shallow depression was probably the cause of the unusual rainfall in Orissa, where general heavy falls occurred while the main depression was near Masulipatam. The recurving of the main depression, the subsequent union and the north-easterly line of motion, all tended to maintain rainfall over the province for several days. General rain fell in the southern districts from the 10th to the 15th, and in other districts from the 12th to the 15th, except in Bihar, where very little rain fell except on the 14th and 15th.

The general fall for the month was in considerable excess in the south and east of the province and in moderate defect in Chota Nagpur and Bihar.

At the beginning of the month pressure was unusually uniform over both the province and the Bay, readings being between 29·76 and 29·80 inches. They were generally in defect which, though increasing towards the south, was small except in Burma and Ceylon. Winds were light and variable with a tendency to become north, and temperature was above the normal except in Madras, where there was a small defect. There was very little change for several days. Pressure oscillated slowly, and temperature remained relatively high except in the west of the province, where it fell and remained 1° below the normal till the 6th.

The first signs of the disturbance in the south of the Bay appeared on the 7th. Pressure was beginning to fall in Burma, but winds, though easterly there, were light. On the following day the fall of pressure was more general, and wind velocity at Diamond Island had increased from 8 to 14 miles an hour The increase to 28 miles on the 9th showed that the disturbance was extending, and from the rise of pressure in the east it was seen to be moving towards the west. The stormy weather continued on the 10th in the south-east of the Bay, and the centre of the disturbance was then not far from the Madras coast about south-east from Masulipatam. On the morning of the 11th the centre was near Masulipatam, where pressure was a third of an inch below the normal. The gradient was very steep on the coast between Masulipatam and Cocanada, and strong cyclonic winds prevailed between the latter station and Nellore. Northwards from Cocanada the wind directions were not in agreement with the cyclonic circulation round the centre near Masulipatam, and suggested the existence of another and more shallow depression off the north coast of the Circars. The evidence of such a depression was more marked on the 12th, on the morning of which day the depression moving northwards crossed South-West Bengal and caused moderate variations of pressure. On the 12th it was over the central districts of Bengal with a regular cyclonic circulation of winds.

Showers had begun in Orissa on the 10th, and heavy falls varying up to 6 inches were reported on the 11th from all the coast stations between Saugor Island and Gopalpur. On the 12th the heaviest falls were at Saugor Island, Balasore and False Point, and on the 13th, when the centre of the shallow depression was inland, at Faridpur and Noakhali. This burst of heavy rainfall moved northwards with a velocity very similar to that of the shallow depression, and was probably due to it and not to the main disturbance which on the 13th was still in the north of the Madras Presidency.

On the 14th there was one depression only with a centre near Midnapore. Rainfall was on that day much more general over the province than it had been on the days previous, but it was more uniform and nowhere very heavy. The north-easterly movement of the storm continued, and the area of rainfall, though still including all districts on the 15th, contracted rapidly towards the east. On the 16th the storm had ceased, and rainfall was almost entirely confined to a few scattered stations, mostly in the eastern districts.

Owing to the cloudy rainy weather which had prevailed between the 10th and 15th, day temperatures were very low. The mean defect on the 16th ranged up to 6° in South-West Bengal, but by the following day it was greater than 2° in East Bengal only.

The pressure distribution soon recovered after the passage of the disturbance. Temperature became normal or was slightly above, and though there were light variable winds in Bengal, a north-westerly current obtained over the Bay.

Fine settled weather continued over the province till the end of the month, the only change worthy of note being the fall of temperature which began in the west of the province on the 27th and was general on the 28th. During the last three days of the month the mean defect varied from 1° in the north-east of the province to 5° in the south-west.

After the recovery of pressure in the north about the middle of the month the normal distribution of pressure was established over the Bay with a gradient rather steeper than usual. North-east monsoon conditions commenced on the Madras coast about the end of the third week, and the weather there continued showery throughout the remaining days of the month.

Pressure was not subject to large oscillations except in the second week while the cyclonic storm was in existence. As the depression was not of more than average depth, the changes were not so large as frequently occur on such occasions, and the defect at the centre was at most a third of an inch. During the passage across Bengal the greatest defect was only a fifth. At other times the pressure distribution was more steady than usual and generally about normal. The average difference from the normal at the various inland stations is very small, usually only a few thousands of an inch.

Temperature was low during the second week while the disturbance was affecting the weather and again towards the end. The difference from the normal on the former of these two occasions was chiefly in day readings, and on the latter in night readings, the average defect being about 5°. At other times there was usually a small excess.

The means for the month are below the normal over almost the whole province. In North Bengal the average mean of the month is practically normal, but from there defect steadily increases towards the south-west and is greatest in South-West Bengal.

Rainfall.—Very little rain fell except between the 10th and 15th, but during these days heavy falls were of daily occurrence, especially in Orissa and Lower Bengal. In the west and north of the province most of the falls occurred on the 14th and 15th and were generally under two inches. In the west of Bihar the fall was much lighter than in other parts, especially in Saran and Champaran, where only light scattered showers occurred.

On an average Bihar received less than half the normal of the month, viz. 48 per cent., and Chota Nagpur 68 per cent. In all the other divisions there was considerably more than the normal, excess being 38 per cent. in North Bengal, 60° in Lower Bengal, and 69 per cent. in Orissa.

The rain distribution was very uniform in the western half of the province, the reports from the different stations being generally 1 or 2 inches. East of a line running south-south-west from the south of Cooch Behar to the west of Orissa falls were over 5 inches, and of a narrow strip along the Orissa and Bengal coasts they were between 10 and 15 inches. The only inland tract of country where the falls were over 10 inches was the north of East Bengal, near which the depression of the middle of the month broke up, a process usually accompanied by very heavy rain in the hills and the adjacent plains.

The following table gives a comparison between the actual monthly and total rainfall and the normal rainfall of the province up to the end of October in the same form as has been employed in the previous monthly abstracts of the present year. The figures represent the ratio of the rainfall of each month of the present year to the normal rainfall expressed as a percentage. The table thus gives a condensed summary of the rainfall data of the year for each meteorological division. The first ten columns give the percentage amount of rainfall received in each month, and the last column the percentage rainfall of the whole period from the 1st of January to the end of October :—

Meteorological Divisions.	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	Actual rainfall of first ten months of 1898 expressed as a percentage of the normal fall for the period.
South-West Bengal ...	120	16	2	64	88	124	82	138	116	158	109

The following table gives full data for the comparison of the actual and normal rainfall of the month of October in all districts of the Province. The first column gives the average district rainfall as determined from the rainfall observations of the past 26 years; the second column gives the actual district rainfall as determined from the actual weighted rainfall of the month at the reporting stations in the district; the third column expresses the ratio of the actual district rainfall to the normal as a percentage; and the fourth the same information in a slightly different from.

Percentage Table for October 1898.

Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal, assembled under the provisions of the Indian Councils Acts, 1861 and 1892.

THE Council met at the Council Chamber on Saturday, the 12th November, 1898.

Present:

The Hon'ble SIR JOHN WOODBURN, K.C.S.I., Lieutenant-Governor of Bengal, *presiding.*

The Hon'ble RAI DURGA GATI BANERJEA, BAHADUR, C.I.E.

The Hon'ble NAWAB BAHADUR SYUD AMEER HOSSEIN, C.I.E.

The Hon'ble W. B. OLDHAM, C.I.E.

The Hon'ble W. H. GRIMLEY.

The Hon'ble C. W. BOLTON, C.S.I.

The Hon'ble E. N. BAKER.

The Hon'ble SAHIBZADA MAHOMED BAKHTYAR SHAH, C.I.E.

The Hon'ble M. C. TURNER.

The Hon'ble NORENDRA NATH SEN.

The Hon'ble SURENDRANATH BANERJEE.

The Hon'ble T. W. SPINK.

NEW MEMBER.

The Hon'ble MR. BAKER took his seat in Council.

APPOINTMENT OF A MEMBER OF THE PROVINCIAL SERVICE TO A DISTRICT MAGISTRACY.

The Hon'ble BABU SURENDRANATH BANERJEE said—

I have the honour to call the attention of the Government to the fact that since the death of Mr. Umesh Chunder Batabyal, late Magistrate and Collector of Bogra, who was a member of the Provincial Service, no member of that Service has been appointed to a District Magistracy. Will the Government be pleased to consider the propriety of appointing a member of the Provincial Service to such an appointment, especially in view of the consideration adverted to in the letter of the Government of India, No. 285, dated the 30th April 1895, viz., that the claims of members of the Indian Civil Service of 1883 and 1884 for vacancies among Magistrates and Collectors and Judges have now been fully considered, and the time, therefore, has come to consider the claims of members of the Provincial Service for such appointments?

The Hon'ble MR. BOLTON replied:—

"As was explained to the Hon'ble Member in Council on the 20th of March last year, the notification of this Government published in the *Calcutta Gazette* of the 5th April 1893, declaring certain 'listed' appointments (of which four are Collectorships and six District Judgeships) open to members of the Provincial Service, including Statutory Civilians, was subject to the restrictions imposed by the Resolution of the Government of India, No. $\frac{9\text{-Public}}{1892}$, dated the 21st April 1892. That Resolution laid down that the appointment of members of the Provincial Service to those posts should be subject to the prior right to promotion of members of the Indian Civil Service appointed in the several years in which recruitment was reduced by one-sixth in order to allow of vacancies being filled up by members of the Provincial Service. In accordance with these orders six District Judgeships and Collectorships are now held by Statutory Civilians, all the Indian Civilians appointed in or before 1886 having received similar promotion to the rank of District Judge or Collector. The vacancy caused by the death of Mr. Batabyal could not be given to the Provincial Service, because the Civilians recruited in 1887 have yet to receive promotion; and until they have all been promoted another District Judgeship or Collectorship will not become available for a member of the Provincial Service.

"When the Government of India wrote their letter of the 30th April 1895 only two of the listed appointments had been appropriated, and both were held by Statutory Civilians. Since that date four more appointments have been so appropriated. The six appointments are now held by Mr. Nanda Krishna Bose, Kumar Gopendra Krishna Deb and Messrs. Ambika Charan Sen, Syed Nurul Huda, Brojendra Kumar Seal and Surjya Kumar Agasti."

MR. AMBLER'S CASE.

The Hon'ble BABU SURENDRANATH BANERJEE asked—

Has the attention of the Government been called to the case which has recently been decided in which one Mr. Ambler was committed to the Court of Sessions on a charge under section 304, Indian Penal Code, of culpable homicide not amounting to murder and other charges, he having, it is alleged, caused the death of one Jagdeo Tewari? Is the Government aware that the decision and the proceedings in connection with that case have caused general dissatisfaction among the Indian section of the community?

Is it the case (1) that, contrary to law, Mr. Ambler was tried by the Sessions Court, although, the committal being under section 304, Indian Penal Code, he should have been tried by the High Court, which was thus irregularly deprived of its jurisdiction in the case; (2) that the Jury consisted exclusively of three Europeans, all of whom were members of his own Club, one of them being the Honorary Secretary of the Club, and that, in the first instance, they refused to bring in a verdict of guilty under a charge of assault under provocation, even though the prisoner had pleaded guilty to it; and (3) that,

contrary to the express provisions of the law, the accused was enlarged on bail by the Committing Magistrate, who possesses no such power, the committal being in respect of a non-bailable offence triable exclusively by a Court of Sessions, the Sessions Court alone in such a case having the power of granting or refusing bail?

Whether, having regard to all these irregularities, which are sufficiently grave in their character, the Government will be pleased to call for the papers and the records of the case and consult the Law Officers of the Crown and take such action as the justice of the case may demand?

The Hon'ble MR. BOLTON replied:—

"The attention of the Government was attracted to the case referred to by the Hon'ble Member, and acting under instructions, the Legal Remembrancer has already taken steps to have a motion presented to the High Court in the matter. Under the circumstances it is not desirable to enter into the points of law raised in the question."

SCARCITY IN THE DISTRICT OF KHULNA.

The Hon'ble BABU SURENDRANATH BANERJEE asked—

Is the Government aware that the district of Khulna suffered from scarcity for three consecutive years preceding the famine of 1896-97, and that there has been a steady deterioration in the productive quality of the soil which has been ascribed by Mr. Westmacott, late Commissioner of the Presidency Division, to the incursions of salt water, which, if not checked, might bring on a recurrence of distress in future years? Will the Government be pleased to state what action, if any, it has taken to improve the tracts which suffered from distress; and will the Government lay on the table all the papers and correspondence on the subject?

The Hon'ble MR. BOLTON replied:—

"It is not correct to say that the district of Khulna suffered from scarcity for three consecutive years preceding the famine of 1896-97. The winter rice is the main staple of the people, who are mostly agriculturists. The winter rice crop of 1893-94 was reported to have exceeded the average in the Sadar subdivision and to have been but little below it elsewhere. In the succeeding year the crop was an excellent one and the outturn estimated at 17 annas, while, although the yield during 1895-96 was less, the material condition of the people was not seriously affected. The physical features of the district render it peculiarly liable to damage from salt water. The occurrence of a cyclone in October 1895 drove the salt water over a larger extent of land than usual in the Satkhira subdivision, and the famine of 1896-97 was largely due to the fact that the short rainfall was insufficient to wash out the saline deposits from the soil. In that year, however, the affected area amounted to 474 square miles only, out of a total area of the district of 2,077 square miles. The country is mainly dependent for its protection upon bandhs. These have been permitted by the local zamindars and raiyats to get out of repair, with the consequence that the salt water percolates through to the gradual deterioration of the soil. In January 1895 Sir Alexander Mackenzie addressed a circular to the leading landowners, many of whom are unfortunately absentees, impressing upon them that they could best provide for their own interests, while fulfilling their duty to their tenants, by taking in hand the repair of existing embankments and the construction of new ones with energy and systematically. Loans were offered for the purpose, and a sum of nearly half a lakh of rupees was so disbursed during the famine and expended upon tanks and embankments. The subject has already been discussed in the published reports of Government in connection with the famine operations, which, together with a copy of the circular referred to, can be laid upon the table if desired."

KILLING OF MONKEYS IN THE PURI MUNICIPALITY.

The Hon'ble BABU NORENDRA NATH SEN said—

The Government is aware of the excitement caused among the orthodox Hindu community in various parts of India by the action of the Puri Municipality in killing monkeys. That excitement has been allayed to some extent by the timely and wise intervention of Government, at whose instance the slaughter has been suspended till further orders. Will the Government be now pleased to state if it has arrived at any final decision in the matter?

The Hon'ble MR. BOLTON replied:—

"The Commissioner was desired to take steps to put a stop to the slaughter of monkeys in the Puri Municipality, and did so. It does not appear that any further order from the Government is called for in the matter."

STATEMENT AS TO THE COURSE OF BUSINESS.

The Hon'ble THE PRESIDENT said:—"GENTLEMEN OF THE COUNCIL—According to custom I have to make to you a statement of the business before you in the present Session. There are at present no new Bills to be introduced. The main duty in the Session will be the consideration in the Select Committee of the Calcutta Municipal Bill. It will, I cannot conceal, be a long and troublesome task. But questions that concern the Government of a great city can never be light, and the Committee will be encouraged in their labours by the importance of the work on which they will be engaged.

"There are questions in connection with this Bill on which I feel that I am called upon to make a personal statement. Because, to the misfortune of the Province, Sir Alexander Mackenzie no longer presides in this Council, I have been challenged to give my personal opinion on the issue upon which an overwhelming majority of this Council has already given its decision. Not except upon the strongest and clearest grounds could I ask this Council to suspend or vary its decision. But I am bound to say that after a patient and, I venture to think, an impartial examination, I am independently of the opinion that that decision was right.

"The Corporation of Calcutta has under its present constitution assented to some great and far-reaching schemes of improvement for the city, and they are entitled to all the credit—and it is a high one—of realizing the value and necessity of the great schemes which have been drawn up for their approval, such as those for the drainage of the city, and the construction of the Harrison Road. They have not shrunk from the heavy taxation which was needed to bring these beneficent projects into effect; and I have myself had evidence of the high public spirit and laborious circumspection which many members of the Corporation bring to the discharge of their municipal duties. These are qualities which not in Calcutta alone have elicited my respect, and it is a pleasure to me to have this opportunity of acknowledging them.

"Nevertheless, it has also been my own experience, in even my limited time of office among you, that the judgment of Sir Henry Harrison on the constitution of the municipal government of Calcutta was right. No man has ever had such long and such favourable opportunities of judging it. No Chairman has ever wielded such an influence in the Corporation; no Chairman has ever been so much beloved or so much trusted; no Chairman's advice was ever so promptly and unhesitatingly accepted, and yet it was his judgment that under its present constitution there is a lack of motive power. The energies of the municipal government expend themselves in criticism and not in action. That opinion was confirmed in the experience of my predecessors. In my own period of office I have been compelled to admit its justice. In the administration of a great city there must be provision for prompt, steady, and efficacious action, and there is no room for doubt that reform of some sort is needed.

"The real issue is the shape which this reform shall take. The solution which Sir Alexander Mackenzie proposed, and which this Council has accepted, is that the executive body of the Corporation—its agents for all purposes of action—shall be a committee limited in numbers, in which the three great interests of the city shall be equally represented—the rate-payers, the men of commerce, and the Government. Under the name of the Government are gathered those great sections of the people—the Muhammadans for instance and the poor—who but for Government nomination may never be represented at all. Against this proposal the Select Committee of the Council will find that several protests have been presented. The most important of these is the memorial submitted by a meeting at the Town Hall. The gravamen of these protests is that the constitution of the Executive Committee, as proposed in the Bill, is an infringement of the great principles of Local Self-Government. If it were so, the Bill would have had from me a most reluctant adhesion; but whatever may or may not be the demerits of the scheme, it most certainly cannot be alleged of it that it infringes in any way the principles of Self-Government. Self-Government is not circumscribed into one solitary and sacred system. Self-Government would cease to be a defensible method of Government, if it were refused permission to adjust itself to the lessons of experience. No Government is defensible which does not seek to amend and improve itself whenever weakness and inefficiency become apparent. From this essential law Self-Government is no more free than an autocracy. If Self-Government in one form has proved unequal to the whole of the task imposed on it, that form must be varied.

"In the humdrum monotonous duties of every day, in duties, nevertheless, of such imperious necessity as the cleanliness of the city, the present constitution has not succeeded as we hoped. I am sorry to say it, but there is no shutting our eyes to that which is patent. We must try and improve it. I think the method which this Council has decided upon is a good one. It limits the members of the Executive where it was overgrown; it increases the share in the administration of the city of those great interests in the community which had been overborne by the single interest of the rate-payers; it keeps strictly within the lines which all the principles of Self-Government permit, and at the same time it has the great merit of clearly defining and distinguishing the functions and relations of the Corporation, the General Committee and the Chairman.

"Of course this is a reform which is unpalatable to the representatives of the rate-payers. They lose the predominance that they have been accustomed to, and we part with annoyance from anything to which we have been habituated. The change, moreover, does convey a slight. In all these feelings they have the sympathy of all of us. Had they been indolent, negligent, false to their duty, they could have had no sympathy. Their virtues have indeed been their vices, and a very excess of zeal has paralyzed their agents. But we should not be true to those very principles of Self-Government which are now said to be assailed; we should not be true to those very principles if we allowed our tenderness to these most natural feelings to hold us back from setting our house in order when its defects have been pointed out. The end must otherwise indeed be that blow to Self-Government which I should be the last to wish to have a hand.

"In the criticisms on the Bill the Select Committee will further find the suggestion that the central body of the Corporation should be reduced in number and brought into harmony with the constitution of the General Committee. It is alleged that it is unscientific and illogical to leave the Corporation unchanged while you materially change your executive Committee, and that the result is certain to be a constant friction. I am not concerned about the charge that the proposals are illogical and unscientific. The most scientific constitutions have not been the most successful in our knowledge. And I have no apprehensions of any injurious friction. At the commencement of all changes there is certain to be opposition and friction of sorts, but as soon as people become accustomed to the change, these temporary sorenesses vanish. It is from the representatives of the rate-payers alone that any friction could come, and they have shown so much good sense and public spirit in all the

greater matters of the past, that I have entire confidence in their bearing in the future. And, speaking for myself, I endorse with the heartiest pleasure and satisfaction the decision that the constitution of the Corporation shall remain as it is. I look upon it as of the greatest value to the administration of the City that there should be numerous wards and numerous delegates. The information and advice about local needs, which these delegates bring, will be of most important service. There could be no more excellent illustration than in the assistance they gave last hot weather in calming the fears of the people and establishing the temporary hospitals, which were the best means of reassuring them. I welcome, therefore, personally the arrangement which retains a large number of local Counsellors, and the dangers of possible friction I personally regard as enormously outweighed by the certain advantages of their help.

"In the main lines of the Bill, therefore, my personal opinions are in complete accord with the decisions of this Council—decisions which have since received the support of such important bodies as the Chamber of Commerce, the British Indian Association, and the two leading Muhammadan Societies.

"The Committee will find, however, in many points of detail very valuable and important suggestions in the criticisms that have been presented during the last few months. I will not take up the time of the Council at present by entering into any examination of these opinions. But there are two matters on which I think I may with propriety now state the opinion of the Government. I have already referred to the memorial from the Town Hall Meeting. I read it, and the speeches at the meeting itself, with the careful attention which it was my duty to give to them. The speeches, if I may say so, were not comparable, in practical knowledge and dialectic skill, to those which were delivered in this Council room by my Hon'ble colleagues, Babu Norendra Nath Sen and Babu Surendranath Banerjee. Those speeches I had not the pleasure of hearing, but I have read them with equal attention to those in the Town Hall. There are, however, two points made in the memorial which I think are perfectly reasonable and to which the Government will give a ready assent. The first is that the duty of sanctioning the bye-laws shall be given to the Corporation instead of to the General Committee. This is just one of those legislative functions—determination of the general lines of the administration—which eminently fall within the jurisdiction of the Corporation. There will, no doubt, be greater delay in fixing the form and character of these bye-laws, but it is well that they should be framed with the most thorough consideration, and the Government willingly agree to this modification.

"The second is that the General Committee shall not exceed the budget allotment on any project without the express sanction of the Corporation, unless within reasonable limits by way of re-appropriation. This again I think is reasonable. I have been warned that, at least so long as friction lasts, the Corporation may hamper its executive by assigning inadequate funds for necessary undertakings. I decline to believe this is possible. I have too much faith, as I have already said, in the commonsense and patriotic feeling of the leaders of the representatives. Should there happen to be a difference of opinion between the Corporation and the General Committee on a question of the kind, I have no doubt that a reference will be made to the Government, as the Bill itself provides, and its impartial decision will close the matter.

"The chapter on the registration of deaths was avowedly tentative and will require very careful examination, and there are numerous details on which the Select Committee will be able to make improvements.

"With these observations I commend the arduous duty to the Committee. The result of it we await with much interest and entire confidence. I am persuaded that they will endeavour to complete their conclusions with as little delay as is consistent with a thorough examination of the criticisms and suggestions

offered by the public bodies we have consulted. It is obvious that it is of great importance to the city that we should settle this matter as early as possible."

CALCUTTA MUNICIPAL BILL.

The Hon'ble Mr. Bolton moved that the Hon'ble Mr. Baker be added to the Select Committee on the Calcutta Municipal Bill.

The Motion was put and agreed to.

The Council adjourned to Saturday, the 17th December, 1898.

CALCUTTA;
The 22nd November, 1898.

F. G. WIGLEY,
Offg. Asst. Secy. to the Govt. of Bengal, Legislative Dept.

RESOLUTION ON THE REPORT OF THE DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL, FOR THE YEAR 1897-98.

REVENUE DEPARTMENT.—AGRICULTURE.

Calcutta, the 21st November 1898.

RESOLUTION—No. 3475.

READ—

(1) Letter No. 836A., dated the 3rd September 1898, from the Board of Revenue Lower Provinces, Land Revenue Department, submitting the report of the Department of Land Records and Agriculture, Bengal, for the year 1897-98.
(2) The report itself.
(3) Read also the Resolution of Government on the report for the year 1896-97.

THE annual report on the working of the Department of Land Records and Agriculture, Bengal, for the year 1897-98, which was due to Government on the 15th August last, was received with the Board's remarks thereon about three weeks after the due date. The report is the second of its kind which has been prepared in the form prescribed by the Government of India in the eighth Resolution of the Revenue and Agricultural Department dated the 20th March 1897 on the proceedings of the Agricultural Conferences of 1893 and of 1895-96. The delay as explained by the Director is due to the difficulties experienced by him in getting the report promptly compiled during his frequent absence on tour.

Mr. W. C. Macpherson, I.C.S., was in charge of the Department from the beginning of the year up to the 23rd June 1897, and again from the 5th September to 22nd November 1897, when he reverted to general duty, and was succeeded by Mr. P. C. Lyon, I.C.S., by whom the present report is submitted. Mr. C. G. H. Allen, I.C.S., officiated as Director during the period from 24th June to 4th September 1897, while Mr. Macpherson was deputed on special duty in connection with the Orissa settlement operations.

2. *Chapter II of the Report.—Land Records Establishment.*—The number of registrations effected during the year under report under the provisions of the Land Records Maintenance Act, III (B.C.) of 1895, in the three mutation offices opened in 1896-97, at Bettiah in Champaran and at Hajipur and Mahnar in Muzaffarpur, are shown below:—

Thana.	Office.	Registration direct under section 6.	Registration through Registrars under Rule 5.	Total.	Permanent tenures.		Temporary tenures.		Holdings at fixed rates.		Occupancy holdings.		Other holdings.	
					Transfer.	Succession.	Transfer.	Succession.	Transfer.	Succession.	Transfer.	Succession.	Transfer.	Succession.
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
Bettiah ...	Bettiah	232	880	1,112	1	Nil.	99	0	8	1	928	9	59	1
Hajipur ...	Hajipur	1,057	1,082	2,139	Nil.	Nil.	Nil.	Nil.	373	139	1,180	288	137	23
	Mahnar ...	1,031	548	2,579	14	12	2	Nil.	80	53	1,433	788	88	60
	Total ...	3,280	2,510	5,790	15	12	101	6	461	193	3,541	1,085	284	92

In the Resolution upon the report for the preceding year it was observed that while the statistics of transfers recorded showed that the registration of changes under the Act was far from perfect, yet that this had been anticipated, and in various ways the Act had worked as satisfactorily as could have been expected. It was requested that in future years more attempt might be made to analyse the figures reported, both by way of comparison with the results which might reasonably have been expected, and of examination of the nature of the transfers made, while a special report was called for as to the practical difficulties experienced in the working of the Act, with recommendations for their removal. It is now stated that the figures do not admit of detailed comparison with those shown in the last year's report, which were for a portion

of the year only. The most satisfactory results are exhibited by the office at Mahnar, and the least so by that at Bettiah. Financially, the latter office worked at a loss of Rs. 1,021, and that at Hajipur of Rs. 627, while the Mahnar office made a profit of Rs. 753.

3. Figures have been furnished by the Director, comparing the number of mutations, which have been actually registered in the three offices since their opening, with the results which might have been anticipated in the light of independent local enquiries and calculations made from time to time by different officers connected with the working of the Act, and in each case the results fall very far short of the estimated realities. The whole subject is at present receiving the separate attention of Government; the special report called for from the Director has been received, together with the preliminary opinions held by the Board of Revenue on the subject. Certain further enquiries have, however, still to be made, and pending the full consideration of the criticisms advanced against the working of the Act as at present framed, the Lieutenant-Governor refrains from any expression of opinion as to the degree of success which has hitherto attended its operation, or as to the modifications and changes which further experience may suggest.

Outside Bihar, the only other area to which the Land Records Maintenance Act has been so far extended is that of the Sujamutha estate, in the district of Midnapore. It having been found, however, that the settlement records of the estate, which were prepared in 1892, were not altogether accurate, and therefore unfitted for the purpose of serving as an initial register of mutation, the operation of the Act has, with the approval of the Board of Revenue, been suspended in the estate, pending their revision by the Sub-Manager of the Burdwan Raj estate.

4. As requested last year an attempt has been made to analyse in greater detail the figures of mutations recorded elsewhere in those tracts where a system for the maintenance of the records is in force, but it is reported that the figures are still in many instances incomplete, and in several important estates very little improvement has been effected. Comparison between the results attained by the different estates is therefore difficult; the most satisfactory results are found in the Government estates of Backergunge, where transfers were registered affecting 7·32 per cent. of the total tenancies and 22·10 per cent. of the total number of fields; while at the other end of the scale stand the Burdwan Raj Khas Mahals, in which transfers affecting ·16 per cent. of the total tenancies and ·06 of the total number of fields only were recorded, showing clearly, as the Director observes, that the registration of mutations in this case is little better than a farce. The Manager in explanation ascribes the smallness of the number of transfers registered to the absence of the custom of the transfer of raiyati-holdings in the Burdwan Division. This statement is said to be traversed by the Settlement Officer who has been conducting the survey-settlement operations of those mahals, but the grave issue has now been directly raised as to whether the Manager or the Settlement Officer is right, and whether it is expedient to maintain a system that encourages the growth of a doubtful privilege. The Lieutenant-Governor is aware that the Board are giving their immediate attention to the matter and awaits their report. The figures are little better in the estates of Kujang in Cuttack, Sujamutha in Midnapore, and Dakhin Shahbazpur in Backergunge. In the Banki estate in Cuttack only transfers by sales have been recorded. Throughout all these areas the registration of mutations is so patently incomplete as to be altogether useless for any purpose whatever, and the Director must set himself to consider by what means he can soon make it really effective. As matters stand, it seems to be useless. The rules for the maintenance of the records in the Angul Government estate are under revision, and the Director also promises further enquiries as to the alleged difficulties of showing the khasra numbers of fields transferred in the Mynaguri Tahsil in the Western Duars. There was a heavy file of undisposed of applications in the Maldwar estate in Dinajpur; on the subject of the inaccuracy of the returns furnished, the Director explains that the exaction of fees for the record of mutations, originally at very high rates, has probably affected the accuracy of the returns, and their reduction was therefore suggested. The Board consider that the case

of this estate affords a good illustration of the difficulties attending the attainment of any complete system of mutation either by an automatic method, or by management on behalf of the proprietor. They observe:—

"The fees, the exaction of which is believed by the Director to have affected the accuracy of the returns, are found to have been levied by long-standing custom, and to be the right of the proprietor; and the Board have agreed with the Commissioner that in its fiduciary position, the Court of Wards would not be justified in abolishing these fees, which are part of the income of the estate."

No information has been furnished by the Director concerning the registration of mutations in the Khurda Government estate in Puri.

5. *Maintenance of boundary marks.*—Detailed information has been furnished, showing that efficient supervision was generally exercised by District Officers over the maintenance of survey boundary marks in their respective districts. In the Saran district it is reported that but little was effected for want of an available agency for inspection purposes, while in Cuttack it is stated that nothing was done. It is not clear why the matter should present more difficulties in these districts than in any others, and the Board are desired to consider what arrangements are necessary to prevent, as far as possible, a recurrence of such a defect. Under section 114 (1) of the Bengal Tenancy (Amendment) Act, III of 1898, expenses that may be incurred in the maintenance of boundary marks are to be included in the total cost of proceedings to be apportioned under that section.

6. *Chapter IV.—Scientific and National enquiry under Imperial control.*—The report by Major D. Prain, I.M.S., on the result of the study made by him during the year 1896-97 of the races of rape and mustard grown in Bengal, was printed during the year under report and published, with his permission, as a bulletin of the Agricultural Department. Dr. Prain also conducted botanical examinations of various leguminous crops, such as gram, *khesari*, *mung*, &c. Dr. G. Watt, C.I.E., Reporter on Economic Products to the Government of India, having undertaken to make a botanical examination of *sola* and *piper betel*, varieties of those substances were forwarded to him by the Agricultural Department. His report on the result of his investigations into the causes of the betel-nut plague in Eastern Bengal, referred to in the Resolution on the report of last year, is still under preparation. The Lieutenant-Governor desires to acknowledge the value of the services which Dr. Prain and Dr. Watt have rendered during the past few years to the Agricultural Department.

7. *Chemical analyses of soil, water, &c.*—Arrangements have been made to test by actual experiments conducted in selected tracts of the Darbhanga, Muzaffarpur, and Champaran districts, the correctness of the opinions expressed by Dr. Leather, and quoted in the Resolution for the year 1896-97, that the well-water of certain tracts in North Bihar which the raiyats objected to use for the purposes of irrigation, contained no elements injurious to the growth of their crops. Enquiries are also being made into the nature of soils affected by *reh* in North Bihar.

8. *Working of the Civil Veterinary Department, Bengal.*—A separate Resolution, No. 3158, dated the 16th September 1898, has been recorded by this Government on the annual progress report of the Civil Veterinary Department in Bengal, for the year 1897-98.

9. *Chapter V.—Scientific and local enquiry under Provincial direction.*—It has not yet been found possible to commence the special report on the district of Shahabad, similar to those already prepared for a few districts in the Province only by the Assistant Directors in previous years. The Lieutenant-Governor trusts that this work will be taken in hand during the present year.

10. *Experimental Farms.*—Agricultural experiments continued to be conducted at the Sibpur, Burdwan, and Dumraon farms, under the supervision of the Department of Agriculture. The farm at Sibpur has since been made over to the Education Department for use as a demonstration farm in connection with the agricultural classes which were opened in June last. As an experimental farm the results obtained were but of little value owing to the variable composition of the soil. The experiments with manures made there during the year, confirmed the result of the experiments of the preceding year,

though in a less marked degree, that saltpetre is a better manuring agent for cabbages than castor-cake. Similar experiments as well as with new crops and new varieties of existing crops were carried out on a larger scale in the Burdwan and Dumraon farms. The results at the Burdwan farm tended to show that for practical purposes there is little to choose between cowdung and a mixture of bone-meal and saltpetre as a manure for paddy, and between cowdung and castor-cake for potatoes. The results at the Dumraon farm showed that ashes of cowdung made the best manure for paddy, and cowdung itself for wheat, although apparently only on irrigated land. The experimental cultivation of varieties of paddy, sugarcane, maize, potatoes, and sorghum was tried at Burdwan, and of paddy, wheat, potatoes, cotton, maize, and *bajra* in the Dumraon farm during the year. The results obtained showed that the *bansmati* variety of paddy gave the best yield in either farm. As regards potatoes, while the Patna variety yielded the largest outturn in the Burdwan farm, the superiority of those from Naini Tal was demonstrated at the Dumraon farm. In trials with sugarcane and wheat the *shamshara* variety of the former, and the Muzaffarnagar (white) variety of the latter gave the best results. As in previous years, seeds and manures were distributed during the year from both farms to the neighbouring cultivators. In the Lieutenant-Governor's opinion the supply of good seeds to raiyats at cheap rates is a measure likely to produce very beneficial results.

11. *Agricultural experiments in Government, Wards,' and private estates.*—The Lieutenant-Governor regrets to observe that notwithstanding the orders contained in Government Resolution No. 895T.R, dated 9th October 1896, on the subject of the introduction of agricultural improvements in Government and Wards' estates and the hope expressed last year that increased exertions would be made in this direction by the officers connected with their management, the Director still complains of the lack of interest which is met with in dealing with the subject. Mr. Lyon observes that the amalgamation of the allotments for miscellaneous and agricultural improvements in Government estates frequently leads to expenditure on the former at the expense of the latter, while the maintenance of an English vegetable garden, or the cultivation of the proprietor's private lands is too often found to constitute the Manager's idea of agricultural experiment. The Director appears to be making what arrangements he can with the Assistants and Travelling Overseers at his disposal to stimulate an interest in these matters, and the Lieutenant-Governor would again request that the Board will impress upon the Managers of estates subordinate to them that attention to this subject constitutes an integral and important portion of their duties.

The favourite experiment appears to have been that connected with the cultivation of Naini Tal potatoes, probably owing to the very lucrative nature of the crop when successful. Details are given of the trials made with different crops in the various Divisions, and their results. The experimental introduction of lac into the Kalimpong khas mahals in Darjeeling appears to have been commenced without due preliminary enquiry, but the experiments in tobacco-growing in the Chittagong district have been read with interest, and it is to be hoped that endeavours will be made to remedy the defects pointed out by the appraiser, as the crop, properly prepared, would find a ready market. A small agricultural farm has been started at Khurda.

An interesting report of the operations of the Agri-Horticultural Society is quoted by the Director in his report, and their co-operation and assistance is also acknowledged. Revised rules for the conduct of experimental crop-cuttings were circulated during the year, and reports were received collating the results of the experiments of the last three years, from which, however, the data deduced were not altogether consistent or reliable.

12. *Silk experiments.*—Under the revised scheme for the conduct of silk experiments, described in the Resolution on the report for 1896-97, 12 seed-rearing nurseries were working at the commencement of the year and three new ones were opened during it. Since the close of the year, the chief firms interested in the industry have combined and subscribed largely to carry out a scheme on lines similar to those already followed by Government. It is stated that it is now proposed to amalgamate the two schemes, and a special report is

promised. The Lieutenant-Governor welcomes this action on the part of those concerned for the improvement of the methods of sericulture, and has read with pleasure the remarks made by the Director concerning the increased interest taken by the rearers in the demonstration nurseries. The total quantity of cocoons raised during the year in the 15 nurseries was 10,914 *kahans* as compared with 7,329 *kahans* in 1896-97, while the quantities sold for seed to cultivators was 2,843 *kahans*, or 8,500 ounces as against 1,056 *kahans*, or 3,200 ounces sold during 1896-97. These figures are very encouraging.

An Industrial School was opened during the year at Rampur-Boalia by the District Board of Rajshahi, at which practical and theoretical training is given in sericulture. Half the pay of the teacher in charge, who is also a Sericultural Overseer employed under the Agricultural Department, is borne by Government, and there are at present 15 students on the attendance-roll, most of whom are connected with the silk industry of the district.

13. *Chapter VI.—Agricultural Education.*—The final sanction of the Secretary of State for India was obtained during the year under report to the opening of the agricultural classes at Sibpur from the beginning of June 1898. The classes were actually started in July last. The annual cost of their maintenance has been estimated at Rs. 10,000, for which provision will be made in the Budget estimates of the Education Department. The control of the teaching staff and establishment will rest with the Principal of the Sibpur Civil Engineering College, but the nomination to the post of Agricultural Lecturer will be made by the Director of the Department of Land Records and Agriculture, Bengal. Teaching is given in two classes, of which the upper is open to the students of the Engineering College who have passed the F. E. examination and are under 23 years of age; and, subject to the accommodation available, to other candidates nominated by Government, who have either passed the B. A. examination by the B course, or are otherwise considered to be possessed of sufficient educational attainments. Sons and relations of landholders and those desirous of receiving the training for the benefit of their own property, can also be admitted under special conditions. The lower class is open to students of the College who have completed their second year in the Apprentice Department, or to teachers sent from training schools with the sanction of the Director of Public Instruction, Bengal. Appointments in the Provincial and Executive services have been reserved for passed students of the upper classes and their applications for nominations to compete at the ordinary examinations for the same will also be considered; the posts of Managers, or Sub-Managers of estates, or of tahsildars or land stewards are also available to them. The training given in the lower class is designed for kanungoes or candidates for other subordinate posts in the Revenue Service. Detailed information as to the aim and object of opening those classes, and the syllabus of study to be followed therein, have been embodied in this Government Resolution No. 1141, dated 15th March 1898.

14. *Chapter VII.—Publication of Agricultural information.*—The usual forecasts of *rabi*, *bhadoi*, jute, winter rice, wheat, and oil-seed crops, and reports on cotton and indigo crops were published by the Department. Tables of Agricultural Statistics for 1896-97, and a consolidated table showing the average wholesale prices of food-grains, firewood, &c., in the principal marts of Bengal for that year, in addition to a bulletin on the cultivation of mustard, and a monograph on the cotton fabrics of Bengal were also issued.

15. *Chapter VIII.—Emigration to Burma.*—The total number of State Emigrants conveyed during the year to Burma on board the vessels of the British India Steam Navigation Company was 363 as against 241 in 1896-97 and 136 in 1895-96. The total Government subsidy amounted to Rs. 756.

(1) Suri in Birbhum.
(2) Madhupur on the East Indian Railway.
(3) Kalimpong in Darjeeling.
(4) Alipur and Falakata in Jalpaiguri.
(5) Bera in Pabna.
(6) Barhampur in Shahabad.
(7) Sonepur in Saran.
(8) Tintanga in Bhagalpur.
(9) Sitamarhi in Muzaffarpur.

16. *Agricultural exhibitions.*—Agricultural exhibitions were held during the year at the places noted on the margin, a total sum of Rs. 1,275 being spent by Government in the distribution of certificates and prizes. The Lieutenant-Governor would be glad if, in future reports, the Board would briefly

describe the agricultural improvements which these exhibitions were designed to stimulate.

17. *Cost of Agricultural experiments.*—The total expenditure during the year on agricultural enquiry and improvement (excluding the pay of the superior establishment, and the expenditure on silk experiments, and the cost of the Civil Veterinary Department) amounted to Rs. 8,407 as compared with Rs. 10,354 in the preceding year.

18. The Lieutenant-Governor desires to acknowledge the value of the services of Mr. W. C. Macpherson, who has now severed his connection with the Department after administering it with conspicuous success for several years, and to thank Mr. Lyon for the energy and devotion which he has shown in maintaining an efficient supervision over the many branches of work in progress. The Director's remarks on the good work done by Mr. Nagendra Nath Banerjee and Mr. Nitya Gopal Mukerjee are also noted.

ORDER.—Ordered, that the Resolution be published in the *Calcutta Gazette*, and a copy of it, together with the Report and the forwarding letter of the Board of Revenue, be submitted to the Government of India, in the Revenue and Agricultural Department, and a copy forwarded also to the Board of Revenue.

By order of the Lieutenant-Governor of Bengal,

F. A. SLACK,

Offg. Secretary to the Government of Bengal.

RESOLUTION ON THE ANNUAL REPORT OF THE MANAGEMENT OF THE ZOOLOGICAL GARDEN, CALCUTTA, FOR THE YEAR 1897-98.

REVENUE DEPARTMENT.—MISCELLANEOUS.

Calcutta, the 21st November 1898.

RESOLUTION—No. 3474.

READ—

The Report of the Honorary Committee for the management of the Zoological Garden, Calcutta, for the year 1897-98.

The effects of the famine of 1896 and 1897 are clearly traceable in the administration of the Zoological Garden during the year under report. Not only did the number of paying visitors fall to the lowest figure recorded during the last five years, but the expenditure on establishment showed an increase of Rs. 1,888, attributable for the most part to the compensation granted to the menial servants on account of the high price of food-grains. The feeding charges of the animals also rose by Rs. 1,821. There was a noticeable falling off in the donations and subscriptions received, which amounted to Rs. 566 only, as against Rs. 1,460 in the previous year. The total receipts of the Garden were Rs. 57,875 which sum includes an opening balance of Rs. 18,318. The actual receipts during the year amounted to Rs. 39,557 as compared with Rs. 40,643 during 1896-97, which in their turn were less by Rs. 3,704 than those of the preceding year. The number of visitors who paid entrance money is shown below in comparison with the numbers since 1891-92:—

Year.	Number of visitors.
1891-92	... 116,382
1892-93	... 139,173
1893-94	... 162,449
1894-95	... 154,532
1895-96	... 165,152
1896-97	... 160,008
1897-98	... 151,640

2. The total expenditure of the Garden rose from Rs. 42,211 in 1896-97 to Rs. 50,544 during the year under report; but of this Rs. 10,779 were spent on the construction of servants' quarters at Begunbari. The establishment charges, as explained, amounted to Rs. 14,269-8-3 as against Rs. 12,381-15-11 in 1896-97, the increase being also due to the payment of a personal allowance of Rs. 50 per mensem to the Garden Superintendent. The year closed with a balance of Rs. 7,331.

3. The collection of animals in the Garden received an addition of 105 mammals, 186 birds, and 72 reptiles during the year. Of these, only four mammals were born in the Garden, and the rest were received as gifts, or obtained by purchase or by exchange with foreign zoological gardens. The special thanks of the Committee are given to the Maharani of Dumraon for the presentation of a valuable collection of animals, including a well-grown tiger and two leopards, and to the Thakur Sahib of Sohagpur for a fine tiger.

4. In commemoration of the Jubilee of Her Majesty the Queen-Empress it was resolved to construct a house for the smaller carnivora. The sum of Rs. 13,725 was subscribed and some progress was made with the building. It is also stated that the Library is in want of important zoological works, but these are usually beyond the means of the Committee to purchase.

5. In consequence of the retirement of Dr. Cunningham no experiments of importance were conducted in the Laboratory during the year.

6. The year under report was marked by the retirement of Mr. E. V. Westmacott, I.C.S., late President of the Committee of Management of the Garden, and of Sir George King, K.C.I.E, LL.D., F.R.S., who had been a member of the Committee since its foundation in 1875. His Honour notices with pleasure the high appreciation expressed by the Committee of the services rendered by these gentlemen.

7. The Lieutenant-Governor expresses his thanks to the President, Secretaries, and Members of the Committee for their efficient management of the Garden.

ORDER.—Ordered, that this Resolution be published in the Gazette, and that a copy of it be forwarded to the Honorary Secretary for the information of the Committee.

By order of the Lieutenant-Governor of Bengal,

F. A. SLACK,

Offg. Secretary to the Govt. of Bengal.

WEATHER AND CROP REPORT.

For the week ending the 21st November 1898.

Burdwan.—No rain. Weather seasonable. Harvesting of *aman* paddy commenced. Cultivation of *rabi* crops and potatoes continues. Common rice selling as follows:—

	Srs.	
Sadar	14 to 17	per rupee.
Kalna	13 „ 15	
Katwa	15	
Raniganj	16½	

Birbhum.—No rain. Weather seasonable. Early rice is being harvested, and *rabi* crops are being sown. Price of common rice at Sadar 16¾ seers and at Rampur Hât 16½ seers per rupee. Fodder sufficient.

Bankura.—No rain. Weather fair. Sowing of wheat and barley progressing. Prospects of *aman* excellent. Fodder and water sufficient. No cattle-disease reported. Common rice sells at Bankura 20 seers (new rice) and at Vishnupur 16 seers per rupee.

Midnapore.—No rain. Prospects of standing crops very good. Cattle-disease reported from Nayagram. Prices of common rice:—

	Srs.	
Sadar	13 to 15	per rupee.
Contai	16	
Tamluk	14	
Ghatal	13 „ 16	

Hooghly.—No rain. Prospects of *aman* and *rabi* good. Cattle-disease prevails in one thana. Common rice sells from 11 to 13 seers per rupee.

Howrah.—No rain. Weather seasonable. Prospects of *aman* good. Fodder and water sufficient. Common rice sells at 12 to 13 seers per rupee.

24-Parganas.—Rainfall nil. Weather seasonable. Prospects good. Ploughing and sowing of *rabi* crops going on. Harvesting of *aman* paddy continues. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	Srs.	
Sadar	11	to 12	per rupee.
Barasat	17		
Basirhat	15⅝		
Diamond Harbour	14		

Nadia.—Rainfall nil. Sowing of *rabi* crops continues. Standing crops doing well. Harvesting of *aman* has commenced. Common rice selling at 12 to 16 seers per rupee. Fodder and water sufficient. Cattle-disease in thanas Tehatta and Kumarkhali.

Tippera.—No rain. Weather seasonable. *Rabi* crops being sown. Reaping of early *aman* commenced. Prospects good. Common rice sells at 14 to 26 seers per rupee.

Noakhali.—Rainfall nil. Crops good except in Hatiya and Sandip, where want of rain affected them. Cattle-disease reported from Chhagalnaiya and Companyganj. Fodder and water good. Price of rice—*aman* 12 to 16 seers and *aus* 16 to 24 seers per rupee.

Chittagong.—Rainfall nil. Weather seasonable. Prospects of crops good. Outturn 90 per cent. Prices steady. Water and fodder sufficient.

Patna.—No rain. *Rabi* and poppy doing well. Paddy beginning to ripen. Prices stationary with a tendency to fall. Common rice at Patna sells at 19 seers a rupee. Condition of cattle good. Fodder and water for cattle sufficient.

Gaya.—No rain. Paddy harvest going on. Prospects good. Prices are :—Common rice 16 seers, wheat 16 seers, gram 23 seers, *arhar* 20 seers, *marua* 25 seers and *makai* 25 seers per rupee.

Arrah.—No rain. Weather fair. *Rabi* sowings continuing. Standing crops good. Rice sells at Arrah 14 seers per rupee. Fodder and water sufficient.

Saran.—No rain. Weather seasonable. *Rabi* and paddy doing well. Poppy sowings in progress and seeds germinating well. Average prices are—Common rice 16·2 seers and *makai* 25·14 seers per rupee.

Champaran.—No rain. Harvesting of winter rice begun in places. *Rabi* sowings still going on. Poppy sowings somewhat retarded by heat, but germination good. Common rice sells at 15½ seers and maize at 23¾ seers per rupee.

Muzaffarpur.—Rainfall nil. Sowing of *rabi* crops still in progress. Rice lands, the crops of which were destroyed by flood, are being sown with *rabi*; the seeds sown are germinating well. No cattle-disease. Prices are—Common rice 11 to 15 seers, wheat 16 to 17 seers, barley 30 seers, gram 21 to 22 seers, *rahar* 22 seers, and *marua* 25 seers per rupee.

Darbhanga.—No rain. Weather cool. Paddy ripening, and new rice coming to market for sale. *Rabi* is being sown and promises well. Poppy sowings nearly completed, and germination very satisfactory. Excessive moisture delayed sowings. Common rice selling at Sadar 11 seers per rupee.

Mongnyr.—No rain. Weather seasonable. Harvesting of winter rice commenced. *Rabi* sowings continue. Standing crops good. About 12 annas of the poppy crop sown, and prospects satisfactory. No cattle-disease. Common rice sells as follows :—

	Srs.	
Monghyr	13	per rupee.
Begusarai	13 to 15	
Jamui	16	

Bhagalpur.—Cold weather has set in. Rainfall nil. Prospects of winter rice continue favourable. Sugarcane being harvested. Sowing of *rabi* crops in progress, and is nearly completed in Banka. Fodder and water sufficient. Cattle-disease reported from

Supaul. Common rice sells at 19 seers, Indian-corn at 38 seers, and kurthi at 35½ seers per rupee. Prices of other food-grains stationary.

Purnea.—No rain. Weather seasonable. Harvesting of *aghani* rice commenced; outturn good. *Rabi* crops in progress. Cattle-disease still continues in Araria. One fresh case of *kala dukh* reported. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	18	per rupee.
Kishanganj	20	
Araria	20	

Malda.—Rainfall nil. Weather fair and cool. Winter rice being harvested in some places. *Kalai* pulse doing well. *Rabi* crops coming up well. Coarse rice sells at 18 seers a rupee. Fodder and water sufficient.

Sonthal Parganas.—Rainfall nil. Weather clear and cool. Harvesting of rice on high lands in progress. Prospects good. *Rabi* sowings continue. Fodder sufficient. Price of rice varies from 14 to 22 seers per rupee, and of maize from 30 to 40 seers per rupee.

Cuttack.—Rainfall nil. Weather seasonable. *Laghu sarad* being reaped. *Guru sarad* and sugarcane ripening. *Rabi* and mustard growing. *Arhar* in flower. Tobacco being planted. Condition of cattle generally good, but disease prevails in some places. Fodder and water sufficient. Common rice sells as follows:—

	S.	ch.	
Cuttack	17	1	per rupee.
Jajpur	17	1	
Kendrapara	22	5	
Banki	19	6	

Balasore.—Rainfall nil. Harvesting of *beali* continues. Cutting of *sarad* commenced. Sugarcane being pressed. *Rabi* crops growing well. Cattle-disease reported from Basudevpur circle. Rice sells from 16 to 22 seers per rupee in the interior, and at 17 seers at Balasore and Bhadrak. Fodder sufficient.

Puri.—No rain. *Sarad* in ear and ripening in places. *Laghu* being reaped. Prospects of sugarcane, *arhar*, and other miscellaneous crops good. Lands being ploughed for next summer rice. Fodder and water sufficient. Cattle-disease reported from parts of the district. Common rice sells as follows:—

	S.	ch.	
Puri	17	2	per rupee.
Khurda	17	1	
Interior of district	13 to 18	2 12	

Hazaribagh.—Rainfall nil. Weather seasonable. Harvests in progress. Excellent rice crop being cut. *Rabi* fields being ploughed. Rice 16 to 20 seers per rupee.

Lohardaga.—No rain. Harvesting of lowland paddy continues. State of standing crops good. Rice sells at Ranchi 19 seers, and in the interior from 19 to 20 seers per rupee. Cattle-disease continues. Fodder and water sufficient. Grain in stock sufficient.

Palamau.—No rain. Weather cold. Rain wanted for *rabi*, which is still being sown in places. Paddy being harvested and threshed. Rice sells at 20 seers per rupee. Cattle-disease prevailing. Fodder and water sufficient.

Manbhum.—Rainfall nil. Weather seasonable. Prospects of crops excellent. Harvesting in full swing. Cattle-disease reported from thana Purulia. Fodder and water sufficient. Average price of common rice at Sadar 24 seers 10 chittacks per rupee. Supply sufficient.

Singbhum.—Rainfall nil. Prospects of crops good. Prices stationary.

General Summary.—There was no rain during the week, with the exception of a very light shower at Darjeeling. The reports of all crops are generally favourable. Winter rice is being harvested, and a good outturn is expected in every district. The *rabi* crops are still being sown and promise well. In Bihar the poppy sowings are in progress, and germination is everywhere satisfactory. Prices generally show a tendency to fall, as new rice has begun to come into the market. There is no want of fodder, and cattle are generally in good condition, but some disease among them is reported from a few districts.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT,
The 22nd November 1898.

F. A. SLACK,
Offg. Secretary to the Govt. of Bengal.

The average fall of the corresponding period for 24 years, Surveyor-General's Office		65·14

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h., and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

≏ dew.

† Added Mds. 1,21,162 and ,, 4,133 } on account of difference between the approximate and audited figures for the week ended 17th
‡ Deducted ,, 1,682 } September 1898.

(a) The decrease is chiefly due to larger pilgrim traffic and to the running of extra troop trains and despatch of Commissariat and Ordnance stores t the Frontier in the corresponding period of 1897.

(b) The increase is chiefly in both upwards and downwards coal traffic amounting to about Rs. 80,000 less.

A decrease of Rs. 22,000 principally in food-grain traffic from stations on the "L" district and Rs. 20,000 in seeds and sundry articles exported from stations on the "D" district.

RESOLUTION ON THE ANNUAL GENERAL ADMINISTRATION REPORT OF THE PRESIDENCY DIVISION FOR THE YEAR 1897-98.

GENERAL DEPARTMENT—(MISCELLANEOUS).

Calcutta, the 22nd November 1898.

RESOLUTION No. 3407.

READ—

The Annual General Administration Report of the Presidency Division for the year 1897-98.

THE report is submitted by Mr. Buckland, who took charge of the Division on the retirement of Mr. Westmacott in January 1898. In all of the five districts of the Division and in all but three of the fifteen subdivisions it was found necessary during the year to effect changes among the officers in charge.

2. *Tours and Inspections.*—The tours made by Mr. Westmacott, which were not extensive, were mostly in connection with the famine relief operations during 1897. Mr. Buckland was able, before the close of the year, to make a short tour through the Division, special attention being paid to the important municipalities about Calcutta, but he had not time to make inspections of the district offices which, therefore, with the exception of the 24-Parganas, remained undone. Mr. Westmacott also failed to visit any of the subdivisional offices, of which but three only could Mr. Buckland manage to inspect. With the exception of the 24-Parganas, where the bad health of the Collector, Mr. Walsh, sufficiently explained the deficiency, the tours of District Officers appear to have been of adequate length, and the necessary inspections to have been satisfactorily made. The same also was the case with the tours made by the Subdivisional Officers. It should be seen that the Subdivisional Officer of Kandi, who is reported to keep no horse, and to be unable, in consequence, to move about his subdivision with facility, procures one at once.

3. *Weather and crops: material condition of the people: prices and wages: public health.*—The average rainfall was much heavier than that of either of the two preceding years, and was sufficient and well distributed in all districts, with the result that the outturns of the different crops showed a marked improvement over those of the preceding two years. The yield of the main winter-rice harvest was 16 annas in comparison with 7 and 10 annas in the two previous years, while the *bhadoi* crop returned 14 annas, jute 13, and the *rabi* fifteen. The reaping of these generally excellent harvests was sufficient to effect a considerable improvement in the material condition of the people, which had deteriorated considerably during the preceding poor years. In fact, in the early part of the year, relief was given in several areas. In the 24-Parganas the employment offered by the mills, road repairs, and by private employers, enabled the people to tide over the distress, but in Nadia relief operations continued till the reaping of a bumper *aus* crop in September; and the Commissioner observes regarding this latter district that although, owing to the *uthandi* system of land tenure, and their improvident habits, many of the cultivating classes are habitually impoverished, yet they exhibited surprising powers of resistance to the prevailing distress. The district of Murshidabad, too, where some scarcity existed, has recovered with great rapidity. In Jessore assistance was given from private and public charity, and especially by way of loans at the time of sowing, the good effects of which were reaped in an excellent harvest, while in Khulna, where relief operations were found necessary, the general condition of the people had improved by the close of the year.

The course of prices was very similar in all districts; ruling high at the commencement of the year, they rose still higher before the gathering of the new harvests, after which they fell slowly, though at the close of the year they had still not reached the level of normal times. In the Division generally the effect of the earthquake of 12th June 1897, by occasioning a subsequent demand for labour, was to impart to wages a slight tendency to rise.

The year as a whole was a healthy one; there was a noticeable absence of disease in any widely epidemic form, and deaths from fever and cholera showed a marked decrease. The prevalence of scarcity does not appear to have materially affected the general health of the people. For the Division as a whole, the recorded death-rate was 29·03 per mille, in comparison with an average of 34·5 for the preceding two years.

4. *Manufactures: Trade and Commerce.*—The factories at work in the district of the 24-Parganas numbered 59, or three more than in the previous year, and gave employment to 80,983 operatives in comparison with 67,085 during 1896-97. From the statistics of the value of the outturn as furnished by the mill-owners, there was a noticeable increase in the value of gunny-bags and cloth manufactured, which amounted to Rs. 3,24,95,983 as against Rs. 2,28,71,075 during the previous year, and it is stated that cheap jute enabled most mills to make fair profits during the latter half of the year. The value of the output of cotton twist and yarn continued to rise steadily; the raw material being cheap owing to the abnormally large American crop. The existence of the plague in the Bombay Province is said to have driven the China trade more to this side of India, and to have compensated the mills for the loss of the local demand which followed the famine. There was also an increase in the value of paper manufactured. The outturn of silk in the 24-Parganas was valued at Rs. 1,91,806 as compared with Rs. 55,341 during 1896-97, but the outturn in Murshidabad, where the industry is of greater importance, is still gradually declining.

The year was a fairly favourable one for indigo, and 6,185 maunds were produced, an increase of about 500 maunds over the outturn of last year, although its value showed a decrease of over two lakhs of rupees as compared with the figures of 1896-97. The statistics of the sugar industry are incomplete, those for Nadia being, as usual, wanting; and the manufacture of this commodity by native methods is reported not to be in a flourishing condition.

Taking the total traffic by rail, river, and canal, as registered in the 24 selected articles usually reported on, the total imports of the Division rose from 1,82,72,842 maunds to 2,09,90,975 maunds, while exports declined from 83,12,812 maunds to 77, 27,603 maunds. There was a decrease of some three lakhs of maunds in the food-grains imported, and of nearly nine lakhs of

maunds in those exported. This fluctuation in exports was very marked in the case of gram and pulses, of which 9,30,000 maunds only were exported in comparison with 19,72,000 maunds in the preceding year; on the other hand, the exports of rice and paddy actually rose from 6,61,000 maunds to 10,54,000 maunds. Other noticeable variations in comparison with the figures of the previous twelve months, were an increase of over two lakhs of maunds of raw jute imported, and of about five lakhs of maunds in the quantity exported; an increase of 27 lakhs of maunds in the import of coal and coke and of over four lakhs of maunds in the quantity of kerosine oil exported; the quantity of unrefined sugar exported was less by over two lakhs of maunds.

5. *Civil Justice.*—Taking the Division as a whole, the proportions of cases instituted (113,685), disposed of (116, 256), and remaining pending (13,730) at the close of 1897, were almost identical with those of the preceding year. The fluctuations in the individual districts were also not large. The percentage of contested cases declined from 20·8 to 17·6 per cent. The figures given of the duration of cases for the districts of the 24-Parganas and Jessore tend on the whole to show some improvement in the matter of prompter decisions, but the Commissioner is of opinion that the results are not altogether favourable, and this is borne out by the fact that while a smaller number of witnesses were examined both in the Courts of Munsifs and all other Civil Courts, the proportion detained over two days (6·4 and 11·2 per cent. respectively) are in each case worse than the corresponding figures of the previous year.

6. *Crime: Criminal Justice: Police.*—The number of cognisable offences reported increased from 17,363 during 1896 to 22,734 during the year under report; the increase was mostly in burglary and theft cases and is attributed to the prevailing high prices of food-grains: 14,933 persons were sent up for trial, of whom 63·6 per cent. were convicted. 780 cases were declared false, in 5·1 per cent. only of which were prosecutions instituted, and, in spite of the remarks made in the Resolution of last year, little use was still made of the useful and salutary provisions of section 560 of the Criminal Procedure Code. Enquiry was refused by the police in only 6 per cent. of the cases reported, and special care appears to be taken to prevent any abuse of this power. 60 cases of murder occurred, in only 8 of which convictions were secured. Other unsatisfactory features of the criminal administration were an increase of cases of dacoity from 32 to 49, and of rioting cases from 408 to 542. It is satisfactory to note that in the 24-Parganas, 11 out of 15 cases of dacoity were detected, in 8 of which convictions, covering 38 persons, were secured. The most noticeable increase in rioting was in Khulna, and is ascribed to the occurrence of disputes regarding possession of the harvest, which was an excellent one.

There was an increase of 1,076 in the number of non-cognisable cases reported as compared with the preceding year, chiefly in the 24-Parganas and Khulna, where, in the former district, prosecutions for municipal offences were more frequent. The Commissioner observes that in the districts other than Nadia and Murshidabad, there is a tendency to make too frequent use of the police for enquiries in these cases, and the Magistrate of the 24-Parganas remarks that processes are often too freely issued, especially in petty land disputes of a civil nature. The Lieutenant-Governor agrees that both points call for attention.

There was an increase in the number of cases tried by the Courts of Session, but the percentage of conviction (69·1) was slightly less than in 1896. There were altogether 400 Honorary Magistrates exercising powers in the division: a new Bench was established at Titaghar, and that at Diamond Harbour was abolished after the close of the calendar year. It is reported that Honorary Magistrates empowered to sit singly attend with fair regularity, but the attendance of others is, with few exceptions, unsatisfactory. In Nadia and Jessore special action was taken to effect an improvement in this respect by warning and removing those who were most irregular. The Lieutenant-Governor is at present unaware how far this laxity in attendance is due to the Honorary Magistrates not having any fixed Court-room. 22,972 cases were disposed of by Stipendiary Magistrates and 60,864 witnesses examined, while 15,643 witnesses were examined in 9,343 cases before Honorary Magistrates. The Lieutenant-Governor regrets

to observe the remarks made by the Commissioner on the increase of the number of witnesses detained over two days, to which special attention has properly been drawn. The percentage of such detentions in Stipendiary Courts rose from 4·8 during 1896 to 6·3 and before Honorary Magistrates from 8·2 to 13·2. The results were worst in the case of Stipendiary Magistrates at Diamond Harbour (16·9 and Basirhat (18) in the 24-Parganas; Kushtia (14·3) in Nadia and Jhenida (18·1) in Jessore; while as regards Honorary Magistrates, the following instances were especially unsatisfactory, the more so as the total number of witnesses examined was in several cases very small: Diamond Harbour (33·8), Basirhat (17·9), Kushtia (45·7), Ranaghat (25·1), Chuadanga (25), Jangipur (31·1). As was to be expected, the percentage of police cases remanded six times and over rose similarly in all Courts from 4·3 during 1896 to 6·1. The Lieutenant-Governor agrees that the figures show serious deterioration in the standard of criminal administration in the Division, which calls for the early attention of the Magistrates concerned.

Rupees 1,37,505 were imposed as criminal fines during the year, of which Rs. 1,17,319 were realised. The results show some improvement, but large balances were still outstanding at the Alipore and Sealdah Police Courts, and at the Sadar Courts in Khulna.

Judged by the standard of the punishments awarded, the conduct of the police improved, punishments of all kinds having been far fewer, though the numbers rewarded remained about the same. Bad reports are still given of the standard of ability and honesty among the police of Khulna, who were also the subject of unfavourable comment last year. Out of the total number of 16,692 rural police, 4,731 were punished, as compared with 7,850 during 1896, and 752 rewarded. The measures taken in Murshidabad to replace the chakran chaukidars by men enlisted under Act VI (B. C.) of 1870 are still in progress, though the step is reported not to be popular with the holders of the lands themselves. Efforts are being made in all districts to improve the status of the force, both by the enlistment of better caste men and the offer of higher and more regular pay: the *dafadari* system has been introduced throughout the 24-Parganas, though experience of its working has still to be gained; and the large area of the *dafadari* villages is mentioned as a drawback. The circles under dafadars in Murshidabad have been to some extent re-grouped, and it is reported that a fairly satisfactory stamp of men can be obtained for the small monthly pay of Rs. 6.

7. *Land Revenue and cesses.*—The total amount realisable during the year on account of land revenue, amounted to Rs. 53,01,604 or an increase of Rs. 20,734 over that of the previous year, shared alike by the arrear and current demand; the total collections, amounting to Rs. 51,09,732 were therefore in excess of those of the preceding year, although their proportion to the total demand remained the same, namely 96·3 per cent. The percentage of total collections on current demand, however, showed some improvement, being 99·6 in comparison with 96·8 per cent. during 1896-97. The percentages of current collections to current demand attained in the estates of different classes in each district are compared below with the prescribed standards:—

	Permanently-settled estates.	Temporarily-settled estates.	Government estates.
Standard percentage ...	99	95	90
24-Parganas ...	98·73	94·61	86·77
Nadia ...	97·45	96 16	76·64
Murshidabad ...	99·67	90·19	51·03
Jessore ...	99·12	86·86	69 60
Khulna ...	97·72	76·73	72·44
Calcutta ...	...	...	99·88

The results generally show an improvement except in the case of permanently-settled estates in the districts of Nadia and Khulna.

The poor collections in temporarily-settled and Government estates formed the subject of unfavourable comment last year, although the failure of crops was advanced in explanation. As before, Khulna still shows the worst results in the former class, and Murshidabad in the latter. The after-effects of the famine, the damage done by the earthquake, and the lenient application of

the certificate procedure are mentioned as explaining the deficient collections in the Division generally. In Murshidabad it is mentioned that the system of payment of tahsildars by commission, which was introduced from the 1st April 1897, has not worked altogether satisfactorily: attention is invited to this point. The remissions granted fell from Rs. 33,674 during the preceding year to Rs. 6,712, those of grace being much less than in 1896-97.

Special attention was called in the Resolution of last year to the matter of improvements in Government estates. More detail has been furnished in the present report, though the information might have been given in a clearer form. The available allotments for such expenditure consist of the grant of 7½ per cent. on collections for management charges and miscellaneous improvements; 1 per cent. for education; 1½ per cent. for communications and 2 per cent. on account of sanitary improvements, or 12 per cent. on collections in all, with which has been amalgamated the former agricultural Public Works grant. It should be clearly stated in future what the allotment under these heads amounted to, the expenditure incurred under each, and if the whole amount was not expended, the explanation of the failure to do so. In the districts of the 24-Parganas and Khulna, it appears that a considerable proportion of the above grants was not utilised.

The total demand on account of Road and Public Works Cess for the Division increased from Rs. 10,20,218 during the preceding year to Rs. 10,40,275, the largest increase being in Jessore, where a general revaluation of the district was effected. The total collections, however, amounted to 88·11 per cent. of the total demand only as against 88·39 per cent. during 1896-97, and no special explanation has been furnished for this decrease.

There was, again, an increase in the number of certificates filed during the year (14,767), although the number pending at the close of the year remained approximately the same (4,466). The number of undisposed of cases on 31st March 1898, increased considerably in the 24-Parganas in comparison with the corresponding figures for the previous year, though an improvement was effected in this respect in Murshidabad.

8. *Wards' and Trust Estates.*—Excluding the Chancha Trust Estate in Jessore and a small portion of Miss Courjon's estates in the 24-Parganas, there were four wards' estates and one trust estate under the management of the Court. The percentage of total collections of rent and cesses to total demand amounted to 34·2 per cent., and of total collections to current demand 90·9 per cent. The important estate of Kasimbazar was released during the year in a thoroughly solvent condition, and with a balance in cash and promissory notes of Rs. 2,13,253. The total rent demand had risen during the 17 years of the Court's management from Rs. 2,94,564 to Rs. 3,54,974, owing to new purchases of landed property and the settlement of pargana Sarail. The total investments in landed property amounted to Rs. 4,55,525, and a sum of Rs. 1,59,434 was spent on improvements of the estate. The realisations during the year in the Bhawanipur Estate amounted to 111·2 per cent. of the current demand and 56·9 of the total demand; both results show an improvement on the previous year, but the balance outstanding on 31st March 1898, is still large. The condition of the tenants who had suffered from successive failures of crops in previous years, improved. In the Syedpur estate 97·2 per cent. of the current demand and 62·7 per cent. of the total demand was realised. The results are worse than in the preceding year, and the outstanding balance is heavy: failure to take proper steps in due time is ascribed as the reason for deficient collections, but it appears from the report of the Board of Revenue on Ward's estates that the greater portion of the balance could not be legally realised till after the close of the year. The affairs of the Sridharpur estate, which has not been long under the management of the Court, are still in some confusion, and although the unrealised balance was large, the Commissioner regards the collection of 82·8 per cent. of the current demand as not altogether unsatisfactory under the circumstances.

9. *Excise: Stamps: Income-Tax.*—There was a net decrease, shared in by all classes of exciseable articles, in the excise revenue during the year of Rs. 1,01,668, excluding a purely nominal increase under the head of charas, but largest in the case of country spirits. The falling-off is attributed to the prevailing high prices. The state of things in Murshidabad appears to call for special attention;

the revenue from country spirits has been declining year by year, and it is said that the introduction of the distillery system raised the price of liquor to such a height that resort has been had to cheaper drinks, while smuggling has been encouraged. The Commissioner doubts the correctness of the Collector's opinion that the distillery system has failed, but the matter has not been discussed in detail and will be brought to the special notice of the Board of Revenue. There was a considerable decrease both in the numbers of persons arrested and convicted for offences against the excise laws.

An increase in the consumption of salt in the latter half of the year was more than counterbalanced by a decrease during the first six months, and the consumption which had last year fallen off by 26,218 maunds, declined during the year under report by 6,672 maunds; less illicit salt was confiscated, and fewer fines imposed, though the number of cases instituted for offences against the law increased.

There was an increase of Rs. 1,13,128 in the total stamp revenue for the year, due chiefly to the payment of probate duty as well as to a larger number of loan transactions than usual, and also to the litigation in Khulna caused by the good harvest. The number of prosecutions for breaches of the law increased from 99 during the preceding year to 1,033, due almost entirely to the action taken in Calcutta, and if it is true, as stated, that people are growing more and more conversant with the law, the above figures would not appear to show a corresponding decrease in the desire to observe it. Further explanation of the circumstances under which so many more cases were filed might usefully have been furnished.

The gross demand of Rs. 25,71,582, on account of income-tax, showed an increase of ·4 per cent on the results of the preceding year; and 95·9 per cent. of the final demand was collected.

10. *Communications and Public Works.*—An extension of nine months was granted for the construction of the steam tramway from Ranaghat to Krishnagar, the delay in completing which is unfavourably commented on by the Commissioner. Three important new drainage sluices were finished in the Schedule D embankments in the 24-Parganas. All Government buildings suffered more or less severely from the earthquake of 12th June 1897. The usual repairs to district roads were executed by the different Boards to the extent of their respective finances, but the Commissioner points out that more might still be done in the matter of arboriculture, a remark which is fully approved of by the Lieutenant-Governor, in whose opinion many District Boards could by a systematic treatment of their road-side lands in the course of years considerably augment their available income.

11. *Education.*—The total number of schools of all descriptions open in the Division was 5,476 or 438 less than in the preceding year, containing 201,177 pupils, or a decrease of 6,435 since 1896-97. The decrease was chiefly in lower primary schools, and is atttributed to the higher prices of food-grains. Both the numbers of schools and of pupils receiving secondary education increased. Girls' schools decreased by 41, and the pupils attending them by 695. A total expenditure of Rs. 10,84,703 was incurred, or Rs. 10,216 more than in the previous year, the increase being mostly met by a larger grant from Provincial revenues. It was mentioned last year that special steps had been taken for the encouragement of Muhammadan education; but no improvement has as yet been shown, owing possibly to the year having been unfavourable. The number of such pupils declined by 3,355, and they were also less successful at examinations.

12. *Dispensaries and hospitals.*—Sixty-five dispensaries and hospitals were opened in the Division as compared with four in the previous year, and the number of patients treated increased from 292,062 to 348,792. The management of some of the dispensaries in Nadia is reported to be unsatisfactory, The total income of the dispensaries in the Division increased from Rs. 1,06,616 during the previous year to Rs. 1,43,933. The Government grants are shown to have increased by Rs. 22,328, which is due to the inclusion of figures for the South Suburban Hospital. The income from subscriptions and endowments rose by Rs. 5,532.

13. *Local Self-Government Institutions.*—On the general working of the District and Local Boards, the Commissioner (Mr. Buckland) writes as follows:—

"There is a consensus of opinion that the District Boards do satisfactory work: their local knowledge is valuable and many of them have fair experience of official business. But hardly anyone has a good word to say for the Local Boards. They have little money at their disposal to spend, and it is not unnatural that the members take so little interest in their unimportant duties. They might well be abolished without any detriment to the district administration."

The number of municipalities remained unchanged, and greater regularity of attendance was observed by the Municipal Commissioners. Of their administration generally, the Commissioner observes:—

"There is.....a want of a proper sense of proportion in municipal expenditure. Education is regarded as more important than a good water-supply, and sanitation is looked on as an accidental fad. A municipality seldom opposes indicated reforms on their merits; on the other hand, it professes to accept them, and if the matter is borne in mind when the budget is prepared, it will go so far as to make provision in it for their execution, but unless continuous pressure is exerted, the matter ends there, and no practical steps are taken to carry out the desired improvements....The best results in the matter of municipal administration are found to be attained when the Chairman is a capable official, willing to take responsibility upon himself in the execution of municipal matters . . . . . The backwardness in collections is one of the worst features of municipal administration. The result is generally bad and to every municipality, the charges made year after year still apply. Want of supervision and a general reluctance to resort to coercive measures and consequent laxity in the observance of rules, are the chief causes which retard the progress of collections."

14. *Conduct of Zamindars.*—Mention is made in the report of most of the leading zamindars of the Division, of some few unfavourably, but of the majority as fair and considerate landlords. Complaint is made of the conduct of the agents of some of the absentee proprietors in the 24-Parganas, Jessore, and Khulna. The condition of the tenants under the *utbandi* system in Nadia is referred to as unsatisfactory, and in the Magura and Narail subdivisions of Jessore, relations between the landlords and their tenants were strained. In the Khulna district, the larger zamindars are reported to be mostly non-resident and apathetic as to the interests of their tenantry, to whom very little assistance was rendered by them during the recent famine, but the Lieutenant-Governor is glad to observe the names of many gentlemen who are mentioned as solicitous for the welfare of their raiyats and ever willing to assist the authorities in the promotion of any works of public utility.

15. The Lieutenant-Governor would express his thanks to Mr. Buckland for his careful administration of the Division during the latter portion of the year, and for his interesting report, extracts from which are herewith published for general information.

By order of the Lieutenant-Governor of Bengal,

F. A. SLACK,

Offg. Secretary to the Govt. of Bengal.

Extracts from the Annual General Administration Report of the Presidency Division for year 1897-98.

* * * * * * *

III.—WEATHER AND CROPS.

11. The average rainfall in the Division was much greater than in either of the two preceding years, being 61·4 inches against 46·3 inches in 1896-97 and 42 6 inches in 1895-96. The largest rainfall (83·6 inches) was at Bagerhat, and the smallest at Lalgola in Murshidabad, where it was little more than 39 inches. It was more seasonable and equally distributed, according to agricultural requirements, than in the two preceding years, and the outturn of crops was accordingly more plentiful. In the 24-Parganas, the average rainfall was 59·8 inches against 55·7 in 1896-97. The heaviest rainfall was in July and October which did much to help the growth and development of the paddy plants, and the crop yielded an average or 16-anna outturn. In Nadia, the rainfall was 58·6 inches, against 42·5 inches in the previous year, and the outturn of *aus* and *aman* crops was sufficient to enable the people to recover to a great extent from the effects of the famine. The rainfall recorded in Murshidabad was 51·1 inches, or 11·1 inches more than in the previous year. It was heaviest in August, being 14 inches. This resulted in a better outturn of almost all the principal food-crops during the year. In Jessore, 62·8 inches of rain fell during the year, against 46·2 inches in 1896-97. The rainfall was largest in June, July and August, and was generally favourable to all the crops grown in the district. In Khulna, six new rain-registering stations were opened during the year. The average rainfall in this district was considerably greater than either of the two preceding years, being 75 inches against 47·2 inches in 1896-97 and 53·1 inches in 1895-96, and the outturn of *aus* and *aman* crops was such as to enable relief operations to be closed from October.

The average outturn of *aman*, which is the staple food in the Division, was 16 annas, against 6·9 annas in 1896-97 and 9·6 annas in 1895-96. The *bhadoi* or *aus* crop yielded an average outturn of 14·2 annas against 8·8 annas in 1896-97 and 10 annas in 1895-96. The jute crop was 13·4 annas, against 12·6 annas in 1896-97 and 12 9 annas in 1895-96, and the *rabi* crops were 14·6 annas, against 8·2 and 11·2 annas, respectively, in 1896-97 and 1895-96. The other crops grown in the Division are of minor importance. Indigo is grown in Nadia and Murshidabad only. The average outturn of this crop was 10·5 annas, against 9·5 annas in 1896-97 and 11·5 annas in 1895-96. The outturn of mulberry, which is grown in Murshidabad only, was not satisfactory, being 11 annas.

IV.—PUBLIC HEALTH.

12. The following table compares the recorded mortality in the districts of this Division during the past three years:—

District.	Number of deaths from fever.			Number of deaths from cholera.			Number of deaths from other causes.			Total number of deaths from all causes.			Average of the past two years, 1896 and 1897.
	1895.	1896.	1897.	1895.	1896.	1897.	1895.	1896.	1897.	1895.	1896.	1897.	
1	2	3	4	5	6	7	8	9	10	11	12	13	14
24-Parganas	39,845	37,919	34,957	6,816	11,043	3,974	8,431	6,920	7,281	55,082	55,882	46,212	55,422
Nadia	48,471	41,802	31,525	8,816	10,736	3,570	6,516	6,930	7,824	63,803	59,458	42,919	61,631
Murshidabad	30,148	30,441	27,509	2,203	4,050	2,222	4,742	5,539	5,875	37,183	40,939	35,606	39,061
Jessore	63,150	58,173	51,253	10,113	9,199	5,967	5,097	4,348	5,793	78,360	70,720	63,013	74,540
Khulna	26,153	27,951	27,043	5,066	6,746	5,750	7,696	7,467	7,515	38,915	42,164	40,308	40,539
Total ...	207,767	196,286	172,287	33,104	41,673	21,483	32,472	31,204	34,288	273,343	269,163	228,058	271,253
Ratio of deaths per mille of population	26·5	24·9	21·9	4·2	5·3	2·7	4	3·9	4·3	34·8	34·2	29·03	34·5

The general health of the Division was better than that of the two preceding years. The total number of deaths was 2,28,058, or 29·03 per mille of population, against 269,163, or 34·2 per mille in 1896, and 273,313, or 36·2 per mille in 1895. The number of deaths from fever was 172,287, from cholera 21,483 and from other causes 34,288, against 196,286, 41,673 and 31.204, respectively, in 1896. The decrease in mortality is chiefly due to the absence of any disease in a widely epidemic form. It is satisfactory to note that the prevalence of scarcity and famine in parts of the districts of Nadia, Murshidabad, Jessore and Khulna did not materially affect the general health of the people of those districts.

In the 24-Parganas, the total number of deaths was 46,212, against 55,882 of the preceding year, showing a decrease of 9,670, or 17·3 per cent. Fever accounted for 34,957 deaths against 37,919 in 1896. As usual, the subdivision of Barasat suffered the most, while the least number of deaths from fever occurred at Diamond Harbour. It prevailed most throughout the district during the months of January, March, October, November and December. The decrease in the mortality from cholera is especially remarkable, being 3,974 against 11,043 in 1896. Nowhere in the district did it prevail with any great intensity. The subdivision of Basirhat and part of Barasat suffered most. Small-pox accounted for 151 deaths against 152 in the previous year, and bowel complaints 1,286 against 1,540. The mortality from other causes was 5,844 against 5,226 in 1896. The number of cases vaccinated was 45,338 of which 45,119 were successful.

In spite of the famine, there was a decided improvement in the public health in Nadia. The total number of deaths was 42,919, against 59,458 in 1896. The mortality from fever has fallen from 41,802 to 31,525. The subdivision of Kushtia was most affected, while the number of deaths was smallest in the subdivisions of Meherpur and Chuadanga. Fever was at its worst in the months of March, April and November. In this district, also, the decrease in the mortality from cholera is remarkable, the number of deaths registered being 3,570, against 10,726 in 1896. Urban areas suffered much more than the rural: the number of deaths from cholera was highest in April. From small-pox there were 87 deaths against 12 in 1896, from bowel-complaints 244 against 150, from injuries 889 against 716, and from other causes 6,604 against 6,052.

The total number of deaths in Murshidabad was 35,606, against 40,939 in 1896. The general healthiness of the year is ascribed to the dryness of the season and the absence of cholera in anything like an epidemic form. The number of deaths recorded from fever was 27,509 against 30,441. As usual, it prevailed all over the district, and especially in the low-lying and swampy portion to the east of the river Bhagirathi. Cholera accounted for 2,222 deaths as compared with 4,959 in the previous year. The towns suffered more severely than the villages. The mortality from small-pox was 167, against 302 in 1896, and from other causes, 5,708 against 5,237.

The total number of deaths recorded in Jessore was 63,013, against 70,720 in 1896, of which fever contributed 51,253 deaths, against 58,173 in the previous year. As usual, the disease was prevalent throughout the year in all the subdivisions of the district. The subdivision that suffered most was Magura, and that suffered least was Jhenidah. The largest number of deaths occurred in November, December, January and March. The number of deaths from cholera was 5,967, against 8,199 in 1896. This disease prevailed in the months of February, March, April, May, November and December. Small-pox accounted for 70 deaths, bowel-complaints 113, and other causes 5,610 deaths.

The total number of deaths registered in Khulna was 40,308, against 42,164 in 1896, of which fever contributed 27,043 deaths against 27,951 in 1896, cholera 5,750 deaths against 6,746, and other causes 7,515 against 7,467.

V.—MATERIAL CONDITION OF THE PEOPLE.

13. A succession of bad harvests during the last three years rendered the material condition of the people in the Division at the commencement of the

year far from satisfactory. The prices of food-grains ruled abnormally high, and it was not till the harvests of *aus* and *aman* were reaped that there was a general amelioration in the condition of the people. In the 24-Parganas, the labouring classes tided over the difficulty by finding sufficient employment in the mills, in road works under the District Board, and in the excavation of tanks, etc., under the Board and private individuals. The condition of the landless middle classes was as bad as in preceding years, perhaps worse as they were affected by the rise in prices without enjoying any corresponding increase of income; the result was that many of them lived practically from hand to mouth. In Nadia, the year opened with depleted grain stocks, and the pinch of scarcity was felt throughout the district, culminating in actual famine in the *kalantar* and the adjacent parts of the Sadar and Meherpur subdivisions. In these tracts relief operations were undertaken and were continued until September, when the reaping of a bumper *aus* crop replenished the exhausted granaries. As stated in last year's report, there is no doubt that, owing to the *utbandi* system, and their own improvident habits, a large proportion of the cultivating class are always impoverished and in debt to their *mahajans*, but they have nevertheless surprised many observers by their power of resistance during the famine, and of recuperation on its termination. In Murshidabad, the distress which began at the end of the year 1896-97 in thanas Barua and Bharatpur, and gradually spread over the Sadar and Kandi subdivisions, was over with the reaping of the bumper crops, both autumn and winter, that followed the favourable and seasonal rainfall of the year under report. The district, as a whole, has shown a marvellous return to prosperity. The industries of the district are, however, decaying, and the people are becoming more and more agricultural. The bulk of the population of Jessore are agriculturists, and their welfare and prosperity depend upon the character of the outturn of the crop they grow. Owing to the failure of crops in 1895-96 and 1896-97, the people had consumed all the food-stocks they had until they were forced to fall back upon the seed-grains they had stored for the purpose of sowing. When this resource was exhausted, they began selling off their paltry valuables and even their plough-cattle. Charitable doles were distributed from the District Fund and the Indian Famine Charitable Relief Fund which saved the people from starvation. When the season for growing the *aus* crop came, they had no seed to sow, and a general clamour was raised for agricultural advances, which were made on a liberal scale. The people thus reaped a good *aus* harvest, which was succeeded by a good *aman* crop, and thus somewhat recovered their position. The material condition of the people of Khulna was to a great degree more satisfactory than in the preceding year. At the beginning of the year, the condition of the people in thanas Kaliganj, Assasuni, Magura and Satkhira in the Satkhira subdivision and thana Paikgacha in the Sadar subdivision was bad, owing to the loss of the *aman* crop of 1896-97, and the consequent scarcity and distress, which prevailed for some months, had to be met by relief operations undertaken by Government. Some pressure was also felt in parts of the Bagerhat subdivision, and the people in need were relieved by money supplied by the Indian Famine Charitable Relief Fund. As a rule, the inhabitants of this district, who are mostly agricultural, are well-to-do and prosperous; but the pernicious system of *gantidari* and other under-tenures, which the zamindars are following, is gradually reducing the actual cultivators to a state of poverty, caused by subinfeudation, both by taking away whatever margin of profit they have and also by driving them into expensive litigation.

VI.—EMIGRATION AND IMMIGRATION.

14. The number of emigrants registered in the district of the 24-Parganas during the year under report was 3,709, against 4,928 in the year preceding. Of these, 806 were for the Colonies and 2,903 for the labour districts of Assam, Cachar and Sylhet, as against 813 and 4,115, respectively, in the year 1896-97, showing a large decrease, which has not been explained by the Collector. It seems to me, however, that the increase in the year 1896-97 was abnormal, due to the distress and the high prices of food-grains that prevailed towards the end of that year. Of the total number of persons who emigrated during

the year, only six belonged to this district, and the rest to other districts. A large number of emigrants from other districts passed, as usual, through the rest-houses at Naihati, in the Barasat subdivision, on their way to the labour districts. During the year there were five such rest-houses, as in the previous year, all of which were provided with sleeping accommodation and separate cooksheds. The river Hooghly supplied the drinking-water, and arrangements were made for the removal of the night-soil by the local Municipality. There were 74 cases of cholera in the rest-houses during the year, of which only one proved fatal. The patients were treated in the cooly cholera hospital at Naihati. Formerly this hospital used to be kept open for only six months (January to June) of the year, but in September 1897 Government sanctioned its maintenance throughout the year, and appointed the Civil Hospital Assistant, in connection with emigration works, to have charge of it in addition to his other duties. A complaint was received from the Superintendent, Hooghly Imambarah Hospital, that batches of cholera-stricken coolies were sent from Naihati for treatment in that hospital; but that, to prevent a recurrence of this irregularity, the agents of all the rest-houses were strictly instructed to have all cholera cases treated locally. There were three cases of small-pox in the rest-houses, but none ended fatally.

As reported last year, up-country men and *Dhangars* came to the Barasat subdivision last year in large numbers for employment in mills or municipalities; and labourers from Midnapore and Cuttack visited the southern part of the district during the cultivating season, returning to their homes after the harvest. As regards the other districts, there was no emigration or immigration properly so called. As usual, during harvest time, the labourers left the districts for the Sundarbans and other Eastern Bengal districts for work, but they returned as soon as their work was over. The number that left the district of Jessore was larger in the year under report than usual on account of the high prices of food-grains that prevailed there during the year. As regards immigration up-country coolies came to work on the railway, and Kabulis visited the districts with warm clothing and dry fruits for sale. It is reported from Khulna that some 20 families have permanently settled themselves in thana Bagerhat, and that some immigration is going on in Morrellganj thana from the district of Backergunge.

VII.—PRICES OF FOOD AND LABOUR.

15. In the 24-Parganas, prices ruled very high at the beginning of the year when the price of common rice was 9 to 11 seers a rupee. This was due to the poor outturn of the crops of the preceding two years. As the year progressed, prices rose higher still; and on the 20th September 1897, common rice was selling at $6\frac{3}{4}$ to $8\frac{1}{2}$ seers a rupee. These high rates continued more or less until about the end of October, after which, in consequence of the full harvest, prices fell gradually, and at the close of the year common rice was selling at 13 to $13\frac{3}{4}$ seers a rupee. In Nadia there has been a fall, not only in the price of common rice, but also in that of wheat and other grains. The average price of common rice, wheat and gram in Murshidabad was considerably higher during the year than in either of the two preceding years. This is due to the failure of the winter rice and *rabi* crops of 1896-97 and the crops of 1897-98 having been in the market for a few months of the year only. The price of common rice in Jessore ruled unusually high up to September, when a good *bhadoi* crop was harvested, and the price came down to 13 seers a rupee: since then it has remained almost stationary, and, although a good *aman* crop was reaped, the price has not fallen. It is, however, expected to go down further, if there be a good *aus* crop in the current year. In Khulna, the price of common rice was much lower in comparison with that in the corresponding period of the preceding year, but higher than in 1895-96, being $13\frac{1}{2}$ seers a rupee against $10\frac{1}{8}$ seers in 1896-97, and $15\frac{1}{8}$ seers in 1895-96. This was due to the scarcity prevalent last year. The price of grain has been gradually rising since 1895-96, probably on account of the scanty and untimely rainfall. Salt sold somewhat cheaper at Bagerhat, where it is now imported from the Khulna bonded warehouse, at a lower cost than before.

The wages of labour, both superior and common, in the 24-Parganas and Jessore, remained stationary. In Nadia, there was a slight increase in the wages of women and boys, chiefly owing to the demand for labour caused by the earthquake of the 12th June 1897. In Murshidabad, the price of all classes of labour, except that of superior blacksmiths, rose considerably during the year as compared with the two preceding years. This general increase is also chiefly due to the high prices at which all classes of labourers found employment after the earthquake. Wages of labour fell off considerably at Satkhira, in Khulna. At Bagerhat and the Sadar, they remained about the same as in previous years. During the prevalence of the distress, the wages of labour were at famine rates at Satkhira, and have not been able to re-adjust themselves since.

VIII.—MANUFACTURES AND MINES.

16. The chief articles of manufacture in this Division are cotton twist and yarn, gunny-bags and cloth, paper, ice, shellac and lac-dye, indigo, silk, sugar and molasses. Of these, cotton twist and yarn, gunny-bags and cloth, paper, ice, shellac and lac-dye were manufactured only in the district of the 24-Parganas, in which there were 59 factories at work. In 40 factories work was carried on by shifts and sets, and in 18 by midday stoppages, while one had no fixed system of working, as noticed in last year's report. The Indian Glass Works at Sodepur were registered in August last, but, as the Company went into liquidation in December, the works have been closed and the factory removed from the list. The Calcutta Flour Mills at Narikeldanga has also remained closed since the beginning of the year. The total number of operatives employed in the 59 working factories during the year under report was 80,983, against 67,085 in the previous year. The increase in the number of operatives was due to the addition of four new mills during the year. There was no material change in the rates of wages paid to the operatives employed in factories during the year under report.

As in the preceding year, there were only two paper mills in this Division, one at Titaghur and the other at Kankinara.

The articles manufactured in these mills were Nos. 1 and 2 white printing, badami, superior badami, cream-laid, cream-wove, yellow-wove, azure-laid, white cartridge, brown cartridge, superior full sized paper, assorted coloured printing and blotting papers. The raw materials used were grass, jute, rags, hemp rope, hemp, gunny and waste papers. There was a slight increase in the outturn of the oil mills and the flour mill at Moheshganj in the district of Nadia.

17. Indigo is largely manufactured in the districts of Nadia, Murshidabad and Jessore. The following table shows the state of this industry during the year under report, as compared with the two preceding years:—

Indigo.

District.	Number of factories.			Produce.			Value.			Remarks.
	1895-96.	1896-97.	1897-98.	1895-96.	1896-97.	1897-98.	1895-96.	1896-97.	1897-98.	
1	2	3	4	5	6	7	8	9	10	11
				Mds.	Mds.	Mds.	Rs.	Rs.	Rs.	
Nadia	48	42	51	3,948	2,797	2,432	4,55,410	5,38 364	3,31,636	
Murshidabad	24	24	13	3,004	1,636	1,900	9,81,581	3,97,327	2,35,382	
Jessore	17	15	18	1,416	1,256	1,793	3,44,997	2,03,937	2,35,424	
Total ...	89	81	82	8,968	5,679	6,185	17,81,988	11,39,628	9,02,42[illegible]	

Owing to the timely rainfall the year was favourable for the indigo crop.

Silk.

The silk industry is chiefly carried on in the districts of the 24-Parganas and Murshidabad. The table below compares the state of this industry during the last three years:—

District.	Number of factories.			Produce.			Value.			Remarks.
	1895-96.	1896-97.	1897-98.	1895-96.	1896-97.	1897-98.	1895-96.	1896-97.	1897-98.	
1	2	3	4	5	6	7	8	9	10	11
				lbs.	lbs.	lbs.	Rs.	Rs.	Rs.	
24-Parganas ...	Information not available.						52,847	56,341	1,01,806	The figures for these are for the calendar year.
Murshidabad...	74	55	48	406,940	565,009	538,175	33,08,129	32,09,731	29,73,715	

The manufacture of silk cloth at Mirzapur, in the district of Murshidabad, is gradually declining. The number of pieces of silk cloth manufactured during the year under report was 6,052 valued at Rs. 45,396, against 6,895 pieces valued at Rs. 47,465 of the preceding year.

Sugar.

The following table compares the state of the sugar industry during the last three years:—

District.	Number of factories.			Outturn.			Value.			Remarks.
	1895-96.	1896-97.	1897-98.	1895-96.	1896-97.	1897-98.	1895-96.	1896-97.	1897-98.	
1	2	3	4	5	6	7	8	9	10	11
				Mds.	Mds.	Mds.	Rs.	Rs.	Rs.	
24-Parganas ...	172	120	90	75,527	46,664	72,475	5,15,582	3,56,763	5,24,175	
Nadia	Statistics not available.									
Jessore	148	144	134	2,26,735	2,36,150	2,11,422	16,32,594	15,70,089	14,82,323	
Khulna	Not available.			36,631	25,700	25,346	2,79,566	1,70,550	2,04,220	

Sugar is still manufactured from sugarcane and date-juice by primitive native process in the subdivisions of Basirhat and Barasat, in the district of the 24-Parganas; but, as the demand for machine-made sugar has steadily increased, sugar manufacture by native methods is not in a flourishing condition. In Nadia sugarcane is largely cultivated in the Kushtia and in part of the Chuadanga subdivisions. In the former subdivision the sugarcane-crushing mill factory worked throughout the year. Information regarding this mill has been refused by the Manager of the factory, but it is known that the system followed is to distribute the machines to local agents, who let them out on hire at a rupee or so a day. The principal centres of the date sugar industry in this district are Santipur, Chakdaha, Kishenganj, Dowlutganj, Alamdanga and Mohesganj, but it is stated that no statistics are available. There are three refined sugar manufactories under European management in the district of Jessore. The brass foundry at Mohesganj, in the district of Nadia, manufactured iron screws and other requisite for indigo factories. Brass and bell-metal utensils are manufactured in the 24-Parganas, Nadia, Murshidabad and Jessore districts. These articles are generally sold in the local markets, as well as sent to Calcutta and other places. Cotton cloth also is manufactured in several places in the Division, but the demand, it is stated, is gradually falling off, as the manufacturers are unable to compete against European imports. Blankets are manufactured in several places in the district of Murshidabad. Locks and keys in imitation of Chubb's locks and of really good quality are made at Natagarh in the Barasat subdivision of the 24-Parganas and at Jangipur in Murshidabad. The other and minor manufactures of this Division are tobacco, mats, cutlery, boats, cart-wheels, ivory works, shell bracelets, pottery, ploughs and other ordinary wood work. There are no mines in any of the districts of this Division.

IX.—TRADE AND COMMERCE.

18. In compiling the statistic of trade in this Division, the instructions contained in the Government Circular No. 103, dated the 22nd July 1897, have been strictly observed. In this Division the traffic is not only carried by rail, but also by the Nadia rivers and the Calcutta canals. The District Officers have submitted separate statements, showing the import and export traffic of their districts carried by the different means mentioned above. These statements are submitted as appendices to this report, as also two other statements, showing the export and import traffic of the several districts of this Division with Calcutta, carried by rail, road, river and canal, as directed in the circular quoted. An amalgamated statement, exclusive of the local traffic, has been compiled in this office, showing the "up" and "down" traffic of this Division from the above appendices, and is given below :—

19. There was a decrease in the import of rice, paddy, gunny-bags, linseed, tobacco (unmanufactured), indigo, cotton piece-goods, European, and cotton twist, European, while there was an increase in the import of all the other articles. As regards exports, there was an increase under the heads of rice, paddy, jute (raw), gunny bags, mustard-seed, tea (Indian), cotton (raw), silk (raw), tobacco (manufactured and unmanufactured), cotton piece-goods, Indian, and kerosine oil, while there was a decrease under all the other heads No explanations have been given of these fluctuations.

The Collector of the 24-Parganas states that the jute trade is profitable to the dealers as well as to the cultivators of his district, and that its cultivation is extensive, that the produce of the Diamond Harbour and Basirhat subdivisions is exported to Calcutta, and that of the Barasat subdivision is partly consumed in the local mills. Gunny bags are largely manufactured in the mills in the district and in the suburbs of Calcutta. The number of gunny-bags exported to Calcutta from this district during the year was 63,97,269 against 64,86,869 of the year preceding, and those imported from Calcutta were 203,217 against 245,080 of the previous year. In this district molasses produced from sugarcane are partly consumed locally and partly exported. The manufacture and sale of sugar and molasses form an important trade of this district. Tobacco is also cultivated more or less throughout this district, but the greater part of the outturn is consumed locally. The Collector of the 24-Parganas states that, besides the staples mentioned in the statements prescribed by Government, there are other articles, some of them important, in which traffic is carried on between his district and Calcutta along the undermentioned main routes, viz., (1) Kamardanga, (2) Behala, (3) Kowrapookur khal, (4) Kowrapookur road, (5) Goriah, (6) Bonhugli, (7) Moti Jheel, (8) Jingerpole, (9) Matiabrooz ghat, (10) Matiabrooz and (11) Nimak mehal. Of these the principal articles are (1) lime and limestone, (2) fresh fruits other than cocoanuts and betelnuts, (3) iron, (4) fire-wood, (5) bricks and tiles, (6) hides, and (7) spirits. The following table shows the exports and imports of these articles as registered along the above-mentioned eleven main routes during the past two years:—

Names of articles.	Import from Calcutta.		Export from Calcutta.	
	1896.	1897.	1896.	1897.
1	2	3	4	5
	Mds.	Mds.	Mds.	Mds.
1. Lime and limestone ...	1,74,725	1,55,246	10,292	50,147
2. Fresh fruits other than cocoanuts and betel-nuts.	1,60,147	1,77,175	6,53,412	6,85,511

	No.	No.	No.	No.
5. Bricks and tiles ...	1,181,828	1,781,407	5,379,150	11,243,425
6. Hides	6,243	1,972	48,537	90,254
	Rs.	Rs.	Rs.	Rs.
7. Spirits	57,279	28,596	44,008	56,371

20. In Nadia the quantities of rice and paddy imported far exceeded the quantities exported. On the other hand, there was a large excess of exports over imports under the heads of "Gram and Pulses," "Other Food-grains," "Linseed," "Jute," "Sugar, unrefined" and "Indigo." It is stated that the large imports of rice and paddy were due to the famine. In this district Rs. 33,99,272 worth of European piece-goods were imported against Rs. 36,77,438 worth in the year preceding and 9,463 maunds of "Cotton twist, European" against 22,129 maunds. The decrease under both the heads

is attributed to the famine. The exports of indigo from this district fell to 4,118 maunds from 5,853 maunds in the preceding year. It is stated that the production of this valuable commodity is steadily declining in the district.

The Collector of Murshidabad states that the river traffic of his district was confined, as a rule, to a few months of the year during the rainy season. The figures given by him do not include the large exports of rice and *rabi* crops which are annually carried on by carts, and the exports this year from the Rarh to other districts were far above the average, owing to the good harvest of the year under report. In this district the increase in the export of paddy, rice and jute is said to be due to the good harvest of the year, while the decrease in the export of wheat, gram and linseed during the year is attributed to the bad harvest of 1896-97.

The Collector of Jessore states that the bulk of the trade in his district is carried on in country boats; that the figures of import and export furnished by the Subdivisional Officers of Narail, Magura and Jhenida are founded upon no reliable basis, there being no registration of traffic in those places, and that they have, therefore, not been reproduced in his report. In this district the channel Muchikhali connecting the Modhumati and Navaganga is silted up for more than six months of the year to the great injury of trade It is recommended that it may be opened by Government in the interests of the people and a toll imposed on those benefited: the project is under consideration.

The Collector of Khulna states that a good deal of import and export traffic of his district is carried on by river with Backergunge and other eastern districts, but no statistics are procurable for want of registering stations. It is also stated that fish, betelnuts, and molasses are quite as important articles of export traffic of his district as the 24 staples prescribed by Government.

* * * * * * *

XVII.—CONDITION OF THE DIVISION AS REGARDS LAND AND LAND REVENUE ADMINISTRATION.

47. The number of estates of each class borne on the revenue-roll of the several districts during the years 1896-97 and 1897-98 is shown below:—

Year.	Class I—Permanently-settled estates.	Class II—Temporarily-settled estates	Class III—Estates held direct by Government.	Total.
1	2	3	4	5
1896-97 ...	9,369	733	256	10,358
1897-98 ...	9,394	731	252	10,377
Difference ...	+25	—2	—4	+19

There was a change in the total number of estates in all the districts. In Nadia the number increased by nine, in Murshidabad by one, in Jessore by eight, and in Khulna by seven, while in the 24-Parganas there was a decrease of six estates, the net result in the Division being an increase of nineteen estates. Transfers from one class to another took place in every district in consequence of the sale of permanently-settled estates for arrears of revenue and their purchase by Government for want of bidders, as also on account of sales of petty Government estates to private individuals with revenue fixed in perpetuity. The increase in Nadia and Jessore is chiefly due to the formation of new estates by partition of a parent estate in each district. In the case of Nadia it is also due to the transfer of two estates from the district of Jessore. The increase of one estate in Murshidabad is due to the fact that

while two estates were transferred to the district from Burdwan, one was transferred from it to Birbhum. The increase in Khulna is caused by the transfer of seven estates from the 24-Parganas. This caused a corresponding decrease in the last-named district, where the removal of one estate from the tauzi-roll and formation of two new estates, one by partition and one by settlement of a Sundarban grant, contributed to the net decrease of six estates. The following table shows the demand, collections, remissions, and balances of land revenue during the past two years 1896-97 and 1897-98:—

Year.	Arrear demand.	Current demand.	Total demand.	Arrear collection.	Current collection.	Total collections.	Remissions.	Balance.	Percentage of collection on demand (col. 7 on col. 4).
1	2	3	4	5	6	7	8	9	10
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	
1896-97 ...	1,58,866	51,22,004	52,80,870	1,25,025	49,61,296	50,86,321	23,674	1,70,875	96·3
1897-98 ...	1,71,825	51,29,779	53,01,604	1,42,203	49,67,529	51,09,732	6,712	1,85,160	96·3

Although the percentage of collections on demand was the same in the two years, viz., 96·3, there was an increase in the demands, collections and balances of the year under review. The remissions, however, fell from Rs 23,674 to Rs 6,712. The percentage of collections in each class is exhibited in the following statement:—

Class of Estate.	1896-97.						1897-98.					
	Arrear demand.	Arrear collection.	Percentage of collection (col. 3 on col. 2).	Current demand.	Current collection.	Percentage of collection (col. 6 on col. 5).	Arrear demand.	Arrear collection.	Percentage of collection (col. 9 on col. 8).	Current demand.	Current collection.	Percentage of collection (col. 12 on col. 11).
1	2	3	4	5	6	7	8	9	10	11	12	13
	Rs.	Rs.		Rs.	Rs.		Rs.	Rs.		Rs.	Rs.	
I.—Permanently-settled estates.	53,146	52,714	99·18	44,41,327	44,04,686	99·17	38,098	37,395	98·15	44,42,414	43,83,503	98·67
II.—Temporarily-settled estates.	35,278	31,636	89·67	3,25,026	2,77,621	85·41	48,551	44,050	90·72	3,31,430	2,86,950	86·57
III.—Estates held direct by Government.	70,442	40,675	57·74	3,55,651	2,78,989	78·44	85,176	60,758	71·33	3,55,935	2,96,980	83·43
Total ...	1,58,866	1,25,025	78·69	51,22,004	49,61,296	96·86	1,71,825	1,42,203	82·76	51,29,779	49,67,529	96·90

Except in the case of class I estates where there was a slight fall, the percentage of collections of arrear demand improved in the other two classes (II and III), though it was below the prescribed standard of cent per cent. The results in Jessore and Khulna, where the percentage was above 95, may be accepted as fair. In the 24-Parganas it improved greatly, being 79·27 against 67·8 of the previous year. The collections were not satisfactory in Nadia or in Murshidabad. The current collections fell off slightly in permanently-settled estates, but improved in the case of estates temporarily settled or under direct management. The percentage of total collections, *i.e.*, both arrear and current, is as follows:—

Calcutta	...	...	...	...	99·8
24-Parganas	...	...	...	...	95·6
Nadia	...	...	...	...	96·6
Murshidabad	.	...	...	...	97·6
Jessore	...	...	...	...	98·8
Khulna	...	...	...	...	92·9
			Total	...	96·3

48. The statement below shows the collections in estates under direct management in each district of the Division:—

District.	Number of estates.	Current demand.	Arrear demand.	Total demand.	Current collection.	Arrear collection.	Total collection.	Percentage of— Current collections on current demand.	Arrear collection on arrear demand.	Total collection on total demand.	Current collection on current demand in 1896-97.

Nadia	32	20,789	5,132	25,921	15,033	2,884	18,767	76·64	55·22	72·4	70·26
Murshidabad	72	25,281	15,986	41,267	12,901	10,225	23,126	51·03	63·96	56·10	45·86
Jessore	83	4,800	1,632	6,432	3,341	1,299	4,640	69·60	79·59	72·14	69 29
Khulna	30	16,205	8,048	24,253	11,740	6,901	18,641	72·44	85·74	76·86	56·68
Total ...	252	3,55,935	85,176	4,41,111	2,96,986	60,758	3,57,744	83·43	71·3	81·1	78·44
Total for 1896-97 ...	256	3,55,631	70,442	4,26,073	2,78,989	40,675	3,19,664	78·44	57·77	75·02	79·60

The number of estates under direct management was 252, against 256 in the preceding year. There was no change in Calcutta, the 24-Parganas, Jessore, or in Khulna. In Nadia the number increased from 29 to 32, and in Murshidabad it decreased from 79 to 72. The increase in Nadia is due to the purchase of a permanently-settled estate on behalf of Government and to the transfer of two temporarily-settled estates to this class. The decrease in Murshidabad is ascribed to the fact that, while three estates were brought in for Government at a sale for arrears of revenue, and another estate was made khas, its farming lease having been cancelled, ten Government estates were sold with the revenue fixed in perpetuity and one Government estate was transferred to Birbhum. The result of the year, so far as the divisional totals are concerned, was a decided improvement over that of the preceding year, there being an appreciable increase under all the heads except in the number of estates. In every district except Nadia there was a decrease in the demand. The increase in Nadia is due chiefly to better prices realised from thatching-grass mahals in some Government estates in the Meherpur subdivision. The decrease in Calcutta is due to the redemption of land-tax. In the 24-Parganas it is owing to the temporary abolition of the daily fees realized from the sellers of vegetable and fish in the Government estate Orphanganj market. This abolition of fees was necessitated by the opening of a rival market by the Bhukoilas Raj estate, which has been made free with a view to attracting vendors from the Government market. The decrease in Murshidabad was the result of the sale of 11 Government estates and their transfer to class I. The fluctuations in Jessore and Khulna are too insignificant to call for notice. The percentage of current collections on current demand in Calcutta was, as in the previous year, nearly up to the prescribed standard, viz., 99·88. Compared with the preceding year, it improved in all the other districts, Murshidabad showing the poorest results, the percentage being 51·03. The arrear collections improved decidedly in all the districts except Calcutta, where there was a falling off. In no district, however, was the prescribed standard of cent. per cent. attained, the state of bad collections being attributed chiefly to failure of crops in the preceding years' famine, earthquake, and to lenient working of the Certificate Act.

49. The remissions granted during the year are classified below:—

	1896-97.	1897-98.
	Rs.	Rs.
Nominal remissions	1,967	3,984
Remissions of grace	19,186	2,495
Ditto of right	2,521	233
Total ...	23,674	6,712

Compared with the preceding year, there was a great decrease in the remissions, due to decrease in the 24-Parganas and Murshidabad. The nominal

remissions represent the rent of certain vacant godowns in the Orphanganj market, the rent of unoccupied lands in some Government estates, and the fictitious demand shown in the accounts of a Government estate in Nadia. The remissions of grace were granted to tenants owing to their poverty on account of failure of crops in preceding years. The remissions of right were granted on account of redemption of Government revenue and diluvion and abatement of rent of land taken up for a boarding-house attached to the Calcutta Madrassa. Except in Murshidabad there has been no material change during the year either in the agency or in the mode of management of estates under direct management. In Murshidabad the system of paying tahsildars by commission has been in force since the 1st of April 1897. The system is reported to have made the staff weak in consequence of the abolition of the *hálsánáhs*, who were mainly employed on collection work.

50. The statement below shows the expenditure incurred for the management of khas mahals and for miscellaneous and other improvements:—

Division.	District.	Amount expended from—				Remarks.
		7½ per cent.		2 per cent. for sanitary improvements.	Total.	
		Management proper.	Miscellaneous improvements, including agricultural improvements and experiments.			
1	2	3	4	5	6	7
		Rs.	Rs.	Rs.	Rs.	
Presidency	24-Parganas...	13,090	4,014	1,823	18,927	
	Nadia ...	1,256	97	72	1,425	
	Murshidabad	1,284	516	916	2,716	
	Jessore ...	...	...	1,609	1,609	
	Khulna ...	737	2,836	...	3,573	
	Total ...	16,367	7,463	4,420	28,250	

The sum of Rs. 68,103 was allotted for the management of, and miscellaneous and sanitary improvements in, the Government estates in the district of the 24-Parganas, of which the amount of Rs. 43,224 was spent during the year. This sum includes the allotment of Rs. 47,025 made for the Orphanganj market during the year. The amount sanctioned for miscellaneous, sanitary and agricultural improvements amounted to Rs. 36,391, of which Rs. 12,442 were actually disbursed during the year. The balance of Rs. 23,949 could not be spent during the year, as some works of improvement in the Orphanganj market could not be completed within that period. The expenditure on works of miscellaneous improvement amounted to Rs. 10,619. Of this, Rs. 6,605 were spent in the Orphanganj market on the repairs of godowns, sheds, and drains, etc. The balance was expended in repairing some village roads and tahsil cutcherries in Government estates. The total amount spent on works of sanitary improvement was Rs. 1,823. Of this, the amount spent in excavating and re-excavating tanks in Government estates where there was scarcity of water was Rs. 1,658. The balance of Rs. 165 was spent in levelling the site of a tank which was filled up sometime ago. A sum of Rs. 2,003 was spent in repairing embankments and sluices in some Government estates to protect them from the ingress of salt-water.

In Nadia, a sum of Rs. 252 was sanctioned for miscellaneous and sanitary improvements, of which Rs. 169 only were spent as follows:—

	Rs.
(1) Repairs to the cutcherry-houses at Bilmedia and Tentulbaria in the Meherpur subdivision	97
(2) Deepening a well at Gobindpur in the Chuadanga subdivision	72
Total ...	169

In Murshidabad, the grant of Rs. 1,422-8, made for miscellaneous and sanitary improvements, was spent during the year thus:—

	Rs.	A.	P.
Repairing roads and bridges	20	0	0
Repairing and constructing cutcherry-houses	459	11	0
Clearing and re-excavating tanks and wells	915	12	0
Miscellaneous	27	1	0
Total ...	1,422	8	0

The allotment made for sanitary improvements in Government estates in Jessore was Rs. 1,630, of which the amount actually spent for excavation and re-excavation of tanks at Magura and Chur Panchuria was Rs. 1,609. The balance (Rs. 21) lapsed to Government. In Khulna, a sum of Rs. 9,808 was sanctioned during the year for miscellaneous agricultural and sanitary improvements in Government estates. Of this, the amount of Rs. 2,835-12-3 was expended in the district. Of the balance, Rs. 1,685 were transferred to Jessore and Rs. 1,241 to the 24-Parganas, the amount lapsing to Government being Rs. 4,046-3-9. Of the amount of Rs. 2,835-12-3 spent in the district, Rs. 1,252 were expended on works of miscellaneous improvements, and Rs. 1,583 on works of agricultural improvements. No new staple was introduced during the year under report, and no new agricultural implements were brought into use or improvements made in agricultural machinery. In the 24-Parganas the amount spent in the maintenance of 78 schools in Government estates was Rs. 3,543. In Nadia, seven schools were maintained by Government in the khas mahals at a cost of Rs. 388. In Murshidabad five primary schools with 163 pupils and 1 girls' school with 19 pupils were maintained in the Government estates at a cost of Rs. 245 and Rs. 48 respectively. In Jessore no grant towards education in khas mahals is given by Government. The estates are not large enough to justify it, being as a rule scattered plots within villages in which there are already schools or patshalas supported by the District Board. In Khulna there were 28 schools in the Government estates, against 25 in the previous year. The number of boys on the roll on the 31st March 1898 was 798, against 729 at the close of the previous year. Except in certain estates in the 24-Parganas, the condition of the raiyats in the khas mahals of this Division was generally bad during the first half of the year, owing to failure of crops in preceding years; but they materially improved during the latter half of the year with the harvesting of the *aman* crop. The accounts and registers of the several Government estates in this Division were duly inspected by the inspecting officers. No material irregularities or discrepancies were brought to notice. No complaints were received against any of the tahsildars or their servants. Out of 1,292 estates or shares of estates with land revenue amounting to Rs. 8,62,400 which became liable to sale, only 97, or 7·5 per cent., were actually sold, against 8·2 per cent., of the preceding year and 10·4 per cent. of the year 1895-96. The sale law was worked with leniency in all the districts of the Division, and defaulting proprietors were allowed every facility for paying their arrears. No mercy was, however, shown to habitual defaulters, and the estate or shares owned by such men which fell into arrears were sold on the dates fixed for their sale.

51. The following statement shows the settlements effected during the year 1897-98:—

Division.	District.	Original settlements.		Resettlements.				Summary settlements.				Estimated Revenue.	
		Number.	Net revenue.	Number.	Net revenue.	Increase.	Decrease.	Number.	Net revenue.	Increase.	Decrease.	Number.	Estimated revenue.

There were concluded during the year 18 original settlements, 21 resettlements and 20 summary settlements, making in all 59. The net increase of revenue obtained by resettlements and summary settlements was Rs 14,737, against Rs. 9,558 in the previous year. The increase is chiefly due to the resettlements in the Sundarbans having resulted in an increase of revenue of Rs. 12,957, against Rs. 8,488 in the previous year. Of the 18 original settlements, 3 were in Nadia, 1 in Jessore, and the rest in the Sundarbans; the revenue obtained by these settlements amounting to Rs. 10,943. The relations between landlords and tenants were generally satisfactory, although there were complaints in almost all the districts of the Division of the oppression of tenants by certain rent-receivers, and this in some cases resulted in riots.

52. The following table shows the amount of landlords' fees received and paid during the year under the Tenancy Act:—

District.	Balance on 1-4-97.	Amount received in 1897-98.	Total.	Amount deposited in the Treasury.	Amount remitted to Collectors.	Amount remitted to other districts.	Otherwise disposed of.	Total of columns 6 to 8.	Balance.	Remarks
1	2	3	4	5	6	7	8	9	10	11
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.		Rs.	Rs.	
24-Parganas	.....	4,128	4,128	4,129	85		.....	85	4,043	
Nadia ...	7	745	752	749	57	3	.....	60	692	
Murshidabad	49	467	516	596*	164	...	... ...	164	352	
Jessore	29	1,348	1,377	1,377	9	..	... ...	9	1,368	
Khulna	.....	1,963	1,963	1,963	52	..	... ...	52	1,911	
Total ..	85	8,651	8,736	8,723	367	3	... ...	370	8,366	

* Rupees 9-14 received during the year were not credited into the treasury owing to some defect in the notice till after the close of the year.

The reluctance of landlords to accept these fees still continues. Out of a total sum of Rs. 8,651 received during the year, only the insignificant amount of Rs. 367 was actually accepted by the landlords. The balance in each case is small, and as in each case of withdrawal a petition to the Collector is necessary, landlords or their agents, it is said, do not care to take the necessary trouble to withdraw the amounts deposited in the treasury to their credit. This may be true to some extent; but I think the true explanation of the large balances that are annually left undrawn by landlords is the old reason that they do not want to take the fees, as their taking them might amount to a recognition of the transfer of tenants' rights for which they are levied. The orders of Government regarding the sale of petty Government estates, the management of which is difficult or impracticable, were carried out during the year as far as feasible. Although on the recommendation of my predecessor the terms originally fixed by Government for the sale of those estates were considerably relaxed, the results everywhere have been more or less disappointing, and several estates still remain unsold. It is said that the people are not willing to purchase Government estates in which records-of-rights have been made, as they leave no margin for enhancement of the raiyats' rents, and give an

insufficient return for the purchase-money, which can be more profitably invested otherwise. However desirable it may be to get rid of these estates, it would, I think, be unwise to sell them without preparing records-of-rights.

53. *Road and Public Works Cesses.*—The subjoined table shows the collections of road and Public Works cesses during the year:—

District.	Demands.			Collections.				Balances.			Deduct remission.	Net arrear.	Percentage of net demand balance on arrear.
	Current.	Arrear.	Total.	Current, including previously paid in advance.	Arrear.	Advance for future years.	Total.	Current.	Arrear.	Total.

There has been an increase in the demand of cesses in all the districts, except the 24-Parganas and Nadia, which show a decrease. The increase is largest in Jessore, being due to the general revaluation of the district. In Murshidabad and Khulna, the increase is due to revaluation and re-assessment of certain estates and tenures. The decrease in the 24-Parganas has not been explained, and that in Nadia is nominal. The collections, both arrear and current, fell off in the 24-Parganas and Nadia, while they improved in Jessore. In Murshidabad the collections of current demand improved, while those of the arrears decreased, and in Khulna the collections of arrears improved, while those of the current demand diminished. The total collections, however, both current and arrear, are worse than in the preceding year, being 88·11 per cent. of the total demand against 88·39. General revaluation is in progress in the 24-Parganas, and has been completed in Jessore. Partial revaluations were in progress in Murshidabad and Khulna.

* * * * * * *

XXIII.—RAILWAYS AND OTHER PUBLIC WORKS.

75. *Railways.*—In the 24-Parganas there were 97½ miles of the Eastern Bengal State Railway, and 32 miles of the Bengal Central Railway, open for traffic during the year. The District Board's proposal to construct a steam tramway from Barasat to Basirhat was not sanctioned by the Government of Bengal on the ground that a concession had been already granted by the Government of India to Messrs. Barry and Company for a period of 12 months to survey and estimate for a light feeder railway from Chandipur station, on the Bengal Central Railway, to Taki, *viâ* Basirhat. The project is now under their

consideration. As regards the construction of the steam tramway from Ranaghat to Krishnagar, Government have granted a further extension of nine months' time, *i.e.*, up to the 16th of March 1899, for the completion and equipment of the tramway. It is to be hoped that these works will soon be completed: the delays, both in the correspondence and in the execution of the project, are the subject of much unfavourable comment, which I do not care to repeat. The Azimganj-Nalhati Branch of the East Indian Railway is the only line that runs through Murshidabad. A survey is now being made for the construction of a railway between Dear Shibnagar in this district and Chuadanga, in Nadia. No new railways were constructed in Jessore or Khulna. A survey for a line from Kissenganj to Magura, *viâ* Kotechandpur, was completed during the year: nothing further has been heard of the project.

76. *Embankments, drainage, sluices, etc.*—In the 24-Parganas, Rs. 18,914 were spent in maintaining 216¾ miles of schedule D embankments, against Rs. 23,825 in the previous year. There are 68 irrigation and drainage sluices, of which 48 are maintained by Government, 4 by the Calcutta Corporation, and 16 at the cost of the zamindars concerned. Two retired lines of embankments, 2,240 feet and 1,590 feet in length, were constructed at Sreenagar and Raynagar at a cost of Rs. 4,482. The construction of three drainage sluices at Satpukur, Kulpi and Bindal was completed during the year at a cost of Rs. 65,826, Rs. 32,917 and Rs. 15,425 respectively. Fourteen cuts were allowed in embankments for drainage and nine for irrigation. Besides these, five cuts were made surreptitiously. In Murshidabad, the Bhagirathi embankment was maintained in proper order, and, when the river rose during the rains, protective spurs were constructed with a view to preserving its channel. The retired line of embankment at Bhagwangola, referred to in the last year's report, is still under construction. In Jessore, the excavation of the Bhawanipur khal has been completed. Embankments were constructed in the Satkhira subdivision of the district of Khulna at a cost of Rs. 32,240 by private individuals for the protection of their lands from the inundation of salt-water.

77. *Buildings.*—No buildings of any importance were constructed during the year in Nadia or Murshidabad. In the latter district all the Government buildings suffered more or less severely by the earthquake of the 12th June 1897, but the damage then caused is in course of repair. In Jessore, a new residence has been built for the Subdivisional Officer of Magura, the old residence being converted to a double Munsifi. The District Board of Khulna constructed the dispensary buildings at Kaliganj and Tala at a cost of Rs. 945 and Rs. 1,086 respectively, and the District Board of the 24-Parganas the dispensary building at Budge-Budge at a cost of Rs. 1,478.

78. *Sanitation, water-supply and miscellaneous public improvements.*—The District Board of the 24-Parganas expended Rs. 6,693, against Rs. 7,901 in the preceding year, on water-supply. Of this sum, Rs. 6,653 were spent in the excavation or re-excavation of tanks at Ramnagar, Barasat, Bashdebpur, Amarkati, Raghudebpur, Sasan and Muragacha, and Rs. 40 in sinking a well at Kulsoom. The sum of Rs. 2,750 was spent in making sanitary arrangements for the Sangor and Harwa *melas*. Also Rs 4,820 were provided by the District Board of Nadia for water-supply, but, owing to the employment of the Board's staff on famine relief during the season for digging wells, Rs. 181 only were actually spent on a well of six feet diameter. The construction of a large number of wells has, however, been taken in hand during the current year. An expenditure of Rs. 5,698 was incurred in Murshidabad in improving the water-supply and of Rs. 606 in maintaining and improving drainage channels In Jessore, Rs. 2,991 were spent in sinking or repairing 145 wells. The District Board of Khulna spent Rs 5,799 in excavating or re-excavating five tanks and several wells. Forty tanks were excavated in the Satkhira subdivision at a cost of Rs. 34,167 as relief works during the late famine.

XXIV.—COMMUNICATIONS.

79. *Roads.*—Provincial roads to the length of 85½ miles were maintained by the District Board of the 24-Parganas, at a cost of Rs 61,114. The average expenditure per mile was Rs. 751, against Rs. 692 in the previous year. The condition of these roads is said to be satisfactory. The maintenance of 150 miles

of district roads, metalled and bridged, cost the Board Rs. 53,156, or Rs. 354 per mile, against Rs. 375 in the previous year. These roads are generally in fair order. A sum of Rs. 9,477 was spent in maintaining 260½ miles of district unmetalled and bridged roads, and 47 miles of unmetalled roads with temporary bridges, showing an average expenditure of Rs. 37 per mile against Rs. 34 in the previous year. There were also 997½ miles of village roads maintained at a cost of Rs. 14,592. The unmetalled and village roads are said to be in passable order. The District Board spent Rs. 5,267 on original works against Rs. 8,658 in 1896-97. In Nadia, the Board's expenditure on original works was Rs. 11,089 against Rs. 13,481 in the previous year. The expenditure incurred in the maintenance of the different classes of district roads was Rs. 43,752 against Rs. 30,829, and of village roads Rs. 4,695 against Rs. 685, in the previous year. Owing to the funds at the disposal of the Board being limited, the expenditure was not sufficient to maintain the existing lines of communication in a proper state of efficiency, and a representation, based on the history of the roads in the district, has been made to Government asking for help from Provincial revenues. There were altogether 1,695½ miles of roads in the district of Murshidabad. The expenditure incurred in the maintenance of 24 miles of metalled and bridged roads was Rs. 9,560; that on 169½ miles of unmetalled and bridged roads was Rs. 8,685; on 350 miles of unmetalled roads, with temporary bridges, Rs. 15,849, and on 398 miles of village roads Rs. 4,655. A sum of Rs. 2,605 was spent on original works. In Jessore, 41 miles of Provincial roads were maintained at a cost of Rs. 18,011, exclusive of establishment charges, which amounted to Rs. 2,750. The sum of Rs. 29,258 was spent in the maintenance and repairs of 109 miles of district metalled and bridged roads, Rs. 1,234 on 316 miles of unmetalled but bridged roads, Rs. 828 on 57 miles of unmetalled roads with temporary bridges, and Rs. 5,461 on 260 miles of village roads. An expenditure of Rs. 5,793 was incurred in metalling roads and of Rs. 4,200 in the construction of culverts. The district of Khulna is intersected by numerous rivers and khals, and communication is principally carried on by water. The administration of the district could be more effectively conducted if the District Officer had a good steam-launch at his disposal: a representation was made to Government but negatived. There were 109½ miles of district roads and 56½ miles of village roads in the year under report. The district roads were repaired at a cost of Rs. 26,441, and the village roads of Rs. 9,152. The sum of Rs. 2,227 was spent in bridging, and Rs. 3,184 in constructing roads. There are tow-paths in the district under the management of the Public Works Department. Their condition is reported to be unsatisfactory. I have brought the matter to the notice of the Superintending Engineer, South-Western Circle.

80. *Arboriculture.*—In the 24-Parganas, 135 new mahogany trees were planted along the different roads during the year, and the existing trees were maintained at a cost of Rs. 838, against Rs. 909 in the previous year. There were about 16,034 trees along Provincial and district roads. The District Board of Nadia spent Rs. 501 on arboriculture against Rs. 590 in 1896-97. In Murshidabad, Rs. 145 and in Khulna Rs. 275 were spent in planting trees on roadsides, 864 trees were planted along the Provincial and district roads in Jessore, at a cost of Rs. 639, including the maintenance charge of existing trees. I do not think that enough is done in this respect, and I shall lose no opportunity of pressing arboriculture upon the attention of the Chairmen of the District Boards.

81. *Communication by water.*—In the 24-Parganas, the Circular Canals (10 miles in length) and Tolly's Nala, including Kawrapukur khal (37 miles), were maintained at a cost of Rs. 39,748, against Rs. 34,193 in 1896-97, while the gross revenue from tolls on these two canals was Rs. 4,08,017, against Rs. 4,25,115 in the preceding year. The work of canalizing the Bhangore khal was completed during the year: 2,497 steamers passed through the Sundarbans channel against 1,366 in the previous year, yielding a gross revenue of Rs. 12,485 in tolls, against Rs. 6,680 in 1896-97. In Murshidabad, a ferry steamer, belonging to Messrs. Hoare, Miller and Company, plied twice daily for a few months between Azimganj and Berhampore. A steamer of the East

Indian Railway Company plied for some months thrice a week between Azimganj and Dhulian, and another steamer of Messrs. Hoare, Miller and Company plied between Calcutta and Jangipur during a part of the year. The steamer service from Barisal to Khulna continues, while that between Kapilmani and Jhinkergacha was closed at the latter part of the year. Another steamer from Calcutta to Narainganj passes by Morrellganj by the outer route in the Sunderbans.

* * * * * * *

XXX.—LOCAL SELF-GOVERNMENT INSTITUTIONS.

98. The year under report was the twelfth in which the Bengal Local Self-Government Act, III of 1885, has been in operation in this Division. There was no change in the constitution of the 5 District Boards, 19 Local Boards or the 22 Union Committees. The number of meetings held by each District and Local Board and the average attendance of members at each meeting are shown below:—

District Boards.

District.	Number of meetings held.		Average attendance at each meeting.	
	1896-97.	1897-98.	1896-97.	1897-98.
1	2	3	4	5

Khulna ...	Khulna ...	9	10	6	5·7
	Bagerhat ...	8	8	8·2	6·0
	Satkhira ...	6	4	6·4	7·7

The number of meetings held by the District Boards of the 24-Parganas, Murshidabad and Khulna fell off during the year. The District Board of Murshidabad held only nine meetings. This is not satisfactory. The Board should hold at least one meeting each month. The average attendance of members at each meeting improved in all the districts except Nadia and Murshidabad, where it diminished. The Local Boards in the districts of Nadia, Murshidabad and Khulna and the Bangaon and Jhenida Local Boards in the district of Jessore, held less than 12 meetings, the number of meetings held by the Local Boards of Satkhira and Berhampore, viz., 4 and 5 respectively, being specially unsatisfactory. The average attendance of members was lower in the Local Boards of Diamond Harbour, Barasat, Krishnagar, Meherpur, Kushtia, Berhampore, Jessore, Jhenida, Narail, Khulna and Bagerhat, in the year under report than in the preceding year.

99. The following statement shows the ordinary income of each District Board, including grants for Provincial works, and the expenditure incurred on Civil works, sanitation and water-supply, medical relief and education for the past two years.—

District.	Year.	Ordinary income, including grant for Provincial works, if any.	Expenditure on—					
			Civil works, including Public Works establishment.	Sanitation and water-supply.	Medical relief.	Primary education.	Education other than primary.	Total education.
1	2	3	4	5	6	7	8	9
		Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
24-Parganas	1896-97 ...	2,51,815	1,71,303	12,751	1,892	35,421	13,655	49,076
	1897-98 ...	2,59,556	1,72,184	10,114	1,811	32,388	12,917	45,305
Nadia ...	1896-97 ...	1,22,915	61,997	3,116	1,774	19,217	11,881	31,098
	1897-98 ...	1,15,270	70,474	1,241	1,987	19,273	12,966	32,238
Murshidabad	1896-97 ...	96,478	53,346	4,345	1,150	15,876	5,297	21,173
	1897-98 ...	90,109	53,098	6,118	1,310	15,530	4,915	20,445
Jessore ...	1896-97 ...	1,99,905	1,13,023	3,880	5,465	28,298	12,285	35,583
	1897-98 ...	2,00,183	1,43,456	5,828	5,413	19,629	7,118	26,747
Khulna ...	1896-97 ...	1,04,837	52,069	2,469	2,573	19,190	8,776	27,966
	1897-98 ...	1,12,022	55,003	6,482	4,194	16,764	12,068	28,832

The expenditure on civil works increased in all the districts except Murshidabad, where it was slightly reduced; that on sanitation and water-supply fell off in the 24-Parganas and Nadia, while the other districts show a satisfactory increase. The expenditure incurred on medical relief increased in Nadia, Murshidabad and Khulna. The districts of the 24-Parganas, Jessore and Khulna show considerable reduction in the expenditure on primary education. This is due to want of funds and to no road-cess money having been allowed to be diverted to meet the expenses of education.

100. The following is a summary of the views of the District Officers on the working of the District and Local Boards and Union Committees:—

24-Parganas.—The District Board worked well. The members generally took an intelligent interest in the matters that came before them. There was some improvement in the working of the Local Boards. Their administration of district unmetalled and village roads and cattle pounds was satisfactory. The Union Committees worked fairly well. *Nadia.*—The members of the District Board took great interest in their duties. The powers of the Local Boards are very limited, and the part they play in the scheme of Local Self-Government is a very minor one. This is due, in the opinion of Mr. Gait, to the way in which Subdivisional Officers, whose influence and constant touring in the subdivision might be of great advantage, have been dissociated with the Local Boards. The funds at the disposal of the Union Committees have been well spent. *Murshidabad.*—The District Board is a useful body, and the members have worked well. The Local Boards are

useless and unpopular incumbrances, and deserve to be abolished, and their duties absorbed by the District Board, or partly delegated to village unions, when further trial has proved the usefulness of these bodies. *Jessore.*—The members of the District and Local Boards took an interest in their work. The Union Committees generally did the work as well as they could with the limited funds at their disposal. *Khulna.*—The District Board worked harmoniously. The Local Boards have not improved to any extent. The members did not take sufficient interest in their work The Union Committees have worked well. * * * * * *

Municipalities.

101. The total number of municipalities in the Division during the year was the same as in the previous year, viz., 40. The elective system was in force in all the municipalities, except in Garden Reach, Titagarh, Garulia, Chakdaha Khulna and Debhatta, where the Commissioners are appointed by Government. The privilege of electing a Chairman is enjoyed by all, except Garden Reach, Baruipur, Santipur, Baranagore, Chakdaha, Kandi and Moheshpur. It is only in the Garden Reach Municipality and in Chakdaha that Government exercise complete control in the appointment of both Commissioners and Chairmen. The general elections in certain wards of the Santipur Municipality, in the district of Nadia, which were postponed in consequence of an injunction issued by the Civil Court, as noticed in the previous report, were held during the year. There were altogether eight bye-elections held during the year, of which one failed in the Kumarkhali Municipality, and the vacancy was filled up by the appointment of a Commissioner under section 16 of the Municipal Act. The table below shows the total income, including balance, and expenditure of the municipalities in different districts, as compared with the preceding year:—

District.	Income.		Expenditure.		Remarks.
	1896-97.	1897-98.	1896-97.	1897-98.	
1	2	3	4	5	6
	Rs.	Rs.	Rs.	Rs.	
24-Parganas	4,86,754	4,99,900	4,25,385	4,21,547	
Nadia	1,08,903	1,19,605	1,01,172	1,07,311	
Murshidabad	1,06,853	1,05,148	91,814	94,257	
Jessore	23,836	31,656	30,023	29,389	
Khulna	37,145	27,041	30,668	21 003	
Total ...	7,73,490	7,83,350	6,79,062	6,73,507	
Increase ...	.....	9,860	.....	.....	
Decrease ...	.....	... ...	.....	5,555	

Thus, taking the Division as a whole, there was an increase in the amount of receipts and a decrease in the amount of expenditure. The increase in the receipts is mainly due to better collections in the districts of the 24-Parganas and

Nadia, and the decrease in expenditure to less work having been done towards town improvement with the Government grant in Khulna. The statement below shows the number of meetings held in each municipality during the past two years and the average percentage of attendance of Municipal Commissioners at each of them :—

Name of Municipality.	Number of meetings held in—		Average percentage of attendance at each meeting.		Remarks.

Debhatta	17	19	29·4	50 0	

102. In 25 out of the 40 municipalities, the average percentage of attendance was over 50. This is an improvement over the figures of the two preceding years, in which only 21 and 13 municipalities respectively showed such percentage. The percentage was specially high in the municipalities of Garulia, where it was 73·1, and Baranagore where it was 71·4. The most unfavourable result in this respect was shown by the Kushtia and Ranaghat Municipalities,

where the percentage was 17·8 and 28·06 respectively. In Kushtia each Commissioner barely attended on an average one meeting in five. Some important public works were executed in some of the advanced municipalities in the district of the 24-Parganas. In Cossipore-Chitpur 18 platforms were erected around the newly-erected standposts, 125 feet of pipes were laid and 2 pushtops erected. Three thousand two hundred and forty-five feet of pucka road-side and *nikasi* drains were constructed at a cost of Rs. 4,984 for the discharge of water in various parts of the town and a new road, 30 feet wide and 135 feet long, with footpaths was constructed. In Maniktala 2,023 feet of pucka drains were constructed at a cost of Rs. 2,038. In Baranagore the municipal trenching-ground was raised by excavating two tanks at a cost of Rs. 5,431. In Garulia, 1,100 feet of pucka drains were constructed, and the municipal office building was erected at a cost of Rs. 5,424. In Garden Reach, besides the repairs of the principal roads at a cost of Rs. 3,323, a pucka surface drain was constructed and a larger amount was spent on street-lighting.

103. On the administration of municipalities Mr. Gait makes the following remarks:

"In many ways the present system of municipal administration is excellent, and much of the work is better done than it would be if left entirely in the hands of an overworked executive. But the system has some grave defects, the chief of which is the elected Commissioners' fear of incurring unpopularity, which might result in their being unseated at the next election, coupled with an amiable desire to please and a tendency to move along the line of least resistance."

The desire on the part of the Municipal Commissioners naturally prevents the Municipal Commissioners from acting with the firmness which is so essential to good administration. The taxes are left uncollected, and remissions are freely granted when the arrears accumulate, thus causing a want of funds at the end of the year, and consequent postponements of desirable improvements.

* * * * * * *

FAIRS.

109. The most important fairs held in the 24-Parganas are—(1) the Ganga Sagor *mêla*, (2) Pir Gora Chand's *mela*, and (3) Ghazi Saheb's *mela*. The Sagor *mela* lasted from the 12th to the 14th January, the number of persons who attended it being 40,000. Sanitary and conservancy arrangements were made by the District Board. A hospital was provided. There were only one case of cholera (which ended fatally), and 27 cases of diarrhœa and fever, which were all cured. Pir Gora Chand's *mela* was held from 21st February to 3rd March at Harowa, in the Basirhat subdivision, and Ghazi Saheb's *mela* in June at Bansra, in the Sadar subdivision. The number of persons attending them aggregated 77,000 and 20,000 respectively. Sanitary arrangements were made partly by the District Board and partly by the owners of the lands. The principal fairs held in Nadia were the *Ras Jatra* at Santipur, the *Dol Jatra* at Ghosepara, and the *Pat mela* at Kulia. The fair at Santipur was attended by 125,000 persons, against 25,000 in the previous year. The increase is due to there being a special *yoga* on the day of the full moon which rendered the *Ras Purnima* day specially auspicious for bathing in the sacred river. The other two fairs were attended by 35,000 and 25,000 persons respectively. Sanitary and conservancy arrangements were made either by the local municipalities or by the owners of lands in which the fairs were held. There was no outbreak of cholera or other epidemic disease at any of the *melas*. The principal fairs in Murshidabad are the *Tulsi Behar méla* and the Kapileshwar *mela*, each lasting for nearly a month. No disease in an epidemic form is reported to have broken out in any of these *mélas*. No fair of any importance was held in Jessore or Khulna.

XXXVII.—GENERAL REMARKS.

118. The year under report was, in many respects, of an unusual character. The acute distress that prevailed in the latter part of the previous year in the several districts of this Division continued with greater intensity in the beginning of the year under report till the harvesting of the *bhadoi* crop, which proved to be a bumper one. People and cattle also suffered from scarcity of water occasioned by the drought of the previous year. The rich and well-to-do classes, who remained comparatively unaffected from these causes, did not escape the visitation of Providence. On the 12th June 1897 the districts of this Division, among others, were visited by an earthquake of unprecedented intensity and duration, causing serious damage to many buildings, and thus entailing heavy pecuniary losses to the rich. But before the year was out, with a good rainfall and a generally bountiful harvest, the people almost recovered their losses, and thus regained their previous standard of prosperity. Some permanent good has, however, been achieved during the calamities above mentioned. In the year under report, considerable addition was made to the water-supply of the several districts. To dig tank, sink wells, etc., and to provide work for the needy, the people availed themselves freely of the favourable terms under which Government granted loans during the famine, and excavated works in large numbers.

RESOLUTION ON THE ANNUAL GENERAL ADMINISTRATION REPORT OF THE RAJSHAHI DIVISION FOR THE YEAR 1897-98.

GENERAL DEPARTMENT—MISCELLANEOUS.

Dated Calcutta, the 29th November 1898.

RESOLUTION—No. 3462.

READ—

The Annual General Administration Report of the Rajshahi Division for the year 1897-98.

Mr. Nolan was in charge of the Division throughout the year, the present report being, however, submitted by Mr. O'Donnell. Complaint is again made of the dislocation to the district administration caused by the frequent transfers of officers. There were changes in all districts, though in Jalpaiguri, Darjeeling and Bogra one officer remained in charge for the greater portion of the year. Four subdivisions out of ten were not affected by transfers, the Rangpur district being particularly fortunate. The remarks made by the Officiating Commissioner have been read with interest, but the matter is no new one, and the disadvantages appertaining to it have long been recognised and minimised as far as present conditions permit.

2. *Tours and Inspections.*—Mr. Nolan left a detailed note of his tour, which appears to have been well planned and of great utility, including every district except Pabna, his visit to which was unavoidably postponed. The tours of District Officers generally coincided with the programme approved by the Commissioner and were well carried through. Among Subdivisional Officers, Mr. Herron at Kurseong alone failed to spend a sufficient time in camp. Mr. Nolan instances two cases in which the Subdivisional Officers were unable to move about their district on horseback—the one from want of a horse, the other from inability to ride, and generally doubts whether the tours of native officers in charge of subdivisions have yielded much tangible fruit. Mr. O'Donnell, in fact, doubts the necessity for extended tours of senior and experienced native officers who have little to learn regarding their own country. Considering the great differences existing between the various districts in the Province, this view cannot be maintained; moreover, such tours are not merely designed to teach the Subdivisional Officer the "realities of village life," but to enable him to see for himself the local needs of his particular jurisdiction, and to bring him into closer contact with the people who are placed in his charge. The orders as to the duration of tours, as contained in Government Resolution No. 749, dated 18th February 1896, already allow the exercise of discretion in the circumstances of different cases, but whether the Subdivisional Officer be previously acquainted with the rural economy of the country or not, the value of the personal inspection by him of the requirements of the particular tract for the efficient adminstration of which he is responsible, has always been recognised and cannot be disregarded.

The necessary inspections appear to have been made, with the exception of those of the Deputy Commissioner's office at Darjeeling, of the treasuries of Darjeeling and Bogra, and of the sub-treasuries of Alipur and Serajganj on the second occasion. The omissions have not been explained.

3. *Weather and Crops: Prices: Material condition of the people: Public health.*—In comparison with the average of the previous ten years, a small deficiency occurred in all districts, save Rungpur, in the year's rainfall, which is, however, described as good, and had the advantage of being well distributed. In Rangpur, where the excess over the normal amounted to 4·80 inches, parts of the country were flooded during September and October, and as it is reported that the beds of the rivers have been raised by the earthquake of 12th June 1897, there will continue to be danger of floods in the Gaibanda and Kurigram subdivisions until the channels have again been scoured out to their former depths.

With the exception of silk and indigo, the reported yield of all crops was better than in the preceding year, the outturn of the autumn and winter rice being given as 13·9 and 15·4 annas, respectively, for the Division. Although

thus short of the 16 annas, which, according to the accepted notation, represents merely an average crop, there appears no reason for supposing that they were below the normal, the popular interpretation of 16 annas as a bumper crop being always a disturbing factor in these returns The Officiating Commissioner appears to doubt the utility of the notation of percentages which will in future be used, but experience has yet to be gained of its working. It has always been recognised and admitted that the statistics of areas under the different crops and of the outturns of the different harvests are only approximately accurate, and it is impossible that they should be otherwise in the absence of any efficient or reliable village agency such as exists in other Provinces for the compilation of statistics; but the experience of the recent famine has clearly shown that it was possible to frame upon the basis of them, estimates of the extent of the crop failure and of the requirements of different districts for the supply of the deficiency in food-stocks, the results being on the whole singularly accurate.

The year is described as "one of fair comfort, crops being much more abundant, prices much easier, and health appreciably better than in the preceding twelve months." Owing to the failure of crops during 1896-97 there was some distress during the first few months of the year, but the people have now almost completely recovered after the good harvests of the year under report. As elsewhere, one of the results of the earthquake was to raise the wages of labour, especially of carpenters and blacksmiths. Except in Pabna, the year under report was generally more healthy than its predecessor. The damage done to the wells by the earthquake, noticeably in Bogra, fortunately occurred in the rainy season, when the evil effects were minimised, and no serious epidemic appears to have ensued in consequence. 5,028 more people than in the preceding year were vaccinated, but the variations were marked only in Pabna, where there was a considerable increase which has not been explained, and in Dinajpur, where there was a corresponding decrease which is attributed to the fact that operations were carried on over a less extensive area.

4. *Manufactures: Mines and Commerce.*—The balance of trade in the Division generally is maintained by the importation of manufactured articles, and the export of rice, jute and agricultural products. The manufacture of indigo is now of little importance, and the yield of silk (excluding the Serail Factory, for which figures were not furnished) amounted to 135,831 lbs. only in comparison with 137,574 lbs. during the preceding year. The jute hand-presses in Jalpaiguri and Serajganj turned out 314,566 bales between them, but the collapse of the Serajganj Jute Mills in the earthquake seriously interfered with the manufacture of gunnies. The number of tea-gardens in Jalpaiguri continues to increase, though in Darjeeling it has been stationary for the last three years, and the area under cultivation, both with mature and immature plants, is increasing in both districts. The gross yield amounted to 35,829,572 lbs. in comparison with 34,173,794 lbs. in the previous year, but the average yield per acre from mature plants fell off from 403 lbs. during 1896 to 375 lbs, owing to insufficient rainfall at the commencement of the monsoon. The Officiating Commissioner does not give a very favourable account of the state of the industry; the large increase in output has brought down prices to a level which leaves but a small margin for profit, and the opening up of China may enable that country once more to re assert its former rivalry. The yield of cinchona amounted to 673,698 lbs. only as against 717,222 lbs. in 1896-97. The output from the Daling Colliery increased from, 96 tons during the year preceding, to 1,356 tons.

The trade of the Division is almost entirely with Calcutta; the export of food-grains to the metropolis by road, river and rail showed a remarkable decrease from 451,242 maunds during 1896-97 to 57,667 maunds, that of rice and paddy having fallen from 309,228 maunds to 27,036 maunds. The result is attributed to scarcity in the rice-producing districts, but the harvests of the year were good, and in that preceding, when they were unfavourable, although there was also a decrease, it was not nearly so marked. Owing to the large crop the export of raw jute increased from 76,00,000 maunds to 86,00,000 maunds, but the destruction of the Serajganj Mills, already referred to, caused a decline of 2,400,000 in the number of gunny-bags exported. The decline of some eight lakhs of rupees in the value of cotton piece-goods imported and of about

one and a-half lakhs of maunds in the import of salt, is attributed to the after-effects of the bad harvests of the previous year.

In the trade with the frontier States of Nepal, Tibet, Sikkim and Bhutan there was a considerable increase in the quantity of food-grains imported into British territory and a decrease in the value of European cotton piece-goods exported from it; the export of those of Indian manufacture, on the other hand, increased.

5. *Civil Justice.*—The number of ordinary and Small Cause Court suits in the Division again show an increase, viz., from 62,502 during 1896 to 62,855 during the year under report. The number of suits disposed of by Munsiffs (59,981) was also slightly more, showing a proportion of 1 to every 153 persons of the population, which was approximately the same as that in the previous year. Mr. Nolan observes that the districts, as classified according to their respective degrees of litigiousness, correspond closely to the classification he would have adopted according to the prosperity of their raiyats. Dinajpur heads the list and Rajshahi brings up the rear. There was a falling off in the promptitude with which witnesses were examined alike in the Courts of District Judges, Subordinate and Small Cause Court Judges and Munsifs, the ratio detained over two days being respectively 5·5, 19·9 and 9·1 per cent., as against 2·1, 14·6 and 8·03 per cent. in the preceding year. On the other hand, more witnesses were examined except in the Courts of District Judges.

6. *Crime: Criminal Administration and Police.*—There are various unsatisfactory features about the criminal statistics for the year; the number of cognisable cases not only increased from 15,477 to 18,277, but while under miscellaneous and special offences there was an actual decrease, the excess was confined to the more serious heads; offences against the public tranquillity rose from 327 to 599, or nearly double the number of the previous year; serious offences against the person from 634 to 1,047, and against property from 4,739 to 5,165. Non-cognisable crime, on the other hand, decreased by 1,242 cases. The prevailing scarcity and high prices are alleged in explanation of these fluctuations, but Mr. O'Donnell expresses the opinion that crime as a means of livelihood is on the increase, and instances the large number of dacoities during the first six months of 1897 and 1898, which were 62 and 45, respectively. The decrease during the current year would tend to show that the abnormal circumstances of the early part of the year 1897 were a factor in the question, and a general opinion as to the growth of criminality could more suitably be deduced from a comparison of ordinary years, but the Lieutenant-Governor agrees that the matter is one calling for attention on the part of the District Magistrates.

7,574 cases were disposed of in Stipendiary Courts and 1,367 by Honorary Magistrates, the corresponding figures for the previous year being 7,366 and 1,884.

There was an increase of 3,740 in the number of witnesses examined by Stipendiary Magistrates, and the percentage of those detained over two days fell from 5·2 during 1896 to 4·4, which is so far satisfactory. The results were worst in Jalpaiguri (8·3) and Rangpur (9·3); in fact, the proportion in each of the three mufassal subdivisions of the latter district was over 12 per cent., notwithstanding the fact that the undue detention of witnesses at Gaibanda and Nilphamari has formed the subject of unfavourable comment for the past two years. Special attention is invited to the matter. On the other hand, although the number of witnesses who deposed before Honorary Magistrates was less by 1,109 than in the preceding year, yet the percentage detained over two days rose from 8·7 to 9·2. The results were particularly unsatisfactory at Jalpaiguri (16·1), Nilphamari (24·4) and Pabna (14·1). Out of the small number of 70 witnesses examined, the Rangpur Sadar Bench detained 28·5 per cent. over two days, and the Lieutenant-Governor agrees with the Commissioner that the fact that over 70 per cent. of the persons on trial before them were acquitted or discharged is probably to some extent due to sheer weariness on the part of the complainants of the law's delays. The proportion of decisions of Stipendiary Courts upheld on appeal improved, but fell off in the case of Honorary Magistrates. For the satisfactory improvement in this respect at Bogra credit is given by the Officiating Commissioner to the late Mr. Batabyal. The proportion of police cases remanded six times

and over fell from 5·8 to 5·2 per cent.; on the other hand, the percentage in Jalpaiguri rose from 2·9 to 9·1. About twice the number of prosecutions for bad livelihood were instituted in comparison with the previous year, the result doubtless of the increase in organised crime already referred to, but the fact that nearly 25 per cent. ended in acquittal would appear to indicate that more care might have been exercised in the selection of persons proceeded against. The results of the trials of Sessions cases showed a percentage of 62·5 cases ending in conviction in comparison with 67·9 during 1896. Of the fines realisable during the year under report, 75·8 per cent. were collected; the district of Rajshahi showing a large outstanding balance (Rs. 5,259) at the close of the year. The proportion of attendances of Honorary Magistrates to the number of times they were requested to was 72 per cent. in comparison with 78 per cent. in the previous year. The statistics bear out the usual experience that while those sitting singly can be induced to attend with fair regularity, it is most difficult to form a Bench on the days appointed. The Officiating Commissioner moreover, observes that the figures are misleading in so far as they include attendances of Honorary Magistrates even when by reason of the absence or unpunctuality of their colleagues no quorum was formed.

Considerable progress was made in the extension of the daffadari system and the formation of chaukidari unions. Mr. Nolan observes that the system of ordering extra parades as a punishment for chaukidars in lieu of fining has answered well. In the Lieutenant-Governor's opinion District and Subdivisional Officers cannot more usefully spend part of their time when on tour than in examining locally the details of village chaukidari assessment lists and remedying those cases where the well-to-do benefit at the cost of the poor, instances of which, there is much reason to fear, are far from uncommon.

7. *Land Revenue and Cesses.*—The year opened with a large arrear demand of Rs. 2,09,969, and the current demand of Rs. 52,13,789 was Rs. 18,341 in excess of that of the previous year, due chiefly to the resettlement of Terai jotes in Darjeeling. The collections amounted to Rs. 52,48,932, or 107 per cent. of the current demand, and the remissions to Rs. 5,639, leaving a balance outstanding on 31st March 1897 of Rs. 1,71,309. The usual comparison of the percentage of the current collections to the current demand in the different classes of estates, with the accepted standards, is made below:—

District.	Permanently-settled estates. Per cent.	Temporarily-settled estates. Per cent.	Government estates under direct management. Per cent.
Standard	99	95	90
Rajshahi	99·47	99·48	91·21
Dinajpur	99·63	...	100
Jalpaiguri	100	100	62·96
Darjeeling	52·6	100	98·97
Rangpur	99 85	96·30	100
Bogra	99·48	...	84·67
Pabna	99·81	92·96	64·28
Divisional average ...	99·64	98·96	72·79

The results are on the whole satisfactory. The short collections in permanently-settled estates in Darjeeling are only nominally so. The short collections in estates under direct management in Jalpaiguri, Bogra and Pabna are attributed generally to the scarcity in the early part of the year and to the fact that there were the arrears of the two preceding unfruitful years, but the total collections, however, did not equal the current demand in the two last districts. Only 26 estates were sold out of 576 liable to sale for arrears of land revenue. The settlement operations in the Darjeeling Terai and the Jaipur Government estate in Bogra were concluded during the year.

Out of a total grant of Rs. 32,363 for miscellaneous and sanitary improvements, Rs. 24,939 was spent in all; but the failure to utilise the balance has not been explained, an omission which should not recur in future years. Of this, 26 per cent. was expended on the construction of tanks and wells and 10 per cent. on drainage and irrigation works. In addition a sum of Rs. 14,890, contributed by the Darjeeling Improvement Fund, was expended on various

works of improvement. The grants for educational purposes and for the improvement of communications appear to have been made good use of.

There was a distinct improvement in the administration of the Arrear Collection Department, 78·9 per cent. of the total number of certificates to be dealt with being disposed of in comparison with 67·8 per cent. in the previous year. Progress was also made in clearing off the pending partition cases.

8. *Wards' and Attached Estates.*—The Sankarpur Ward's estate in Dinajpur was released during the year after having been for twenty-four years under the management of the Court, during which time the results were for the most part satisfactory. The bulk of the estate was surveyed and settled and a total increase of Rs. 26,734 obtained in the rent-roll by amicable agreement and by the reclamation and resettlement of waste and abandoned lands. Excluding this estate, the total demand due from others under the management of the Court amounted to Rs. 3,80,714, of which Rs. 1,93,014 was collected and Rs. 15,932 remitted. The percentage of total collections on total demand was 50·7 and on current demand 102·8 per cent. In spite of the instructions given last year that reports should be submitted of the conduct of managers who persistently disobey the orders of Government as to the removal from the accounts of sums shown as outstanding but in reality hopelessly irrecoverable, it is still stated that sufficient action was not taken in this direction. It is requested that no further time may be lost in giving effect to the frequently expressed wishes of Government on this subject.

9. *Excise: Stamps: Income-tax.*—There was a falling off of Rs. 66,769 in the income derived from excise, which is attributable to the prevalent high prices and scarcity. The season also was not a good one for the cultivation of ganja in the Naugaon subdivision of the Rajshahi district.

There was a small increase of Rs. 22,492 in the total stamp revenue collected. The prosecutions instituted for infringements of the Act decreased noticeably, from 72 during 1896-97 to 33.

The demand on account of income-tax was assessed at Rs. 3,32,201, or slightly in excess of that of the preceding year, and Rs. 3,28,708 in all were collected. The Commissioner remarks that the exercise of more vigilance in Rangpur might discover more assessees.

10. *Railways and Public Works.*—The surveys for three railway lines were completed during the year: from Nator to Boalia in Rajshahi; from Rampur Boalia *viâ* Godagari towards Malda; and from Godagari to Sultanpur. The construction of the line from Cooch Behar to Jainte was commenced, and progress was made both with the land acquisition and earthwork on the line from Sultanpur to Kaliganj.

Great damage was done to public buildings, especially in Rangpur and Bogra, by the earthquake. The loss is estimated at four lakhs of rupees. 242 tanks and wells were excavated by private individuals at a cost of Rs. 1,31,655 and 113 by District Boards at a cost of Rs. 20,631. The sum of Rs. 70,682 was expended by District Boards on original works, mostly on bridges and improvements of existing roads, and of Rs. 1,84,434 on repairs. The Commissioner observes that the funds at the disposal of District Boards, which are barely sufficient to maintain the existing roads, seldom permit of the construction of new lines of communication. A small expenditure was incurred on arboriculture, a matter to which more attention should be given, as under systematic treatment it would in the course of years considerably increase the income of District Boards.

11. *Education.*—The Commissioner complains of the difficulty experienced in giving an account of the state of education in the Division in the absence of the report of the Inspector of Schools; and the matter will be brought to the notice of the Director of Public Instruction. The information available is consequently somewhat meagre. The number of schools of all kinds declined from 3,942 to 3,886, and of pupils in them from 117,650 to 115,808; the decrease being most marked in the case of primary schools. The scarcity in the early part of the year and the disturbance of normal conditions after the earthquake appear to furnish sufficient explanation. The percentage of boys of school-going age at school declined consequently from 19·07 to 17·9 per cent.; the proportion being highest in Bogra (31·4) and lowest in Rangpur

(15·6). There are technical schools at Rangpur and Pabna. The total expenditure on education amounted to Rs. 6,33,976, of which Rs. 86,645 were contributed from Provincial revenues and Rs 1,53,604 by District Boards.

12. *Hospitals and Dispensaries.*—The number of dispensaries and hospitals open increased from 65 to 72, but their total income declined from Rs. 1,23,533 to Rs 1,17,012, the total of private subscriptions and donations being less by Rs. 17,168 than in the preceding year. The number of patients treated both indoors and out increased considerably and amounted to 316,537 against 289,157 during 1896-97. It does not appear that efforts have been made to increase the number of these very useful institutions. Persons locally interested might be induced to guarantee the means needed for erecting the requisite buildings and procuring the yearly supply of medicines, the District Board supplying the instruments and the necessary staff.

13. *Local Self-Government Institutions.*—The matter of the working of the Local Self-Government institutions is not dealt with by the Commissioner in detail pending the submission of the usual special report on the subject. The Lieutenant-Governor is glad to observe that it is stated that the party-feeling in the Dinajpur Municipality is dying out, and that the Commissioners are applying themselves vigorously to the sanitation of the town. The District Engineer of Jalpaiguri resigned, with forfeiture of pension, during the year: though the investigation into the charges against him was rendered unsatisfactory by the formation of party cliques during the consideration of the evidence adduced.

14. *Conduct of zamindars.*—The landlords of the Division generally are mentioned as having administered their properties in a satisfactory manner, but the non-resident landholders of Pabna are reported to leave their affairs too much in the hands of their subordinates, and to have done little to assist their raiyats during the recent scarcity.

15. The Lieutenant-Governor thanks Mr. Nolan for his able and successful administration of the Division and Mr. O'Donnell for his interesting report.

By order of the Lieutenant-Governor of Bengal,

F. A. SLACK,

Offg. Secretary to the Govt. of Bengal.

Extracts from the Annual General Administration Report of the Rajshahi Division for the year 1897-98.

* * * * * * *

III.—WEATHER AND CROPS.

(*a*) Weather.

10. The following statement shows the rainfall as compared with the average of the last decade:—

District.	Average of last ten years.	Actual of 1897-98.	Excess.	Deficiency.
1	2	3	4	5
Rajshahi	56·13	51·98	...	4·15
Dinajpur	66·56	61·04	...	5·52
Jalpaiguri	135·06	134·27	...	0·79
Darjeeling	123·75	117·00	...	6·75
Rangpur	81·71	86·51	4·80	... ..
Bogra	62·54	55·05	...	7·49
Pabna	57·13	54·81	...	2·32
	83·27	82·86	...	0·41

The rainfall of the year was deficient in comparison with the average of the last ten years in all the districts except Rangpur, where an excess of 4·80 inches was recorded. The deficiency is noticeable in Bogra, being 7·49 inches. Still I would describe the rainfall as good, without being excessive or short of agricultural requirements. It had the added advantage of being well distributed. There were good showers everywhere in April, and all the chief crops of the year germinated well. The rains of September and August were ample to provide moisture till the harvesting of the winter rice. In Rangpur, however, the Collector writes:—

"Excessive rainfall in the months of September and October caused floods in the Kurigram and Gaibanda subdivisions and to a lesser extent in Nilphamari. The beds of the rivers and low lands generally having been raised by the earthquake of 12th June, the flood water could not pass off in the usual way, and overflowed the banks and inundated the country. I am afraid the Gaibanda and Kurigram subdivisions, more especially the former, will be liable to floods every rain until the rivers have time to cut out channels of the old depth or to raise the surrounding country by depositing silt—either of which processes will necessarily take time. The floods did some damage to the winter rice crop in parts of Gaibanda, and also affected the outturn of sugarcane."

(*b*) Crops.

11. The following statement shows the outturn of the principal crops as estimated in annas in the returns prepared for the Agricultural Department:—

District.	Autumn rice.		Winter rice.		Jute.		Tobacco.		Indigo.		Sugarcane.		Silk.		Tea.		Maize.	
1	2		3		4		5		6		7		8		9		10	
	1896-97.	1897-98.	1896-97.	1897-98.	1896-97.	1897-98.	1896-97.	1897-98.	1896-97.	1897-98.	1896-97.	1897-98.	1896-97.	1897-98.	1896-97.	1897-98.	1896-97.	1897-98.
Rajshahi	6	14	6	14·5	15	15	7	13	13	8	9·3	13	9·5*	8·5	...	...	...	...

	9·4	13·9	8·3	15·4	11·3	15·7	11·7	13·6	10·3	9·7	13·4	14·8	9·5*	8·5	13·2*	13·7	11	14

* Revised figures.

From these figures it follows that the year was a fruitful one, all the principal crops showing a much increased outturn compared with the preceding year. There is said to have been a slightly smaller outturn of indigo and silk, but no cause for decrease has been reported. The outturn of both autumn and winter rice, though far better than that of 1896-97, fell below an average crop, if 16 annas is interpreted to mean an ordinary good crop, but as a matter of fact the departmental interpretation is never followed by subordinate officers or by the peasantry, to whom 16 annas means, and always will mean, a bumper or ideal crop. The Agricultural Department is knocking its head against a stone wall in trying to give a fictitious meaning to an idiom of the vernacular which is centuries old. This high authority on agricultural matters has, in my opinion, recently gone off at another tangent in introducing percentages—100 to represent an average crop. I will refer to this subject under "Statistical Enquiries." The confusion that results from arbitrary definitions is shown in the following remarks of Mr. Clark, the Collector of Rangpur :—

"The winter rice crop is reported as a 15-anna one for the whole district, but I must say that, if the average crop of the district is better than the crop I saw this year, the cultivators must be an exceedingly prosperous lot. I have certainly never seen a better average crop, and only occasionally a better crop on small areas of newly-cleared jungle land in Assam."

The autumn crop of Indian-corn in Darjeeling was excellent, whilst in Bogra and Dinajpur bumper crops of sugarcane were obtained.

IV.—PUBLIC HEALTH.

12. The rate of recorded mortality in the different districts was as follows:—

District.	Deaths per thousand.	
	1896.	1897.
1	2	3
Rajshahi	40·34	36 2
Dinajpur ...	37·71	34·79
Jalpaiguri ..	39·89	34 03
Darjeeling ...	51·43	42·16
Rangpur ...	37·80	38·12
Bogra ...	30·36	29·72
Pabna ...	36·35	40·05
Total ...	37·74	36·2

These figures are admittedly inaccurate, but they form a relative guide. Thus it may be safely said that the past year was a more healthy one in Rajshahi, Dinajpur, Jalpaiguri, and especially in Darjeeling than the preceding one, whilst in Pabna it was less healthy. At the census of 1891 it was ascertained by actuarial treatment of the returns that the average death-rate of Northern Bengal was 42·2, so that in both years under consideration it is probable that many deaths, chiefly those of infants, escaped registration by the rural police. Still in the past ten years there has been a great improvement in these statistics.

Mr. Nolan has left the following observations on the subject :—

"It will be observed that the death-rate was considerably lower than in the previous year, and that the improvement was very marked in Rajshahi, the district in which the

conditions most nearly approximated to those of famine. The District Magistrate attributes it to the heavier rainfall and the higher flood of the Ganges. He adds:—

'The most unhealthy part of the district is a tract comprising the thanas of Boalia, Puthia, Nator, Bariaigram, and Singra, in which there is a large number of swamps and some dead rivers. The general complaint is that the channels which at one time connected the *bils* and the inland rivers with the Ganges have been obstructed, so that in a year of heavy rainfall the rain water does not find its way out and makes the soil water-logged. An old silted-up channel running northwards from the Ganges at a point some seven miles to the east of the sadar station was re-excavated as a test-relief work in the early part of the year with the result that a large tract of low-lying country was inundated with water conveyed through this channel as soon as the Ganges reached a high flood level. The effect on the health of the population of the tract supplied with water through this channel was beneficial. The decrease in mortality was marked in the Darjeeling hills, but the health was even worse than usual in the Terai. The slight rise in Rangpur was due to an epidemic of cholera, which carried off 7,250 persons.'

"It was most severe along the course of the great rivers—the Brahmaputra, Tista and Dharla, a fact which the Magistrate properly quotes as adverse to the theory that it was caused by the filling up of wells by the earthquake. The Civil Medical Officer of Bogra observes that in his opinion most of the cases reported as cholera were really dysentery or diarrhœa. Mr. Batabyal considers that cholera is spread by the washing of jute in stagnant pools, and it certainly recurs at the season when this is done, that is at the close of the rains. He observes:—

'In the alluvial tracts the earthquake spoilt almost all the drinking-water wells, but the bad effect was not very much felt, as the calamity occurred in the rainy season and the tracts in question were inundated. The health of the people therefore did not suffer from scarcity of water, although the wells were spoilt. There was a serious outbreak of cholera during the latter part of the year, and it was most marked in thana Shariakandi, which accounts for nearly half the deaths from this disease in the whole district throughout the year. Medical aid was sent to the suffering people in this thana *gratis* at the cost of the District Board. Probably the Civil Medical Officer is right in thinking that a good many of those cases were not really cholera, but an aggravated form of diarrhœa brought on by the use of new rice at the end of a season of scarcity.'

"In Pabna alone was there an increase in the number of deaths from the usual cause, which is fever. It is attributed to the small rainfall of 1896, which left a deficiency in the first months of 1897."

ACCIDENTAL AND SUDDEN DEATHS.

13. The figures showing total number of accidental and sudden deaths in 1897 were as follows:—

District.	Men.	Women.	Children.	Total.	Total for 1896.	Remarks.
1	2	3	4	5	6	7
Rajshahi ..	237	317	499	1,053	755	
Dinajpur ...	205	212	370	787	830	
Jalpaiguri ...	101	49	91	241	215	
Darjeeling ...	51	20	18	89	67	
Rangpur ...	217	209	362	788*	660	* Includes persons killed in the earthquake of 12th June 1897.
Bogra ...	116	162	251	529	419	
Pabna ..	139	183	339	661	527	
Total ...	1,066	1,152	1,930	4,148	3,473	

No district officer has recorded any comments on the variations in these figures, though in Rajshahi at least there was much reason for remark.

(*b*) Vaccine operations in the districts.

14. The following table shows the statistics regarding vaccination in 1897-98 and in the previous year in the several districts, *exclusive* of operations in municipalities:—

District.	Number of thanas in which the operations were carried on.		Number of villages in which the operations were carried on.		Number of persons vaccinated.		Successful.		Unsuccessful.		Unknown.	
	1896-97.	1897-98.	1896-97.	1897-98.	1896-97.	1897-98.	1896-97.	1897-98.	1896-97.	1897-98.	1896-97.	1897-98.
1	2	3	4	5	6	7	8	9	10	11	12	13
Rajshahi	13	14	2,248	2,153	43,263	48,740	42,996	47,590	277	1,144	...	...
Dinajpur	16	16	4,162	2,760	54,583	45,423	52,104	42,719	2,173	2,543	246	161
Jalpaiguri	8	8	(*a*)	(*a*)	19,501	18,832	18,753	18,198	748	634	..	...
Darjeeling	4	4	No villages.		19,581	20,402	19,317	20,131	102	96	132	175
Rangpur	16	16	1,708	1,769	47,455	47,456	47,017	47,060	438	374	...	12
Bogra	9	8	1,100	963	19,393	18,300	19,211	18,182	182	118	...	
Pabna	8	8	1,230	1,530	30,186	39,857	29,884	37,827	302	2,030	...	..
Total ...	74	74	10,518	9,177	2,33,962	2,38,990	229,362	231,673	4,222	6,960	378	348

(*a*) The Civil Medical Officer has not furnished the figures.

These figures show a considerable increase in the number of persons vaccinated in the rural tracts of the districts of Rajshahi, Darjeeling, and Pabna, with some falling off in the remaining four districts. The increase is large only in Pabna, and the decrease is marked only in Dinajpur, where it is attributed to the fact that "during the year under report only one-half of the district was taken up" for vaccine operations; while the decrease in Bogra is due to the transfer of thana Nawabganj to the Rajshahi district. Out of 238,990 persons vaccinated in the Division, the operations proved successful in 231,673 cases, *i.e.*, in 96·9 per cent., against 97·6 per cent. in the preceding year.

The percentage of failure, (3·1) seems larger than it should be, and it would seem to suggest that the lymph employed is not always in good condition. Probably, in a climate like this, the fact is not to be wondered at.

(*c*) Vaccine operations in municipalities.

15. The following table shows the statistics regarding vaccination in municipalities in 1897-98 and the previous year:—

District.	Name of Municipality.	Number of persons vaccinated.		Successful.		Unsuccessful.		Unknown.	
		1896-97.	1897-98.	1896-97.	1897-98.	1896-97.	1897-98.	1896-97.	1897-98.
1	2	3	4	5	6	7	8	9	10
Rajshahi	Rampur Boalia	1,067	1,118	849	926	206	192	12	...
	Nator	122	219	122	217	...	2	...	...
Dinajpur	Dinajpur	610	535	441	393	109	132	60	...
Jalpaiguri	Jalpaiguri	394	482	320	305	74	177	...	...
Darjeeling	Darjeeling	1,835	1,820	1,762	1,739	73	88	...	2
	Kursoong	615	249	763	242	19	4	28	3
Rangpur	Rangpur	547	406	500	372	47	31	...	5
Bogra	Bogra	193	222	166	202	27	20	...	...
	Sherpur	161	150	148	145	15	5	...	...
Pabna	Pabna	984	727	698	470	226	251	...	...
	Sirajganj	700	637	496	475	204	162	...	...
	Total ...	7,358	6,566	6,258	5,486	1,000	1,070	100	10

There has been a considerable decrease in the number of vaccinations in towns as a whole, but an increase in the municipalities of Rampur Boalia,

Nator, Jalpaiguri, Darjeeling, and Bogra. The increase in Jalpaiguri is attributed to the fact that the operation was carried on throughout the year without interruption, while in Bogra it is due to the vaccination of a number of adult up-country coolies, working on the Brahmaputra-Sultanpur Branch Railway. Out of 6,566 persons vaccinated, the operation was successful in 5,486 cases, *i.e.*, in 82·6 per cent. The contrast between the result of the operations in the rural parts of the districts and in the towns is very striking. It suggests the high percentage in rural areas is unreliable, and possibly to be attributed to incorrect reporting. The Collector of Rangpur observes that "I do not myself believe that this figure can be accepted as absolutely reliable. Either the testing is not to be depended upon, or many of the unsuccessful cases are not brought into account. Probably both of these causes are really at work." If the town percentage is to be accepted as true for both urban and rural tracts, it would mean that one out of every five cases is a failure, which would be a fact requiring serious consideration. If it also means that 18 per cent. of the population were unprotected, the only matter of astonishment is that small-pox is not epidemic as well as endemic.

V.—MATERIAL CONDITION OF THE PEOPLE.

16. The following remarks of the Collector of Rajshahi apply to the whole Division, except the tea areas in the Duars, the Terai, and the Darjeeling hills:—

"The bulk of the population of this district consists of agriculturists, and their material condition depends entirely upon the outturn of their crops. Owing to failure during 1896-97 much distress prevailed among the people up to the end of August 1897. Prices ruled very high, and relief works had to be opened at different places. No trace of distress, however, remained in December, when a fair outturn of the winter rice was obtained, and the agricultural population has now almost completely recovered from the effects of the late scarcity. The condition of the middle class, with small fixed income, was very bad. Their income remained stationary, while the cost of living greatly increased."

The Collector of Rangpur adds a little colour to the picture:—"The soil," he writes, "is fertile and easily worked, and though the rent paid by the actual cultivators is in many cases somewhat high (always so where the zamindar-jotedar-chukanidar-raiyat system prevails), there is in ordinary years an abundant margin for the food of himself and his family, for clothes—an item on which his expenditure is not excessive, for a few ornaments for his women-folk, and, most expensive luxury of all, for a case in the civil or criminal court. For some reason or other the bone of contention, at any rate in the criminal courts, is usually a woman—his own wife or his neighbour's or some recently bereaved widow, whose husband has left her with a little property. The morals, indeed, of the lower classes leave much to be desired. Opium, ganja, and country liquor are not very largely used, much less so than they used to be, as I find the quantity of opium sold in 1871-72 was close upon 166 maunds, or about three times the quantity sold now. The umbrella is of course universal; kerosine oil is used by the poorest, and corrugated-iron is extensively employed throughout the district for roofing purposes. Comparing the prices which prevailed some 25 years back with those now ruling, there has been a very marked increase in most of the ordinary articles of food. Thus common rice sold in December 1872 in Rangpur at 25 seers to the rupee; this year, at the same time, it was selling at 11 seers. Probably this rise is largely due to the increased facilities for exportation. The increased amount of ready money thus brought into the district probably fully compensates the cultivator for any increased price that he may have to pay for the few articles he has to buy. There is no large class of poor gentry, nor is the landless labourer common amongst the indigenous population."

The past year may be said to be one of fair comfort, crops being much more abundant, prices much easier, and health appreciably better than in the preceding twelve months.

VI.—EMIGRATION AND IMMIGRATION.

Emigration.

17. There is very little to report under this head. Six hundred and seventy-two men were recruited in Darjeeling for military service under Government, of whom 439 went as muleteers on the Tirah expedition and 233 to the Burmah Rifles and Frontier Police. Two hundred coolies were also supplied to the Lushai survey party in Silchar for transport work. Their enlistment does not really, constitute emigration from this Division, as they were for the most part immigrants from Nepal. There is said to have been some movement in quest of labour amongst new Santhal and Dhangar settlers in the Naugaon subdivision of Rajshahi. They seem to have found their new homes less profitable than they expected, and have "trekked" again.

Immigration.

18. The tea-gardens of Darjeeling and the Western Duars receive their coolies from two chief sources—Nepal and Chota Nagpur. Their number is steadily increasing with the extension of cultivation in the older gardens and the opening out of new gardens. The cooly population, however, is always fluctuating, and has its period of ebb and flow. At the commencement of the tea season large numbers come in, and many return to their homes when the busy season is over. Those from Chota Nagpur often settle permanently in the Duars and take to agriculture.

The influx of up-country labourers in the cold season from Jaunpur, Saran, and Ghazipur still continues, and, in fact, goes on increasing. They find employment as harvesters, thatchers, palki-bearers, road coolies, and so forth. The number of Santhals migrating to Dinajpur and Rangpur is appreciable. The Collector of the latter district observes:—

"There are some Santhal colonies in the south of the district and one or two Garo villages near Ulipur in the south-east corner. They appear to be increasing slowly in size, but the latter settlers at all events are losing much of their individuality, and will probably in a few years be scarcely distinguishable from the indigenous Rajbangsis. In one village which I visited I could only find one set of the ponderous earrings, which are so characteristic of the Garo women, and even this had been discarded, and none of the younger girls had their ears pierced at all."

VII.—PRICES OF FOOD AND LABOUR.

(*a*) Prices of food.
(*b*) Do. of labour.

19. The price of rice, which is the staple food of the Division, fell from 9 seers, the average rate per rupee at the close of the last year, to 12½ seers; that of wheat also declined, but that of gram showed a slight increase. The prices, however, of rice and wheat were not so low as in 1895-96. There was a rise in wages in some places. In Rajshahi all forms of labour commanded a higher remuneration, except that of common blacksmiths, while in Dinajpur and Rangpur the increase appeared in the wages only of masons and carpenters, whose labour was in much demand to repair the damage done to buildings by the earthquake. In Pabna also there was a slight increase in the earnings of carpenters. In the other districts wages remained stationary.

* * * * *

IX.—TRADE AND COMMERCE.

24. The trade of the Rajshahi Division is almost entirely with Calcutta, and the statistics of the traffic between it and the metropolis cover nearly all the mercantile transactions of the seven districts which form the Division. There is a small trade with Tibet, which will be separately noticed, and petty local transactions with neighbouring districts, but they do not form an appreciable portion of the total trading operations of the Division.

25. The following statement shows the export trade of the Division with Calcutta by various routes:—

Statement No. III—Showing the trade between Calcutta and the districts of the Rajshahi Division carried by rail, road, river (country-boat and steamer) during the year 1897-98 as compared with the preceding year.

Exports from the Rajshahi Division to Calcutta.

26. Jute, raw and manufactured, is the staple product of the Division. There was an increase of about 10 lakhs of maunds in the export of jute, raw, during the year under report, due chiefly to the large crop of this fibre. The short rice harvest in all the districts, which are jute-producing also forced the people to part with their stocks of jute in order to buy grain. The decrease in gunny-bags to 6,392,409 from 8,830,641 in the preceding year was due to the destruction of the Sirajganj Jute Mills in the earthquake of June 1897. Only 57,667 maunds of food-grains were exported, against 4,51,242 maunds in the previous year, and this great decrease was entirely caused by the scarcity prevailing in most of the rice-producing districts. The increase in the quantity of tobacco exported was nominal and needs no comment.

27. The subjoined table shows the import trade of the Division from Calcutta under the principal heads of commodities during the year under report as compared with 1896-97:—

Statement No. IV—Showing the trade between Calcutta and the districts of the Rajshahi Division carried by rail, road, river (country boat and steamer), during the year 1897-98, as compared with the preceding year.

The value of European cotton piece-goods imported fell from 108 lakhs to 99 lakhs of rupees, in consequence of the bad harvest of the previous year and the impoverished condition of a large section of the population. The import of salt likewise decreased by about 2 lakhs of maunds. The increase in the import of kerosine oil shows the steady extension of its use.

28. The following statement No. V shows the rail-borne up and down traffic of the Division:—

BENGAL RAIL-BORNE TRAFFIC.

The most noticeable facts are an increase in rice imported from 6,19,361 maunds in 1896-97 to 7,66,908 maunds in the year under review. Refined sugar increased from 52,115 maunds to 75,125, whilst unrefined sugar decreased from 1,60,136 to 1,43,245 maunds. The import of salt also fell from 9,02,701 to 6,70,605 maunds and of coal from 2,53,273 to 2,04,727 maunds. Excluding jute and rice, noticed above, the most important change in export was a decrease in tea from 4,37,419 to 3,79,952 maunds, in spite of a large increase in the area under tea cultivation in the Jalpaiguri Duars.

There was a considerable increase in the quantity of food-grains imported into the Division from the Frontier States during the year of report and a less noticeable increase in the import of Indian cotton piece-goods, wool, raw and manufactured, ghee, and most other articles of commerce. As to the export trade, there was a decrease in European piece-goods, but an increase in Indian cotton piece-goods, while the export of wool, manufactured, fell unusually low.

* * * * *

XXIII.—RAILWAYS AND OTHER PUBLIC WORKS.

(*a*) Railways and railway feeder roads.

79. The survey operations commenced last year for a branch railway from Nator to Boalia in Rajshahi have been completed during the year under report. This line would form a link in the most important cross-country railway in Bengal, viz., that from Hazaribagh to Sirajganj *viâ* Giridhi, Dumka, Nalhati, Azimganj, and Nator. Two other lines were surveyed—one from Rampur Boalia *viâ* Godagari towards Malda, and the other from Godagari to Sultanpur crossing the Borind.

A sum of Rs. 383 was spent in surveying the projected tramway line from Raiganj to Lahiri in the Dinajpur district. The construction of the narrow gauge railway from Cooch Behar to Jainte, 31½ miles *viâ* Alipur in the district of Jalpaiguri, was commenced in the latter part of the year. The

Cooch Behar State Railway will terminate on the west bank of the river Kaljani, and the remaining portion of the line will be the property of Government. The whole of the land required for the branch line from Sultanpur to Kaliganj *vid* Bogra was demarcated, and the first 35 miles acquired. The earthwork of about 40 miles and the bridging of the first fifteen miles were also completed during the year. A telegraph line from Bogra to Sultanpur was erected along the embankment.

The railways of this Division suffered very severely during the earthquake, and Mr. Clark, the Collector of Rangpur, expresses the general opinion of the public when he says that, "considering the damage done, the Railway authorities worked wonders in restoring communication as soon as they did."

Railway feeders.

The State grant for the construction of feeder roads in Dinajpur and Pabna was withdrawn in consequence of the stress of other financial demands, and nothing was therefore done in this connection during the year.

Other public works.

Imperial and provincial buildings were maintained under the supervision of the District Boards till October 1897, when their charge was resumed by the Public Works Department. The earthquake of the 12th June 1897 did very great damage to the public buildings in this Division, specially to those at Rangpur and Bogra, many of which were entirely wrecked, the damage done being estimated at four lakhs of rupees. The progress made in their reconstruction and repair has been slow, and Government has recently increased the engineering staff.

(*b*) Steamer service.

80. The steamers that ply between Goalundo and Patna, touching at Damukdia, Rampur Boalia, and Godagari, are reported, as they were last year, to have worked unsatisfactorily. The India General Steam Navigation Company maintained the steam-ferry service between Pabna and Kushtia. The District Board is contemplating the stoppage of the subsidy of Rs. 5,000 paid annually to the Company, as this important communication should be self-supporting and yield a profit to good management.

(*c*) Tanks, wells, roads, &c., constructed, &c., by private individuals and by the District Boards.

81. The total number of tanks and wells, roads and bridges, and other works of public utility constructed and repaired during the year 1897 by private individuals at their own cost, together with their cost, are shown in the following table:—

Districts.	Number of tanks and wells.	Cost.	Number of roads and bridges.	Cost.	Hospital, school, and other public utility.	Cost.
1	2	3	4	5	6	7
		Rs.		Rs.		Rs.
Rajshahi ...	173	92,013	...	...	...	...
Dinajpur ..	17	5,665	...	...	...	...
Jalpaiguri ...	...	...	4	4,118	3	450
Darjeeling ...	...	...	...	...	...	...
Rangpur ...	11	2,865	...	...	..	...
Bogra ...	19	12	1	200	...	...
Pabna ...	22	30,200	1	2,000	...	...
Total, 1897 ...	242	1,31,655	6	6,318	3	450
Total, 1896 ...	131	82,599	7	6,790	8	7,800

There has thus been a great increase in the number of tanks excavated by private persons. Hindus justly regard this piece of public work as a pious act of charity, and the continuance of this opinion is to be devoutly wished for.

The following table shows the number of tanks and wells sunk, excavated or repaired by the several District Boards, and the amount expended on this account during the year:—

District.	Number of tanks excavated or re-excavated.	Cost.	Number of wells sunk or repaired.	Cost.	Total cost.	Remarks.
1	2	3	4	5	6	7
		Rs.		Rs.	Rs.	
Rajshahi	1	100	8	2,303	2,403	
Dinajpur	...	...	18	1,708	1,708	
Jalpaiguri	...	...	4	480	480	
Darjeeling	...	...	...	...	...	
Rangpur	...	...	57	1,528	1,528	
Bogra	...	...	7	500	500	
Pabna	4	10,433	11	3,579	14,012	
Total ...	5	10,533	108	10,098	20,631	

The great majority of Boards wisely, as I believe, confine their efforts to the construction of wells. The results obtained in Pabna, where this practice has been departed from, are not commensurate with the cost. Moreover, as appears in the last paragraph, it is safe to leave the excavation of tanks to private charity. From the sanitary point of view a well is a much safer source of water-supply if it is properly built, with a high parapet and a wide platform to prevent soiled water percolating back into the well. On the other hand, it is difficult to prevent a tank from being used as a bathing place, not only by men but by animals. Moreover, a tank is fed principally by surface flood water, which is generally extremely impure and often loaded with sewage. In wards' estates I always refuse sanction to new tanks, whilst every effort to extend well-making is encouraged.

* * * * * * * *

FAIRS.

99. The Nekmurd fair held on the borders of Dinajpur and Purnea during the month of April is the most important in the Division. The following statistics regarding it were collected by police agency. I fear they are not very accurate.

I.—LIVE-STOCK.

Description of animals sold.	Number sold.		Total prices realised.		Average price per head.		Remarks.
	1896.	1897.	1896.	1897.	1896.	1897.	
1	2	3	4	5	6	7	8

II.—GOODS.

Description of Articles.	Number of shops.	Value of articles offered for sale.	Value of articles sold.	Remarks.
1	2	3	4	5
		Rs.	Rs.	
English cloth .. ... / Country ,, ...	225	1,00,500	47,000	
Brass utensils	35	54,000	25,000	
Spices, &c.	80	20,000	18,000	
Ironware	50	4,000	3,400	
Wood cart wheels, boxes, &c. ...	100	8,000	7,000	
Articles of food, sweetmeat, &c. ...	175	40,000	38,000	
Miscellaneous, including fancy articles, blankets, durries, &c.	350	60,000	40,500	
Earthenware	60	2,000	1,600	

Three rather large fairs are annually held in Jalpaiguri. The fair at Alipore lasted from 10th to 26th January. The estimated value of articles reported to have been sold was Rs. 5,000, against Rs. 3,500 in the preceding year, both figures being probably much below the fact. A grant of Rs. 200 was made by Government to meet expenditure connected with this fair, chiefly on conservancy. This gathering helps to promote trade between Bengal and Bhutan. The Falakata fair commenced on the 26th January 1898, just after the breaking of the Alipore fair and lasted for more than a fortnight, the Government grant being Rs. 300. The fair at Jalpesh, which is the largest and the oldest in the district, was held on the 19th February 1898 and lasted till the 8th March 1898.

The annual agricultural show at Kalimpong, in the district of Darjeeling, was held on the 24th and 25th November 1897 and was well attended, the total number of visitors, including Europeans, being estimated at 5,000. Rupees 500 were contributed by the Darjeeling Improvement Fund, Rs. 500 by the Agricultural Department, and Rs. 465 by the Veterinary Department of Government to meet expenses, and a considerable amount was also raised by local subscriptions. Veterinary-Captain Raymond, who visited the fair, found the number and quality of Bhutia ponies above those of the preceding year. Mules were also distinctly better; cattle from Nepal, both bulls and cows, are reported to have been very good.

* * * * * * *

XXXVII.—GENERAL REMARKS.

107. The great earthquake of the 12th June is the most memorable event of the year, and it will be a very long time before all traces of it disappear or the people of the country forget it. It will very probably form an era, from which occurrences will be dated in future years. Nearly every masonry building in the Division was seriously injured, and a large number, including several public offices, were reduced to ruins in a few minutes.

Amidst the distress, which prevailed during the year, the Diamond Jubilee of Her Most Gracious Majesty the Queen-Empress of India was celebrated throughout the country with great loyalty.

Frontier relation with Nepal and Bhutan continued to be friendly, whilst nothing of importance arose in connection with the Sikkim State.

In regard to the Provident Fund Companies, described at some length in last year's report, the Collector of Rangpur writes :—

"The funds which were so conspicuous last year are now practically defunct, some having collapsed quietly and others having been wound up by the District Judge under the Companies Act."

The Collector of Pabna also records the following remarks :—

"I have had some experience of these Loan Companies or Benevolent Societies in another district, and am strongly of opinion that Government would be doing a kindness to the *raiyat* if it stepped between him and them. The *raiyat* will believe anything when he sees a prospect of obtaining a loan of money, whilst the company promoters have usually the best intentions in the world, but unfortunately are without subscribed capital, and failure is bound to come sooner or later."

RESOLUTION ON THE ADMINISTRATION REPORT OF THE STATIONERY DEPARTMENT FOR 1897-98.

FINANCIAL DEPARTMENT—MISCELLANEOUS.

Calcutta, the 28th November 1898.

RESOLUTION—No 6095Mis.

READ—

Letter No. 690B., dated the 30th August 1898, from the Board of Revenue, submitting the Report on the Administration of the Stationery Department for the year 1897-98.

THE following statement compares the value of the stocks, receipts, and issues of the Stationery Office for the past two years:—

	1896-97. Rs.	1897-98. Rs.
Value of stores at the beginning of the year	7,70,778	7,21,058
Gain (+) or loss (—) by revaluing the opening balance at the issue rates of the year	+50,327	—25,337
Corrected value of stores at the beginning of the year	8,21,105	6,95,721
Value of stores received during the year ...	23,74,970	29,26,351
Total ...	31,96,075	36,22,072
Value of stores issued during the year ...	24,75,017	29,41,253
Value of stores in stock at the close of the year	7,21,058	6,80,819
Gain (+) by valuing the stores in stock at the close of the year 1897-98 at the issue rates of the year	....	+36,435
Corrected value of stores at the close of the year	.....	7,17,254

2. In accordance with the orders of the Government of India, a price-list is prepared every year in the Stationery Office, based on the average of the prices of the previous nine months, and the issues of the year are valued according to this list. The receipts, however, are originally valued with reference to the invoice and actual prices paid for the articles, plus a percentage for charges, and the value of the stock balance at the end of the year as hitherto shown merely represented the difference between the value of the receipts and issues thus calculated, added to or subtracted from, the value of the stock balance at the beginning of the year. This of course was merely a paper value. In order, therefore, that the accounts of each year might be closed once for all, the Superintendent of Stationery was directed in future to calculate the closing balance of each year at the issue rates of that year. When this closing balance is carried forward to be the opening balance of the following year, it is recalculated according to the rates of that year. In this way the transactions of each year are complete in themselves, and the closing balance will correctly represent the value of the stores in stock at the end of the year. Effect has been given to these orders in the present report.

3. The value of stores received and issued during the year rose by Rs. 5,51,381 and Rs. 4,66,236, respectively, as compared with the preceding year, but the value of the stores in stock at the close of the year decreased by Rs. 3,804. The increase in the value of the receipts was due to an advance of Rs. 1,67,469 in the value of imported stores, of Rs. 2,90,372 in the value of country-made paper, of Rs. 39,752 in the value of country-made miscellaneous articles, and of Rs. 17,300 in the value of English stores purchased locally.

The rise in the value of imported stores was mainly due to the receipt from England of 100 tons of various kinds of paper for comparison with similar paper locally manufactured and of certain stores due on indents of the previous year; while that in the value of paper locally purchased is attributed to the introduction into the North-Western Provinces and Oudh of water-marked paper for use with adhesive Court-fee stamps; to the supply of different kinds of paper to the Government Press at Allahabad on account of the previous year's indent, which at the request of the indenting officer was deferred till March 1897; to an increase in the demand of the Postal Press at Aligarh and of the Presses under the Government of India, and the Governments of Bengal, Punjab, Burma, and Central Provinces; and to the increased requirements of regimental officers on field service during the Frontier disturbances. Larger purchases of cream-wove envelopes from the Bally Paper Mills, of leather envelopes for regimental officers on field service, and of water-colours, writing and binding materials and miscellaneous articles enhanced the value of country-made miscellaneous articles. The advance in the value of English stores purchased locally is ascribed to the Superintendents of Government Printing, India and Bengal, having increased their demands for tub-sized foolscap paper and hand-made medium and bank post papers; to the purchase of cream-laid foolscap and note papers of special kinds required for certain high officers; to the more extensive purchases of cyclostyles, type-writers and their accessories, travelling and screw-top inkstands and automatic pencils for staff and regimental officers on field service, and of padlocks, the demand for which increased considerably.

4. The value of stores issued to Local Governments, including Vernacular Departments, rose by Rs. 1,76,006, and all the Provinces, except Upper Burma, shared in the increase. The largest increase, amounting to Rs. 62,032, took place in Bengal. The value of stationery used by officers and departments of the Government of India rose by Rs. 2,07,014. The fluctuations will, as usual, be explained in the reports on the consumption of stationery which the Superintendent submits to the several Local Governments and to the Government of India. The issues to the Postal and Telegraph Departments show an increase of Rs. 28,843.

5. The stock of country-made articles in store at the close of the year has been further reduced, and now represents less than one month's consumption. This is satisfactory, as it is bad economy to keep any considerable stock of articles which can be procured as required.

6. The quantity of water-marked paper issued for use with adhesive Court fee stamps rose by 19,300 reams, and its value by Rs. 62,725. The increase is mainly attributable to the fact that the Government of the North-Western Provinces and Oudh, which purchased this kind of paper for the first time during the year under review, were supplied with 16,294 reams. There was also an increase in the amount supplied to Bengal, Assam, the Punjab, and the Native States of Orissa, and a decrease in the amount supplied to the Central Provinces and the Hyderabad Assigned Districts.

7. The income and expenditure of the Stationery Department amounted to Rs. 4,953 and Rs. 1,09,877 against Rs. 5,044 and Rs. 1,03,601 respectively in the previous year. The decrease in the receipts was mainly due to the realisation of a smaller amount than in the year before, on account of the 10 per cent. commission on the sale of stationery supplied on payment; while the advance in expenditure is chiefly attributable to an increase under the head "Packing cases" and in other expenses incidental to the despatch of a large number of cases of water-marked paper to the North-Western Provinces and Oudh, and of numerous cases and parcels of stationery to the North-Western Frontier for the Tirah Expedition. Contingent charges other than these showed a slight decrease.

8. The total value of the different articles of stationery issued, exclusive of deficiencies in stock-taking and miscellaneous adjustments, rose by Rs. 4,64,679. This advance is attributed to the increased demands of the various Government Presses and to the very large requirements of the Military Department on account of the Frontier war. The principal increases occurred under Writing paper (Rs. 1,19,094), Printing paper (Rs. 1,45,993), Coloured paper (Rs. 22,562),

Water-marked paper (Rs. 62,817), Carbonic, Papyrographic, and other kinds of paper (Rs. 32,710), Leathers (Rs. 33,124), and Other articles (Rs. 20,442). The most marked decrease was under the head "Tracing-cloth," which shows a falling off of Rs. 12,364, while there were considerable decreases under the heads "Drawing paper," "Blank books," "Drawing materials" and "Parchment." The supply of paper to the various Government Presses shows an increase of Rs. 2,26,641, and all the Presses, with the exception of the Assam Press, shared in the advance. The consumption of the Government of India Presses was the largest, the increase amounting to 20,799 reams valued at Rs. 1,09,774. In Bengal there was an increase amounting to 8,197 reams valued at Rs. 55,476. An explanation of this increase will be submitted by the Superintendent in his report on the consumption of stationery and printed forms in Bengal for the year, but no explanation with regard to the fluctuation in the demands of other Presses can be given as they are not under the Superintendent's control.

9. The substitution of country-made for European paper and of country-made miscellaneous articles for articles of European manufacture effected a net gain of Rs. 30,696 and Rs. 7,538 respectively. The use, however, of country-made paper of the particular descriptions known as white printing, blotting, white cartridge, coloured, badami cartridge, cream-wove, and azure-laid, resulted in a loss of Rs. 1,22,816. The Superintendent has submitted an alternative statement showing that if all charges, incidental to the receipt of paper from England, including landing charges, godown rent, storage charges, loss of interest, and railway freight, were taken into account, there would be no loss from the use of country-made white printing paper, while the total loss from the other kinds of country-made paper enumerated above would be reduced to Rs. 40,532. In paragraph 9 of the Resolution on the Report for 1896-97, the loss from the substitution of country-made white printing, white cartridge, and coloured mottled-grey papers for similar paper of European manufacture was noted, and it was requested that before entering into contracts with the local mills for the supply of papers of those descriptions during 1898-99, the Standing Committee, appointed to consider the questions that from time to time arise in connection with the substitution of country-made for English stationery and the settling of contracts for Indian-made stationery, should decide whether, in the event of mill-owners refusing to reduce their rates sufficiently to ensure Government against loss, papers of these descriptions should not be obtained from England. It was found impossible, however, to obtain samples for comparison before entering into contracts for 1898-99, and the matter was held in abeyance till the result of the current year's tender was known. It is estimated that a loss of Rs. 66,535 will accrue from the use during 1898-99 of the seven kinds of paper above enumerated under which there was a loss during the past year, but the Secretary of State has lately been indented on for ten tons of each of these kinds of paper, and the Lieutenant-Governor desires that, on the arrival of these samples, the matter may be referred for the consideration of the Standing Committee and their report submitted to Government.

10. The system of supplying newspapers and periodicals through the Stationery Office worked satisfactorily during the year. The number of newspapers and books and maps supplied fell off by 234 and 2,484 respectively, but that of exercise books and periodicals rose by 4,427 and 27. The total payment on account of newspapers, &c., amounted to Rs. 84,420 against Rs. 1,20,324 in the preceding year. The decrease of Rs. 35,904 is said to be mainly due to smaller demands and to the favourable rate of exchange obtained when sending remittances for the purchase of foreign periodicals and books.

11. The receipts and issues of standard and special forms, exclusive of the survey and settlement forms, printed and supplied direct by the Superintendent of Government Printing, show an increase of 16,665,312 and 6,171,806, respectively, as compared with 1896-97. The advance in receipts is attributed to the receipt of printed copies of certain newly-introduced forms, to larger demands of local officers, and to certain forms which were due in 1896-97 and others which were not due till 1898-99 having been supplied during the year of report. The first two of these causes led in turn to an increase of issues.

The details of the work in the Form Branch will be reviewed when the report on the consumption of stationery by the various officers under the Government of Bengal is received.

12. The receipts of the Form Branch amounted to Rs. 37,763 and the charges to Rs. 47,637 against Rs. 36,757 and Rs. 48,578, respectively, in 1896-97. The increase in receipts was due to a larger demand for forms by the Local Funds in Bengal and Assam, while the decrease in charges was due to no extra establishment having been employed, and to a reduction in freight charges by the India General and British India Steam Navigation Companies.

13. The Lieutenant Governor notices with satisfaction the reforms which have been introduced during the year in the working of the Department, and trusts that they will be successful in preventing delay in the issue of indents, and in restricting stocks to the lowest possible working level.

14. The thanks of the Lieutenant-Governor are again due to Mr. Beames, the Superintendent of Stationery, for his efficient administration of the Department during the year.

ORDER.—Ordered that a copy of the Resolution be forwarded to the Board of Revenue, for information, and that their special attention be invited to paragraph 9 of the Resolution.

Ordered also that a copy of the Resolution, with a copy of the Report, be submitted to the Government of India, in the Department of Finance and Commerce, for information.

Ordered also that a copy of the Resolution be forwarded to the Superintendent of Government Printing, Bengal, for information.

By order of the Lieutenant-Governor of Bengal,

E. N. BAKER,

Offg. Secy. to the Govt. of Bengal.

RESOLUTION ON THE ADMINISTRATION REPORT OF THE COMMISSIONERS OF THE PORT OF CALCUTTA FOR THE YEAR 1897-98.

No. 2155Marine.

GOVERNMENT OF BENGAL, MARINE DEPARTMENT.

Dated Calcutta, the 24th November 1898.

RESOLUTION.

READ—

The Administration Report of the Commissioners of the Port of Calcutta for the year 1897-98.

The total amount of the loans which have been raised by the Port Commissioners from time to time, including the consolidated loan from the Government of Rs. 60,25,100 and the Dock loan of Rs. 2,87,70,566, amounted to Rs. 4,58,10,666, and the total amount outstanding on these loans on the 31st March 1898 was Rs. 4,09,50,346. The total investments at credit of the sinking funds have been raised from Rs. 16,15,500 at the beginning to Rs. 18,34,000 at the close of the year.

2. Against the debt (consisting of the unpaid portion of the consolidated loan from the Government), together with the book debt on account of the Port block transferred by the Government to the Commissioners in 1871, the Dock loan and the six debenture loans, amounting in all to Rs. 4,27,84,346, the Commissioners hold block of the value of Rs. 5,34,31,736, and reserve funds amounting to Rs 29,72,772, in addition to the valuable Strand Bank lands extending from Chandpal Ghât to Aheereetollah Ghât, for which they pay to the Government an annual quit-rent of Rs. 37,292.

3. The year opened with a revenue balance of Rs. 8,53,280, and the income for the year under review amounted to Rs. 61,84,908. The expenditure, including sinking funds, renewals and improvements amounted to Rs. 61,04,613, leaving a balance of Rs. 9,33,575 on the 31st March 1898. The income of the year exceeded the expenditure by Rs. 80,295

4. The income under the head "Jetties" amounted to Rs. 16,93,905, or Rs. 1,26,727 less than that of the previous year. The expenditure amounted to Rs. 9,96,258, showing a decrease of Rs. 2,25,311, as compared with that of the previous year. The net revenue under this head was Rs. 6,97,647, as compared with Rs. 5,99,063 in 1896-97.

5. The income derived from the Petroleum Wharf at Budge-Budge amounted to Rs. 4,06,349, against Rs. 3,33,797 in the previous year. The quantity of kerosine oil imported was 43,748,516 gallons, as compared with 40,255,153 gallons during 1896-97.

6. The importation of oil from Russia was 47½ per cent. of the total quantity imported in the year under review.

7. The total number of packages of tea amounted to 713,054 chests, against 776,397 in 1896-97. The receipts, which were Rs. 1,07,620 in the previous year, amounted in the year under review to Rs. 95,010. The decrease was due partly to the unfavourable crop in the Duars, and partly to the diversion of some of the rail-borne tea to the docks for direct shipment.

8. During the year 214 vessels with a tonnage of 557,706 were berthed at the jetties, against 200 with a tonnage of 500,513 during 1896-97. The average number of days each vessel occupied the jetties was 9·2.

9. The income of the Harbour Master's Department amounted to Rs. 5,75,531, against Rs. 5,16,357 in 1896-97. The increase was due to larger receipts from mooring hire and Harbour Masters' earnings. The expenditure amounted to Rs. 6,49,861, against Rs. 5,75,834 in the preceding year. The increase was due to heavy expenditure in connection with working expenses, which included the cost of additional mooring materials.

10. During the year there were 13 casualties to vessels, against 10 in the previous year. This gives a percentage of 1·05 calculated on the number of vessels which arrived in the port.

None of the casualties were of a serious nature either with reference to the vessels concerned or to the conduct of the Assistant Harbour Masters. In eight of these the officers concerned were warned, and in four cases exonerated from blame. In the remaining case no enquiry could be held as the vessel left port.

11. The work of examining boats plying for hire was regularly attended to by the Surveyors, and during the year 135 passenger boats and 155 cargo boats were called in for survey. Of these, 80 passenger boats were found to have become defective through wear and tear, and 55 had come so by accidents. Of the cargo boats, 96 have become defective through wear and tear, and 59 from the effects of accidents.

12. The receipts from port dues amounted Rs. 4,61,715, against Rs. 4,05,524 in 1896-97. The expenditure for the year amounted to Rs. 5,87,593, against Rs. 5,07,651 in the previous year. The excess expenditure was due to the cost of extensive repairs to the several light vessels, as well as to the proportionate cost of a steam-launch for the Deputy Conservator and to the blowing up of wrecks.

13. The survey of the western channel of the Sandheads, which had partly been undertaken in 1896-97, was completed during the year. The five fathoms' contour of the western sea reef has extended two miles to the southward, and has also curved bodily the same distance to the westward. The eastern brace has joined the western sea reef, another three fathoms contour has gone one mile south, and over two miles, to the westward.

The five fathoms' contour line of the western brace receded 1½ miles to the northward, and the three fathoms' contour no less than three miles; but both have gone westward 2½ miles. Thus there is a general tendency for all the sands and channels to move to the westward. This is particularly noticeable in the channel between the western brace and the sola buoys.

14. The principal changes which occurred in the river were at the Beaumont's Gut, Kankhali Crossing, Eden Bar, Upper Bar, Rungfulla Channel and the James and Mary shoal. The other channels were fairly steady during the year.

15. A sum of Rs. 11,27,752 was obtained from special tolls levied under section 108 of the Calcutta Port Act, 1890, against Rs. 9,15,104 in the previous year.

16. The result of the working of the Kidderpore Docks was as follows:—

Receipts.		Rs.	*Expenditure.*		Rs.
Graving Dock	...	1,25,730	Traffic Establishment	...	1,89,867
Rent and Miscellaneous	...	49,771	Working expenses	...	7,91,208
Imports ...	...	1,49,768	Repairs ...	...	31,357
Exports ...	...	8,56,462	Municipal taxes	...	1,44,080
			Interest ...	...	11,50,823
Total	...	11,81,731	Total	...	23,07,335

In view of the ever growing size and number of steamers visiting the Port of Calcutta, a scheme has been introduced, and is now in force, for turning to the best account the existing accommodation.

The dominant feature of the new system is that the jetties are permitted to be used only for the discharge of general import cargoes brought by Liner steamers; the latter, after discharging at the jetties, proceed to the Docks to load export cargoes; or they may load from boats in the stream if this course is found more convenient than going to the Docks. The only obligatory part of the scheme is that steamers must not load at the jetties.

The scheme includes also the following:—

(1) The construction of three bonded Salt Golas at the Docks, on the banks of the boat canal.

(2) The provision of three berths in the boat canal to serve the coal export trade, there being no more room for that trade at the Docks under the new system.

(3) The doubling of the single railway line, between the Docks and jetties, for 1,400 feet of its length, near Fort Point.

(4) The erection of new sheds at the jetties to receive those goods only which are intended to be railed to the Docks for shipment there.

(5) The provision of a powerful tug to assist vessels to the Docks from the jetties.

(6) The jetties to be reduced in number from seven to six, and lengthened.

(7) Additional electric lighting at the Docks.

17. The thanks of the Government are due to the Commissioners for their efficient management of the affairs of the Trust and for their assiduous improvement of the conveniences of the Port.

By order of the Lieutenant-Governor of Bengal,

A. D. McARTHUR, *Colonel*, R.E.,

Secretary to the Govt. of Bengal.

REPORT ON THE STATE OF THE SALT MARKET FOR THE SECOND QUARTER OF 1898-99.

No. 887B., dated Calcutta, the 17th November 1898.

From—E. M. KONSTAM, Esq., I.C.S., Offg. Secy. to the Board of Revenue, L.P.,
To—The Secretary to the Government of Bengal, Financial Department.

SALT.

THE HON'BLE MR. W. H GRIMLEY.

I AM directed to submit the following report on the state of the salt market for the second quarter of 1898-99, comprising the months of July, August and September 1898.

2. The quantity of salt of every description cleared during the quarter under review, amounted to 26,25,392 maunds, as compared with 28,36,853 maunds in the previous quarter, and 28,26,349* maunds in the corresponding quarter of the previous year; and the net amount of duty levied thereon was Rs. 61,01,897, as against Rs. 67,29,251 in the previous quarter, and Rs. 66,70,781† in the corresponding quarter of the previous year.

* Revised figures.

† Revised figures.

3. The quantity of locally-made salt removed from the *golas* in Orissa during the quarter under review, and the quantity which remained in store at the close of the quarter, are shown in table I below:—

TABLE I.

1	2
	Mds.
Balance at the close of the previous quarter ...	5,51,707
Manufactured or added during the quarter ...	.....
Total ...	5,51,707
Sold during the quarter	20,850
Wastage	2,932
Total ..	23,782
Balance at the close of the quarter	5,27,925

The total sales of locally-made salt during the quarter under review amounted to 20,850 maunds, as compared with 7,186 maunds in the previous quarter, and 4,100 maunds in the corresponding quarter of the previous year. Duty was paid on the full quantity sold.

4. The subjoined table (II) shows in detail the importations into the port of Calcutta and the total clearances of sea-imported salt during the quarter

under review, as compared with the figures of the corresponding quarters of the last two years:—

7. The quantity of salt despatched by the East Indian Railway to stations beyond Buxar during the quarter under review, amounted to 1,871 maunds and 30 seers, as noted in the margin, against 2,250 maunds and 20 seers in the previous quarter, and 2,623 maunds and 10 seers in the corresponding quarter of the previous year.

	Mds. s.
July	747 20
August	374 30
September	749 20
Total ...	1,871 30

8. The quantity of saltpetre removed from the refineries during the quarter on payment of duty, amounted to 3,142 maunds, as compared with 6,074 maunds in the previous quarter, and 6,137 maunds in the corresponding quarter of the previous year.

9. The shipments of Liverpool salt for the port of Calcutta, according to the published market reports, were as follows:—

		Tons.
July 1898		16,180
August „		17,270
September „		40,240
	Total ...	73,690

It is reported that one vessel was *en route* for Calcutta at the close of the quarter with 5,200 tons of salt from Hamburg.

10. Table V shows the average wholesale price per 100 maunds of Liverpool and other descriptions of salt during each fortnight of the quarter:—

No transactions in sea-imported salt have been reported for the quarter from Cuttack and Puri.

WEATHER AND CROP REPORT.

For the week ending the 28th November 1898.

Burdwan.—No rain. Weather seasonable. Harvesting of *aman* paddy continues. The crop is a bumper one throughout the district. Sowing of *rabi* crops and planting of potatoes nearly over. A few cases of cattle-disease reported. Fodder and water sufficient. Common rice selling as follows:—

	Srs.	
Sadar	15 to 17	per rupee.
Kalna	14 „ 17	
Katwa	17	
Raniganj	16½	

Birbhum.—No rain. Weather seasonable. Harvesting of *aus* completed. Reaping of *aman* commenced. Sowing of *rabi* continues. Price of common rice at Sadar 16⅔ to 18 seers, and at Rampur Hât 16⅔ seers per rupee. Fodder sufficient.

Bankura.—No rain. Weather occasionally cloudy at the beginning of the week. Harvesting of *aman* has commenced in places. Sugarcane and other standing crops doing well. Fodder and water sufficient. Common rice sells at Sadar 20 seers and at Vishnupur 16 seers per rupee.

Midnapore.—No rain. Prospects of standing crops very good. Cattle-disease reported from Nayagram. Prices of common rice:—

	Srs.	
Sadar	13 to 16	per rupee.
Contai	16 to 17	
Tamluk...	14-3½ ch.	
Ghatal	15 to 16	

Hooghly.—No rain. Prospects of *aman* and *rabi* crops good. Cattle-disease prevails in some parts. Common rice sells from 11 to 13 seers per rupee.

Howrah.—No rain. Weather cloudy during the beginning of the week. Harvesting of *aman* commenced. Fodder and water sufficient. Common rice sells at 12 to 14 seers per rupee.

24-Parganas.—Rainfall nil. Weather seasonable. Prospects of winter and *rabi* crops good. Harvesting of *aman* paddy continues, and ploughing and sowing of *rabi* crops going on. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	Srs.	
Sadar	12	to 13	per rupee.
Barasat	17½		
Basirhat	15⅝		
Diamond Harbour	16		

Nadia.—Rainfall nil. *Rabi* sowings completed. Sugarcane and *kalai* pulse doing well. Harvesting of *aman* paddy continues. Common rice selling at 12 to 16 seers per rupee. Fodder and water sufficient. Cattle-pox in thana Tehatta.

Jessore.—No rain. Weather fine and cold. Harvesting of early *aman* going on. Sowing of indigo still continues. No cattle-disease reported. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Jessore	16 to 20	per rupee.
Jhenida	18 „ 20	
Magura	18 „ 20	
Narail	20	
Bangaon	17 „ 18	

Khulna.—Rainfall nil. Weather seasonable. Cultivation of *rabi* crops continues. Harvesting of *aman* paddy commenced. Prospects good. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	19 to 22	per rupee.
Bagerhat	20	
Satkhira	16 and 18 (new *aus*).	

Rajshahi.—No rain. Prospects of crops good. Sowing of *rabi* crops in progress Harvesting of *aman* paddy going on. No cattle-disease. Fodder and water plentiful. Rice sells from 15 to 25 seers per rupee.

Dinajpur.—No rain. Weather fine and fairly cool. Harvesting of winter rice and sowing of *rabi* crops progressing. No cattle-disease. Fodder and water sufficient. Rice 16 to 17 seers a rupee.

Jalpaiguri.—Rainfall at Sadar ·21, Alipur Duars ·22. Weather seasonable. Harvesting of *haimanti* paddy commenced. Transplantation of tobacco and cultivation of *rabi* crops going on. Fodder and water sufficient. Price of common rice stationary.

Darjeeling.—Rainfall at Darjeeling ·05, Kurseong ·10, Siliguri ·2. Weather seasonable. *Hills—Haimanti* paddy and *kalai* are being harvested; *phaphar*, wheat, barley, and *tori* are progressing well. *Terai—Haimanti* paddy is being harvested; mustard and potatoes are doing well; sugarcane is being cut. Coarse rice sells as follows :—

		Srs.	
Hills	9 to 12	}	per rupee.
Terai	13 to 18	}	

Bhutta sells at Darjeeling 10 seers and at Rangit 10 seers per rupee.

Rangpur.—No rain. Weather fine and cool. Cultivation of *rabi* crops and transplanting of tobacco going on. Prospects good. Common rice selling at 13 to 15 seers per rupee. Fodder and water sufficient.

Bogra.—No rain. *Rabi* crops still being sown. Winter rice is being harvested. Prospects good. Common rice selling from 17½ to 23½ seers per rupee. Fodder and water ample.

Pabna.—Rainfall nil. Weather fine. Crop prospects excellent. Price of common rice 14 to 20 seers per rupee.

Dacca.—Rainfall nil. Weather seasonable. Harvesting of *aman* continues. Prospects good. Fodder available. No cattle-disease. Common rice 14 to 22 seers per rupee.

Mymensingh.—Rainfall nil. Weather seasonable. *Aman* is being harvested. Sowing of *rabi* in progress. Prospects good. Rice selling from 15 to 22 seers per rupee. No cattle-disease reported. Fodder and water sufficient.

Faridpur.—No rain. Weather seasonable. Prospects of crops good. Rice 20 seers a rupee.

Backergunge.—Rainfall nil. Weather fine. Prospects of crops good. Common rice sells from 12 to 18 seers (old *aman*), 15½ to 18½ seers (new *aman*), and 16 to 22½ seers (*aus*) per rupee.

Tippera.—No rain. *Aman* being harvested; prospects excellent. *Rabi* being sown. Common rice 16 to 23 seers per rupee.

Noakhali.—Rainfall nil. Crops good except in Hatia and Sandip. No cattle-diseases Fodder and water good. Price of rice—*aman* 12 to 18 seers and *aus* 16 to 28 seers per rupee.

Chittagong.—Rainfall nil. Weather seasonable. *Aman* being reaped. *Rabi* crop sown. Rice selling at 16 seers per rupee. Water and fodder sufficient.

Patna.—No rain. Sowing of *rabi* and harvesting of black paddy going on. Poppy sowing commenced. Prospects of paddy good. In Patna common rice sells at 22 seers a rupee. Fodder and water for cattle sufficient.

Gaya.—No rain. Harvesting of paddy continues. Prospects of *rabi* and poppy good. Prices are—Common rice 17 seers, wheat 16 seers, gram 23 seers, *arhar* 20 seers, and *makai* 25 seers per rupee.

Shahabad.—No rain. Weather seasonable. *Rabi* sowing continues. Paddy being harvested. Rice sells at Arrah 15 seers per rupee. Fodder and water sufficient.

Saran.—No rain. Weather seasonable. *Rabi* and poppy doing well. Cutting of paddy commenced. Average price of common rice 17·1 seers and of *makai* 26·7 seers per rupee.

Champaran.—No rain. *Rabi* sowings still continue. Harvesting of *aghani* rice has begun in places. Poppy sowings nearing completion; germination good, and young plants doing well. Common rice sells at 15½ seers and maize at 24½ seers per rupee.

Muzaffarpur.—Rainfall nil. Harvesting of winter rice commenced in places. *Rabi* sowings still in progress. Prospects good. No cattle-disease. Prices are—Common rice 11 to 17 seers, wheat 16 to 17 seers, barley 25 to 30 seers, maize 25 to 30 seers, gram 19 to 21 seers, *rahar* 22 seers, and *marua* 25 seers per rupee.

Darbhanga.—No rain. Weather cool. Paddy harvest has commenced. *Rabi* doing well. Weather continues favourable for poppy; about two-thirds sowings completed. Common rice selling at Sadar 15 seers per rupee.

Monghyr.—No rain. Weather seasonable. Harvesting of winter rice and sowing of *rabi* crops still going on. Sugarcane pressing in progress. Prospects of crops good. Poppy seedlings thriving; the early sown crops germinate well; later sowings coming on satisfactorily. No cattle-disease. Common rice sells as follows:—

		Srs.	
Monghyr		13	per rupee.
Begusarai		13 to 15	
Jamui		16	

Bhagalpur.—Rainfall nil. Weather seasonable. Prospects of standing crops satisfactory. Winter rice and sugarcane being harvested in Banka. *Rabi* sowing still going on in Supaul. Fodder and water sufficient. Cattle-disease reported from Supaul. Common rice sells at 29½ seers and Indian-corn at 40½ seers per rupee. Prices of other food-grains nearly stationary.

Purnea.—Rainfall at Sadar. ·01. Weather seasonable. Harvesting of *aghani* rice has commenced; outturn good. *Rabi* crops in progress. Cattle-disease abating in Araria. One recovery from *kala dukh* reported from Kishanganj. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	18	per rupee.
Kishanganj	20	
Araria	20	

Malda.—No rain. Weather clear and cool. Harvesting of winter rice has commenced. *Rabi* crops growing well. *Kaoai* pulse in flower. Coarse rice (*bhadoi*) selling at 20 seers per rupee. Fodder ample.

Southal Parganas.—Rainfall nil. Weather bright and cool. Harvesting of rice continues. Prospects good. *Rabi* doing well. Fodder sufficient. Price of rice varies from 16 to 28 seers and of maize from 35 to 40 seers per rupee.

Cuttack.—Rainfall nil. Weather seasonable. *Laghu sarad* being harvested. *Guru sarad* maturing. Sugarcane commencing to be cut. *Rabi* and mustard growing and in flower in places. *Arhar* in flower and pods. Tobacco and *dalua* being planted. Wheat, barley, and coriander being sown. Condition of cattle generally good, but disease still lingering in Banki. Fodder and water sufficient. Common rice sells as follows:—

	S.	ch.	
Cuttack	18	6	per rupee.
Jajpur	17	1	
Kendrapara	21	0	
Banki	22	11	

Balasore.—Rainfall nil. Harvesting of *local* and *sarad* continues. Sugarcane being pressed. *Rabi* crops growing well. Cattle-disease reported from Basudevpur circle. Rice sells from 16 to 22 seers per rupee in the interior, and at 18 seers at Balasore and Bhadrak. Fodder sufficient.

Angul.—No rain. Winter rice being reaped. Prospects of *rabi* crops good. Common rice selling at 26 seers per rupee in Angul and 18 seers in Khondmals.

Puri.—No rain. *Sarad* in ear and ripening in places. *Laghu* being reaped. Prospects of *arhar*, sugarcane, *kulthi* and other miscellaneous crops good. Land being ploughed for next summer rice. Fodder and water sufficient. Cattle-disease reported from parts of the district. Price of common rice almost stationary.

Hazaribagh.—Rainfall nil. Weather seasonable. Harvests in progress. *Rabi* crops are being sown. Common rice 12 to 18 seers per rupee.

Lohardaga.—No rain. Paddy harvesting continues. State of standing crops good. Rice sells at Ranchi 16 seers, and in the interior from 16 to 24 seers per rupee. Cattle-disease continues in the interior. Fodder and water sufficient. Grain in stock sufficient.

Palamau.—No rain. Weather seasonable. Harvesting of paddy in progress. Other crops doing well. Cattle-disease prevailing. Fodder and water sufficient. Rice sells at 20 seers per rupee.

Manbhum.—Rainfall nil. Weather seasonable. Prospects of crops on the ground are excellent. Cattle-disease reported from thana Puralia. Fodder and water sufficient. Average price of common rice at Sadar 22 seers 9 chittacks per rupee. Supply sufficient.

Singbhum.—Rainfall nil. Prospects of crops good. Prices stationary.

General Summary.—There was slight rain in Jalpaiguri and Darjeeling during the week. The general agricultural prospects continue favourable. The rice harvest is in rapid progress, and a good outturn is generally expected. The sowing of all cold-weather crops, including poppy, is nearly complete, and the young plants are thriving well. Reports of the sugarcane crop are satisfactory; and pressing has begun in some districts. Prices generally show a tendency to fall. There is no outbreak of cattle-disease, but cases are reported from some districts. The supply of fodder for cattle is reported to be sufficient in all districts.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT,
The 29th November 1898.

F. A. SLACK,
Offg. Secretary to the Govt. of Bengal.

The average fall of the corresponding period for 24 years, Surveyor-General's Office	0·01
The total fall from 1st January to 26th November 1898	59·52
The average fall of the corresponding period for 24 years, Surveyor-General's Office	65·15

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h., and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

D dew, o, overcast.

RESOLUTION ON THE ANNUAL GENERAL ADMINISTRATION REPORT OF THE BHAGALPUR DIVISION FOR THE YEAR 1897-98.

GENERAL DEPARTMENT—(MISCELLANEOUS).

Calcutta, the 5th December 1898.

RESOLUTION—No. 3491.

READ—

The Annual General Administration Report of the Bhagalpur Division for the year 1897-98.

MR. W. B. OLDHAM was in charge of the Division for the greater part of the year, Mr. O'Donnell officiating for him for three months. The present report is submitted by Mr. Carstairs. There were changes of District Officers in all districts with the exception of the Sonthal Parganas; but the transfers of officers in charge of subdivisions were less frequent.

2. *Tours and inspections.*—Mr. Oldham spent 34 and Mr. O'Donnell 40 days on tour, all the district offices being inspected except that at Purnea, and 6 out of 13 subdivisions were visited. Special attention appears to have been given to the state of the municipalities in the Division. The tours of the different Collectors were of suitable scope and duration, covering the usual inspections. It is not stated whether they were settled in consultation with the Commissioner as required by the standing orders of Government, and the same omission was noticed in the previous year. In Bhagalpur and the Sonthal Parganas the attention of the District Officers in the early part of the year was specially directed to the supervision of the relief operations, and in Monghyr and Malda to enquiries whether the organisation of relief was necessary. The tours of the

Subdivisional Officers of Jamui in Monghyr, and Dumka and Godda in the Sonthal Parganas, are mentioned as having been insufficient; but the reasons alleged are in no case altogether satisfactory.

The necessary inspections of the district offices and treasuries were made by the Collectors concerned, but by an oversight the treasury at Purnea was only inspected once. District Officers also duly inspected the subdivisional offices under them. It is not mentioned if Subdivisional Officers inspected their own offices.

3. *Weather and crops: Material condition of the people: Public health.*—The rainfall of the year was slightly below the normal in Malda, and considerably so in the Sonthal Parganas; in the remaining three districts it was in excess, but everywhere it was seasonable and well distributed, with the result that the *bhadoi* harvest in the Division was a full average one, and the winter rice a bumper crop. The outturn of the cold-weather crops was also good, and the year an excellent one generally. Following on the poor harvests of the previous twelve months, the year opened badly, and in the districts of Bhagalpur and the Sonthal Parganas relief measures were undertaken by Government. In the remaining districts the prevailing high prices and the apprehension of scarcity rendered the general condition of the people anything but favourable. With the good crops, however, of the year under report, prices fell considerably, though at the close of the year they were still slightly above normal rates, and although the opinion is expressed regarding the Sonthal Parganas that the depletion of grain-stocks during the famine has not yet been completely made good, there seems little doubt that by the end of the year the condition of the people was improving rapidly, and with favourable seasons during the current year should be well up to the normal standard.

In the districts of Malda and the Sonthal Parganas the year was more unhealthy than that preceding, though the registered figures in the latter district in both years appear of doubtful accuracy. The Deputy Commissioner observes that the famine left the people in a condition predisposed to disease, and their lowered vitality was also shown by a decrease in the registered birth-rate. In Monghyr, Bhagalpur and Purnea (excluding the Sadar station) the year appears to have been fairly healthy. The prevalence of a kind of fever known as *kala dukh* in the north-east of Purnea, of a deadly type though fortunately not widespread, has formed the subject of special enquiry since the close of the year.

4. *Manufactures: Mines: and Commerce.*—The area under poppy cultivation in Monghyr declined from 30,604 bighas during the previous year to 29,508 bighas, and the outturn similarly from 2,875 maunds to 2,232 maunds. The season was unfavourable at the time of the collection of the drug. The statistics of indigo cultivation in the Division are very incomplete, but the season generally seems to have been adverse, and the prices realised were poor. The European silk factories in Malda produced 47,202 lbs. of silk, or 4,631 lbs. in excess of the outturn of the previous year, although the estimated value was less by Rs. 10,061; the native filatures turned out silk to the value of Rs. 9,00,000, or one lakh of rupees more than in the preceding season. The manufacture of firearms at Monghyr, which is an industry of long standing, seems flourishing, and 3,013 guns and pistols were exported, of which 1,125 went to Calcutta. The output of the mica mines in Monghyr was 29 tons only in comparison with 44½ tons during 1896-97; one coal mine and two surface quarries in addition to stone and slate quarries, were worked in the Sonthal Parganas.

The registered trade of the Division by road, rail and river in the 24 principal articles usually reported on, showed a total of 67,32,000 maunds imported and 80,03,000 maunds exported. The traffic in food-grains showed a total of 11,31,000 maunds imported and 46,36,000 maunds exported, large supplies having been drawn from the Division in the early part of the year for the distressed districts of Bihar and the North-Western Provinces, although the drain was less than in the autumn of 1896, at which time the apprehension of famine was first felt, prices were rising rapidly, and the export of food-grains was continuous. There was a large importation of coal and coke into the Division, aggregating 36,64,000 maunds, of which more than half went to

Monghyr. The trade in jute is said to have been dull both in Purnea and Malda, prices ruling low. As regards the trade of the Division with Calcutta, the export of rice and paddy rose from 22,265 maunds to 76,054 maunds during the year under report, and in gram and pulse similarly from 5,52,500 maunds to 7,12,000 maunds; the export of wheat, however, declined considerably, as also did that of other grains, and the total amount of food-grains despatched, rather over ten lakhs of maunds, was about the same as in the previous year. The export of oilseeds showed an advance of 6,95,000 maunds. In the case of imports from Calcutta, there were no noticeable fluctuations. The trade with Nepal is reported to have been rather duller than in the preceding year, which is attributed to better crops in both territories. More than six lakhs of maunds of food-grains were imported from Nepal and about 20,000 maunds exported to it.

5. *Civil Justice.*—A decrease in civil litigation was noticed in the Resolution on the report for the previous year and was continued during the period now under review, except in the matter of Small Cause Court cases disposed of by Munsifs, which rose from 10,600 to 11,276. The number of suits disposed of by the superior Civil Courts decreased from 2,028 to 1,622, the falling off being largest in the case of money suits. 3,326 witnesses in all were examined, but the proportion detained over two days, 14·7 per cent., was large and higher than in the previous year. All classes of ordinary suits disposed of by Munsifs showed a decrease, and noticeably money and rent suits. The promptness with which witnesses were examined showed an improvement, the number detained over two days being 10·74 per cent. of the number examined.

6. *Crime: Criminal Justice: and Police.*—There was a heavy increase in cognisable crime from 16,076 cases during 1896 to 27,669 during the year under report, although non-cognisable cases fell to 12,299 from 14,725 during the previous year. The increase in cognisable cases was very marked under the heads of burglary and theft, and is attributed to the scarcity. A wholesale case of arsenic poisoning in the Sonthal Parganas is mentioned, in which 51 persons were poisoned, of whom 30 died; the murderer was hanged. Dacoities increased from 22 and 28, in the two preceding years respectively, to 69, the number in Purnea being large, and a special report has been submitted on the precautionary measures to be taken. The Lieutenant-Governor hopes that with the disappearance of famine and with the exercise of vigilance on the part of the local officers, this outbreak of lawlessness will speedily disappear. Out of 769 cases declared false, prosecutions were instituted in 10 per cent. only; the proportion is less than in the previous year, although special attention was then directed to the matter; 51 per cent. of the prosecutions ended successfully.

11,781 cases were disposed of by the Stipendiary Courts and 3,889 by Honorary Magistrates, the corresponding figures for the previous year having been 12,143 and 4,004, respectively. The depositions of 47,995 witnesses were recorded by Stipendiary Magistrates, or 1,105 in excess of the number during the previous year, but the proportion detained over two days, 4·8 per cent., was practically the same. In the Resolution on the Report for 1896-97, the bad results in this respect exhibited at Monghyr and Malda formed the subject of special comment. During the year under review a distinct improvement was effected at Malda, the ratio being 2·9 per cent. only, its place as regards unsatisfactory results being taken by the Sadar and Kishenganj subdivisions of the Purnea district, where the figures were 9·4 and 11·9 per cent., respectively. The results at the Jamui and Begusarai subdivisions of Monghyr (14·8 and 17 per cent., respectively) were still very unsatisfactory; matters are said to have gone from bad to worse, and need the serious attention of the District Magistrate.

The number of witnesses examined by Honorary Magistrates increased by 730 in comparison with the previous year, while the ratio detained over two days declined from 9·3 to 6·7 per cent.; the improvement is so far satisfactory, but the figures in the three subdivisions of the district of Monghyr (16·2, 13·3 and 22·7 per cent., respectively) reflect little credit on the Honorary Magistrates concerned. The Lieutenant-Governor has seen with much pleasure the list of

gentlemen in the Division who as Honorary Magistrates were very regular in their attendance: the explanation now supplied, with reference to the Begusarai Bench, that the Honorary Magistrates frequently merely attend Court in order to sign the diary and adjourn all cases on the plea of no time, possibly affects the statement made in the Resolution of the previous year that their standard of attendance was excellent.

The total demand on account of criminal fines during the year amounted to Rs. 1,01,834, of which Rs. 69,494 were collected and Rs. 10,604 remitted. The balances outstanding were specially heavy in the districts of Bhagalpur (Rs. 6,559) and the Sonthal Parganas (Rs. 8,934).

The percentage of convictions obtained in cases before the Courts of Session increased from 69·6 during 1896 to 73·3 per cent. The results with reference to the number of persons committed to trial were less satisfactory and incurred the unfavourable comment of the High Court as to the care with which the enquiries preliminary to commitment were conducted. The work of the police in the districts of Monghyr and Purnea is unfavourably reported on; elsewhere it is said to be up to the usual average. The increase of indigo riots in North Monghyr and of dacoities in Purnea all point to a certain laxity of criminal administration, in removing which the Lieutenant-Governor hopes that no time will be lost.

7. *Land Revenue and Cesses.*—There was an increase of Rs. 8,924 in the current demand on account of land revenue, which amounted to Rs. 33,79,605, while there was an arrear of Rs. 84,127 outstanding at the commencement of the year. 98·1 per cent. of the current and 89·8 per cent. of the arrear demand were realised, the total collections being 103 per cent. of the current demand. The usual comparison is made below between the prescribed standard of collections in the three classes of Government estates and the actual results attained in the proportion of current collections to current demand:—

	Permanently-settled estates.	Temporarily-settled estates.	Estates under direct management.
Standard ...	99·	95·	90·
Monghyr ...	99·74	88·60	56·46
Bhagalpur ...	99·66	85·44	90·01
Purnea ...	99·72	89·04	86·63
Malda ...	99·90	96·56	57·04
Sonthal Parganas ...	99·91	98·22	92·03

The prevailing scarcity is assigned as the cause of the deficiencies in collections, and considering the character of the season, the results are on the whole satisfactory. The reconciliation of the tauzi accounts with those of the khas mahals in Bhagalpur, referred to last year, has not yet been effected, but its completion during the current year is promised. The number of estates which became liable to sales for arrears was 1,184, or 95 less than in the previous year. The Lieutenant-Governor regrets to observe that in three out of the five districts the standing orders as to holding the sale of one kist before the date of the next were not adhered to. The certificate work, as in the last year, was heavy; 13,575 cases in all were disposed of during the year and 4,127 left pending at its close. The number was largest in Monghyr, although disposals kept pace with institutions. There were also a considerable number (201) of land acquisition cases for disposal, mostly in connection with the different railway projects, but the progress made was good, and all but 28 were disposed of. The division is always a heavy one for partition work, of which 56 new cases were instituted during the year, and 125 were pending at its commencement; 54 cases being disposed of.

Of the total demand on account of Road and Public Works cess, 83·9 per cent. was collected. Under the Land Improvement Loans Act, Rs. 7,975 were advanced, mostly in the Sonthal Parganas, and Rs. 53,650 were also given under the Agriculturists' Loans Act, the greater part in the same district and in Bhagalpur. Special attention was drawn last year to the matter of sanitary and agricultural improvements in Government estates. From the details now furnished, it would still seem that the expenditure under this head amounted to Rs. 15,410 (of which Rs. 9,708 was in the Sonthal Parganas alone), or about

5 per cent. on the current demand on account of Government estates in the Division. It should be stated in future what, under the existing Government orders, was the amount of the allotment for improvements and how much of it was not utilised during the year, the reasons for the balance being given.

8. *Wards and Attached Estates.*—Of the seven estates mentioned last year as being under the charge of the Court of Wards, that of Sukraj Rai in Bhagalpur was released, and charge was newly assumed of the small estate of Ghati in the Sonthal Parganas. Out of a total demand of Rs. 5,56,503, only some 63 per cent. was collected; the proportion was approximately the same as in the preceding year, and is sufficiently explained by the prevailing scarcity. The outstanding balance in the Lagma estate in Bhagalpur is still in excess of the current demand, and in the Khagra estate in Purnea the arrears are also heavy. Rupees 13,824 in all was remitted as compared with Rs. 2,824 during the previous year, and it is said that attention is being directed towards the clearance of the accounts of irrecoverable balances. The sum of Rs. 20,154 was spent on improvements to the estates, and measures were also taken in those in the Sonthal Parganas for the relief of the distress.

9. *Excise: Stamps: Income-tax.*—Unlike the experience elsewhere, the decrease in the excise revenue, occasioned by the famine, was ·2 per cent only. The incidence of the revenue was highest in the district of Monghyr (3 annas 4 pies) and lowest in that of the Sonthal Parganas (1 anna 6 pies). The Madras system of a tree-tax on tari palms was in force in Monghyr and Bhagalpur, a shop-rent being also levied. It appears that owing to competition amongst vendors the sale of ganja increased, that drug being found a cheaper intoxicant than liquor. There was a general decrease in the number of detected offences against the law.

The total stamp revenue fell off by 2·3 per cent., the only districts which showed an increase being those of Bhagalpur and the Sonthal Parganas. In the latter the increase was very slight, and in the former it is attributed to larger purchases of stamps for money bonds and partition papers.

The total demand on account of income-tax amounted to Rs. 2,79,244, or Rs. 8,779 more than in the previous year. The large profits made by grain-dealers during the famine resulted in the discovery of a certain number of new assessees.

10. *Railways and Public Works.*—Good progress was made with the South Bihar Railway, but on the Hajipur-Katihar extension of the Tirhut State Railway, little was done in Bhagalpur and Purnea, though some work was completed in Monghyr. The provision of sufficient waterway in the alignment in the Bhagalpur district was the subject of some discussion during the year. Some attention seems paid to arboriculture by all the District Boards in the Division, although more might be done in Purnea.

11. *Education.*—There were 5,401 schools of all kinds in the Division, containing 112,274 pupils; the loss of 29 schools and 772 pupils as compared with the previous year was less than might have been expected considering the unfavourable circumstances of the year. As might have been anticipated, the falling off was largest in Bhagalpur and the Sonthal Parganas. The Lieutenant-Governor regrets to observe the gradual and steady decline in the popularity of female education. As remarked in connection with the Bhagalpur district, the schools appear to depend entirely on the grants received from public funds, and possess no inherent elements of stability. In Monghyr, where over one-fourth of the total allotment for primary education is devoted to the maintenance of girls' schools containing some 3,000 pupils only, the District Board found it necessary to curtail the expenditure, which at once reacted unfavourably upon the attendance. The fact that the year was an auspicious one for marriages also led to many pupils being withdrawn. There was a decrease of ·4 per cent. in the number of Muhammadan pupils and of 11·2 per cent. in those of aboriginal races. The Magistrate of Purnea remarks as regards his district that while primary education is making steady progress, higher education is very unpopular. The proportion of boys at school to those of a school-going age in the Division generally was only 17 per cent. The total expenditure upon education amounted to Rs. 5,24,207, of which about 36 per cent. was met from Provincial revenues and the funds of District Boards and Municipalities.

12. *Hospitals and Dispensaries.*—Three new dispensaries appear to have been opened during the year—two in Monghyr and one in Bhagalpur, one former institution in the latter district being also closed. The want of more dispensaries in the Purnea district, where only four exist, is especially noticeable. The total number of patients treated was 195,087, or 14,680 more than during 1896-97. The total income from all sources increased to Rs. 78,295, although the expenditure appears to have exceeded it by Rs. 794. There was a decrease of over Rs. 6,000 in the income from private subscriptions and endowments, but the income will doubtless revive with better seasons.

13. *Local Self-Government Institutions.*—The administration of the Monghyr Municipality continues to be successful; a water-supply for drinking and a system of masonry drains with flushing arrangements are mentioned as the most pressing wants of the town. With reference to the relations between the Jamalpur Municipality and the local authorities which was referred to last year, Mr. Oldham, who inspected the office last year, was satisfied that the management of their affairs was in competent and responsible hands. The confusion in the finances of the Bhagalpur Municipality will doubtless be gradually remedied under the guidance of the present Chairman. The history of the other municipalities in the Division seems generally to have been uneventful but satisfactory. The District Boards in the four regulation districts appear to have worked smoothly: and that of Bhagalpur incurred an expenditure of Rs. 66,012 in connection with famine relief.

14. *Conduct of Zamindars.*—With a few exceptions, the zamindars of the Division are reported to have shown great consideration to their raiyats and to have helped liberally in works of public utility. The assistance rendered by them during the famine has already been acknowledged by Government.

15. The Lieutenant-Governor desires to express his thanks to Mr. Oldham and Mr. O'Donnell for their able and successful management of the Division and to Mr. Carstairs for his careful report.

Extracts from the Commissioner's report are herewith published for general information.

By order of the Lieutenant-Governor of Bengal,

F. A. SLACK,

Offg. Secy. to the Government of Bengal.

Extract from the Annual General Administration Report of the Bhagalpur Division for the year 1897-98.

* * * * * * *

III.—WEATHER AND CROPS.

37. The following is the usual statement showing rainfall and outturn of the crops: —

District.	Rainfall.		Outturn of crops, taking 16 annas as the average outturn.			Remarks
	Average of 10 years.	In 1897-98.	Bhadoi.	Winter rice.	Rabi.	
1	2	3	4	5	6	7
Monghyr ...	49·43	51·74	13⅘	15½	...	The figures in column 2 are taken from the Bengal Administration Report. Those in column 3 from the District Reports. Those in columns 4 and 5 from the Director of Land Records and Agriculture's final reports. They differ very slightly from those given by the District Officers in their Table II. Final forecast of the *rabi* crop has not been received from the Director of Land Records and Agriculture or published in the *Calcutta Gazette*.
Bhagalpur ...	48·79	49·78	17¾	18	...	
Purnea ...	60·12	72·59	15⅘	15½	...	
Malda ...	56·59	54·17	15⅗	18	...	
Sonthal Parganas	64·39	54·52	14⅘	17	...	
Divisional average	55·86	56·56	15¼	16⅓	...	

38. The average rainfall of the district of Monghyr was 51·74 inches against 41·80 and 33·64 in the two preceding years. The average is taken from all the nine rain-registering stations of the district. The rainfall was fairly distributed throughout the district. The highest rainfall was 57·16 at Chakaye in the south, and the lowest, 43·19, at Shaikpura in the west.

39. The outturn of all the crops was greater than that of the preceding year. The increase is due to the timely rainfall and seasonable weather. The poppy crop was damaged to some extent by the heavy rainfall and strong west wind. The sudden rise of the Ganges did some damage to the *bhadoi* crops on the low lands. Export was very brisk in all parts of the district, as the people were anxious to avail themselves of the high prices, which prevailed during the year, by disposing of their surplus stock.

Bhagalpur.

40. The average rainfall of the Bhagalpur district was 49·78 inches against 39·53 and 44·86 in the two preceding years. The fall was a little above the normal average—48·91 inches. The variation was from 58·61 inches at Pratabganj to 41·70 inches at Madhipura. The local distribution of rain was fairly equal and seasonable for agricultural requirements. The *bhadoi* crop, which forms the staple food of the lower classes of the people in the district, was a bumper one, and went a great way to relieve the stress of the scarcity felt in the preceding year. The *aghani* and *rabi* crops also derived benefit from the opportune rainfall, and the outturn of the winter rice crops was 17½ annas. The total yield of the district of all the crops was more than the local requirements, and left a large surplus for export.

41. The average rainfall of the district of Purnea was 72·59 inches against 52·93 and 64·82 of the two preceding years. The highest rainfall was 81·36 in Kishenganj, and the lowest, 58·93, in Purnea. The rainfall throughout the year was seasonable and advantageous to transplanting.

Purnea.

The *bhadoi* crop, for which the weather was favourable, was an average one. The winter rice, which is the most important crop of the district and is grown extensively, yielded more than 15 annas. Mustard and other oilseeds, which are largely grown in the Sadar and Araria subdivisions, were on a smaller area than usual. Though the mustard was a little damaged by rain when in flower, it yielded an outturn of about 14 annas. The *rabi*, of which there is little, was less than an average crop. Tobacco yielded a 16-anna crop, and sugarcane was an average crop. Of the non-food-crops, the most important in the district are jute and indigo. The former yielded a 16-anna outturn, and the latter, owing to unseasonable weather and want of timely rain, did not yield more than 10 annas. Hemp, which is not much cultivated in this district, gave an average outturn.

42. The average rainfall of the district of Malda was 54·17 inches against 44·81 and 33·72 of the two preceding years. On the whole, the year was favourable to the principal crops, which showed an increased outturn. In April and May there was a fair amount of rain, followed by drought, which lasted till the middle of June; then there was copious rain, which allowed *bhadoi* rice being sown. After June the weather was all that could be desired, and crops prospered accordingly. Fortunately also the rivers remained low until late in August.

Malda.

43. Regarding crops, the Collector writes:—

"The outturn of the *bhadoi* crop was excellent and that of *boro* paddy fairly good. The winter rice, which is extensively grown in the Barind tract or the eastern half of the district, yielded a magnificent crop. The Indian-corn produced a full crop. There was very heavy rain in October, which was beneficial to the cold-weather crops. The result was that the *rabi* crops also yielded a 16-anna crop."

The outturn of jute and indigo was fair, and the growth of the mulberry plants was as good as usual.

44. The average rainfall of the district of Sonthal Parganas was 54·52 inches against 45·53 and 38·82 in the two preceding years. The largest rainfall was 59 68 inches in Dumka, and the smallest, 45·19 inches, in Godda. In strong contrast to that of the previous year, the rainfall was all that could be desired, both as regards its amount and distribution. Large areas were therefore cultivated, and the crops yielded an excellent outturn, varying from 14 to 17 annas. These crops have been sufficient to replenish stocks and to restore the district to its normal measure of prosperity.

Sonthal Parganas.

45. It may be said generally of the Division that the weather was favourable, the rainfall well distributed, and the crops were excellent. I doubt, however, whether stocks have been fully replenished.

* * * * * * *

V.—MATERIAL CONDITION OF THE PEOPLE.

58. The first-half of the year was one of great hardship and distress, but the famine which afflicted the greater portion of the country did not visit this district, and though famine prices ruled, there was no scarcity of food. Certain classes of the people, especially those who depend on manual labour and employés on fixed pay, suffered. The cultivating class as a whole did not suffer much, and the wise and thrifty portion of it rejoiced in the famine. It was the landless, indiscreet, labouring people who suffered more during the first-half of the year. The trading class as a whole made some profit.

Monghyr.

59. The people of this district were worse off than those of the sister district of Monghyr during the famine of last year. The two northern subdivisions of Madhepura and Supaul fared worse than the southern portion. Real distress fell only upon two comparatively small tracts, namely, part of the Supaul thana and thana

Bhagalpur.

Bongong in the Madhepura subdivision, pargana Kabkhand, forming the western portion of thana Bongong, being the most seriously affected. In these two tracts the crops were specially poor. Relief works were opened in January and were all closed in July 1897. The physical condition of the people was good. Mr. H. J. McIntosh, who was Collector of Bhagalpur during the famine of last year, summarised the situation thus:—

"There can be no doubt that the people have in the present scarcity shown increased resources and more resisting power than in previous scarcities of like severity, that they are acquiring habits of thrift, and desire, so far as may be, to rely upon themselves."

Purnea.

60. All apprehensions of scarcity came to an end during the year, and the condition of the people is now normal. As regards rural prosperity this district should be classed with the districts of Bengal, and not with those of Bihar. The pressure of population on the soil is light, and the landless labourer is rare in the land. Rents are usually low and the soil is productive, so that it is difficult to see why people are not outwardly of a more prosperous appearance

Malda.

61. In ordinary years the people of this district are particularly well-to-do, but the drought of the last two years had tried their resources very severely. In the early part of the year there was some hardship owing to the failure of the winter rice crop, and in some parts of the district scarcity was actually felt. The good outturn of *bhadoi* rice tended to mitigate the distress a little, and the bumper winter rice crop removed all appearance of hardship. A few more good harvests are expected to restore the people to their former easy and comfortable circumstances.

Santhal Parganas.

62. The Deputy Commissioner says that the effects of the famine and scarcity have disappeared. I think they probably still survive in depleted stocks. He quotes from my own notes the following remarks:—

"Famine was declared in the Deoghur and Jamtara subdivisions, and throughout the rest of the district there was scarcity owing to high prices. The excellent winter harvest has restored the people to their normal condition. The relations of money-lenders and raiyats are of special interest after a severe pinch such as we have had. On the whole the mahajans did their duty in supporting the raiyats. They were warned that transfers of lands to them from the raiyats, whether as consideration or as security for their help, would not be sanctioned save to a very limited extent and for clear and limited periods. There is reason to believe that there have been considerable transfers, and these are under enquiry. There is also reason to believe that money-lenders in the Government estate Damin-i-koh have been evading the exemption of plough cattle from attachment by themselves becoming the owners and lending the cattle out. This is another matter under enquiry. A third matter is the practical acquisition by Sahebganj traders of lands nominally occupied by Paharias for the cultivation of *sabai* grass. A very hopeful experiment is the grain gola system, which has for some time been at work in the Nunkar Sankara Court of Ward's estate, and has been extended to some of the Deoghur estates. This is providing a gradually increasing stock of grain, which is coming to be the capital of a sort of agricultural bank.

"During the year 883 maunds of paddy were lent out at the golas, and the outstanding arrears at the end of the year were 352 maunds. The balance in stock was 1,800 maunds against 956 maunds in the previous year.

"I have more hope of benefiting the raiyats by providing the raw materials of wealth in kind, such as seed-grain and water, than by lending them cash, and think that the most hopeful way of providing accommodation of the latter kind is by working through and improving the money-lenders and others rather than by dealing with them direct."

VI.—EMIGRATION AND IMMIGRATION.

63. In the district of Monghyr 369 emigrants were registered under the Inland Emigration Act against 450 in the preceding year: 137 of them were males, 80 females and 152 dependants. As in the year before, last year also there were no depôts, sub-depôts or rest-houses in this district. There are two shelters for sardari emigrants at Monghyr and Lakhisarai, which were inspected by a Deputy Magistrate and reported to be fit for use. There was no emigration from this district under the Colonial Emigration Act, nor was there any immigration into it. No criminal case connected with emigration occurred. The Magistrate of Monghyr has prominently brought to notice a practice which has lately sprung up of sending to that district from the colonies of Mauritius, British Guiana and Trinidad, old, blind, infirm and incapable

returned emigrants whose homes were elsewhere. He fears that this unsatisfactory way of treating returned emigrants is not likely to improve recruiting there.

Bhagalpur.

64. There are no depôts for inland emigration in this district. During the harvesting season large numbers of labourers go by road to Dinajpur, Rangpur and Malda, and return home when the harvet is over.

Purnea and Malda.

65. Properly speaking, there is no emigration from, or immigration to, these districts. Under the head of Immigration the Collector of Purnea mentions that lately there has been no immigration of Sonthals to his district, probably because superior inducements are offered by the tea gardens of Assam. Emigrants are probably drawn elsewhere, but only a limited number, and not of the same class, go to Assam; so I doubt if he is right about this. The people in the district of Malda being mostly agriculturists are, as a rule, averse to leave their homes and seek work in other districts. A few Muhammadans, however, go to Calcutta to serve as *bhistis* there. Large numbers of labourers come from up-country for employment in road-making and agriculture. In the beginning of the cold weather streams of labourers from the North-Western Provinces pass through Malda on their way to the eastern districts of Bengal.

Sonthal Parganas.

66. The number of emigrants registered under the Inland Emigration Act in the Sonthal Parganas was 670, consisting of 375 labourers and 295 dependants. In the previous year the number registered was 672. The Deputy Commissioner writes:—

"The scarcity had therefore practically the same effect in raising Act emigration above its usual standard in 1897-98 as in 1896-97. The results in the so-called 'free' emigration were probably much the same, but no statistics are available."

The Sonthal emigration scheme under Mr. Adlam continued to work well; 2,038 emigrants, including dependants, went to Assam under it, against 1,865 in the previous year. As in previous years, Mr. Adlam also continued to despatch Sonthal coolies for Government work to the Lushai Hills. During the year under report 21 sardars and 543 coolies were recruited by him for the purpose. Only 21 offences connected with emigration were reported in this district against 36 in the previous year. The Deputy Commissioner states that he is unable to account for the decrease, unless the reason be that coolies were so cheap during the scarcity that it was not worthwhile to use fraud in procuring them. All the cases were disposed of during the year, resulting in the conviction of 20 persons and acquittal of 21. Another possible cause was that Government officers were moving about more freely to look for distress and put down violence.

67. The registration of emigrants is from the 1st April to the 31st March. Most of the emigration was during the time of distress. So far as I am aware, the past cold season has been rather a slack one, probably owing to the excessive emigration of former seasons, and the abundant crops this last year.

* * * * * * *

IX.—TRADE AND COMMERCE.

83. There were no changes in the trade routes and centres of the Division during the year under report.

The total quantities of "up" and "down" trade carried by rail during the past two years were as follows:—

	Import.			Export.		
Year.	Up.	Down.	Total.	Up.	Down.	Total.
1	2	3	4	5	6	7
	Mds.	Mds.	Mds.	Mds.	Mds.	Mds.
1896-97	3,38,098	47,85,987	51,24,085	48,29,426	48,29,457	96,58,883
1897-98	3,05,884	63,89,043	66,94,927	22,13,624	57,35,290	79,48,914

The exports of almost all the principal articles were considerably less in 1897-98 excepting that of jute raw, oilseeds, cotton raw, tobacco, indigo, salt, and cotton piece-goods. In 1896-97, however, the exports were abnormally high owing to the apprehension of famine in the North-Western Provinces and elsewhere.

Monghyr.

This district has a considerable export trade in wheat, gram and pulse, miscellaneous food-grains and oilseeds. It imports principally the following articles:—Rice and paddy, gunny-bags, refined sugar, cotton piece-goods and yarn, salt, kerosine oil, and coal and coke. The trade is carried on chiefly by means of the two railways (Bengal North-Western Railway and East Indian Railway). The river steamers and the country boats comparatively carry on an insignificant amount of traffic.

The export of wheat during last year fell from 1,44,000 maunds to 36,000 maunds, the export of grain and pulse fell from 8,83,000 maunds to 7,64,000 maunds, but still it was much greater than the export in 1895-96, when 4,99,000 maunds were sent away. Grain and pulse were exported principally to Burdwan, Hooghly, Calcutta, other Bihar districts excepting Malda, and to Chota Nagpur. Seventy-one thousand maunds were sent to the North-Western Provinces and Oudh and about 26,000 maunds to the Central Provinces. Out of a total export of 3,86,000 maunds of miscellaneous food-grains, 3,59,000 maunds were exported to the Bihar districts. Darbhanga alone imported 2,31,911 maunds. The total exports in 1896-97 were 7,19,000 maunds and 1,94,000 maunds in 1895-96. The enormous increase in the last two years was apparently due to famine. Linseed and mustard seed were the only two articles in which the exports were greater in the year under report than in 1896-97.

The import trade during the year was greater than in 1896-97. The quantity of rice imported was 4,52,000 maunds, against 1,95.000 in the previous year. This was said to be due to the inequality of price caused by abnormal imports and exports of food-grains in consequence of famine. Gunny-bags and refined sugar were imported chiefly, and cotton piece-goods, salt and kerosine oil exclusively from Calcutta. The increase in the import of each of these articles was probably due to a larger use of them among the poorer classes. Under the head of Indian cotton twist and yarn about 7,000 maunds were imported from the North-Western Provinces and the Punjab, against 3,800 maunds in the preceding year. The imports of coal and coke increased from 14,80,000 maunds to 19,37,000 maunds. This was due to larger consumption in the Railway workshop at Jamalpur and in the South Bihar Railway. The consumption of coke for domestic use is also on the increase. The import and export of unmanufactured tobacco were nearly equal.

Bhagalpur.

The Loop Line of the East Indian Railway carried the bulk of the import and export trade of the South Bhagalpur. In North Bhagalpur the Tirhut State Railway was the means of communication used. Since the extension of this Railway to Khanwa Ghat, a considerable portion of the trade of this part of the district, which formerly used to be carried down to Sahibganj by boat traffic through the Kosi, has of late passed to the Tirhut State Railway. The internal trade of the district is carried on by means of carts, pack-bullocks and ponies. No statistics of this trade are available, but its amount is considerable.

The principal articles of export were rice, paddy, gram and pulse, other food-grains, oilseeds and sugar, unrefined, and of import gunny-bags, sugar, cotton piece-goods, European, salt, kerosine oil, and coal and coke. The export trade of the district with Calcutta shows an increase in respect of rice, gram and pulse, jute raw, oilseed and cotton raw; in the import trade the increase is noticeable under the heads cotton piece-goods both European and Indian, salt, kerosine oil and gunny-bags.

Purnea.

The trade of the year under report was rather dull, in the preceding year there was unusual briskness due possibly to the famine in neighbouring districts. The demand for food-grains, one of the chief items of export from this district, was less during 1897-98. The poor prices realised for jute discouraged the cultivators of that staple.

The total exports were less, only 17,93,413 maunds of food grains and other crops having been exported during the year, against 20,69,803 maunds in 1896-97. There was a decrease under heads rice, wheat, gram and pulses. Other food-grains, jute raw, gunny-bags, sugar, manufactured tobacco, cotton, piece-goods Indian, cotton twist Indian, and kerosine oil; in all other articles a slight increase is noticeable. The important trade of the district was also duller than in the preceding year. The people in general had probably less money to spend after the scarcity of the preceding year. 5,95,194 maunds only of food crops and other articles were imported into the district, against 6,08,816 maunds in 1896-97, the principal articles of import were rice, paddy, grain and pulses, other food-grains, gunny-bags, cotton raw, sugar, cotton piece-goods, cotton waste, salt, kerosine oil and coal and coke.

There was a remarkable decrease in the export of wheat to Calcutta, only 927 maunds of wheat were exported, against 15,393 maunds in the preceding year. In the import trade with Calcutta there was a decrease in European cotton piece-goods, European cotton twist, salt and gunny-bags. In other articles of import there was a slight increase.

The external trade of the district is carried for the most part by rail, to which some roads serve as feeders. Since the opening of the Barsai-Kishanganj Railway branch, the traffic by the river Mahananda has greatly dwindled.

Malda.

The import and export traffic of the district is carried on by river and road. The boat traffic is attended with much inconvenience owing to the silting up of the rivers in many places in and out of the district. The principal articles of trade in this district were the same as in the preceding year and are as detailed below:—

EXPORT.

Rice, wheat, oil-seed, pulses, indigo, silk, cocoons, bellmetal utensils and jute.

IMPORT.

European piece goods, cotton twist, salt and kerosine oil, the export trade in rice decreased during the year owing to the successive bad harvests of the preceding two years and the consequent high prices. About 70,000 maunds of rice were exported during the year, of which 1,264 maunds only were sent down to Calcutta. The trade in wheat too, which is largely exported, decreased. About 25,000 maunds of wheat were exported during the year, of which only 3,395 maunds were sent down to Calcutta. The trade in jute was rather dull. About 67,863 maunds of raw jute were exported to Calcutta, against 89,657 maunds in the preceding year. Messrs. Ralli Brothers & Co., who had opened an agency at old Malda, had almost the entire monopoly of this trade. The export trade in raw silk was also slack owing to the famine and plague in the Bombay Presidency. The exports in oilseeds were, however, brisker during the year. About 21,967 maunds were sent to Calcutta. The imports of European piece-goods, cotton twist and salt was normal during the year, while those of kerosine oil increased, about 2,392 maunds were imported during the year, against 687 maunds in the previous year.

Sonthal Parganas.

The Deputy Commissioner of the Sonthal Parganas writes: "The remarks of last year as to the insufficiency of the railway statistics, as a record of the trade of the district, apply to the year under review." The principal articles of trade were rice, wheat, grain and pulse, oilseed, sugar, salt, coal and coke. The export trade in rice decreased during the year. It is estimated that 1,11,986 maunds of rice were exported, against 2,03,021 maunds in the preceding year. The export trade in gram and pulse was also smaller; that in unrefined sugar was dull. The imports in rice were almost double, and those in unrefined sugar increased. The imports in salt showed only a slight decrease. The sabai grass exported from Rajmahal subdivision was 2,50,000 maunds, against 2,80,000 maunds in 1896-97 and 2,45,000 in 1895-96.

The export trade of the district with Calcutta increased in respect of rice, gram and pulse, other food-grains, oilseed, tobacco, unmanufactured, and indigo. In the import trade the decrease is noticeable in all cases except in gunny-bags.

Regarding the cattle market of Hiranpur, the Deputy Commissioner writes:—

"The transactions of the Hiranpur cattle market show a continued falling off, only 20,780 heads of cattle having changed hands, against 25,604 in the previous year. Prices were still further reduced, the number of heads which were sold at prices more than Rs. 24 being 1,595, against 1,773 in 1896-97 and 2,761 in 1895-96; and those sold between Rs. 17 and Rs. 24 being 2,568, against 3,798 in 1896-97 and 4,586 in 1895-96. The trade began to show a slight improvement in February and March, when the numbers sold were somewhat in excess of those sold in February and March of the previous year."

I attribute this to the temporary cause of tightness after the famine.

The annexed statement shows the import and export trade with Nepal, as registered at the three registering stations on the frontier of the Bhagalpur district and 12 registering stations on the border of the district of Purnea. These stations are on the principal trade routes. The Magistrate of Bhagalpur suspects that some portion of this trade escapes registration by passing through intermediate routes. The Magistrate of Purnea writes that a branch of Kusumbha station is required at Gudam, where it is proposed to place a literate peon for registering traffic for six months from the 15th December. The imports from Nepal into British territory were rice, gram and pulses, fresh fruits and vegetables, oilseed, tobacco, timber, jute, and gunny-bags, besides cattle, sheep and goats and hides of cattle, and the chief exports to Nepal mainly consisted of unrefined sugar, cotton twist European, salt and kerosine oil. Both import and export trade to and from Nepal were rather dull than in the previous year, owing to a better outturn of crops in both British and Nepal territories.

The Magistrate of Bhagalpur, Mr. Ritchie, writes:—

"In my short visit across the frontier I was struck by the complete absence of cart roads of any sort or kind. Even round the chief place of Hunumnagar, there is nothing that would be classed even as a fair-weather road in British territory. Till they reach our border all goods have in consequence to be carried on pack animals."

* * * * * * *

XVII.—CONDITION OF THE DIVISION AS REGARDS LAND AND THE LAND REVENUE ADMINISTRATION.

Number of estates.

129. The number of estates borne on the revenue roll again rose from 15,023 to 15,070. Forty-five estates were added by partition. Three estates comprising B class lands of the East Indian Railway, though already borne as one estate on the revenue roll of the Sonthal Parganas, were for the first time during the year under report accounted for in the tauzi returns of the district, the revenue derived from them being hitherto shown as miscellaneous revenue. A diluviated estate, which reformed and was settled during the year, was entered on the revenue roll of the district of Monghyr under the orders of the Board of Revenue. Three estates formed by partitions in the district of Bhagalpur were united into one under section 129, Act VIII (B.C.) of 1876. The net result is an increase of 47 estates.

Sales and redemption of estates.

130. Two Government estates in Bhagalpur and one Government estate and shares of Government in two estates in Malda were sold, with revenue fixed in perpetuity, under Government orders No. 914L.R., dated the 19th January 1895, and No. 743L.R., dated the 13th September 1897. There was no case of redemption during the year.

Demand.

131. The current demand increased from Rs. 33,70,681 in 1896-97 to Rs. 33,79,605. The increase of Rs. 8,924 is mainly due to the settlement of *khas patit* lands; to the resettlement of estates at higher rental, chiefly of two Government fisheries in Malda; to the addition of the rent of the three plots of railway B class lands referred to above, and to the addition of the revenue derived by the settlement of Paharia villages in the Pakour subdivision of the Sonthal Parganas.

Collections.

132. The current collections were Rs. 33,15,622 during the year against Rs. 32,94,149 in 1896-97, giving a net increase of Rs. 21,473. The percentage of collection was 98·1 against 97·7. Out of an arrear demand of Rs. 84,427, Rs. 75,881, that is, 89·8 per cent., were collected against 84·1 in the previous year; 97·9 per cent. of the current and arrear demands were collected, the remissions amounting to about ·07, leaving a balance of only 2·03 per cent., distributed as follows:—

		Rs.
Class I		8,778
„ II		5,126
„ III		56,230
Total ...		70,134

133. The statement in the margin shows the percentages of collections attained in each district.

District.		Percentages of collections.		
		Class I.	Class II.	Class III.
1		2	3	4
Monghyr ...	Current ...	99·74	88·60	56·46
	Arrear ...	100·	99·77	95·14
Bhagalpur ...	Current ...	99·66	85·43	90·01
	Arrear ...	81·30	74·46	47·46
Purnea ...	Current ...	99·72	89·04	86·63
	Arrear ...	99·08	75·92	5·40
Malda	Current ...	99·90	96·56	57·04
	Arrear ...	100·	100·	61·99
Sonthal Parganas ...	Current ...	99·91	98·22	92·93
	Arrear ...	100·	100·	99·70

134. In class I the current collections exceeded the standard of 99 per cent. in all districts. The arrear collections were less than 99 per cent. in Bhagalpur alone. Out of an arrear demand of Rs. 6,467 in that district, Rs. 5,264 were collected, leaving a balance of Rs. 1,203 outstanding at the close of the year. The Collector reports that this amount is held in deposit and will be transferred as soon as pending appeals regarding sales are disposed of.

135. In class II the standard of 95 per cent. fixed for current collections was exceeded in Malda and the Sonthal Parganas. In Monghyr, Bhagalpur, and Purnea the percentages were 88·60, 85·43, and 89·04, respectively. In the collection of arrear demand the prescribed standard was attained in Monghyr, Malda, and the Sonthal Parganas. Out of the total balance of Rs. 5,126 shown against this class, Rs. 80 have been realised since the close of the year, Rs. 4,874 are covered by certificates, and the remainder is in process of recovery. The Collector of Monghyr, where the balance was heavy (Rs. 4,092), attributes the short collections in his district to the poor harvest of the year 1896-97.

136. In class III the current collections exceeded the standard of 90 per cent. in Bhagalpur and the Sonthal Parganas. The arrear collections reached the prescribed standard only in the Sonthal Parganas. The Collector of Monghyr reports that the short collections are due (1) to the poor harvest of the preceding year; (2) to there being no tahsildar (or Sub-Deputy Collector) who might have pushed on collections vigorously, and (3) to the *bhadoi* crops being partly damaged by the high floods of the Ganges. In Bhagalpur out of the total balance of Rs. 4,372, Rs. 1,213 have since been realised, Rs. 1,241 are irrecoverable and are pending remission on account of diluvion in estates Mohanpur and Tintanga, and the rest is in course of realisation. With reference to the discrepancies between the khas mahal and the tauzi accounts of this Collectorate, noticed in the report for the preceding year, the Collector submitted a full report containing many suggestions for their reconcilement and prevention of such discrepancies in future. The Board have since approved of them, and it is hoped the matter will be set right during the current year. The Collector of Purnea writes that the collections were somewhat retarded for want of officers.

The Collector of Malda attributes the short collections in his district to the prevailing distress and to the failure of cocoons and the damage done to the *bhadoi* crops by the floods during the year under report. The Deputy

Commissioner, Sonthal Parganas, writes that the poor Sonthals and Paharias had to pay the heavy arrears of the preceding year. Rupees 9,105 have, however, been paid since the close of the year.

Sales for arrears of land revenue.

137. Out of 14,797 revenue-paying estates in the Division, 1,184 fell into arrears for a sum of Rs. 45,930; 65 of them were sold. The standing orders of Government that the sales for the arrears of one kist day should take place before the next kist day were infringed in the districts of Monghyr, Bhagalpur, and Purnea. The Collector of Monghyr writes that the delay in the preparation of the arrear lists is partly due to the inadequacy of the tauzi establishment and partly to the defective state of the Land Registration registers. The delay in Bhagalpur is due to the backwardness of certain tauzi muharrirs in submitting their portions of the arrear lists. The Collector has taken steps to prevent such delay in future. The Collector of Purnea writes that the tauzi ledger forms for 1897-98 were not received till August 1897, and there was some delay in writing and comparing them, and therefore the arrear lists could not be prepared so as to admit of the sale being held before the 27th December 1897.

Settlements.

138. Three hundred and seventy-five estates were actually or nominally under settlement during the year, including 280 applications by private parties in the Sonthal Parganas for table of rates under Regulation II of 1886. Two hundred and ninety-six of them were pending from 1896-97, 285 were disposed of, leaving 90 undisposed of. Of the former 251 were struck off the file (1 in Bhagalpur as the estate being untraceable was removed from the revenue roll, and 250 in the Sonthal Parganas as the villages were included in the proposals for regular settlement). The number of settlements actually effected was therefore 34. The settlements gave a net increase of Rs. 3,849 only. The revenue of the northern and southern sections of the fishery Gangapath Islampur (property of Government) in the district of Malda rose from Rs. 2,950 to Rs. 5,950.

Public Demands Recovery Act.

139. Including those pending at the close of 1896-97, there were 17,702 certificates for disposal, their demands aggregating Rs. 2,89,245, against 18,647 certificates and demand of Rs. 3,17,126 in the preceding years. Of this sum, Rs 1,44,816 were realised by 12,201 certificates, 1,374 certificates were cancelled, leaving 4,127 cases pending which covered Rs. 1,17,717; Rs. 55,801 were realised in issue of notice under section 10 and attachment; Rs. 80,740 on issue of sale notification, and only Rs. 8,275 by actual sale or arrest. The number pending at the close of the year under report was only 4,127 against 4,166 at the end of 1896-97. In Malda and the Sonthal Parganas the disposals nearly kept pace with the institutions, and in Monghyr and Bhagalpur have exceeded them. In Purnea alone the disposals were much less than the institutions. The Collector writes that out of the 738 cases pending at the close of the year, 432 were instituted in the month of March 1898.

The Collector of Monghyr remarks that sections 20 and 21 of Act I (B.C.) of 1895, as amended by Act I (B.C.) of 1897, had proved a boon to defaulting proprietors, many having availed themselves of the privilege it confers.

Land acquisition.

140. There were 162 new cases, and 42 were pending from last year. One hundred and seventy-six cases were disposed of, leaving 28 pending at the close of the year.

141. As in the year before, a Deputy Collector was employed for the acquisition of lands required for the South Bihar Railway, and three Deputy Collectors for the Hajipur-Katihar extension of the Tirhut State Railway in the districts of Monghyr, Bhagalpur and Purnea.

142. Of the total length (79 miles) of the South Bihar Railway, 22 miles lie in the district of Monghyr, and the total area to be acquired in that district is 1,018 acres, and the total number of cases to be disposed of is 2,221. Nine hundred and eighteen acres of land were acquired, for which Rs. 1,33,943 were awarded and Rs. 1,13,031 paid. One thousand eight hundred and twenty-five cases were disposed of.

143. The Monghyr Deputy Collector, Babu Kanti Bhushan Sen, was in charge of 69 miles against 68 miles the year before. The Deputy Collector

measured the whole area last year, excepting five miles of the line for the Monghyr Ghat branch, which has not yet been demarcated by the Engineering Department. He made awards for 327 acres, and paid Rs. 63,463 as compensation.

144. Owing to the non-demarcation of the land in the Munshi division, and to the non-publication of the notification under section 6 in the Kosi Bridge division, the work of the Bhagalpur section of the Hajipur-Katihar Railway could not be taken up till November 1897. Babu Suresh Chandra Chatterjee, Deputy Collector for this district, reverted to the general line on 5th June 1897, and on the 20th November 1897 he was deputed back to this work. The whole of the 1,107 acres of land to be acquired in this district was surveyed, and all preliminary operations completed during the year.

145. Babu Romesh Chandra Das was employed in acquiring the land for the Purnea section of the Hajipur-Katihar Railway. He expects to complete the acquisition of the whole length of 31 miles within a short time. Three thousand three hundred and ninety-nine acres of land are to be acquired at an estimated cost of Rs. 2,25,200, including brickfields, for the projected line. One thousand three hundred and forty-five acres of land were acquired, and Rs. 74,291 paid as compensation during the year. Owing to the postponement of the work, this Deputy Collector also had to revert to the general line for some time. The question of the waterways and altered alignment between miles 88 to 110 having been settled by the Committee assembled at Kursella, the draft declaration has now been sent up for publication.

Partitions.

146. Of the 181 cases on the file for disposal, 125 were pending from 1896-97 and 56 were new institutions. Fifty-four cases were disposed of and 127 left pending at the close of 1897-98. The number of cases instituted increased by 31, the increase being most marked in Monghyr. The number of disposals also increased by 23, it being nearly double in Monghyr. It is satisfactory to notice that, notwithstanding the large increase in the institution, the file of pending cases increased only by 2.

147. In Monghyr two old cases, pending respectively for the last 13 and 11 years, were disposed of during the year under report. The oldest case on the file is that of pargana Bisthazari, comprising 158 *asli* and 56 *dakhil* villages, instituted on the 30th June 1885. It is at the stage of section 75, and was before the Board on appeal, and has lately been disposed of. In Bhagalpur the oldest case on the file is that of Jalai, instituted on the 30th August 1890. It is pending on appeal before the Board, and is at the stage of section 81. The partition cases in the other districts of this Division call for no special comment.

Land registration mutations.

148. Including 1,756 pending cases of the preceding year, the total number of cases for disposal last year was 5,380: 1,850 appertained to the district of Monghyr. The disposals numbered 3,992 (in Monghyr 2,085), and the year closed with 1,388 cases pending. Only 248 cases were pending over six months.

Landlords' fees.

149. The number of transfers on which fees were paid, purporting to be under sections 12 and 13 of the Bengal Tenancy Act, was 1,223. Under the Board's circular order No. 6 of September 1896, the whole amount of fees paid (Rs 1,675) was deposited in the treasury, and the landlords to whom they were payable were informed that the same would be held in deposit till applied for by them. During the year under report only Rs. 7 were paid to the landlords on their applications. It appears that the system is not working well.

Embankments.

150. As reported last year, the only revenue embankments in this Division are the Monghyr embankment in the Begusarai subdivision and the Belwa embankment in Purnea. There is nothing new to write about their management. The cost of maintenance realisable during the year amounted to Rs. 795, that is, Rs. 82 for *Sakri* and Rs. 713 for the Monghyr embankment. Last year the Purnea District Board sent a requisition for recovery of Rs. 288 spent for the Belwa embankment in constructing works to protect the bank from erosion. The Mahananda embankment in Malda and the Chandan embankment

in the Banka subdivision of the district of Bhagalpur are to protect those two civil stations, and are managed by the District Boards.

Road and Public Works cesses.

151. The total demand, current and arrear, of Road and Public Works cesses was Rs. 10,21,118. The collections amounted to Rs. 8,57,568, and the net balance, after deducting remissions, was Rs. 1,63,464, or a percentage of 16·0 on the gross demand. A partial revaluation of seven estates in the district of Malda having been sanctioned by the Government order No. 456T.—F., dated the 25th September 1897, and by the Board's order No. 370A, dated the 16th October following, the work was taken in hand during the month of November last. Of these, six estates have been revalued up to the close of the year at a net increase of Rs. 582. No revaluation was in progress during the year in any other district of this Division.

* * * * * * *

Advances under the Land Improvement Loans Act XIX of 1883.

156. Rupees 7,975 were advanced during the year,—Rs. 100 in Malda and Rs. 7,875 in the Sonthal Parganas. The total amount outstanding on the 31st March 1897 was Rs. 12,154, which was raised to Rs. 20,129 by advances made last year. Of this sum, only Rs. 3,911 principal and Rs. 760 interest, in all Rs. 4,671, fell due during the year. The total collections amounted to Rs. 3,934 (Rs. 3,353 principal and Rs. 581 interest), leaving a balance of Rs. 558 principal and Rs. 179 interest—total Rs. 737 outstanding. Of the total balance, Rs. 211 are due from Monghyr, Rs. 279 from Bhagalpur, and the remainder from the Sonthal Parganas. Rupees 150 have been recovered (in Monghyr) since the close of the year, and the rest is in process of recovery.

157. A special allotment of Rs. 10,000 was sanctioned by the Board for the district of Bhagalpur in January 1897. Out of this grant a sum of Rs. 8,331 was advanced during 1896-97, of which Rs. 3,619 have been recovered, leaving a balance of Rs. 4,712 outstanding on the 31st March 1898.

158. A sum of Rs. 5,000 was sanctioned last year for Bhagalpur under the *modified rules* published by Government under the Land Improvement Loans Act, but nothing was disbursed during the year. The Collector says that the unbounded energy and enterprise of the people of his district in starting small private works of their own rendered it unnecessary to give loans for village relief works under the modified rules. Rupees 10,700 were advanced in the Sonthal Parganas under these rules, of which only Rs. 1,083 fell due during the year. The total collections amounted to Rs. 1,078, leaving a balance of Rs. 5 outstanding in the Jamtara subdivision. Rupees 3,444 were remitted in this district under rule 18 of the modified rules. No such loans were granted in any other district of this Division.

Advances under the Agriculturists' Loans Act XII of 1884.

159. The aggregate amount advanced was Rs. 53,650, of which Rs. 4,443 were given in Monghyr, Rs. 29,764 in Bhagalpur, Rs. 2,395 in Purnea, Rs. 1,699 in Malda, and Rs. 15,349 in the Sonthal Parganas. The opening balance on the 1st April 1897 was Rs. 12,495. With Rs. 53,650 advanced last year, the total was Rs. 66,145, of which only Rs. 23,394 were actually due and Rs. 2,326 were due as interest; Rs. 21,520 were collected (Rs. 19,472 principal and Rs. 2,048 interest), leaving a balance of Rs. 4,200. A part of it has since been realised, and the outstanding balance is being recovered under the certificate procedure.

Miscellaneous, sanitary and agricultural improvements in Government estates.

160. The following information is furnished regarding the amounts expended in Government estates on account of miscellaneous sanitary and agricultural improvements in accordance with the instructions contained in Government letter No. 3505, dated the 19th October 1894.

161. In Monghyr Rs. 695 were spent in constructing two masonry wells at Khagaur and Binda Diara, Rs. 163 in repairing tahsil offices, and Rs. 70 in erecting boundary pillars. Rupees 120 were contributed to the charitable dispensary at Khagaur (Lakhisarai), and Rs. 40 were paid to the sweepers employed in keeping clean the bazar in Government estate Khagaur. In

Bhagalpur Rs. 100 were spent in repairing roads, Rs. 975 in repairing and constructing tahsil offices, and Rs. 250 in purchasing furniture for them, Rs. 85 in levelling the Tintanga cutcherry compound, Rs. 800 in re-excavating tanks in Pealapur and Hazarbighee, Rs. 420 in sinking wells, Rs. 548 in repairing embankments, and Rs. 41 in purchasing potatoes for seeds. In Purnea Rs. 95 were spent in digging and cleansing wells at Belwa, Harien, Khari, and Bagmara, Rs. 32 in purchasing Naini Tal potatoes for seeds, Rs. 150 in repairing and constructing tahsil offices, and Rs. 68 in planting a mango garden in Bagmara. In Malda Rs. 690 were spent in re-excavating tanks and sinking wells and Rs. 360 in repairing tahsil offices and on sundry works.

In the Sonthal Parganas Rs. 9,708-9 were spent.

Forest.

162. There is no Government forest in any district of this Division, except the Sonthal Parganas.

* * * * * * *

XXI.—INCOME-TAX.

189. The results of the year's administration are summarised below and compared with those of the previous year:—

Year.	Number of persons assessed.	Total demand, including arrears, costs, penalty.	Total collections, including arrears, costs, penalty.	Remissions.	Balance.
1	2	3	4	5	6
		Rs.	Rs.	Rs.	Rs.
1897-98	11,396	2,79,244	2,70,355	2,875	6,838
1896-97	11,374	2,70,465	2,64,004	1,726	5,446
	+23	+8,779	+6,351	+1,149	+1,392

There was an increase both in demand, and in the number of persons assessed in Bhagalpur, Malda, and the Sonthal Parganas, due chiefly to the discovery of new assessees. In Monghyr the number of assessees decreased, but the demand increased by 5·7 per cent. This is attributed to the enhancement of the tax of grain-dealers, who made extensive profits owing to large exports and sudden rise in the prices of food-grains towards the end of 1896-97. There was a decrease in the demand in Purnea, due to smaller commissions received by the managers and assistants of indigo concerns, owing to the badness of the indigo season, and to the reduction of tax on objection from Rs. 4,075 to Rs. 1,888 in the case of an assessee of the highest class.

190. Rupees 2,63,860 were collected as tax, and on the 31st March Rs. 3,468 remained to be collected, of which Rs. 2,450 were reported as under realisation. In Malda, as usual, the entire demand was realised within the year, and nearly the same result was attained in the Sonthal Parganas, the outstanding balance being Rs. 95 only. This amount is reported to be bad and irrecoverable.

191. In Monghyr, Bhagalpur, Purnea, and the Sonthal Parganas the warrants issued for realisation of tax exceeded those of the previous year by 9, 51, 14 and 38, respectively, while in Malda they decreased by 22. The increase is generally attributed to the wilful neglect on the part of the assessees to pay their tax on the issue of demand notices, in the belief that resort to extremities would prove their inability to pay the tax and establish a claim for future exemption. The percentage of sale in the Sonthal Parganas is highest, viz. 26·6, while in the remaining districts it varied from 6·5 in Malda to ·4 in Monghyr. Nine hundred and eighty-five objections were filed, of which 760 were rejected. The percentage of successful objections for the Division was 22·8. In Bhagalpur the proportion of successful objections exceeded 25 per cent. The actual expenditure amounted to Rs. 12,843, including the cost of establishment in this office. Taking into account Rs. 114 remitted under rule 13 of the Bengal Government rules, the total expenditure amounts to

Rs. 12,957. The percentage of charge for the Division, excluding the collections made by the Accountant-General, Bengal, and the interest on Government securities, was 4·8 against 5·2 in the preceding year.

192. For the first time in this Division there was a case of composition of tax. This was with an assessee in Monghyr for a period of three years commencing with 1898-99.

193. The tax continues to be as unpopular as ever, but people have become accustomed to it, and there was no open manifestation of discontent during last year.

* * * * * * *

XXIII.—RAILWAYS AND OTHER PUBLIC WORKS.

199. No new railway projects were sanctioned last year. The works under construction are the South Bihar Railway and the Hajipur-Katihar extension of the Tirhut State Railway. The construction of the former has progressed considerably. Of the latter some progress is reported from the district of Monghyr, but not much done in the other two districts, viz., Bhagalpur and Purnea. The land acquisition work in Bhagalpur had to be suspended for a greater portion of the year, in consequence of the delay on the part of the Railway authorities in demarcating lands. In Purnea also the work was stopped for some time, as the alignment questions had not been settled. The acquisition work is, however, now being pushed on vigorously in both the districts. Objections have been made to the absence of crossings for water in the Bhagalpur district. As regards the scheme for a light railway from Bhagalpur to Deoghur by Bansi, it remains at the same stage as last year. Since the close of the year the Board of Revenue have called for an estimate of the probable cost of the land, which is under preparation.

200. There was no case of obstruction on the long lengths of open line last year. Some damage was caused by flood to the railway line at Mananpur (254 miles) in the Monghyr district. It was, however, restored as quickly as practicable, and no inconvenience was felt by the public.

201. In the same district there were 36 cases of accidents against 30 in the preceding year. Of these, 13 proved fatal against 6 in the year before. Owing to the formation of sand-banks in the Ganges, the connection between the East Indian Railway and the Eastern Bengal Railway is now considerably east of Sahibganj and Manihari on the respective banks. The railway ferry steamer now goes down to Moharajpur ghat, and there is a shuttle train between Sahibganj and Moharajpur stations.

202. There are no Government irrigation works in this Division. The *rabi*-growing lands are irrigated with well water, while for paddy lands the people have to depend on rainfall, except in *Kharagpur*, where the Maharaja of Darbhanga has extensive irrigation works, viz.—

A.—Canal.

B.—Gilandazi bunds and wells.

The canal with its distributaries measures 32 miles in length, and receives its supply of water from a reservoir constructed by bunding up the river. Then there is a perennial strean fed by the hot and cold springs of the Kharagpur hills. There are 6 wells and 84 gilandazi bunds irrigating lands which lie beyond the reach of the canal and its distributaries. By the bunds 32,500 bighas of lands of all description are irrigated at all seasons of the year, and by the canals 30,000 bighas of paddy lands are irrigated. Great good is being done by these splendid works. The cost of maintenance last year was reported at Rs. 7,285.

203. The Deputy Commissioner of the Sonthal Parganas reports that about Rs. 5,000 were spent in excavating new bunds and in improving old ones in the Damin-i koh. From the reports received from District Officers, it does not appear that any important public works were executed during last year.

XXIV.—COMMUNICATIONS.

204. The roads and communications under the District Board of Monghyr were well maintained. Eighty-two miles of metalled roads and 1,323 miles of unmetalled roads were maintained at total costs of Rs. 29,545 and Rs. 53,172, respectively. Minor

Monghyr.

works were constructed at a total cost of Rs. 657. Eight miles of new road were constructed at a cost of Rs. 1,807. Twenty-one new bridges were constructed at a cost of Rs. 4,898. For repairs to old bridges Rs. 2,571 were spent. The expenditure incurred by the Local Boards on village roads was Rs. 18,963.

Bhagalpur.

205. The cost of maintenance of the roads under the District Board of Bhagalpur was Rs. 42,586, and that of the roads under the Local Boards Rs. 7,648.

Purnea.

206. The District Board of Purnea spent Rs. 12,473 on original works and Rs. 58,972 on repairs, and the Local Boards spent Rs. 14,615 on repairs.

Malda.

207. The total expenditure on the maintenance of the 92 district roads, aggregating 535 miles in length, cost Rs. 28,005. On village roads Rs. 40 only were spent. There are in this district 378 miles of river communication. The total expenditure incurred in removing snags of 149 miles was Rs. 212. There are two steamer services, of which one plies between English Bazar and Rajmahal during the rainy season, and the other between English Bazar and Rampur Boalia. The District Board of Malda paid a subsidy of Rs. 1,030 to the former.

Sonthal Parganas.

208. From the Road Fund Rs. 884 were spent in improving bridges and culverts on the Dumka-Deoghur road. From the donation given for famine relief by Raja Ram Ranjan Chakravarti, of Hitampur, Rs. 804 were utilised in improving two roads. From the Estates Improvement Fund Rs. 4,421 were spent on the improvement of roads and construction of bridges and roads in the Damin-i-koh.

Arboriculture.

209 In the district of Monghyr about 24,218 fruit-bearing trees and a few timber trees were maintained at a cost of Rs. 3,194. The District Board of Bhagalpur planted 117 young trees and maintained 10,459 established ones at a cost of Rs, 1,364. The Local Boards spent Rs. 133 in planting and maintaining trees on the roads in their charge. In the district of Purnea 372 trees were planted at a cost of Rs. 357, and nursery gardens were maintained at the head-quarters subdivision and in the subdivision of Araria at a cost of Rs. 57. On the Ganges and Darjeeling road 334 trees were planted at a cost of Rs. 475. In Malda Rs, 204 were spent in planting 69 trees and in supplying gabions.

In the Sonthal Parganas 1,115 new trees were planted during the year, but there was a loss of 1,633 trees owing to drought. The number of established trees on the roads is now 22,297, the maintenance of which cost Rs. 186, excluding the pay of *malis*. In the Court of Wards' estates in this district the number of trees on the roads at the beginning of the year was 11,145; the number planted during the year was 805; 146 were destroyed. There remained 11,804 at the end of the year.

210. The Superintending Engineer, Mr. Cloete, rendered the same cordial assistance to my predecessors in office as he did in previous years. Mr. Oldham retained his high opinion about the work of Mr. James Robinson, the District Engineer of Bhagalpur.

* * * * * * *

XXX—LOCAL SELF-GOVERNMENT INSTITUTIONS.

258. *Municipalities.*—As in the year before, there were two municipalities in each of the five districts of the Division. The statement below shows the number of their meetings, the attendance, and their demand and collection of taxes:—

Number.	Name of Municipality.	Number of meetings.	Percentage of attendance.	Total demand.	Collection.	Percentage of collection.	Total expenditure.	Remarks.
1	2	3	4	5	6	7	8	9
				Rs.	Rs.		Rs.	
1	Monghyr	15	61·5	50,928	51,210	92·94	6,076	
2	Jamalpur	7	63·39	19,808	17,846	87·17	20,506	
3	Bhagalpur	13	87·1	95,660	63,047	65·91	1,07,332*	* Includes expenditure of Rs. 26,712 for extending the water-works scheme, for which the Municipality obtained a loan from Government of Rs. 3,00,000.
4	Colgong	16	64·77	4,847	4,509	88·9	5,009	
5	Purnea	13	56·7	15,940	14,796	93·4	18,663	
6	Kishanganj	23	26·77	4,821	4,009	92·03	6,961	
7	English Bazár	14	54·6	11,709	9,501	81·1	13,499	
8	Old Malda	19	53·12	2,558	2,323	90·81	3,325	
9	Deoghur	17	61·7	6,030	6,029	99·98	8,552	
10	Sahibganj	10	53·	10,194	9,632	95·32	12,542	

259. The pressing wants of the Monghyr Municipality are—

(*a*) A supply of drinking-water for the town.

(*b*) A system of pucka drainage with flushing arrangements, for which a scheme was prepared and submitted to Government for administrative sanction. Government by its order No. 2684M., dated 5th May 1898, withheld its sanction to the scheme, as it did not appear to be financially sound.

260. As noticed in the last year's report, the Vice-Chairman, Babu Shivandan Prasad Singh, who also acted as Chairman for several months during Mr. Marriott's absence, continued to take the keenest interest in the welfare of the Municipality, and he and his father, Rai Camalishwari Prosad Singh, Bahadur, have great influence, which is reported to be always used for the good of the town.

261. The Municipality of Jamalpur obtained a loan of Rs. 3,000 from Government under orders No. 1959M., dated 29th March 1898, for remodelling the bazar drains. A culvert and 1½ miles of drain costing Rs. 5,092 were made.

262. The Municipal Commissioners have since resolved to extend the drainage works, and asked for a further loan of Rs. 3,000 from Government to complete the scheme.

263. This Municipality was inspected by Mr. Oldham on the 26th February 1898, and I quote below his remarks:—

"As regards the relations of this Municipality with the controlling authorities, which, so far as they have been unfortunate, I attribute entirely to the weakness of their office establishment."

"It is the deliberate policy of the present executive (Mr. B. W. Rendell, the Chairman, and Mr. Tobyus Browne, the Vice-Chairman) to spend every pice of their revenue which they can afford on useful public works, and it is by the good work which they know that they are doing that they console themselves for the very considerable worry which their municipal duties give them, trenching on their onerous official duties as they do, and occasionally bringing them into annoying conflict with the authorities. * * * * But I think there is little chance of friction so long as the municipal administration is vested in the competent and responsible hands in which it now rests."

* * * * * * *

267. The Colgong Municipality is small, but is well managed. It has a compact area. Last year for the first time the Municipality elected a non-official Chairman who is doing well, as was seen by Commissioner Mr. Oldham on the 6th February 1898.

268. The boundaries of the Purnea Municipality were revised during the year, and the villages noted in the margin were excluded from it. Part IX of the Municipal Act has been extended to this Municipality in the end of the year under report. Great attention is paid to cleanliness. The Municipal Commissioners, especially the Vice-Chairman, Babu Jogendra Nath Mukerjee, are intelligent and zealous.

Sarupganj, Baijnathganj, and Gokulganj.

* * * * * * *

270. As to the two Municipalities (English Bazar and Old Malda) in the district of Malda, the Magistrate writes that both the Municipalities worked as well as could be expected. They rejoice in having no history for the year.

271. The Deputy Commissioner of the Sonthal Parganas reports that the two Municipalities at Deoghur and Sahebganj continued to work well; and at both places considerable interest is said to be taken by the Commissioners in municipal affairs.

At Deoghur too much of this interest is given to debate.

At Sahebganj Mr. Cowley, District Traffic Superintendent of the East Indian Railway, is Chairman, and Babu Pasupati Bose, Civil Hospital Assistant, is Vice-Chairman, and to him and Babu Hari Das Marwari, Municipal Commissioner, credit is due for their energy and zeal. The sanitation of the town has been greatly improved within the last few years.

District Board.

272. There is a District Board in each of the four Regulation districts of this Division. The table below shows the income, expenditure and the balance of each:—

District.	Opening balance at the beginning of the year.	Total receipts of the Board during the year.	Total income, including the opening balance.	Total expenditure.	Balance.			Remarks.
					Deposit.	Actual balance.	Total.	
1	2	3	4	5	6	7	8	9
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	
Monghyr ...	22,598	2,54,083	2,76,681	2,40,617	14,469	21,595	36,064	
Bhagalpur ...	14,272	3,10,938	2,96,666	2,79,619	3,716	13,331	17,047	
Purnea ...	67,916	1,83,098	2,51,014	1,85,303	...	65,711	65,711	
Malda ...	32,202	91,348	1,23,550	93,367	918	29,265	30,183	
Grand Total ...	108,444	8,39,467	9,47,911	7,98,906	19,103	1,29,902	1,49,005	

Monghyr.

273. The District Board of Monghyr held 12 meetings, against 13 in the previous year. There were 25 members in all, including the Chairman. The average attendance was 13·3, against 14 in the previous year. The three Local Boards at Monghyr, Jamui, and Begusarai have 38 members, of whom only 2 were officials. Altogether 36 meetings were held by them, against 33 in the previous year in five of these meetings there was no quorum. There was no change in the powers exercised by them. The amount spent by the Board under heads "Education" and "Medical" were Rs. 32,290 and Rs. 13,960, respectively. Rupees 1,54,583 were spent under head "Civil works," of which Rs. 5,858 represent the expenditure incurred in improving the water-supply of the district.

Bhagalpur.

274. The District Board of Bhagalpur held 17 meetings, against 15 in the previous year. There was no change in the total number of members (31). The average attendance was 14·7, against 14·5 in the previous year. Rupees 25,394 were spent by the Board on education and Rs. 44,220 on sanitation, the bulk of which, Rs. 42,655 was spent on works, which also afforded relief. The total expenditure incurred by the Board for the latter purpose under all the heads was Rs. 66,012. The four Local Boards at Sadar, Banka, Madhipura, and Supaul had a total strength of 54 members, of whom 6 were officials. Fifty-two meetings in all were held by them. The largest number of meetings was held at Supaul, viz., 16, and the other Local Boards held 12 meetings each. At Banka the attendance was the best, whilst at Supaul 5 meetings had to be adjourned for want of a quorum.

Purnea.

275. The Purnea District Board has 25 members, including the Chairman. Of the 19 meetings held by it, 5 were special; only 1 meeting was unsuccessful for want of a quorum, and 2 had to be adjourned. The average attendance of members was 12·4, against 12·5 in the preceding year. Rupees 25,156, Rs. 3,206, and Rs. 1,26,382 were spent by the Board under heads "Education," "Medical," and "Civil works," respectively. The three Local Boards in this district at Sadar, Araria, and Kishanganj held 43 meetings, 5 of which were adjourned. The highest number of adjourned meetings was at Kishanganj, which is due to the fact that the members of this Board have to travel long distance, and are unwilling to undergo the consequent trouble and expense.

Malda.

276. The District Board of Malda held 16 meetings, of which 8 were special, 5 ordinary, and 3 adjourned. The average attendance of members at each meeting was 6·6, out of the total number of 13, including the Chairman. The amounts spent by the Board under heads "Education," "Medical," and "Civil works" were Rs. 17,083, Rs. 4,336, and Rs. 49,730 respectively. This district has no subdivision and therefore no Local Board.

General.

277. Mr Ritchie, the Magistrate of Bhagalpur, writes:—

"The functions of the District and Local Boards are now well defined, and these bodies work smoothly and satisfactorily."

278. Mr. O'Brien writes:—"The District Board here is a distinctly useful body." The District Officers are unanimous in their opinion that the members take great interest in their work, and some render great assistance.

279. The Magistrate of Malda, Mr. Yusuf, writes:—

"The fact that the expenditure of the Board is beyond its income will require being carefully watched."

* * * * * * *

XXXIII(b).—FAIRS.

Monghyr.

299. The biggest gatherings held during the year chiefly for religious purposes were at—

Kashtaharini Ghât, Monghyr Fort and Sitakund	...	39,000 on the *Kartic Purnimashi* day.
Ditto ditto	...	10,000 on the *Maghi Purnimashi* day.
Bari Bazar, Monghyr, *Ram Lila* Maidan	...	15,000.
Gowri Sankar Ghât	...	11,000, *Kartic Purnimashi* day.
Ditto ditto	...	3,000, *Sree Panchami* day.
Simaria Ghât	...	30,000, *Kartic Purnimashi* day.
Ditto	...	32,000, *Maghi Purnimashi* day.

There was an outbreak of cholera at Simaria. There were 14 cases and 3 deaths. The gathering was dispersed under orders of the District Magistrate, dated the 6th November 1897. On the requisition of the Subdivisional Officer of Begusarai to the zamindar, the latter appointed a doctor and several mehtars.

Bhagalpur.

300. Fairs were held at Sultanganj, in charge of Mr. Hammond, Tintanga (spoilt by rain); Bausi (Banka), Singhesar (Madhepura), with gatherings of 25,000 and 30,000, (the Magistrate being present at the latter) and Kabilas (Supaul).

Purnea.

301. Khagra fair was attended by 10,000 daily and Karagola by 25,000. Good sanitary precautions were taken. The plague scare reduced the attendance at the former, and the latter was broken up because of a small outbreak of cholera (4 cases).

Malda.

302. The fair at Ramkoli near Gour held in June was attended by 15,000 people, and there was also one at Chanchal in March.

Sonthal Parganas.

303. In the Sonthal Parganas the fairs mentioned in the previous year's report were held, but the number of persons attending each varied in some cases, as will be seen from the following table:—

Subdivision.	Fairs.	Gatherings in—	
		1896-97.	1897-98.
1	2	3	4
Dumka ...	Hijla	20,000 to 30,000	20,000 to 30,000
Deoghur ...	Sripanchami ...	20,000	15,000
	Sivaratri ...	23,000	20,000
	Bhadra Purnima ...	12,000	10,000
Godda ...	Bastara ...	25,000	35,000
	Dhamsai ...	14,000	14,000
Jamtara ...	Karamdoba ...	8,000	More than 4,000
Pakour ...	Pakaur	10,000	10 000
	Maheshpur ...	10,000	10,000
Rajmahal ...	Ghuddi Kata *mêla* ...	8,000	Number not reported.

Besides the above, several other unimportant fairs were held.

304. As reported last year, the Hijla *mêla* at Dumka was held under the management of the Dumka Jubilee Institute, and there was a show of animals, produce, and industrial work, for which prizes were awarded from the *Mêla* fund raised by subscriptions and donations.

There were also sports and amusements. Raja Sitos Chandra Pande contributed largely to the expenses.

The Subdivisional Officer of Deoghur reports that, owing to the scarcity, as compared with the previous year, all the gatherings were small this year, which also suffered from plague precautions.

305. At all the fairs the necessary conservancy arrangements were made, and there was no outbreak of any disease except as noted.

RESOLUTION ON THE ANNUAL GENERAL ADMINISTRATION REPORT OF THE ORISSA DIVISION FOR THE YEAR 1897-98.

GENERAL DEPARTMENT—MISCELLANEOUS.

Calcutta, the 5th December 1898.

RESOLUTION—No. 3490.

READ—

The Annual General Administration Report of the Orissa Division for the year 1897-98.

Complaint is again made by the Commissioner, of some difficulty and delay in obtaining complete and correct figures from District Officers.

The late Mr. Cooke was in charge of the Division throughout the year. Of the three districts, that of Cuttack, and of the four subdivisions that of Kendrapara, were the only ones in which there were no changes of the officers in charge during the year.

2. *Tours and Inspections.*—As required by the Government orders, the duration of the tours of District Officers was fixed by the Commissioner in consideration of the circumstances of each district; but it is not stated whether the tours of Subdivisional Officers were similarly controlled by their respective Collectors. The time spent by officers in camp appears to have been usefully employed. In the early part of the year in Puri, and to a less extent in Cuttack, the subject of relief operations engaged special attention.

The Commissioner visited all the district offices and all the subdivisions except Jajpur, but the treasuries at Balasore and Puri and the sub-treasury at Khurda were not inspected. The different Collectors made the necessary inspections of their own offices and of the subdivisional offices under them, but no district treasury appears to have been inspected more than once,—a neglect of existing orders that must not recur, and which apparently has escaped the Commissioner's notice. The Subdivisional Officers of Jajpur and Kendrapara do not seem to have inspected their own sub-treasuries,—an omission for which no explanation has been given. The Lieutenant-Governor trusts that the rules relating to these very necessary inspections will be strictly followed in future.

3. *Weather and Crops: Material condition of the people: Public Health.*—The average rainfall for the Division was 54·89 inches, or about 5 inches below the normal, the deficiency being common to all districts. The fall was, however, well distributed, and while avoiding the one extreme of long intervals of drought, escaped the other, equally disastrous in a country like Orissa, of an excessive downpour and heavy floods. The season in consequence is described as having been most propitious, and the outturns of both the autumn and winter rice were above the average. The other harvests, too, were generally excellent, and not only was their yield per acre in excess of that of the previous year, but, with the small exception of summer rice, a much larger area was sown under each crop. The after-effects of the damage done to the harvests of the previous year by successive inundation and drought continued to be felt with increasing severity for the first four or five months of the year 1897-98, and the turning point was not reached till the new crops were cut, since when matters have been steadily improving. The pinch of scarcity in the early part of the year was felt least in Balasore; in Cuttack assistance was given from the Indian Famine Charitable Relief Fund, but in Puri relief works were opened on the part of Government, mostly in the tracts adjoining the Chilka lake. Prices fell considerably towards the end of the year under report, but failed to reach the normal level. To those on fixed incomes some hardship must have been thereby caused, but the Commissioner observes that there are few who do not in addition hold some arable land. The demand for unskilled labour on the railway is said to have raised the rates of ordinary cooly hire, as also of the skilled labour of masons, blacksmiths, carpenters, &c., in Cuttack. The Commissioner writes that "the condition of the people at the close of the year was satisfactory, and with good harvests in 1898-99 the losses of 1896-97 will be more than made good."

With the exception of Balasore, the year in the rest of the Division was less healthy than its predecessor, and it is noticeable that the death-rate in the three districts has varied directly with the comparative intensity of the distress in each. Cholera caused many deaths in Cuttack and Puri, and there is no doubt, as the Commissioner remarks, that the condition of the people predisposed them to this disease. In the Division generally, the recorded death-rate was 31·01 per mille, as compared with 28·81 in the previous year.

4. *Manufactures: Mines: and Commerce.*—In spite of the large quantity of salt accumulated at the factories on the Chilka lake, the manufacture was continued as a relief measure; less pans were however worked, and only 1,62,351 maunds were manufactured, as against 1,95,000 maunds during the previous year, of which 17,047 maunds were sold, the corresponding quantity for 1896-97 being 46,224 maunds. The opening of the East Coast Railway is said to have enabled Madras salt to compete favourably with that locally manufactured, to which it is in some respects superior.

The trade of the Division might usefully have been analysed in greater detail, the statistical statements which encumber this portion of the report being relegated to the appendices. The value of the imports by sea into the Division increased from Rs. 67,06,278 to Rs. 82,56,109, and of exports from Rs. 90,24,065 to Rs. 96,44,928. The important fluctuations were in the trade of the Balasore ports, cotton twist, kerosene oil, salt and railway materials among the imports, and rice and paddy, and hides among the exports, all showing a large increase; on the other hand, the value of pulses exported decreased by over two lakhs of rupees. The figures of the traffic with Calcutta by road, river and canal are incomplete, and of little value for purposes of comparison. The export of food-grains by country boats along the canals amounted to 12,07,134 maunds as compared with 7,81,645 maunds in the previous year.

5. *Civil Justice.*—There was a marked increase in civil litigation, noticeably in money suits, and it is probable that with improving prospects more creditors entered the Courts for the recovery of dues for realising which, even if decreed, the bad prospects of the previous year held out little hope. Six hundred and ninety-seven original suits were tried by District and Subordinate Judges, and 20,245 in the lower Courts, in comparison with 318 and 15,739, respectively, during the preceding year. There was a corresponding increase in the number of rent suits disposed of by Revenue Courts from 4,984 during 1896 to 5,817; but although the total number of witnesses examined was less than in the previous year, the Lieutenant Governor regrets to observe that a larger proportion were detained over two days.

6. *Crime: Criminal Justice: and Police.*—Cognisable cases increased during the year from 6,474 to 10,723 and non-cognisable cases from 6,161 to 6,806. Although the increase in the former is partly accounted for by differences of classification in the returns adopted since the previous year, there was a real increase in the number of true cases reported under all headings except that of "Minor offences against the person," although most marked under that of "Minor offences against property." It was observed last year that the scarcity and high prices had not led to any serious increase of crime; but this, however, was not the case during the year under report.

A percentage of 2·8 of the cases reported were declared false; the corresponding figure in the previous year being 4 per cent. Prosecutions were instituted in only 20 per cent. of such cases, and in only 37·5 per cent. of these were convictions obtained. Compensation under section 560, Criminal Procedure Code, was awarded in only 36 cases in comparison with 55 during 1896, although in the Resolution on the report of the preceding year it was remarked that more use might be made of this section. Attention is again invited to the matter.

There was an increase of 19 3 per cent. in the number of cases tried, as compared with the previous year. Stipendiary Magistrates disposed of 6,272 cases in the course of which 18,444 witnesses were examined, and Honorary Magistrates of 2,196 cases during which 3,484 witnesses deposed before them. The Lieutenant-Governor is glad to observe that although more witnesses were examined in stipendiary Courts, the proportion detained over two days fell from 3·9 during 1896 to 1·7 per cent. The corresponding percentage in the

Courts of Honorary Magistrates was slightly worse than in the year preceding, being 3·4 as against 2·9 per cent. The Cuttack Sadar Bench showed the worst results (8·2), the next being that of Puri (6·2). The attendance of Honorary Magistrates is reported to have been fairly regular.

There were 66 cases disposed of in the Courts of Sessions, of which 78·7 per cent. ended in conviction—on the whole, a satisfactory result. There is still room for improvement in the realisation of criminal fines, of which the balance outstanding at the close of the year was as much as Rs. 17,665. In the Khurda subdivision of Puri considerably more was outstanding than was imposed during the whole year, and the unrealised balances at all three Sadar stations were heavy. It is requested that very early attention may be given to this matter. Arrangements for the introduction into the Division of the Chaukidari Act, VI of 1870, continue to be made, and the Lieutenant-Governor would strongly impress on District and Subdivisional Officers the need of their personally examining locally, when on tour, the fairness of the village assessment lists. The conduct of the police is reported to have been, on the whole, as satisfactory as could be expected.

7. *Land Revenue and Cesses.*—The current demand of Rs. 18,61,991 on account of land revenue was only Rs. 1,022 in excess of that of the preceding year, and the year opened with an outstanding arrear of Rs. 1,10,804. Of the total demand 89·5 per cent. and of the current demand 89·4 per cent. was collected. The proportion of current collections to the current demand in the different districts is compared below with the usual standards, for the different classes of estates in the Division:—

	Permanently-settled estates.	Temporarily-settled estates.	Estates under direct management.
1	2	3	4
District Standard ...	99·	95·	90·
Balasore	100·	99·98	51·97
Cuttack	99·99	99·42	91·10
Puri	100·	63·84	73·88
Angul	.....	.....	99·1

The poor collections in Government estates in Balasore have not been explained; the deficiencies in Puri were, no doubt, due to the scarcity in the district, large remissions, to the extent of Rs. 84,513, being given there in Government estates. A sum of Rs. 12,729 was expended on improvements in Government estates, but more detail might well have been furnished of the objects to which it was applied, and the proportion of the final expenditure to the allotments made. Only 28 estates, or shares of estates, were sold for arrear of revenue out of 1,765 which became saleable, and good progress was made with the operations for the settlement of the new land revenue.

The disposal of certificate work, which was unfavourably noticed last year, did not show much improvement; it is true that only 1,814 cases were left pending at the close of the year, as against 2,336 at the end of 1896-97; but, on the other hand, 806 fewer cases were filed during the year than in that preceding. The land acquisition work in the Division, mostly for railway projects, was heavy, but would appear to have been kept well in hand.

8. *Wards' Estates.*—As in 1896-97, there were six estates under the charge of the Court of Wards, one of which was, during the year, released. The year opened with the large arrear demand of Rs. 4,06,946, while the current demand amounted to Rs. 3,74,882. Of this, Rs. 4,31,109 were collected, being a percentage of 55·14 of the total, and 114·9 of the current demand. The results were considerably better than in 1896-97. The sum of Rs. 68,343 was remitted, and Rs 2,89,007 were outstanding at the close of the year. The bulk of this (Rs. 2,37,316) was due to the Kujang Estate, which still continues to show an outstanding balance largely in excess of the current demand, in

spite of the remarks made last year on the point. The Commissioner has not specially noticed the matter, and attention is again invited to it. The sum of Rs. 60,748 was spent on improvements, which is Rs. 19,723 in excess of the expenditure of the preceding year, but no particular reason has been given, neither has the nature of the works undertaken been specified.

9. *Excise: Stamps: Income-tax.*—The excise revenue increased during the year under report from Rs. 6,27,769 to Rs. 6,62,775, the increase being shared by all districts. This is somewhat unusual, considering the experience of other parts of the Province and the unfavourable conditions of the early part of the year. Sixty-five per cent. of the revenue was derived from opium, and 18 per cent. from *ganja*. In Cuttack the number of prosecutions for breaches of the law decreased to 11 as compared with 149 in the preceding year; due, so it is said, to greater vigilance, which would, however, ordinarily have resulted in the detection of more cases, not fewer; and it is also said that the prohibition of the use of Gurjat *ganja* and *siddhi* is now more widely known. The correctness of the explanation is doubted, and attention is invited to the point.

The stamp revenue, amounting to Rs. 4,98,613, shows an increase of 13·8 and 21 per cent., respectively, over the figures for the two previous years. The most noticeable increase was under the heads of court-fees and impressed stamps, the former being attributed to the settlement operations, and the latter to the large number of deeds of mortgage which were executed at the commencement of the year. The law is either well observed, or more vigilance is necessary for the detection of breaches of it; only eight persons being prosecuted in this connection during the year.

There was a small increase of 96 assessees and of Rs. 4,399 in the final demand on account of income-tax. The collections were slightly deficient in Puri, but otherwise were satisfactory.

10. *Railways and Public Works.*—Work on the Calcutta-Midnapore-Cuttack extension of the Bengal-Nagpur Railway made satisfactory progress. The area irrigated by the Orissa Canals increased from 185,048 acres during 1896-97 to 193,600 acres. The demand accordingly rose from Rs. 2,69,850 to Rs. 3,21,119 during the year under report, the collections being very satisfactory, amounting to 99·79 per cent. The total length of metalled roads in the Division maintained by District and Local Boards and Municipalities was 198 miles, and of unmetalled roads 1,506 miles. The proposals for feeder roads in connection with the new railway, to which reference was made last year, were still under consideration, and the Commissioner expresses a doubt whether funds will be available for their construction, and a hope that the District Boards concerned will not act precipitately in the matter. While immature proposals should of course be avoided, it is certain that the construction of the new lines must have created a need, which did not perhaps exist before, for feeder roads, and it is hoped that it will be found possible at least to construct those concerning the necessity for which there should be little or no doubt. Arboriculture appears to receive some attention in Cuttack, but to be neglected in Balasore and Puri.

11. *Education.*—The educational statistics showed a decrease of 298 schools and 6,221 pupils, chiefly in lower primary schools in the districts of Cuttack and Puri. The falling off is ascribed to the scarcity and to some extent to the outbreak of epidemics of small-pox and cholera. The total educational charges amounted to Rs. 4,50,165, or Rs. 4,394 less than in the preceding year. Of this about half was met from fees, and from Provincial revenues and District Board Funds 17 per cent. each. Of the boys of a school going age, some 36·2 per cent. were at school, Balasore being the most advanced district in this respect, and Puri the least. There was a small decrease during the year, both in the numbers of girls and Muhammadans under instruction.

12. *Dispensaries and Hospitals.*—One new outdoor dispensary was opened during the year, and the number of medical institutions was thus raised to 31, with a total income of Rs. 43,275, of which 44 per cent. was derived from private subscriptions and endowments, 23 per cent. from Government, and the balance from District Boards and Municipalities. The Lieutenant-Governor regrets to remark that the Cuttack General Hospital is still in want of funds. A total of 140,329 patients were treated, or 16,548 more than in the previous twelve months, owing no doubt to the greater unhealthiness of the year.

13. *Local Self-Government Institutions.*—The wants of the town of Cuttack in the matter of drainage and conservancy are specially commented on: but that the town is, as a rule, free from the outbreak of epidemics seems rather due to its naturally healthy situation than to its cleanliness. Want of funds is attributed as the reason for the neglect to do more, and at the close of the year, it would seem that the liabilities of the Municipality considerably exceeded its balance in hand; but, as the Commissioner points out, full use is not made of the legal powers of taxation. Moreover, unless undue leniency was exercised, it is incredible that, at the revision of the assessment made in 1896, the final demand should have been reduced. As remarked, the railway must have benefited the town considerably, and there is no reason for supposing that a decline has begun in its material prosperity. The condition of the town of Puri is reported as good, but the District Magistrate refers to certain matters that still require attention. The percentage of ordinary income devoted to primary education was 4·2 in the Division generally, being highest in Jajpur (5·9), and lowest in Puri (3·6).

The administration of the District and Local Boards presented no new features. There appears more room for regularity of attendance among the members. The five village unions in Balasore have not, so far, proved of much use.

14. *Conduct of zamindars.*—The Commissioner does not give an altogether satisfactory account of the relations between landlord and tenant in the Division generally. In places relations were openly strained, and in others the good-feeling of former years is said to exist no longer. Some of the old families are reported to be heavily encumbered or broken up by internal dissensions; outside proprietors with but little sympathy for their tenants, have been introduced, and absenteeism is as elsewhere an unmitigated evil. Exceptions, however, exist; and relations are reported to be quite peaceful in Balasore and in Puri, where Government is a large landholder and on satisfactory terms with its raiyats.

15. *Political.*—As in the previous year, a short account is given of the administration in Angul. Mr. Wylly and Mr. McL. Smith held charge during the year, and between them spent 166 days in camp. The rainfall, though less than in the previous year, was well distributed in the Sadar subdivision though less so in the Khondmals. The *bhadoi* crop was an excellent one everywhere, and the winter rice, though estimated at 12 annas in the Khondmals, was a bumper one in Angul itself. The people, on the whole, were, therefore, well off. The number of civil suits increased, but not largely, from 367 during 1896 to 429. Both cognisable and non-cognisable offences also rose slightly. The strength of the regular police was reduced, but the cost increased for which, the Commissioner observes, that no explanation has been furnished. As a force, they are not well reported on. The arrear and current demands of land revenue amounted to Rs. 76,900, of which 98 8 per cent. was collected. The excise revenue rose from Rs. 25,302 during 1896-97 to Rs. 33,371, but the Deputy Commissioner expressed the opinion that illicit manufacture of country spirit goes on to a large extent,—a subject that is being enquired into. The number of schools and pupils fell off slightly.

16. The Lieutenant-Governor has already placed on record his sense of the loss to the Administration by the death of the late Mr. Cooke, and would express his thanks to Mr. Stevenson for the present report, in which, however, the place of many of the statistical statements inserted might advantageously have been taken by the supply of greater detail as to the facts and fluctuations of the year.

By order of the Lieutenant-Governor of Bengal,

F. A. SLACK,

Offg. Secy to the Govt. of Bengal.

Extracts from the General Administration Report of the Orissa Division for 1897-98.

* * * * * * *

III.—WEATHER AND CROPS.

22. The average rainfall in the Division during the year under report was much less than in either of the two preceding years, it being 54·89 in 1897-98 against 64·01 in 1896-97 and 63·30 in 1895-96. As compared with the year 1896-97, the rainfall of 1897-98 was short in all the three districts of Cuttack, Balasore and Puri, as indicated by the returns of all the registering stations except Soro (Balasore) and Puri, Satpara and Banpur (in the district of Puri). The statement below compares, month by month, the actual and normal rainfall in each district:—

Month.	Cuttack.		Balasore.		Puri.		Average for Division.		Remarks.
	Actual.	Normal.	Actual.	Normal.	Actual.	Normal.	Actual.	Normal.	
1	2	3	4	5	6	7	8	9	10
April 1897 ...	0·88	1·08	2·06	1·62	0·13	0·41	1·02	1·03	
May ,, ...	1·31	4·57	2·62	5·12	1·19	3·35	1·67	4 34	
June ,, ...	8·95	9·92	9·65	8·97	4·10	8·36	7·57	9·08	
July ,, ...	14·16	11·77	11·85	12·09	12·23	10·94	12·75	11·60	
August ,, ...	13·02	12·34	10·74	11·50	10·21	12·08	11·32	11·97	
September ,, ...	7·89	10·26	5·90	11·22	7·45	10·74	7·08	10·74	
October ,, ...	8·92	5·85	14·13	5·09	10·12	6 91	11·06	5 95	
November ,, ...	1·91	2·09	0·20	1·41	4·18	3 03	2·10	2·18	
December ,, ...	0 14	0·33	0·12	0·20	0·22	0 44	0·16	0·32	
January 1898 ...	...	0·37	...	0·35	...	0·30	...	0·34	
February ,, ...	0·04	0·73	0·25	1·02	0·19	0·71	0·16	0·82	
March ,, ...	...	1·20	...	1·46	...	0·87	...	1·18	
Total ...	57·22	60·51	57·42	60·05	50·02	58·14	54·89	59·65	
Total for 1896-97	64·88	60 51	69·13	60·05	58·02	58·14	64·01	59·65	

It will be seen from the above statement that the average for the Division was below the normal in all months but those of July and October, and was less than in 1896-97 in all months except April, October and November.

23. The year under report, however, affords a good illustration of the truth of the saying that it is not the amount of rainfall but its distribution which really affects the harvest. The rainfall of 1897-98 while less in the aggregate was very evenly distributed. There were no long interspaces of dry weather, nor were there heavy downpours in Orissa itself or in the hilly country to the west, such as usually result in destructive floods. Above all the rainfall in October, at the critical time when the ears of grains are filling, was ample. As might be expected under such circumstances, the year was a most propitious one for the agriculturist as is indicated by the figures below which set forth in the old form the outturn of different crops as compared with the years 1896-97 and 1895-96:—

	1895-96. Annas.	1896-97. Annas.	1897-98. Annas.
Beali	13	8	16·88
Saradh	15	7	16·44
Pulses	12	8	13·28
Cotton	13	11	14·66
Oil-seeds	13	7	15·33
Laghu rice	15	8	15·16
Sugarcane	13	8	13·44
Mandia	12	5	15 66
Dalua paddy	12	12	12·11

These satisfactory results are not confined to one district only.

24. There was an increase not only in the outturn but also in the area under different crops. The statement below, prepared from the crop estimates of the Director of Land Records and Agriculture, show this.

Statement showing area under different crops sown in districts of the Orissa Division during 1897-98.

Name of Crop.	Name of district.	Acreage. 1896-97.	Acreage. 1897-98.	Remarks.
1	2	3	4	5
Bhadoi or Beali paddy ...	Cuttack ...	116,000	166,000	
	Balasore ...	87,900	89,500	
	Puri ...	85,000	90,000	
	Total ...	288,900	345,500	
Wintor or Saradh ,, ...	Cuttack ...	721,000	1,028,100	
	Balasore ...	611,900	651,900	
	Puri ...	489,600	502,600	
	Total ...	1,822,500	2,182,600	
Dalua or summer ,, ...	Cuttack ...	51,700	38,600	
	Balasore ...	4,000	400	
	Puri ...	5,000	6,000	
	Total ...	60,700	45,000	
Pulses	Cuttack ...	91,500	97,900	
	Balasore ...	21,700	21,600	
	Puri ...	30,800	62,200	
	Total ...	144,000	181,700	
Oilseeds	Cuttack ...	29,600	38,000	
	Balasore ...	8,500	9,700	
	Puri ...	7,300	9,200	
	Total ...	45,400	56,900	
Mandia or Ragi ...	Cuttack ...	12,200	14,500	
	Balasore ...	.....	.....	
	Puri ...	22,000	28,000	
	Total ...	34,200	42,500	
Wheat	Cuttack ...	1,000	2,100	
	Balasore	300	100	
	Puri ...	.....	.....	
	Total ...	1,300	2,200	
Sugarcane	Cuttack ...	4,300	4,600	
	Balasore	4,000	3,900	
	Puri ...	3,000	4,000	
	Total ...	11,300	12,500	

Cuttack has shown a decrease in the area under "dalua" only, Balasore, in that under "dalua," "pulses," "wheat" and "sugarcane," while there is an increase in area under all other crops in all districts.

* * * * * * *

V.—MATERIAL CONDITION OF THE PEOPLE.

34. Orissa is a province dependent in the main for its prosperity on agriculture as the material condition of the agricultural class reacts upon all other classes, and is a safe general index to the prosperity or otherwise of the whole community.

35. The year 1897-98 opened badly. Harvests in the year preceding had been poor owing to floods followed by drought, with the result that prices rose high and the people felt the pressure, so that in parts of the Division relief measures had to be resorted to before 31st March 1897.

36. The state of matters became worse and worse until September 1897, when the *bhadoi* harvest gave considerable relief. This was the turning point, and from that time onwards things improved rapidly, the well-distributed rainfall insuring good crops of all kinds. The district of Balasore escaped most easily, Cuttack coming next, and it was in Puri only that Government assisted. Special relief works were found necessary, *e.g.*, in the tracts adjoining the Chilka.

Any individual cases of distress in Balasore were easily dealt with by the District Board, while in Cuttack it was found necessary to give relief from the Indian Famine Relief Fund also.

As a rule, except in Puri, the working classes found sufficient employment on road and embankment repairs rendered necessary by the flood damages of the preceding year, and on the railway. There was also an unusual demand for field labour, the result of a larger area than common being brought under *bhadoi*, cold weather rice and, indeed, all crops in the hope of making good the deficiencies of the harvests of the year preceding.

37. In spite, however, of the extension of cultivation and of good crops, prices did not fall so much as expected. This, as usual, has been felt by persons who hold no rice land at all and who are in receipt of fixed incomes. This class is not, however, a numerous one. Every one who can, holds some paddy land—not a few in Cuttack town, for instance, who could not get arable land near, leasing some in Khurda. The demand for such land seems steadily rising, and I understand that it is making itself felt here even in the more remote tracts towards the coast.

38. High prices to the agriculturist, on the other hand, should mean better times, even though a large part of his crop has to go to the *mahajan* in the first instance, and though he of course gets nothing like the prices charged by the *bania* to the public.

39. It is, however, difficult to estimate the extent to which the producer—the raiyat—benefits, as he not infrequently, with his inborn improvidence, will, for the sake of a small sum down, agree beforehand to dispose of his expected crop at a figure which is sure to be below, if not well below, what is the selling price at harvest time.

40. Speaking generally, the condition of the people at large at the close of the year under report was satisfactory, and, with good harvests in 1898-99, the losses of 1896-97 will be more than made good.

* * * * * * *

VII.—PRICES OF FOOD AND LABOUR.

46. The price of common rice, which was abnormally high at the commencement of the year, continued to rise during the first six months of 1897-98 until the *bhadoi* crop came upon the market, though even then the fall was not so great as might reasonably have been expected from the good

harvest. This no doubt was largely due to the fact that the creditors of the raiyats did not fail to realize all they could from the first crop. The year 1897-98 does not therefore compare very favourably in the matter of prices with 1896-97, the average price of common rice being 16 seers 12 chitaks and 13 seers 8 chitaks, respectively, during the corresponding periods of the two years.

47. As in the case of rice other food staples were cheapened but slightly, wheat selling on an average at 9 seers 10 chitaks against 8 seers, gram or kalai at 12 seers 14 chitaks against 12 seers 15 chitaks and salt at 10 seers 14 chittaks against 10 seers 4 chittaks according to the last fortnightly returns of March 1897-98 and 1896-97 respectively. Wheat and gram are not, however, articles of food which are in request by the people at large. That salt sold at a cheaper rate than in the two preceding years is deserving of notice especially as this coincided with the abolition of the local salt manufacture. This cheapening of salt was common to the districts of Balasore and Puri, but has not been accounted for.

48. The cost of ordinary cooly labour is said to have been enhanced because of the demand for unskilled labour on the new railway lines. There has been a larger demand than usual for domestic servants on account of the influx of railway employés, and the wages of this class have in consequence shown a tendency to rise.

49. A rise in the wages of artizans, such as masons, blacksmiths and carpenters, is also reported from Cuttack district and is attributed to the demand for their labour in the Bengal-Nagpur Railway extension. At the same time the local handicraftsmen are reported to be very inferior to their fellows from the Bombay Presidency, and from the Punjab, and large numbers of artizans from these parts of India were imported by contractors.

* * * * * * *

IX.—TRADE AND COMMERCE

54. The table below compares the value of the sea-borne trade of the Orissa ports during the last two years:—

CUTTACK.

Name of port.	Value of imports.		Value of exports.		Total value of trade.		Remarks
	1896-97.	1897-98.	1896-97.	1897-98.	1896-97.	1897-98.	
1	2	3	4	5	6	7	8
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	
Cuttack ...	(a)66,708	36,174	25,42,485	27,27,180	26,09,173	27,63,354	
Balasore ...	66,38,243	82,19,935	60,23,109	64,56,578	1,26,61,352	1,46,76,513	
Puri ...	1,327	(a)...	4,58,491	(a)1,61,170	4,59,818	4,61,170	
Total ...	67,06,278	82,56,109	90,24,065	96,14,928	1,57,30,343	1,79,01,037	

(a) Adopted from the report of the Collector of Customs, Calcutta, for 1897-98.

55. The aggregate value of the trade of the Division was Rs. 1,79,01,037 against Rs. 1,57,30,343 during 1896-97, showing an increase of Rs. 21,70,694 during the year under report. This is chiefly due to the increased value of both the import and export trade of Balasore. The fluctuations are explained below in their proper places.

CUTTACK.

56. Cuttack shows a decrease in its import and an increase in its export trade. The decrease is attributed to there being no importation of kerosine oil during the year, while the increase has not been accounted for by the Collector.

57. The following statement shows imports by sea into Cuttack during 1896-97 and 1897-98:—

59. The passenger traffic of the canal system shows an increase during the year. The increase is said to be partly due to a larger influx of pilgrims by the Kendrapara Canal, and partly to the extra traffic on the High Level Canal due to the railway works in progress.

BALASORE.

60. As stated above, there was an increase in the value of both imports and exports. The increase in the former is reported to be due to the greater expansion of trade in cotton twist, piece goods, kerosine oil, salt, railway materials, machinery, "other sorts," provisions, spices, "other sorts," cocoanut oil and sugar (refined), though no reason for this expansion is hazarded, and that in the latter to large exports of rice to Mauritius and Columbo, the district having had a bumper crop during the year.

61. The following statement shows the fluctuations in the imports by sea into the district of Balasore during 1896-97 and 1897-98:—

Articles.	1896-97.		1897-98.		Increase.	Decrease.

Seeds, linseed	1,548 ,,	6,833	261 ,,	696	.....	6,137

(a) These figures are taken from the Collector of Customs, Calcutta's report for 1897-98.

PURI.

63. The subjoined table compares the sea-borne import trade of this district during the last two years:—

Articles.	1896-97.		1897-98.		Increase.	Decrease.
	Quantity.	Value.	Quantity.	Value.		
1	2	3	4	5	6	7
		Rs.		Rs.	Rs.	Rs.
Beer	12 gals.	33	.....	.....	.....	33
Whisky	2 „	31	.....	.....	.....	31
Claret	2 „	23	.....	.....	.....	23
Oilman store	Cwt. lbs. 2 16	240	.....	.....	.....	240
Piano	6	1,000	.....	.....	.....	1,000
Steel trunk	.....	.....	1 cwt. 1 qr.	49	49	.....

There was, it will be seen, a great falling off in imports during 1897-98.

This is attributed to gunny-bags, the principal article of import, being now obtained from Cuttack by rail, in place of being imported direct by sea from Calcutta.

64. The following table shows the sea-borne export trade of Puri during 1896-97 and 1897-98:—

Articles.	1896-97.		1897-98.		Increase.	Decrease.
	Quantity.	Value.	Quantity.	Value.		
1	2	3	4	5	6	7
Foreign Produce.		Rs.		Rs.	Rs.	
Nil.						
Indian Produce.						
Rice and paddy	89,637 cwt.	4,58,491	(a) 109,988 cwt.	4,61,170	2,679	

(a) Taken from the Collector of Customs, Calcutta's report for 1897-98.

The increase in the exports is due, it is said, to the better harvest of the year.

65. Statements in forms Nos. III and IV showing the trade with Calcutta carried on by road, river (country boat and steamers) and canals are annexed for Cuttack as required by paragraph 5 of Government Circular No. 1 of 20th April 1896. As figures for only 10 months of the year 1897-98 are available, it seems needless to endeavour to compare them with those of 1896-97. The Collector of Balasore has not submitted the statements at all, as the statistics

required for those have not been yet published for the whole year in the *Calcutta Gazette*. The statements for the district of Puri are blank.

Statement III—Showing the trade between Calcutta and the district of Cuttack, Orissa Division, carried by road, river (country boat and steamer) and canal during the year 1897-98 as compared with the preceding year.

EXPORTS FROM CUTTACK DISTRICT (OR DIVISION) TO CALCUTTA.

* * * * * * *

XXIII.—RAILWAYS AND OTHER PUBLIC WORKS.

193. In order to bring the Puri railway station nearer Puri town, the Khurda-Puri branch line of the East Coast Railway has been extended towards the sea coast.

194. Work in connection with the Calcutta-Midnapore-Cuttack extension of the Bengal-Nagpur Railway is reported to have made satisfactory progress. In the district of Cuttack practically all land required has been handed over to the Railway Department, earthwork has been nearly completed except in a few places. Stone has been quarried in large quantities and much has been brought to the site. The large bridges over the Kuakhai, Kathjari, Mahanady, Birupa, Brahmini and Byturni are in hand. In the case of the four first-named bridges, which are close to Cuttack, a fair start has been made with well sinking. On the Brahmini and Byturni well sinking has been nearly completed, some of the piers have been furnished, and it was expected that girders would be placed in position on the Brahmini bridge before the rainy season.

195. In north Balasore all earthwork is said to have been completed and the rails laid; nearly all the small bridges are completed and the bridge over the Subarnarekha river is expected to be finished shortly. Stations are being constructed. In the southern portion of the same district earthwork has been completed and rail-laying had begun during 1896-97. Most of the bridges are reported to have been completed. The piers have been built for the bridge over the river Burabalang, but the girders had still to be placed in position.

196. Railways apart, no other new public works are reported to have been in hand in the districts of Cuttack and Balasore during the year under report. In Puri a new combined Post and Telegraph Office was built at a cost of Rs. 12,050 and an additional barrack was constructed in the Reserve Police Lines at a cost of Rs. 2,609.

197. The table given below compares the area irrigated and the financial working of the Orissa canals during the last three years:—

District.	Area irrigated in acres.			Total demand, including arcas (exclusive of miscellaneous demand).			Total collections.			Remissions written off.			Balance.			Percentage of total collections.		
	1895-96.	1896-97.	1897-98.	1895-96.	1896-97.	1897-98.	1895-96.	1896-97.	1897-98.	1895-96.	1896-97.	1897-98.	1896-96.	1896-97.	1897-98.	1895-96.	1896-97.	1897-98.
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19
				Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.			
Cuttack	111,084	159,492	164,405	2,40,545	2,32,147	2,58,708	2,08,151	2,14,882	2,48,063	4,180	13,346	5,077	33,214	4,219	535	84·4	92·3	93·9
Balasore	10,239	26,556	26,195	23,322	37,713	62,411	21,456	32,356	51,651	696	4,939	649	1,130	379	129	99·1	85·9	90·7
Total ...	121,323	185,048	193,600	2,63,867	2,69,860	3,21,119	2,29,607	2,46,778	3,11,729	4,876	18,285	5,726	34,344	4,597	664	85·1	91·4	93·9

The figures for 1895-96 and 1896-97 shown in columns 2 and 3 of last year's statement were approximate only.

They were ultimately corrected in the canal revenue report and the figures now supplied are the correct ones. The figures in column 4 of the above table are also but approximate, the measurement of lands under *rabi* crops and irrigated during 1897-98 not having been finished as yet.

198. The increase in the demand in Cuttack is said to be mainly due to the increased *kharif* area irrigated, and that in Balasore to the execution of new leases. Collections have been very satisfactory, being 99·79 per cent. against 99·70 in the year 1896-97. Of the uncollected balance shown in column 16, Rs. 203 being irrecoverable has since been remitted, and the sum of Rs. 153 realized on 31st March 1898 was paid into the treasury after the close of the year, leaving Rs. 308 only to be collected during 1898-99.

XXIV.—ROADS AND COMMUNICATIONS.

199. Government roads running through the districts of this Division are reported to be generally in good condition. But the Collector of Balasore remarks that in the rains the Grand Trunk road is said to become at places almost impassable for wheeled traffic.

200. The table given below shows the length of metalled and of unmetalled roads maintained by District and Local Boards and by Municipalities in this Division :—

Roads.	Cuttack. By whom maintained.				Balasore. By whom maintained.				Puri. By whom maintained.			
	District Board.	Local Board.	Municipality.	Total.	District Board.	Local Board.	Municipality.	Total.	District Board.	Local Board.	Municipality.	Total.
1	2	3	4	5	6	7	8	9	10	11	12	13
	Miles.	Miles.	Miles.	Miles.	Miles.	Miles.	Miles.	Miles.	Miles.	Miles.	Miles.	Miles.
Metalled road ...	26	...	25	51	44·25	1·	19·	64·25	78·25	...	1·75	83·
Unmetalled road	453	425	67	925	270·75	181·25	8·75	461·75	75·25	40	2·	117·25
Total ...	479	425	92	976	315·	185·25	27·75	528·	153·50	40	6·75	200·25

207. Besides the roads maintained by the District Board, 22 roads, with a length of about 120 miles, were maintained out of the Estate Improvement Fund in the Khurda Government estate. A sum of Rs. 2,620 was spent out of this fund in repairing the above roads and renovating bridges and inspection bungalows. In addition to the above a new road from Sunakhalla to Aukula, which was started as a famine relief work during 1896-97, was taken up by the Improvement Department during the year under report. About three-fourths of this road have, it is said, been completed.

208. During the year under review a suggestion was received from the Agent and Chief Engineer of the Bengal-Nagpur Railway Company for the construction or repair of some 20 feeder roads lying partly in the districts of Cuttack and Balasore, and partly in the Tributary States of Mohurbhanj, Kilgiri, Keonjhar and Dhenkanal which might be expected to bring traffic to this railway. The District Board of Cuttack has ordered a survey to be made and plans and estimates to be prepared of such roads in that district, but it is doubtful how far funds will be available for construction and repair. The District Board of Balasore has also resolved to take in hand some of these roads at once as far as funds will permit. My predecessor advised the above two District Boards to apply for provincial grants in aid of this work. They will not, I trust, act too precipitately in the matter.

209. The Boards have already a greater length of roads than they can keep in proper repair, and except in cases as to which there can be no reasonable doubt, it will be so far for them to defer action till experience shows that a feeder road is actually required.

210. The allotments made and the expenditure incurred in respect of works in the districts, during the year under review, are compared with the figures of the preceding year in the statement given below :—

District.	Original works.		Repairs.		Establishment.		Tools and plant.		Water-supply and water-works.		Total expenditure.		Total allotment.		Percentage of expenditure.	
	1896-97.	1897-98.	1896-97.	1897-98.	1896-97.	1897-98.	1896-97.	1897-98.	1896-97.	1897-98.	1896-97.	1897-98.	1896-97.	1897-98.	1896-97.	1897-98.
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17

Total ...	40,014	34,773	16,104	63,568	27,556	27,876	314	191	2,509	13,413	1,41,157	1,35,860	1,83,377	1,65,707	76·9	81·98

Includes Rs. 7,947 spent on famine relief. † Undertaken as famine relief works. ‡ Further allotment has been applied for.

211. From this table it will be seen that expenditure was considerably less than the allotment in the districts of Cuttack and Balasore, whereas in Puri it was in excess. The Collector of Cuttack explains that some contractors did not appear to receive payment of the amounts due to them before the 31st March 1898; and certain original works not having been completed within the year, the accounts of these could not be made up. The Collector of Balasore does not assign any reason for the short expenditure in his district, nor does the Collector of Puri explain why the allotment was there exceeded. Their attention has been invited to this.

212. The total expenditure incurred in arboriculture amounted to Rs. 1,691, Rs. 678 having been spent by each of the District Boards of Cuttack and Balasore and Rs. 335 by Puri.

The total number of trees planted was 2,840, of which by far the most, viz. 2,121, were planted in Cuttack, against 479 in Balasore and 240 only in Puri.

XXV.—WORKING OF THE PURI LODGING-HOUSE ACT.

213. The subjoined table compares the receipts and expenditure under the Act for the past two years and gives the number both of licenses granted and of lodgers allowed by these licenses:—

Name of funds.	Receipts.		Expenditure.		Number of *chuttics*.	Number of licensed persons.	Number of lodgers to be accommodated.
	1896-97.	1897-98.	1896-97.	1897-98.			
1	2	3	4	5	6	7	8
	Rs.	Rs.	Rs.	Rs.			
Lodging-house Fund of *chuttics* along the Jagannath road in Cuttack.	2,747	4,464	4,355	3,555	25	189	1,115
Lodging-house Fund of Chandbali.	664	561	913	1,226	1	50	1,908
Lodging-house Fund of *chuttics* along the Jagannath road in Balasore.	2,493	2,817	2,738	3,190	35	121	2,528
Lodging-house Fund of the Puri town and the *chuttics* along the Jagannath road in the district.	12,233	8,828	12,790	11,609	17	253	8,186
Lodging-house Fund of Jajpur.	434	447	294	314	1	50	794
Total ...	18,571	17,117	21,090	19,694	79	663	14,831

There was an increase of one *chutti*, the number of these being 79 against 78 in 1896-27, and this was due to the extension of the Puri Lodging-house Act to Barang *chutti* in the district of Cuttack, this place being the present terminus of the East Coast Railway.

214. The aggregate receipts show a decrease, although there was a considerable increase in the income of the Pilgrim Lodging-house Fund in Cuttack. This increase was, however, of but a temporary nature and was the result of a sum of Rs. 2,058-8 being paid by the Bengal-Nagpur Railway a compensation for the acquisition of the Gopalpur rest-house.

215. The variations in receipts and expenditure of the several funds do not call for special remarks.

216. Lodging-houses were regularly inspected by the Health Officer. The District Officer of Cuttack inspected some of the *chuttics* along the

Jagannath road and found them in fair condition. There was no disease of an epidemic character in any of the *chutties* to which the Act has been extended.

217. In Cuttack, the wells along the Jagannath road were cleaned, repaired and disinfected with permaganate of potash. Fifty-five wells in the town of Puri and the wells along the Jagannath road in that district were thoroughly cleaned and disinfected. One tank in Puri itself was filled up as its water had become offensive.

218. According to the five years' scheme of wells sanctioned under Bengal Government No. 1669M., dated 22nd March 1898, steps have been taken to sink wells in those parts of Puri town where good drinking water is required. The opening of the East Coast Railway has, by diverting to a very large extent pilgrim through traffic from the Jagannath road, told prejudicially on the income of the fund from the roadside *chutties* between Puri and Cuttack town so far as that is derived from lodging-houses and house rent.

The same must be expected in Balasore and in Cuttack district north of the river Mahanadi when the Bengal-Nagpur Railway extension is completed.

XXVI.—EDUCATION.

219. The statistics under this head show a decrease of 298 schools and of 6,221 pupils. In 1896-97, 289 schools were closed, but the number of pupils rose by 927, so that during these two years there has been a net loss of 587 schools and of 5,294 pupils. The decrease in 1897-98 occurred chiefly in lower primary schools and in the districts of Cuttack and Puri; this class of school showing an increase in the district of Balasore. The falling off is seldom in the main due to the dearness of food grains and in part to the occurrence of cholera and small-pox. The fluctuations in the number of schools of other descriptions and in the number of pupils attending these do not call for remark.

220. Sixty-three private institutions also ceased to exist which involved a loss of 175 pupils. The causes assigned are the same as above stated. The total expenditure on schools of all classes (excepting the Ravenshaw College) amounted to Rs. 3,83,529 in 1897-98 against Rs. 3,86,971 in 1896-97, a further sum of Rs. 66,636 being spent on account of inspection, scholarships, buildings and other miscellaneous charges. The total sum of educational charges thus amounted to Rs. 4,50,165 in 1897-98 against Rs. 4,54,5[illegible]9 the year before.

The table below shows from what sources and in what proportion the above expenditure was met during the two years 1896-97 and 1897-98:—

Expenditure from—	Percentage.	
	1896-97.	1897-98.
1	2	3
Provincial Revenues	16·1	17·7
District Boards	18·9	17·5
Municipalities	1·3	1·2
Fees	49·4	49·3
Other sources	14·3	14·3
Total ...	100·0	100·0

The fluctuations here indicated have not been accounted for. It is, however, worthy of note that the income from fees shows but a slight falling off notwithstanding a considerable decrease in the number of schools and of pupils.

221. As in 1896-97, the major portion of the contribution from Provincial revenues was spent on secondary and special education, District Board and Municipal grants being on the other hand principally devoted to primary educatio[illegible].

222. The cost per head of pupils during 1897-98 varied from 2·4 in lower primary schools to 103·6 in special schools.

223. The proportion of boys attending school to the number of boys of school-going age in 1897-98 was 35·6 in Cuttack, 44·2 in Balasore, and 29·3 in Puri, against 39·2, 43·2 and 31·3 respectively in 1896-97. Taking the Division as a whole, some 36·2 boys out of every hundred of school-going age seem thus to have been under instruction during 1897-98, as compared with 38·2 in 1896-97.

Special institutions.

224. The Cuttack Training Medical and Survey Schools and the Alalpur Industrial School call for no special remark. There were on the rolls of these institutions, on the 31st March 1898, 67, 99, 84 and 24 students respectively, against 70, 112, 73 and 23 at the close of 1896-97.

225. There were 64 students attending the Ravenshaw College classes at the close of the year under report against 71 at its commencement. The average daily attendance in 1897-98 was 73·2 against 76·0 in 1896-97. Income from fees and fines, including the half-fee payments made from the Mohsin Fund, amounted to Rs. 4,448 in 1897-98 against Rs. 4,365 in the year before. The total expenditure on the College for the year was Rs. 19,688 against Rs. 22,883 in 1896-97, while the grant from Provincial revenues was Rs. 14,340 in 1897-98 against Rs. 17,623 in 1896-97.

226. Sixteen candidates competed at the B.A. and 34 at the F.A. University Examinations held in March 1898. Seven of the former and 22 of the latter proved successful. Three candidates appeared at the B.L. Examination held in November 1897, and a like number at the Pleadership Examination held in March 1898—all failed.

227. The Collegiate school numbered 307 pupils on the 31st March 1898 against 265 a year before. The average daily attendance during 1897-98 was 236·3 against 227 in 1896-97. The total receipts and expenditure during 1897-98 amounted to Rs. 6,173 and Rs. 9,970 respectively against Rs. 5,947 and Rs. 8,604 in 1896-97, the contribution from Provincial revenues during these two years being Rs. 3,797 and Rs. 2,657 respectively. Seventeen candidates went up for the last Entrance examination of whom 13 passed. The work of providing more hostel accommodation was completed during the year under review at a cost of Rs. 7,187, which leaves Rs. 4,000 still in hand for further improvements. The hostel can now accommodate 50 boarders, and the monthly average was 30·6 in 1897-98 against 21·1 in 1896-97.

Mr. E. F. Growse, the Collector of Cuttack, took much interest in this work.

228. The number of girls' schools decreased by 8 in Cuttack and increased by 1 and 2 respectively in Balasore and Puri, there being thus a net loss of 5 schools representing 83 pupils. The decrease occurred in Lower Primary schools. Eight girls (4 from Cuttack and 4 from Balasore) passed the Middle Scholarship examination, 4 with Middle English and 4 with Middle Vernacular certificates; while 9 passed the Upper and 87 the Lower Primary Scholarship examinations.

229. The number of Muhammadan boys under instruction is reported to have been 3,378 in 1897-98 against 3,501 in the year preceding—a decrease of 123 boys. Four Muhammadan boys passed the Middle English, 5 the Upper Primary and 15 the Lower Primary examinations.

230. Pupils belonging to aboriginal races numbered 220 in 1897-98 against 198 in 1896-97. One hundred and forty-two of these—mostly Sonthals—belonging to the district of Balasore, 1 a Khond studying in Cuttack, and 77 Khonds and Sabars in Puri. Eight special schools for pupils of this class existed during 1897-98—5 in Balasore and 3 in Puri. No such boy passed any of the departmental examinations.

231. There were altogether 3 low-caste schools—2 in Cuttack and 1 in Balasore. Two low-caste pupils, 1 from Cuttack and 1 from Balasore, passed the Lower Primary Scholarship examination, the former obtaining a scholarship.

232. The table below shows the number and character of the various indigenous institutions with the numbers of their pupils, district by district:—

District.	Advanced.				Elementary.				Teaching the Koran.		Other Schools.				Total.	
	Arabic or Persian.		Sanskrit.		For boys.		For girls.				For boys.		For girls.			
	Schools.	Pupils.	Schools.	Pupils.	Schools.	Pupils.	Schools.	Pupils.	Schools.	Pupils.	Schools.	Pupils.	Schools.	Pupils.	Schools.	Pupils.
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17
Cuttack	27	465	16	100	294	1,983	...	...	...	...	5	84	...	...	342	2,732
Balasore	6	79	5	94	121	869	...	...	...	...	...	...	...	...	132	973
Puri	7	79	30	339	699	4,215	...	...	1	10	...	...	...	...	737	4,643
Total ..	40	614	51	533	1,114	7,067	...	...	1	10	5	84	...	...	1,211	8,338

233. Most of the Arabic or Persian schools are reported to teach anything but an advanced course.

234. Sanskrit learning is far from occupying the position it should in a province like Orissa, and, as a rule, the tols are not flourishing.

235. So far as has come to notice, discipline was fairly well maintained during the year.

XXVII.—DISPENSARIES AND HOSPITALS.

236. The table below shows the number of dispensaries and hospitals in each district, their income and its sources, and the total number of patients treated during the year 1897:—

District.	Number of dispensaries and hospitals.	Income from—					Total number of patients treated.		Ratio per cent. of out to in-patients.
		Government.	District Board.	Municipality.	Subscription.	Total.	In-patients.	Out-patients.	
1	2	3	4	5	6	7	8	9	10
		Rs.	Rs.	Rs.	Rs.	Rs.			
Cuttack	18	7,320	2,190	2,361	12,868	24,739	1,176	90,210	1·20
Balasore	7	541	2,534	1,384	4,785	9,244	932	26,440	3·52
Puri	6	2,167	1,344	4,373	1,408	9,292	1,176	20,395	5·76
Total ...	31	10,028	6,068	8,118	19,061	43,275	3,284	137,045	2·4

237. The number of institutions was augmented by one outdoor dispensary opened at Patamundi in the district of Cuttack. The zamindar of Utikan provided the building and has promised an annual subscription of Rs. 360, the District Board providing the balance.

238. As in last year's report, the foregoing statement includes the temporary cholera hospital at Puri, which is really a branch of the Puri Pilgrim Hospital. During the year under review it was necessary to open the temporary hospital twice only, *i.e.*, on the occasions of the Car and of the Panchak festivals. The proposal to amalgamate the Hukitola and False Point Lighthouse dispensaries in the district of Cuttack, referred to in paragraph 292 of last year's report, is under the consideration of Government.

239. The total income shows an increase of Rs. 2,862 which accrued in the districts of Cuttack and Puri, there being a falling off in Balasore. The increase in Cuttack occurred in the income derived from Government and in private subscriptions; District Board and Municipal grants showing a decrease, which in the case of the District Board is apparent rather than real, and is due to the fact that in the appendix and statements furnished by the Civil Surgeon last year the income derived from the district, port and all other

local funds and from wards' estates was shown in the lump against the District Board. The foregoing statement shows separately the actual amount contributed by the District Board, by each of the other local funds and by wards' estates, as also the aggregate of private subscriptions. Other fluctuations have not been accounted for. In explanation of the increase in the income derived from Government and of the decrease in Municipal grants in Balasore, it is said that the Municipal contribution towards the pay of a Civil Hospital Assistant for some months was in fact credited into the treasury, but was left out of account in calculating the payments made by the treasury, while the entire pay of the said Civil Hospital Assistant for those months was shown as a Government grant. The Collector has omitted to state in what proportion this amount should be shown as debitable to the Government grant and to the Municipality. His attention will be invited to this matter. No reason has been assigned for the falling off in private subscriptions and in revenue from endowments. The district of Puri shows an increase in income from all sources except District Board grants, but the fluctuations have not been accounted for.

240. The table below compares the percentages of income derived from different sources during the year under report with the figures of 1896-97 :—

Income derived from—	1896-97.	1897-98.
1	2	3
Government	19·1	23·1
District Board	21·4	14·0
Municipality	20·5	18·7
Private subscription	38·5	44·0
Endowments, &c.		

The fluctuations in each district have already been accounted for.

241. The opening of the railway seems to have given an impetus to the Cuttack Medical School as it is said to give employment to many of its successful students. The Cuttack General Hospital maintained its already high reputation. Its available resources do not however keep pace with its requirements in spite of liberal donations, as of Rs. 1,000 by the Rani of Kanika for the purchase of instruments, and of a sum of Rs. 100 by a few gentlemen for the purchase of some cots.

242. The table below compares the number of indoor and of outdoor patients treated who attended the dispensaries in each district during the years 1896 and 1897 :—

District.	Total number treated.				Total.	
	In-patients.		Out-patients.			
	1896.	1897.	1896.	1897.	1896.	1897.
1	2	3	4	5	6	7
Cuttack ...	1,047	1,176	76,202	90,210	77,249	91,386
Balasore ...	587	932	2,549	26,440	26,078	27,372
Puri ...	900	1,176	19,554	20,395	20,454	21,571
Total ...	2,535	3,284	121,247	137,045	123,781	140,329

There was an increase in both classes of patients and this in all districts. The cause was apparently the greater unhealthiness of the year 1897.

* * * * * * *

DISTRICT BOARDS.

259. The statement below shows the attendance of members of the District Boards in this Division during the year 1897-98 as compared with 1896-97 :—

Name of District.	Number of members.	Number of meetings held in—		Average percentage of attendance.	
		1896-97.	1897-98.	1896-97.	1897-98.
1	2	3	4	5	6
Cuttack	21	12	15	46·6	39·5
Balasore	16	13	12	51·46	50·
Puri	13	24	22	36·9	39·2

Except in Cuttack the average percentage of attendance shows an improvement. The worse result in Cuttack is attributed to the fact that several members, town as well as mufassal, were irregular in attendance, the Civil Surgeon, for instance, not attending a single meeting during the year under review. The average attendance of members of the Puri District Board has never been very good, and, though in 1897-98 the percentage showed some improvement, the District Officer writes :—

"Almost the whole of the work devolves upon the Chairman and the Vice-Chairman, and it is vain to look to the non-official members for suggestion, much less active co-operation."

260. The District Officer, Balasore, makes no remarks.

261. The meetings adjourned for want of a quorum in the several District Boards during 1897-98 are as follows :—

Cuttack	... 3
Balasore	... 1
Puri	... 5

262. There were, as in the previous year, 4 Sub-Committees under the District Board of Cuttack, 4 under that of Balasore and 2 under that of Puri.

263. The Sub-Committees under the Cuttack District Board held 28 meetings during the year under report against 31 in 1896-97. Of the 28 meetings, 8 proved abortive for want of a quorum. There is much room for improvement. No doubt, as the District Officer states, to have 9 successful meetings of the Finance Committee is better than to have had 3 only as in 1896-97; but it is to be remembered that the members of this Committee do not do their duty unless they meet monthly to audit accounts.

In Balasore the number of meetings held by the Sub-Committees during 1897-98 was 22, against 15 in the preceding year.

The Sub-Committees under the Puri District Board held 13 meetings during the year under report, against 11 in the preceding year.

264. The statement given below shows the income and expenditure of the three District Boards during 1897-98 as compared with 1896-97 :—

District Boards.	Income in—		Expenditure in—	
	1896-97.	1897-98.	1896-97.	1897-98.
1	2	3	4	5
Cuttack ...	1,22,250	1,30,120	1,16,085	1,28,915
Balasore ...	91,668	74,860	93,873	74,636
Puri ...	62,041	57,922	62,815	63,324
Total ...	2,75,959	2,62,902	2,72,773	2,66,875

Both the total income and the total expenditure show a decrease as compared with the preceding year. The net decrease in the aggregate receipts is the result of an increase in Cuttack more than counterbalanced by a decrease in Balasore and Puri. In the total expenditure there was an increase in Cuttack and Puri and a decrease in Balasore. As regards the decrease in Balasore both in income and expenditure, it is explained that the District Board had no such Government grant in 1897-98 as it had in 1896-97 (Rs. 17,892) for completing the Chandbali road. The decrease in the income of the Puri District Board was due to a fall in the income from ferries in consequence of the opening of the railway.

LOCAL BOARDS.

265. The table given below shows the attendance of members of all Local Boards in the Division as compared with the previous year:—

Name of Local Boards.	1896-97.			1897-98.		
	Number of members.	Number of meetings held.	Average attendance of members at each meeting.	Number of members.	Number of meetings held.	Average attendance of members at each meeting.
1	2	3	4	5	6	7
Cuttack ...	15	15	6·5	15	11	5·3
Jajpur ...	13	14	5·9	13	13	4·7
Kendrapara ..	13	15	7·5	13	20	6·3
Balasore ...	12	8	8·0	12	12	6·1
Bhadrak ...	11	6	4·2	11	11	3·2
Puri ...	8	11	3·7	8	8	3 0
Khurda ...	12	4	5·1	12	6	6·5

Results are thus worse everywhere except in Khurda.

266. There was no change in the powers exercised by the several Local Boards in the Division. Expenditure by District Boards during 1897-98 is classified under its chief heads in the table subjoined:—

District Boards.	Civil Works.		Sanitation.	Medical.	Education
	Original.	Repairs.			
1	2	3	4	5	6
	Rs.	Rs.	Rs.	Rs.	Rs.
Cuttack	11,168	37,579	7,550	4,871	38,503
Balasore	12,087	14,469	20	2,592	29,064
Puri	2,308	12,620	1,322	4,345	18,652

267. The expenditure on primary education amounted to Rs. 29,874 in Cuttack, Rs. 23,168 in Balasore and Rs. 11,631 in Puri, giving for 1897-98 a ratio of 22·9,38·8 and 32·2 respectively to the total incomes of the three District Boards in the Division.

XXXII.—POST OFFICES AND TELEGRAPH.

271. In the district of Cuttack there were six branch offices opened and three closed during the year. The two branch offices opened experimentally in the Puri district during 1896-97 not having proved a success, were closed during 1897-98. The number of post offices in the Balasore district was the same as in 1896-97.

272. The statistics for the last two years of inland money orders, exclusive of revenue and rent money orders, are compared in the following table. The figures for 1896-97 shown against Puri have undergone alterations in this statement owing to the number and amount of telegraphic money orders having, according to the Collector, been shown twice over in his report for last year.

273. The divisional total for 1897-98 shows an increase in the number and amount of orders issued, as also in the value of orders paid, though in the number paid there is a decrease:—

Name of district.	1896-97.				1897-98.			
	Issued.		Paid.		Issued.		Paid.	
	Number.	Amount.	Number.	Amount.	Number.	Amount.	Number.	Amount.
1	2	3	4	5	6	7	8	9
		Rs.		Rs.		Rs.		Rs.
Cuttack	48,428	9,73,303	121,016	16,80,323	48,908	11,01,972	120,771	16,[illegible]
Balasore ...	34,579	7,79,284	33,824	5,90,651	36,851	9,21,895	32,956	5,[illegible]
Puri ...	22,570	4,78,715	17,810	4,30,403	22,243	3,78,368	18,414	5,08,120
Total ...	105,895	22,22,273	172,550	27,10,377	108,002	24,02,232	172,141	27,12,[illegible]

The increase in the number and value of orders issued has taken place in Cuttack and in Balasore accompanied by a falling off in the number paid, while in Puri the reverse was the case.

274. With regard to the above results, the Collectors concerned make the following remarks:—

Cuttack.—"There was an increase in the total number and amount of money orders issued and a decrease in those paid. The increase is almost certainly due to the fact that a large number of foreigners who work in the railway remitted money home out of the district, and the decrease may be due to the fact that on account of high prices and partial scarcity more persons left the district in 1896-97 in search of employment in Calcutta and elsewhere who remitted money home than in the year under report, but the decrease is small and really requires no explanation."

Balasore.—"The increase in the issue of money orders is believed to have been principally due to the railway and settlement operations in progress during the year, and the decrease in the payment of money orders to the return of people to their homes on account of the good harvest during the year who had left the district in search of employment and remitted their earnings for the support of their families at home during the previous year."

Puri.—"The decrease in the number and amount of money orders issued is attributed to the great falling off in the remittances made by the Pandas of the town to their agents in different parts of India. This was doubtless due to the plague, the Pandas considering that there was very little prospect of inducing people to make the pilgrimage to Puri."

275. The increase in the payment of money orders in Puri is attributed to larger remittances made by rice merchants to their agents at Puri, and this explanation seems borne out by the increased value of exports to Madras.

276. In Savings Bank transactions there has been a decrease shared by all the districts as shown in the following table:—

Name of district.	Deposits.						Withdrawals.						Total number of accounts opened on 31st March—		Total amount in deposit on 31st March—	
	Number of accounts opened during—		Number of deposits made during—		Amount deposited during—		Number of withdrawals during—		Amount withdrawn during—		Number of accounts closed during—

The smaller number of transactions in Cuttack is attributed to the prevalence of scarcity during the year, and the increase in the amounts deposited and withdrawn to investments in Government securities under the Savings Bank Rules.

277. The cause of the decrease in the number of accounts opened and of the increase in the number and amount of withdrawals in Balasore is said to be the dearness of food-grains for some months of the year. The increase in the amount deposited is said to be due to the railway and settlement operations in progress.

The Collector of Puri states that the fluctuations in that district are due to ordinary causes.

278. Sixty-five miles of new telegraph line were erected and seven new telegraph offices opened during the year for the use of the Bengal-Nagpur Railway extension in the district of Cuttack. As regards the Government Telegraph Department, there is no change to note.

* * * * * * *

XXXVII.—GENERAL REMARKS.

319. All matters usually dealt with in the annual report have been so in the foregoing paragraphs. Besides these there is little calling for remark.

320. Scarcity was formally declared to exist in the district of Puri, where only was relief required on anything like an extensive scale. Distress existed, however, in some parts of Cuttack district and also in a portion of Bhadrak subdivision of the Balasore district. Everywhere, however, the tracts most affected were scattered, and as a rule they were such, as from their position and the character of the country, suffer more or less every year from either flood or drought. It so happened that in 1896 the floods were exceptionally heavy, general, and prolonged, while the evils of an unusually protracted drought were superadded.

321. In Puri only had local resources to be eked out by Government funds.

322. In Cuttack all the relief necessary was afforded by the Indian Charitable Relief Fund Committee and by liberal contribution from the wards' estates which suffered.

323. In Balasore also local funds amply sufficed to meet all demands for relief. The measures taken were everywhere successful. Details have been reported in this office No. 121R., of 10th February 1898, to Government and need not be reproduced here. A separate report was duly submitted to the Honorary Secretary, Bengal Executive Committee of the Indian Famine Charitable Relief Fund.

324. The Diamond Jubilee of Her Majesty the Queen-Empress was celebrated in all places of importance with loyal enthusiasm as reported to Government in this office No. 2155R. of 27th September 1897.

325. The earthquake of 12th June 1897 was fortunately felt but slightly in this Division, and practically no damage was done.

NOTE ON THE EARLY COTTON CROP IN BENGAL,

THE following is published for general information.

F. A. SLACK,

The 6th December 1898. *Offg. Secy. to the Govt. of Bengal.*

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL.

Note on the early cotton crop in Bengal, 1898.

Explanatory.—Two cotton crops are grown in these Provinces, viz., the early crop which is sown during the monsoon rains and harvested during the cold weather, and the late crop which is usually sown at the close of the rainy season and harvested in the hot weather. Estimates of area and outturn of the former crop are furnished in this report. Estimates of the late crop will be published separately in a later report.

2. *Character of the season.*—In July, the rainfall in all the early cotton-growing districts was generally below the normal. There was an excess only in Lohardaga and Palamau. In August, on the other hand, heavy rain fell in most of the early cotton-growing districts. This proved in some cases to be unfavourable to the cultivation of the crop. Heavy rain continued generally throughout September. In October, the rainfall was above the average in Orissa and in Midnapore and Singhbhum, and less than the average in all the other districts of Bengal. During the first three weeks of November, there was no rain except slight showers in Jalpaiguri and Puri.

3. *Area sown.*—The total area sown in early cotton this year appears from the returns annexed to this note to be 100,600 acres, against 105,300 acres estimated to have been sown last year. The decrease of 4,700 acres this year occurs chiefly in Palamau and Manbhum, and is accounted for by excess of rain. There is a nominal increase in the area sown this year, as compared with that of last year in Jalpaiguri and Puri. In the former district, the increase is said to be due to the immigration of Meeh cultivators who adopted the cultivation of the early cotton crop, and in the latter district, the increase is attributed to good rainfall at the time of sowing.

4. *Character of the crop.*—Out of the 14 early cotton-growing districts of Bengal from which returns have been received, Cuttack only, with a small area of 3,000 acres, estimates a crop above the normal, four districts (including Lohardaga, for which estimates have been made by this Department in the absence of returns from the local officer) estimate normal crops (100 per cent.), seven estimate crops varying from 75 per cent. to 99 per cent., and three districts estimate crops below 75 per cent. In the Chittagong Hill Tracts, which is the only cotton-exporting district in these Provinces, the crop is reported to have failed, the outturn being estimated at 6 per cent., which was also the estimate for last year. Unseasonable heavy rain is reported to be the cause of the failure this year, but further enquiries will be made. Comparing this year's crop with last year's crop, and taking into consideration only 14 districts as mentioned above, four districts report better crops, six report equal crops, and four report worse crops. The outturn for the Province as a whole is estimated by this Department at 75 per cent. of the normal crop, against 80 the corresponding estimate for last year.

5. *Gross outturn.*—The gross outturn of the early cotton crop in Bengal this year amounts to 7,229,700 lbs., against 8,169,200 lbs. estimated for last year. The corresponding average yield of the preceding four years amounts to 6,052,600 lbs.

N. N. BANERJEI,

Asst. Director of Land Records and Agriculture, Bengal.

(Countersigned.)

P. C. LYON,

Director of Land Records and Agriculture, Bengal.

CALCUTTA;

The 1st December 1898.

Forecast of the early Cotton Crop of Bengal, 1898.

1	2	3	4	5	6	7	8	9
Division.	District.	Approximate normal area under *early* cotton.	Approximate area sown last year.	Estimated area sown this year.	Taking 100 to represent the normal outturn per acre, how much represented outturn last year?	Taking 100 to represent the normal outturn per acre, how much will represent this year's outturn?	Remarks by District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
		Acres.	Acres.	Acres.				
Burdwan	Midnapore ...	1,900	1,800	1,860	50	40	The prospects are very gloomy owing to incessant and heavy rain before and after sowing.	
Rajshahi	Jalpaiguri ...	400	400	500	69	69	The increase in area is attributed chiefly to new recruits of the Meeh tribes in Alipur from elsewhere.	
Chittagong ...	Chittagong Hill Tracts.	17,000	17,000	17,000	6	6	The decrease in the outturn is due to unseasonable heavy rain.	The complete failure of the crop in this district is not understood, and further enquiry will be made as to the accuracy of the return.
Bhagalpur ...	Monghyr ...	400	400	400	100	100		
	Bhagalpur ...	11,300	11,300	11,330	94	100	There was timely rainfall.	
	Santhal Parganas	12,900	12,900	12,900	99	99	The normal area has been cultivated. The distribution of rain was as favourable as that of last year, and the outturn will be the same.	
Orissa	Cuttack	2,100	3,100	3,000	106	107	Owing to the absence of high floods and to favourable rainfall this year, the area sown is above the normal and the outturn estimated higher than the average.

		Acres.	Acres.	Acres.				
Orissa—*concld.*	Puri	6,500	3,600	4,700	75	75	The increase in the area sown this year as compared with that of last year is due to good rainfall in the sowing season. The outturn is not expected to exceed 75 per cent. of the average owing to subsequent scanty rain.	
	Balasore	1,000	900	800	81	64		
	Angul and Khondmals.	2,200	3,500	3,500	100	75	The short crop is due to want of sufficient rain in July and in the beginning of August.	
Chota Nagpur ...	Hazaribagh ...	7,500	7,500	7,500	100	100		
	Lohardaga ...	8,900	6,900	6,900	100	100		
	Palamau	5,900	10,000	9,300	75	95	The decrease in area this year as compared with that of last year is due to excessive rainfall at the sowing season.	There is a great difference between the normal area and the areas sown this and last year, which should be explained.
	Manbhum ...	12,500	20,000	14,400	100	75	The decrease in the area and outturn this year as compared with the area and outturn of last year is due to heavy rain.	The Deputy Commissioner states he is not satisfied with the returns submitted by him. He will be asked to revise them.
	Singhbhum ...	6,000	6,000	6,000	100	75	Owing to excessive rainfall, the prospects are not as good as those of last year.	
	Total ...	96,500	105,300	100,600	89	75		

WEATHER AND CROP REPORT.

For the week ending the 5th December 1898.

Burdwan.—No rain. Weather seasonable. Harvesting of *aman* paddy continues. Sowing of *rabi* crops nearly over. Prospects of sugarcane favourable. A few cases of cattle-disease still reported in Kalna. Fodder and water sufficient. Common rice selling as follows:—

	Srs.	
Sadar	15 to 17	per rupee
Kalna	14 „ 15	
Katwa	17	
Raniganj	16¼	

Birbhum.—No rain. Weather seasonable. Harvesting of *aman* continues. Sowing of *rabi* completed. Price of common rice at Sadar 18 seers, and at Rampur Hât 17 seers per rupee. Fodder sufficient.

Bankura.—No rain. Weather fair and cold. Harvesting of *aman* briskly going on. Sugarcane and other standing crops promising well. No cattle-disease reported. Fodder and water sufficient. Common rice sells at 16 seers per rupee at Vishnupur.

Midnapore.—No rain. Prospects of standing crops very good. Common rice sells as follows:—

	Srs.	
Sadar	15 to 18	per rupee.
Contai	14 to 16	
Tamluk...	13 to 15	
Ghatal	14 to 16	

Hooghly.—No rain. Reaping of winter rice crop going on and prospect of *rabi* good. Cattle-disease prevailing in some parts. Common rice sells from 11 to 14 seers per rupee.

Howrah.—No rain. Weather seasonable. Harvesting of *aman* continues. Outturn favourable. Sowing of *rabi* going on. Fodder and water sufficient. Common rice sells at 12 to 14 seers per rupee.

24-Parganas.—Rainfall nil. Weather seasonable. Prospects of standing crops good. Harvesting of *aman* rice commenced. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	Srs.	
Sadar	12	to 13	per rupee.
Barasat	17½		
Basirhat	13⅜		
Diamond Harbour ...	16		

Nadia.—No rain. Harvesting of *aman* continues. Standing crops doing well. Common rice selling at 11 to 17 seers per rupee. Fodder and water sufficient. Cattle-pox in thanas Meherpur and Tehatta.

Jessore.—No rain. Weather fine and cold. Harvesting of *aman* paddy going on. Sowing of indigo and *rabi* crops still continues in some places. Prospects of standing crops good. No cattle-disease reported. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Jessore	16 to 20	per rupee.
Jhenida	18 „ 20	
Magura	18 „ 22	
Bangaon	17 „ 18	

Khulna.—Rainfall nil. Weather seasonable. *Aman* is being harvested, and sowing of winter crops continuing. Prospects good. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	19 to 22	per rupee.
Bagerhat	20	
Satkhira	16 and 20 (new *aus*).	

Rajshahi.—No rain. Harvesting of *aman* paddy in progress. Sowing of *rabi* crops going on. Prospects of crops good. No cattle-disease. Fodder and water ample. Price of common rice ranges from 16 to 30 seers per rupee.

Dinajpur.—No rain. Weather fine and cool. Harvesting of winter rice continues. *Rabi* crops getting on well. No cattle-disease. Fodder and water sufficient. Rice 17 to 18 seers a rupee.

Jalpaiguri.—Rainfall at Sadar nil, Alipur Duars ·15. Weather seasonable, but cloudy. Harvesting of *haimanti* paddy going on. Transplantation of tobacco and cultivation of *rabi* crops nearly finished. Fodder and water sufficient. Price of common rice stationary.

Darjeeling.—Rainfall at Darjeeling ·56, Siliguri ·41. Weather seasonable. *Hills*—*Kalai* and *haimanti* paddy being harvested; wheat, barley, and *phaphar* progressing. *Terai*—*Haimanti* paddy and sugarcane being harvested; mustard, potatoes, and *kalai* doing well. Coarse rice selling as follows :—

	Srs.	
Hills	... 11 to 12	per rupee.
Terai	... 14 to 18	

Bhutta sells at Darjeeling 26 seers and at Poolbazar 40 seers per rupee.

Rangpur.—No rain. Cultivation of *rabi* crops and transplantation of tobacco in full swing. Reaping of winter rice commenced in places. Prospects fair. Common rice (new) sells at 12 to 20 seers per rupee. Fodder and water sufficient.

Bogra.—No rain. Harvesting of *aman* in full swing. *Rabi* crops doing well. Common rice selling from 17 to 25 seers a rupee. Fodder and water ample.

Pabna.—Rainfall nil. Weather fine and cool. Winter crops are being harvested and *rabi* sown. Common rice 14 to 20 seers per rupee.

Dacca.—Rainfall nil. Weather seasonable. Harvesting of *aman* continues. Prospects good. Fodder available. No cattle-disease. Common rice 14 to 22 seers per rupee

Mymensingh.—Rainfall nil. Weather seasonable. Prospects of crops good. Harvesting of *aman* continues. Rice sells from 15 to 21 seers per rupee. Fodder and water sufficient.

Faridpur.—No rain. Weather seasonable. Prospects of crops good. Rice 20 seers a rupee.

Backergunge.—Rainfall nil. Weather fine. Prospects of crops good. Common rice sells from 12 to 18 seers (old *aman*), 12½ to 20 seers (new *aman*), and 16 to 22 seers (*aus*) per rupee.

Tippera.—No rain. *Aman* harvest in progress. *Rabi* being sown. Common rice 15 to 26 seers per rupee.

Noakhali.—No rain. Crops good except in Hatia and Sandip. Harvesting of *aman* continues. Lands being cultivated for *rabi* crops. No cattle-disease. Fodder good except in Lakhimpur. Water good. Price of rice—*aman* 12 to 20 seers and *aus* 16 to 28 seers per rupee.

Chittagong.—Rainfall nil. Weather seasonable. *Aman* still being reaped and *rabi* crops sown. Prices steady. Water and fodder sufficient.

Patna.—No rain. *Rabi* and poppy sowings nearly over; prospects favourable. Harvesting of paddy going on. Prices falling. Common rice in Patna sells at 24 seers per rupee. Condition of cattle good. Fodder and water for cattle sufficient.

Gaya.—No rain. Harvesting of paddy in progress. *Rabi* and poppy doing well. Common rice selling at 20 seers per rupee.

Shahabad.—No rain. Weather cold with westerly wind. *Rabi* being sown. Paddy being harvested. Rice sells at Arrah 15 seers per rupee.

Saran.—No rain. Weather cold. Prospects of *rabi* and poppy very good. Cutting of paddy in full swing. Average prices are—common rice 17 seers 10 chitaks and *makai* 28 seers 1 chitak per rupee.

Champaran.—No rain. Poppy and *rabi* sowings practically finished. Young plants coming up well. Winter rice harvest progressing. Prices show a tendency to fall. New rice coming into market. Common rice sells at 16¼ seers and maize at 24 seers per rupee.

Muzaffarpur.—Rainfall nil. Prospects good. *Rabi* crops doing well. Rice crop being harvested. No cattle-disease. Prices are—Common rice 12 to 17 seers, wheat 15 to 18 seers, barley 30 to 35 seers, gram 21 to 22 seers, rahar 21 to 22 seers, maize 23 to 35 seers, and *marua* 27½ seers per rupee.

Darbhanga.—No rain. Weather very cold with west wind. Harvesting of paddy in progress. *Rabi* doing well and shows good prospects. Weather continues favourable for poppy; about two-thirds sowings complete; seeds germinating well. New rice sells at Sadar 16 seers per rupee.

Monghyr.—No rain. Weather cold with west wind. *Rabi* sowings still going on. Harvesting of winter rice continuing. Pressing of sugarcane going on. Prospects of *rabi* crops fair. Poppy sowings nearly completed; prospects hopeful. No cattle-disease. Common rice sells as follows:—

	Srs.	
Monghyr	15	per rupee.
Begusarai	13 to 15	
Jamui	21	

Bhagalpur.—Rainfall nil. Sugarcane and winter rice being harvested. Standing crops doing well. Fodder and water sufficient. Prices nearly steady.

Purnea.—No rain. Weather seasonable. Harvesting of *aghani* rice going on everywhere. Prospects of *rabi* crops good. Cattle-disease still continues in Araria. Common rice sells as follows:—

	Srs.	
Sadar	18	per rupee.
Kishanganj	20	
Araria	21	

Malda.—No rain. Weather fine and fairly cool. Harvesting of winter paddy progressing; an average outturn expected. *Rabi* crops doing well. *Kalai* coming in pods. Coarse rice selling at 20 seers per rupee. Fodder ample.

Sonthal Parganas.—Rainfall nil. Weather seasonable. Harvesting of rice in full progress. *Rabi* crops doing well. No cattle-disease reported. Fodder and water sufficient. Price of rice varies from 17 to 25 seers, and of maize from 35 to 40 seers per rupee.

Cuttack.—Rainfall nil. Weather seasonable. *Laghu sarad* being cut. *Guru sarad* maturing. *Biri*, *kulthi*, and *arhar* in flower. Sugarcane being harvested. Tobacco being planted. Condition of cattle generally good. Fodder and water sufficient. Common rice sells as follows:—

	S.	ch.	
Cuttack	18	6	per rupee.
Jajpur	19	7	
Kendrapara	21	0	
Banki	22	11	

Balasore.—Rainfall nil. Harvesting of *beali* and *sarad* continues. Sugarcane being pressed. *Rabi* crops growing well and being irrigated. *Dalua* being sown. Cattle-disease reported from Basudevpur circle. Rice sells from 16 to 22 seers per rupee in the interior, and at 18½ and 18 seers per rupee at Balasore and Bhadrak respectively. Fodder and water sufficient.

Angul.—No rain. Prospects of sugarcane, *arhar*, and other miscellaneous crops good. Common rice selling at Angul 26 seers and at Khondmals 18 seers per rupee. Fodder and water sufficient. No cattle-disease.

Puri.—No rain. *Sarad* being cut. *Laghu* harvested. *Arhar*, *kulthi*, and mustard promising fairly. State of summer rice, sugarcane, and other miscellaneous crops good. Fodder and water sufficient. Cattle-disease reported from parts of the district. Common rice (new) sells as follows:—

	S.	ch.	
Puri	17	2	per rupee.
Khurda	17	1	
Interior of district	17 to 23	1 to 0	

Hazaribagh.—Rainfall nil. Harvests nearly finished. A good outturn of rice crop expected. State of *rabi* crops good. Poppy sowings nearly complete. Common rice selling at 18 to 20 seers per rupee.

Lohardaga.—No rain. Paddy harvesting continues. Rice sells at Ranchi 18 seers, and in the interior from 18 to 23 seers per rupee. Cattle-disease continues in the interior. Fodder and water sufficient. Grain in stock sufficient.

Palamau.—No rain. Weather seasonable; paddy being harvested. Other crops doing well. Cattle-disease prevailing in some villages. Fodder and water sufficient. Rice sells from 18 to 23 seers per rupee.

Manbhum.—Rainfall nil. Weather seasonable. Prospects of crops excellent. Cattle-disease reported from thana Purulia. Fodder and water sufficient. Average price of common rice at Sadar 23¾ seers and at Gobindpur 22 seers per rupee. Supply sufficient.

Singbhum.—Rainfall nil. Prospects of crops very good. Rice selling at 20 to 24 seers per rupee.

General Summary.—There was no rain during the week except in Darjeeling and at the Alipur Duars in Jalpaiguri. The weather is now seasonably cold throughout the Province. The winter rice harvest is progressing rapidly, and a good outturn is generally expected. The prospects of the *rabi*, poppy, and other cold-weather crops are favourable. The pressing of sugarcane goes on in some districts. The price of rice is falling with the appearance in the market of the new crop. Cattle-disease is reported from some districts, but nowhere in an epidemic form. The fodder-supply is generally sufficient.

	Miles.	
The highest velocity of the wind in one hour		10
	%	
The mean relative humidity		69
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office		71
	Inches.	
The total fall of rain from 27th November to 3rd December 1898		Nil
The average fall of the corresponding period for 24 years, Surveyor-General's Office		0·04
The total fall from 1st January to 3rd December 1898		59·52
The average fall of the corresponding period for 24 years, Surveyor-General's Office		65·19

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h., and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

⏢, dew.

	Inches.
The mean 10 A.M. pressure of the seven days	30·076
	⊖
The mean temperature of the seven days	70·9
The extreme variation of temperature	29·1
The maximum temperature	84·0
	%
The mean 10 A.M. relative humidity of the seven days	58
The total fall of rain from 27th November to 3rd December 1898 ...	Nil

The daily mean temperatures are the crude means of maximum and minimum temperatures.

METEOROLOGICAL OFFICE, BENGAL,
The 5th December 1898.

C. LITTLE,
Meteorological Reporter to the Govt. of Bengal.

Abstract of the Results of the Barometric and Thermometric Observations taken at 10 a.m. at the Meteorological Office, Chowringhee, in the month of November 1898.

	Inches.	Date.
The mean pressure at 10 A.M. during the month	29·996	
	⊖	
The mean temperature at 10 A.M. during the month	78·9	
The highest temperature during the month	88·5	9th
The lowest temperature during the month	58·9	15th & 16th
The absolute range of temperature during the month	19·6	
The mean daily range of temperature during the month ...	19·9	
The greatest range of temperature in one day during the month ...	24·9	15th
	%	
The mean 10 A.M. humidity during the month	64	
	Inches.	
The mean 10 A.M. vapour tension during the month	·629	
The total rainfall of the month	Nil	
The greatest fall in 24 hours	Nil	
The number of rainy days in the month	Nil	

C. LITTLE,
Meteorological Reporter to the Govt. of Bengal.

* There are no separate leases for sugarcane on the Sone Canals. All leased fields of that crop now come under one of the other heads.
† An area of 2-0-26 acres being unirrigable has been deducted from the figure (7,369) shown in the return for September 1898.

CALCUTTA,
The 6th December 1898.

A. H. C. MACCARTHY,
Under-Secy. to the Govt. of Bengal.

IRRIGATION DEPARTMENT,—BENGAL.

* Added No. of passengers 3,139 and deducted Rs. 4,235
† Do. Mds. 1,61,714 and ,, 12,490 } on account of difference between the approximate and audited figures for the weeks ended 1st
‡ Deducted ,, 1,783 } and 8th October 1898.

(a) The decrease is in outward traffic chiefly at stations on the A, B, and C districts.
(b) The decrease is chiefly due to less quantity of opium despatched from Patna City and Ghazipur to the Port Trust Railway, and cotton, wheat, edible grains, and sundry commodities exported from Cawnpore City and some of the principal stations on the B and D districts.

TARKESSUR BRANCH RAILWAY.

RESOLUTION ON THE PROGRESS REPORT OF THE FOREST ADMINISTRATION IN THE LOWER PROVINCES OF BENGAL FOR THE YEAR 1897-98.

REVENUE DEPARTMENT.—FORESTS.

Calcutta, the 7th December 1898.

RESOLUTION—No. 3702.

READ—

The Progress Report of Forest Administration in the Lower Provinces of Bengal for the year 1897-98.

Read again—

The Progress Report of Forest Administration in the Lower Provinces of Bengal for the year 1896-97, and the Government orders thereon.

Mr. A. E. Wild was in charge of the Bengal Forest Circle up to the 16th of March 1898, when he went on furlough, and was succeeded by Mr. E. G. Chester, by whom the Report was submitted on the 8th October, seven days later than the assigned date.

2. The following statement shows the area of each class of forest in the Circle:—

Forest.	At commencement of the year.	Added.	Excluded.	At close of the year.	Percentage—	
					Of total forest area.	Of the area of the provinces (151,533 square miles).
1	2	3	4	5	6	7
	Sq. miles.	Sq. miles.	Sq. miles.	Sq. miles.		
Reserved ...	5,876	4		5,880	44	3·9
Protected ...	3,378	95	14	3,460*	26	2·3
Unclassed ...	4,034	...	...	4,034	30	2·6
Total ...	13,288	99	14	13,374	100	8·8

* Allowing for fractions.

The Tumchar forest was notified as a reserve on the 5th of July 1897, and forms the only real change in the area of reserved forests. Other minor changes involving the exclusion of 173 acres have been mooted, but no notifications under section 26 of the Act have issued.

The additions under protected forests are more apparent than real, as in former years information regarding many areas could not be given owing to the fact that reliable estimates were not procurable. During the year under report the redemarcation of village boundaries in the district of Palamau and operations by the Settlement Officer in Manbhum have rendered it possible to add 95 square miles to the area of which estimates have been formed. An area of 14 square miles was transferred from the Forest Department to the Commissioner in the Sundarbans to be leased out to cultivators.

3. *Settlements.*—The Tumchar forest (area 5 square miles) was settled during the year under report, while the Paglajhora forest in the Kurseong Division and eleven areas aggregating 842 square miles in the Chittagong Division were under settlement. A notification regarding the former has been issued since the close of the year under section 19 of the Act, and it is expected that the latter areas will be demarcated and ready for notification early next year. All the boundaries of reserved forests which require artificial demarcation have been completed, excepting 17 miles in the Singhbhum district, where progress has been made in demarcating permanently the boundaries of blocks, these having been only temporarily and vaguely marked off by the Revenue Settlement Officer.

4. *Working Plans.*—As remarked in last year's Resolution, the working plan of the Tista Division (212 square miles) received the approval of the Inspector-General during the year under report. Working plans for the forests in the Tista Valley and Jalpaiguri are almost complete, but it is disappointing to find that no fresh plan of this nature was put in hand during the year under report. The reason assigned for the delay in pushing on this important matter is the difficulty of procuring for the work a duly qualified officer, but the Lieutenant-Governor feels confident that the Conservator will press on arrangements to secure the preparation of working plans for the remaining areas as quickly as possible. The Lieutenant-Governor has been much impressed with the looseness of the information in the departmental records as to the character and contents even of forests, which have been brought within the influence of railways. Without the definite information which plans of even the rudest and most summary description give, it is difficult for the Department to judge what can in an individual forest be done, and what it is wise to leave undone; and without them it is altogether impossible for the Government to judge whether or not the action of the Department is right. The area of reserves for which working plans have still to be taken in hand is 3,343 square miles, and it is only by the most persevering and persistent efforts that effectual progress will be made.

The means at present available for exporting produce from forests difficult of access no doubt to some extent prevent a strict adherence to working plans, and the Lieutenant-Governor will therefore be glad if the Conservator would submit proposals for cheapening and extending the existing methods of transport in the Darjeeling and Tista Divisions, where the hindrance seems to be most acutely felt. Not the least simple and promising suggestion is to concentrate the transport into the dry season, when the roads are good and draught-labour lightest.

5. *Buildings and Communications.*—The following statement shows the expenditure on roads and buildings in 1896-97 and 1897-98 and the budget estimates for the latter year :—

Description of work.	Buildings.			Roads and Bridges.			Total.		
	Actuals of 1896-97.	Budget estimates of 1897-98.	Actuals of 1897-98.	Actuals of 1896-97.	Budget estimates of 1897-98.	Actuals of 1897-98.	Actuals of 1896-97.	Budget estimates of 1897-98.	Actuals of 1897-98.
1	2	3	4	5	6	7	8	9	10
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
New construction ...	12,407	20,200	21,508	10,480	18,710	11,592	22,887	44,910	33,160
Repairs ...	10,131	12,636	11,341	14,236	12,390	10,745	24,358	25,226	22,086
Unapportioned ...	664	2,564	1,395	441	7,200	120	1,105	9,764	1,515
Total ...	23,203	41,000	34,304	25,147	38,300	22,457	48,350	79,900	56,761

There was an increase of Rs. 11,101 in the expenditure on buildings, and a decrease, for which no reason has been given, of Rs. 2,690 on that for roads and bridges.

In the Darjeeling Division an inspection bungalow was built, and in the Kurseong, Singhbhum, Angul, Puri, and Jalpaiguri Divisions rest-houses were erected. In the Buxa Division the Divisional Officer's bungalow, which had been wrecked in the earthquake, was reconstructed, and in the Sundarbans the erection of quarters for the Divisional Officer of Khulna was commenced.

Sixty-seven miles of new roads and paths were made during the year as against 72 in the previous year, and repairs were carried out along 881 miles of road, the corresponding figures for 1896-97 being 775. Of the new roads, 35 miles were meant to facilitate export, while 32 miles were for purposes of inspection.

6. *Breaches of Forest Law.*—Three hundred and seventy-nine cases were taken into Court during the year under report as against 280 in 1896-97. This increase is most marked in the Sonthal Parganas, Singhbhum, and Chittagong, and is ascribed to the more vigilant supervision of the local officers.

Of the cases disposed of, 92 per cent. ended in conviction as against 87·8 in the previous year. Prosecutions were instituted in 40 cases for offences with regard to fire, of which 31, involving 35 persons, ended in conviction, and 4, involving 7 persons, resulted in acquittal. The remainder were pending at the end of the year. Of the total cases of this kind, 29 occurred in Singhbhum, 4 in Angul, and 2 in Palamau, while Darjeeling, Tista, Jalpaiguri, Buxa, and Chittagong had one case each. No less than 173 cases of injury by fire were undetected as against 47 the previous year, and 83 of these undetected cases occurred in Singhbhum. These figures, even allowing for the difficulty of

detection, are far from satisfactory, and the Lieutenant-Governor trusts that the officers in the Forest Department will spare no efforts to obtain better results in future.

The number of cases compounded by Forest Officers amounted to 1,631, involving 3,441 persons as against 1,158 cases involving 1,937 persons the previous year. The amount received as compensation was Rs. 11,532 as compared with Rs. 7,021 the previous year. The average compensation received for each case was Rs. 7-1-2 and for each person Rs. 3-5-7. The compensation received for each person involved varied between Re. 0-10-4 in Singhbhum and Rs. 17-12 in Palamau. It is stated that the high averages in Palamau and Jalpaiguri were due to a few heavy cases having been compounded, but omitting these, no explanation has been offered of the wide variations in other divisions. In the Sundarbans the average compensation for 655 persons involved was Rs. 7-5-8; in the Tista for 439 persons Rs. 2-11-2; in Puri for 549 persons Re. 1-11-7; whereas for Singhbhum for 465 persons it was, as above stated, only Re. 0-10-4. These variations are probably due to the fact that in the Sundarbans, boats, big and small, are used by the offenders for transporting the wood and that elsewhere thefts of forest produce usually take the form of head-loads. The total number of offences increased from 1,527 to 2,230, and of these the Tista Division contributed 406 cases, while the Darjeeling, Sonthal Parganas, and Sundarbans all contributed over 300 cases.

7. *Grazing.*—Three hundred and ninety-three square miles of reserved forests were open to all animals for the whole year, while 177 square miles in Palamau were opened as a means of relief to 1,500 head of cattle belonging to *bonâ fide* khas mahal cultivators. The result of the enquiries now being made as to the best method of instituting a rotation of grazing areas in protected forests (which are at present all open for grazing) is awaited. The fees received from grazing amounted to Rs. 14,783 in reserved forests and Rs. 7,359 in protected forests as against Rs. 12,031 and Rs. 7,177, respectively, last year. These figures are incomplete, since fees received under the commutation system are not shown. The Conservator remarks that the heavy increase in the number of head of cattle grazing is not a matter for congratulation, as the forests grazed are already called on to support far more cattle than they can continue to do. This remark is not fully understood, and the Conservator should, therefore, submit a report showing what measures, in the light of existing orders, he would adopt to lessen the injury alluded to. The number of cattle impounded was 2,851 as against 2,484 the previous year.

8. *Forest Fires.*—The year under report was a disastrous one in the matter of fires, like every alternate year during the past five, because after a good year there is apparently more forest to burn and fewer clearer spaces to check the progress of fire. Protective measures against fire were taken for 1,953 square miles, of which 529 square miles, or 27·1 of the entire protected area, were burned, a slight improvement on the results obtained in 1895-96. In Singhbhum the percentage of area burnt to protected area was 59·6, and but for this abnormal proportion the percentage for the circle would have been the very fair average of 7·5 instead of 27·1. It is, therefore, to Singhbhum that the Conservator's attention should be principally directed. There have already been increased precautions and an increased establishment. The result is not re-assuring. Looking at the statement given by the Conservator, the Lieutenant-Governor doubts whether the gravity of this offence was clearly brought to the notice of the trying Magistrates, otherwise he fails to understand the lenient sentences imposed in some of the cases. The attention of the Commissioner will be drawn to this matter. The Conservator states that the question of reducing the number of gun licenses is under consideration, and a report on the subject is awaited.

9. It would appear that for the circle no less than 108 fires as against 62 in the previous year were fired intentionally, damage being done to 241,652 acres as against 39,600 in 1896-97. Prosecutions were instituted in 19 of these cases, of which 2 ended in acquittal.

10. *Yield and outturn of forest produce.*—The following statement gives details of the forest outturn of the year :—

Class of forest and agency by which produce was removed.	Timber.	Fuel.	Total wood.	Bamboos.	Minor produce.

Total ...	269,617	46,743	316,360	6 939,926	7,036
GRAND TOTAL IN 1897-98 ...	4,904,846	30,128,991	35,033,837	19,827,312	274,606
GRAND TOTAL IN 1896-97 ...	5,396,702	30,277,688	35,674,390	18,160,514	252,421
Difference in 1897-98	—491,856	—148,697	—640,553	+1,666,798	+22,185

The total outturn of timber and fuel was 35,033,837 cubic feet, showing a decrease of 640,553 on the outturn of the previous year. The decrease is explained by the closing of the operations in the Singhbhum district for the supply of sleepers to the Rai Bareli-Benares Railway, the supply during the year being only 94,102 cubic feet as against 538,767 in the previous year, and also by the fact that the figures of the previous year included the standing produce, about 122,000 cubic feet, of 500 acres of land which were sold to a tea-planter. Such fluctuations will always occur with the varying demands, which Railway undertakings make upon the forests. There was an increase of 1,666,798 in the yield of bamboos, while the value of grazing fodder, &c., rose by Rs. 22,185. The decline in the demand for fuel in the Chittagong Division is ascribed to the cyclone having blown down many trees, thereby placing a large quantity of fuel in the hands of the villagers. The reduction in the amount of fuel supplied by departmental agency to the troops at Darjeeling is due to reduction in their numbers. The want of means of carriage for timber is ascribed as the cause of the decrease in the amount

removed by purchasers and, as before remarked this is a subject regarding which a separate report should be submitted. Though there was some increase in the quantity removed from the Sundarbans, the late famine is said to have again affected the demand.

11. *Financial Results.*—The following statement shows the financial results during each of the last six official years:—

Financial year.	Receipts.	Charges.	Net revenue.
1	2	3	4
	Rs.	Rs.	Rs
1892-93	7,44,882	3,81,608	3,63,274
1893-94	8,01,611	4,04,043	3,97,568
1894-95	7,95,673	3,98,601	3,97,072
1895-96	9,18,709	4,66,068	4,52,641
1896-97	13,70,849	6,90,042	6,80,807
1897-98	11,89,285	6,53,437	5,35,848

It will be seen that, with the exception of 1896-97, the results during the year under report both in gross receipts and net revenue have been better than those of any of the preceding years. The decrease in net revenue during 1897-98 is almost entirely accounted for by the reduction in the sale of sleepers for the Rai Bareli-Benares Railway.

12. The following table shows the result of the last two financial years, division by division:—

Division.	Receipts.		Charges.		Surplus.		Deficit.	
	1897-98.	1896-97.	1897-98.	1896-97.	1897-98.	1896-97.	1897-98.	1896-97.

Singhbhum	3,83,760	5,12,162	2,24,810	2,72,420	1,58,950	2,39,743	... ...	... ...
Angul	7,642	10,375	12,159	13,999	.....	.....	4,517	3,624
Puri	20,313	21,582	25,050	21,789	5,263	.....	.....	226
Sundarbans	4,50,694	5,01,004	94,654	91,615	3,55,930	4,09,389	.....	.....
Chittagong	75,149	77,906	33,442	29,953	41,707	47,453	.....	.....
Total ...	11,89,285	13,70,849	6,53,437	6,90,042	5,86,827	7,39,087	50,979	58,280
Net surplus ...	.....	.....	.....	.....	5,35,848	6,80,807	.....	.....

The Sundarbans Division has again the largest surplus, and is followed by Singhbhum. The Chittagong revenue has again declined, but five divisions (the Sonthal Parganas, Puri, Direction, Palamau, and Angul) show improved results. The Sonthal Parganas and Puri Divisions for the first time show a surplus.

13. *Miscellaneous.*—Mr. Wild was on tour for 97 days and Mr. Chester (by whom the Report is submitted) for 33. The Lieutenant-Governor attaches much importance to frequent rounds by the Conservator in his divisions. His personal guidance and advice to the Divisional Officers is all the more necessary so long as the deficiency of working plans remains so great. There were changes of charge in seven divisions, the most numerous instances occurring in the Chittagong Division.

One forester was sentenced to 12 months' rigorous imprisonment for embezzlement and a clerk was dismissed the service. The loss occasioned by

the cyclone, which uprooted most of the trees in the Sitapahar plantation, was very great. One of the elephants belonging to the department died during the year. The decision of the question of the reorganisation of the office establishment of the Department is at present pending receipt of the opinion of the Committee appointed to consider the revision of the system of accounts and reports and the relief in the matter of clerical labour which may thereby be afforded. On the whole, the year may, except in the one matter of the prevalence of forest fires, be said to have been successful, and the thanks of the Lieutenant-Governor are tendered to Mr. Wild for his administration of the Department and to Mr. Chester for his Report.

By order of the Lieutenant-Governor of Bengal,

F. A. SLACK,

Offg. Secy. to the Govt. of Bengal.

RESOLUTION REVIEWING THE DIVISIONAL REPORTS ON THE WORKING OF DISTRICT BOARDS IN BENGAL DURING 1897-98.

MUNICIPAL DEPARTMENT—LOCAL SELF-GOVERMENT.

Calcutta, the 8th December 1898.

RESOLUTION—No. 6986L.S.-G.

READ—

The reports from Commissioners of Divisions on the working of the District Boards in Bengal during 1897-98.

Read again—

The Resolution reviewing the Divisional Reports on the working of District Boards in Bengal during 1896-97.

It is satisfactory to observe that all the Divisional Reports were received within a week of the date fixed for their submission to Government, viz., 31st July, except in the case of the Orissa, Rajshahi and Presidency Divisions, which were respectively nine, eleven and twelve days late. The improvement, as compared with the last two years, is considerable.

2. *Constitution of District Boards.*—As in the previous year, the 38 District Boards in Bengal contained in all 794 members. Of these, 186 were appointed *ex-officio*, 280 were appointed by Government, and 328 were elected by Local Boards, against 182, 287 and 325, respectively, in 1896-97. The European and Eurasian members numbered 183, and natives of the country 611. During the year 571 meetings were convened, or 16 less than in 1896-97. The District Board of Puri heads the list with 22 meetings, Saran comes next with 21, and the District Boards of Jessore and Jalpaiguri follow with 20. On the other hand, the District Board of Murshidabad met only nine times, and no explanation has been given of the neglect in this instance of the rule that a meeting shall be held at least once a month. The attendance was best in Chittagong, and worst in Backergunge and Saran. The attendance of the official members was 3·7 against 3·6 in 1896-97, and that of the non-official members 7·0 against 7·3. The number of meetings that were adjourned, together with those that were entirely abortive, owing to the absence of a quorum, amounted to 61 against 54 in the preceding year; these failures were too frequent in Saran, Puri, Jalpaiguri, Faridpur, Gaya and Muzaffarpur.

3. *Constitution of Local Boards.*—The 104 Local Boards were composed of 1,253 members, or two less than in the previous year. Of these, 39 were *ex-officio* members, 801 were nominated and 413 elected, against 43, 794 and 418, respectively, in 1896-97; officials numbered 151 and non-officials 1,102, while the total of Europeans and Eurasians amounted to 103 against 1,150 natives of the country. The total number of meetings held was 1,135, or 16 more than in 1896-97. Of these, 202, as compared with 182 in the previous year, had to be adjourned or proved abortive owing to failure to form a quorum. Only 32 Local Boards, as against 38 in the previous year, held more than 12 meetings, the Jajpur Local Board standing first with 20 meetings. No less than 54 Local Boards failed to meet once a month, and four of these, viz., Satkhira, Dinapur, Siwan and Raniganj held four meetings or less during the year. The Raniganj Local Board indeed met once only during the year, the reason assigned (which the Commissioner and the Chairman of the District Board rightly consider inadequate) being that there was not sufficient business

to require any other meeting, since the executive functions of the Board were generally exercised by the Chairman and the Vice-Chairman. There was a falling off generally in the attendance of non-official members, which is attributed chiefly to want of interest in their work

4. *Elections.*—No general elections were held in any district during the year, except in the Ghatal subdivision of the district of Midnapore. In two out of the three thanas of this subdvision, the elections failed and the members had, therefore, to be appointed by Government.

5. *Occupation of members.*—The figures showing the occupations of the members of District and Local Boards are given in the following table. Compared with the figures of the previous year, the variations are very slight.

	Government servants.		Zamindars, &c.		Pleaders and Mukhtears.		Planters.		Missionaries.		Government pensioners.		Other occupation.		Total number of members.
	Number.	Ratio per cent.	Number.	Ratio per cent.	Number.	Ratio per cent.	Number.	Ratio per cent.	Number.	Ratio per cent.	Number.	Ratio per cent.	Number.	Ratio per cent.	
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16
District Boards	257	32·9	244	30·7	172	21·6	59	7·4	4	·5	12	1·5	48	5·7	794
Local Boards	154	12·3	571	45·5	334	26·5	47	·37	4	·3	33	2·6	111	8·8	1,253

6. *Powers of Local Boards.*—The powers delegated to the Local Boards remained unchanged during the year, except that the Narainganj Local Board, in the district of Dacca, was not entrusted, as in previous years, with the supervision of the sanitary arrangements at the Nangalbund Fair, and that the Rampur Hât Local Board was relieved of the management of eight scheduled roads, a management which was found to be only nominal, since the real control was exercised by the District Board through the District Engineer.

7. *Union Committees.*—The subjoined table shows the constitution, income and expenditure of the several Union Committees:—

Name of District.	Name of Union.	Date of establishment.	Area, in square miles.	Population.	Number of members.	Number of meetings held.	Income.					Expenditure.				
							Receipts under the Cattle Trespass Act.	Contribution by the District Board.	Receipts under section 118 of the Act.	All other receipts.	Total.	From receipts under the Cattle Trespass Act.	From contribution by the District Board.	From receipts under section 118 of the Act.	From all other receipts.	Total.

The conduct of the Daspur Union Committee in submitting false bills supported by false vouchers was noticed in last year's Resolution. This Union was abolished during the year. The only other change made was in the district

of Pabna, where the Shazadpur Union was brought into working order. This Committee is, however, reported to have been dilatory and wanting in energy. The number of the members (469) and the number of meetings held (302) show respectively an increase and decrease of one as compared with the previous year. The total income during the year rose from Rs. 18,921 to Rs. 19,881 in consequence of larger contributions from District Boards, while the total expenditure increased from Rs. 13,222 to Rs. 17,481. The Commissioner of Burdwan reports that the Union Committees at Contai and at Panskura worked satisfactorily during the year, but that the remaining three Unions in the district of Midnapore took very little interest in their work. The Chanditola Union, in the district of Hooghly, expended the whole amount allotted to it, and is well spoken of, but the Pandua and Balagar Committees were inefficient. The Basudebpur Union, in the 24-Parganas, and all the Union Committees in Khulna are said to have worked well, and the same is said of all those in Tippera, except that at Laksham. The Union Committees in the Noakhali district are reported to have had insufficient funds at their disposal, and the Commissioner thinks that, if the District Boards cannot furnish them with more funds, they might be dispensed with. In Balasore the five new unions formed in 1896, with the exception of that at Remuna, appear to have done little or nothing. The Commissioner of Burdwan makes the following remarks:—

"The Union Committees are as yet but infant institutions; but, judging from the working so far, it cannot be said that their utility has been in any degree commensurate with the trouble they cause to District Boards and local officers. So long as they have only infinitesimal sums to manage,—and it is practically only by local taxation, which will never be adopted, that these sums can be increased,—I fail to see why we should expect anything from these Union Committees. It is impossible for District Boards to increase their allotments to any extent, and it is in only a very small number of cases that these Committees are likely to do good. I except cases like that of Contai, where a Subdivisional Officer directly works the Committee."

8. Owing to the scarcity which prevailed in Bengal during the years 1896 and 1897, it was not considered advisable to proceed with the formation of Union Committees. Since then the Lieutenant-Governor has had before him statistics of the working, for an entire year, of a number of Unions which were constituted in certain districts in the year 1895-96. These illustrate the financial and administrative difficulties which have to be met, and throw some doubt upon the expediency or possibility of extending the system to any substantial extent without seriously interfering with the financial resources of the District Boards. Sir John Woodburn has, therefore, decided that for the present no more Union Committees shall be formed, and that, as regards those already constituted, their working shall be carefully watched and reported on fully in the annual reports on District and Local Boards, in order that it may be seen whether any further extension of the system is possible in the future

9. *Financial Results.*—The income and expenditure of the District Boards under the various heads during the past two years are shown in the following statement:—

INCOME.

	1896-97.	1897-98.

Interest on Debt	15,420	27,641
Total ...	70,93,454	69,07,397

10. The year opened with a credit balance of Rs. 15,88,769 (corrected figures), and the total amount available for expenditure was Rs. 86,93,834 against Rs. 86,79,666 in the previous year. The year closed with a credit balance of Rs. 17,86,437. Out of this sum, however, more than one and a half lakhs consisted of deposits. The closing balances were more than one-third of the year's income in Hooghly, Howrah, Jalpaiguri, Rangpur, Dacca, Purnea, Cuttack, Tippera, Gaya and Muzaffarpur. No reason for keeping so large a balance has been given in the cases of the Hooghly, Rangpur, Howrah and Jalpaiguri District Funds. In the case of Tippera it is explained that a large contribution made by Government for the construction of a new telegraph office, some new buildings in the Jail compound, and some out-houses of the circuit-house, remained unexpended. In Gaya, the large balance is said to be due to the budget allotments for original and repair works not having been fully expended, and in Muzaffarpur to the fact that the amount set apart from the savings from other works for payment of compensation for lands acquired for famine relief works was not spent during the year. As regards Dacca, the Chairman says that the balance is much in excess of what is required, but that, as the Board has a working programme which will absorb all its resources for some years to come, no difficulty will be felt in deciding how to reduce it. The heavy balance in Purnea is said to be due to the District Engineer not having been able to work up to the allotment for earth-work in consequence of the scarcity of labour and want of materials, while in Cuttack it is explained that the actual income exceeded the estimated receipts, and the District Board found itself unable to spend the whole amount allotted to original and repair works.

INCOME.

11. *Provincial Rates.*—The proceeds of the road cess credited to District Funds, after deducting the cost of collection and of periodical revaluation, increased from Rs. 37,73,615 to Rs. 39,16,230 during the year, chiefly owing to revaluations and to better collections. All the districts in the Orissa Division, however, show a decrease, which in the case of Balasore is not explained; in the case of Puri is said to be due to increased expenditure on process fees, and in the case of Cuttack is merely put down to short collection of road cess.

12. *Interest.*—The income under this head shows a slight increase, which is attributed, as in the preceding year, to the larger collection of arrears of road cess.

13. *Pounds.*—There was an increase of 147 during the year in the number of pounds, but a decrease of Rs. 3,720 in the total income derived from them. This occurred in the Rajshahi, Presidency, and Bhagalpur Divisions; in the case of the first it is ascribed to the effects of the scarcity and the earthquake; in the case of the two latter different explanations are given for different districts. In some few districts it is reported that the new pound forms have caused improvement, but the general complaint still is that the pound farmers and their representatives are too illiterate to understand,

or else too negligent to keep up these forms. Leases of pounds were granted for more than one year in certain districts of the Presidency and Bhagalpur Divisions, in Muzaffarpur, in Sirajganj, and in other places, and in these instances a better class of pound farmers was obtained. Pounds were inspected, as usual, by Government and District Board officials. The Magistrate of Hooghly complains of the perfunctory character of the inspections made by Sub-Inspectors of Schools and sub-overseers, and says that a whole-time officer responsible for the proper management and improvement of pounds would be of great use. Special Inspectors of Pounds were employed in some districts, but were not in all instances found satisfactory. At Birbhum this official was suspended and fined during the year, and at Midnapore the appointment was abolished, and the duties, so far as the sadar subdivision was concerned, given to a lately appointed Veterinary Assistant, while in Faridpur the Commissioner of Dacca points out that the District Board spent over Rs. 1,000 a year on their special Inspector, although their average annual income from pounds is only Rs. 5,000. Irregularities on the part of pound farmers and pound-keepers are reported from Jessore, Dinajpur, Pabna, Backergunge, Gaya, Monghyr, Balasore and Puri. The worst case was at Bhola in the Backergunge district, where the servants of the pound farmer were sent out to seize cattle, and attempted to impound 50 buffaloes. Three of the culprits were sentenced to six months' imprisonment.

14. *Education.*—The receipts under this head rose from Rs. 53,599 to Rs. 65,879. This increase is said to be due to a larger number of boys attending the schools, larger collection of fees at the Lower Primary Scholarship examinations, larger receipts from the sale of articles manufactured in the workshops of the technical schools, and to donations from private individuals.

15. *Medical.*—The increase of income under this head was chiefly due to larger contributions made by private individuals to hospitals and dispensaries.

16. *Scientific and other Minor Departments.*—Receipts under this head are reported from four districts only, viz., 24-Parganas, Dacca, Gaya and Saran, to meet the cost of certain sanitary arrangements made at fairs in these districts.

17. *Miscellaneous.*—By far the largest increase under this head occurred in Darbhanga, and was mainly due to adjustments of account connected with famine expenditure.

18. *Minor Works and Navigation.*—There was a falling off in the canal revenue in Chittagong in consequence of the heavy loss sustained by the farmers from the cyclone. The rent derived from the fishery in the drainage channel along the Diamond Harbour Road declined from Rs. 200 to Rs. 115.

19. *Civil Works.*—Of the several items which make up the total under this head, receipts from ferries alone call for notice. Compared with the previous year there was a falling off of Rs. 1,840. A decrease occurred in 20 districts, viz., Birbhum, Midnapore, Hooghly, Nadia, Murshidabad, Jessore, Rajshahi, Jalpaiguri, Rangpur, Bogra, Dacca, Mymensingh, Faridpur, Tippera, Noakhali, Patna, Muzaffarpur, Bhagalpur, Balasore and Puri. No explanation of this is given in the case of Hooghly, Rajshahi and Bogra; in the other districts the reasons assigned are various. The most remarkable of these is that given for Rangpur and Mymensingh, where large remissions had to be granted to the ferry farmers in consequence of the earthquake of June 1897, many ferries being rendered fordable by the upheaval of the beds of the rivers. The ferry boats and the landing-stages to the approaches to the ferries appear generally to have been kept in good order. Ferry farmers were prosecuted during the year in Murshidabad, Pabna and Puri. Complaints of delay in crossing mails are reported only from Gaya and Cuttack, in both of which districts the boatmen in fault were punished. In Darbhanga the farmer of a ferry resigned his lease, and took it again in the names of his servants on a considerably reduced *jama*, but the case was enquired into, the *benamidars* agreed to pay the original *jama*, and no further proceedings were taken. The Chairman of this District Board states that *benami* transactions with regard to ferries are so numerous that steps are being taken to ascertain the solvency or otherwise of each farmer before giving him lease. The Lieutenant-Governor would have supposed that this precaution would always be taken in any case.

20. *Contributions.*—The grants made by Government and contributions from private individuals for special works fell off from Rs. 10,46,159 to Rs. 7,13,853. The contributions made by Government to equalize the assets and charges of the several District Boards also decreased from Rs. 5,13,912 to Rs. 5,11,128. In both cases the decrease was chiefly due to smaller grants made by Government.

21. *Loans.*—The sum of Rs. 7,000 shown against Chittagong represents the balance of the contribution of Rs. 13,000 made by Babu Prosanna Kumar Rai for the re-excavation of Sigolbaha Canal.

22. *Deposits and advances.*—The sums deposited as security for the payment of revenue by ferry farmers, contractors and others, and the recoveries and adjustments on account of advances made from District Funds increased from Rs. 5,07,780 to Rs. 5,24,827. This increase was due to casual variations of no special importance.

EXPENDITURE.

23. *Refunds.*—The sum of Rs. 187 shown under this head against Murshidabad represents the refund in that district of road cess collections which were not legally realizable.

24. *Administration.*—The expenditure under this head fell from Rs. 2,98,761 to Rs. 2,82,770. The various reasons assigned for the decrease are the abolition and amalgamation of posts, the appointment of new men on salaries lower than those which the old incumbents drew, and the transfer of the amounts charged in the accounts under the head "Payment of establishment for offices of account and control" to the head "Contributions to Provincial" in accordance with instructions from the Accountant-General, Bengal.

25. *Rules for the management of Provident Funds.*—A new rule directing that no public account may at any time have more than Rs 10,000 at its credit, exclusive of interest, and that no interest will be allowed on any sum in excess of Rs. 10,000, was added by the Government of India to the Post Office Savings Bank Rules. As this rule affected all Municipalities and District Boards, in whom the management of Provident Funds is vested, Commissioners of Divisions were requested to impress upon those bodies the necessity of arranging with the Comptroller-General for the investment in Government securities of all deposits exceeding the prescribed maximum limit of Rs. 10,000.

26. *Pounds.*—The expenditure on cattle pounds amounted to Rs. 21,234 against Rs. 16,873 in 1896-97. The largest increase was in Patna, and is said to be chiefly due to the repairs which were undertaken during the year.

27. *Education.*—The following abstract, which has been compiled from Appendix B, shows the educational expenditure of District Boards during the last two years:—

	1896-97.	1897-98.
	Rs.	Rs.
Inspection.		
Sub-Inspectors	1,83,180	1,92,591

In all the districts of the Patna Division, and in the Jessore, Jalpaiguri, Backergunge, Chittagong, Monghyr, Bhagalpur and Purnea districts, the percentage of expenditure on education was below the average for the whole province, which was 20·3. The proportion was highest in Balasore, where 41·3 per cent. of the income of the District Board was spent on education; in Bankura, Pabna, Dacca, Faridpur, Cuttack and Puri it was 30 per cent. or more, while 17 other districts show an expenditure of 20 per cent. and over. In Shahabad the proportion was below 10 per cent. of income. With regard to the proportion spent on primary education, Balasore has a ratio of 32·1 per cent., while in Bankura, Dacca, Faridpur, Noakhali, Cuttack and Puri the expenditure was 20 per cent. or more. In Jalpaiguri, Gaya, Shahabad, Saran and Muzaffarpur it was below 10 per cent.

29. The number of schools maintained by District Boards, as shown in Subsidiary Table III appended to the Departmental Report on Education, fell off from 179 to 174. The number of pupils, however, increased during the year from 11,023 to 11,437, the increase occurring chiefly in high and middle schools. The number of schools aided by District Boards decreased by 3,324, and the number of pupils attending them by 71,279—a result which is to be ascribed to the scarcity that prevailed during the year. The number of industrial schools maintained by District Boards was six, as in the previous year, but the number of scholars in them increased from 211 to 247. The following table, which compares the number of girls' schools aided by District Boards and the number of pupils attending them during the past two years, shows that there was a marked falling off during the year under review:—

	1896-97.		1897-98.	
	Schools.	Pupils.	Schools.	Pupils.
Upper Primary	71	1,703	53	1,089
Lower „	1,939	31,000	1,682	27,579
Total ...	2,010	32,703	1,735	28,668

30. In Circular No. 538-543T.G., dated the 15th September 1897, Government expressed a desire that in certain districts, where the Muhammadan population preponderated, a proportion of the Sub-Inspectors of Schools should, if possible, be qualified Muhammadans. No opportunity occurred of giving effect to this during the year in Dacca, Mymensingh or Faridpur; but in Backergunge, on a vacancy occurring, a Muhammadan was chosen to fill the post. The District Boards of Bhagalpur, Monghyr and Purnea are reported to have their due proportion of Muhammadan Sub-Inspectors.

31. The Director of Public Instruction has recorded the following observations regarding the educational work of District and Local Boards in his Annual Report for the year 1897-98:—

"*District Boards.*—Harmonious relations between the District Boards and the Department are reported from the Presidency Division. No friction of any kind is reported from any of the districts of the Burdwan Division, but delay in the transaction of educational business is reported as a general failing, more particularly in regard to the passing of grant-in-aid and reward bills; this was remarkably so in the case of the office of the Midnapore District Board, where primary school bills were so much delayed that cheques issued for more than Rs. 11,000 remained uncashed at the close of the year. From the Rajshahi Division relations are described as having been 'generally cordial.' Harmony is also reported from the districts of the Dacca and Chittagong Divisions. From the Patna Division the report is that 'relations have been of the most cordial and satisfactory nature in practically every district throughout the year.' Harmonious relations between the Boards and the Department are also reported from the Bhagalpur and Orissa Divisions.

"Instances of considerate and well-timed charity are reported from the districts of Patna Gaya, Saran, Champaran and Muzaffarpur, where the Boards granted relief to the poorer masters, drawing less than Rs. 50 a month, by allowing them to have educated one son free and one son at half the usual rates in schools under their control.

"*Local Boards.*—The work of these bodies is generally confined to the award and transfer of stipends allotted for primary schools and the passing of reward and stipend bills and the issue of cheques in payment for the same. They are also supposed to check the work of inspecting pandits, but I believe this is a duty which they perform in a very unsatisfactory manner. In my opinion it would be better not to require Local Boards to deal with any educational matters. All business of this kind had much better be transacted by the District Boards aided by their Educational Sub-Committees.

"The allotments from District Funds were Rs. 7,46,616, against Rs. 7,53,245, but the savings effected by the Boards came to very nearly 10 per cent. of their allotments in 1897-98. It is no doubt true that these bodies found that there were excessive demands upon their purses for other purposes, but yet I hardly think that the cause of primary education should have been allowed to suffer to so very great an extent. It is particularly unsatisfactory to find that the miscellaneous charges were allowed by the Boards to increase from Rs. 22,194 to Rs. 24,348, while their direct payments to the teachers of the schools were allowed to fall from Rs. 5,49,981 to Rs. 4,93,126.

"It seems to be beyond question that the District Funds are, in most instances, so inelastic that it will be impossible for District Boards to make larger allotments for primary education than were made in the year 1896-97. I trust that ere long Government may be able to see its way to increasing its assignment to the Boards. When this can be done, it should be made a special condition of the grants that the Boards are to keep up their former payments for primary education, and that the new allotments are to be regarded as supplementary to the grants formerly given by the Boards for this purpose. This condition should be kept in view by the Department, and Deputy Inspectors of Schools should be required to keep the Inspectors informed when this special condition is being lost sight of. In case extra allotments are made, the districts which will require the lion's shares will be the very backward districts of the Divisions of Patna, Bhagalpur, Rajshahi, Chota Nagpur, and the Tributary Mahals of Orissa."

32. *Special Schools.*—The following details are gathered from the Divisional Reports. The Maisadal Raja's technical school, which is managed by the District Board of Midnapore, was during the year affiliated to the Sibpur Engineering College, as was also the technical school at Barisal. The number of pupils in the Apprentice Department of the Comilla Elliott Artizan School, which is also affiliated to Sibpur, increased by ten, and six pupils obtained certificates of proficiency. The District Boards of Howrah, Midnapore, Cuttack, Tippera and Noakhali continued to award scholarships to pupils to enable them to study at Sibpur. The Noakhali District Board also gave a native of the district a scholarship tenable at the Calcutta School of Art, and the Cuttack District Board granted four scholarships for education at the Jobra Workshops. With the exception of Purnea, all the District Boards in the Patna and Bhagalpur Divisions continued to award scholarships for the Bihar School of Engineering. The District Board of Rajshahi opened a sericultural school at Rampur Boalia during the year.

33. *Female Medical Education.*—Scholarships to female medical students were granted by the District Boards of the 24-Parganas, Dacca, Mymensingh, Backergunge, Faridpur, Tippera, Patna, Shahabad, Rangpur and Darbhanga. The District Boards in the Burdwan Division and the Muzaffarpur, Noakhali and Chittagong District Boards offered scholarships, but no candidates came forward. The District Board of Gaya continued to pay for the employment of a native midwife and menial staff in the Female Ward attached to the Gaya Pilgrim Hospital with the object of training *dhais* in midwifery. The employment of the female student attached to the Motihari Municipal Dispensary was discontinued at the beginning of the current year.

34. *Medical.*—The total outlay under this head amounted to Rs. 3,03,657, being Rs 91,494 more than in the previous year, an increase being found under all heads except that of scholarships in medical schools. More than half this increase, however, is attributable to the expense of the construction of the plague observation camps at Mairwa and Chausa. Leaving this out of account, all the Divisions show an increase in their medical expenditure, although in Dacca and Rajshahi the increase is very small.

35. The following table shows the proportion of total income which was expended by each District Board on medical charity:—

Names of District Boards.	1896-97.		1897-98.	
	Total medical expenditure.	Percentage of medical expenditure on ordinary income.	Total medical expenditure.	Percentage of medical expenditure on ordinary income.

Total ...	2,12,163	3·7	3,03,657	5·1

36. A new dispensary was opened at Budge-Budge in February 1898, the total cost sanctioned for its maintenance being Rs. 900, of which Rs. 300 were contributed by the District Board of the 24-Parganas, Rs. 500 by the

Port Commissioners and Rs. 100 by Messrs. Bird and Company. Two new dispensaries were opened by the District Board of Khulna at Kaliganj and Tala during the year: five by the District Board of Backergunge at Tazumuddi, Nazirpur, Manpura, Rajapur and at Bakai: two by the District Board of Champaran at Dhaka and at Kisseria: two by the District Board of Monghyr at Sangrampur and at Baktiarpur; and one by the District Board of Cuttack at Patamundai. The District Board of Backergunge provided for ten additional minor dispensaries, which it was decided to open in the course of the current year. As regards Veterinary science, Veterinary Assistants were employed during the year by the District Boards of Cuttack and Tippera, and in Birbhum a Veterinary Assistant was employed for a short time during an outbreak of cattle-disease at Murarai. This officer, although he found difficulty in persuading the people to adopt his remedial measures, treated 274 cases of rinderpest, 186 of which resulted in cure, 4 in relief, and 84 in death. The District Board of Cuttack agreed to subscribe a sum of Rs. 40 per mensem towards the maintenance of a Veterinary Institution. The District Boards of Hooghly, Bogra, Chittagong, Shahabad and Cuttack granted monthly stipends to students to enable them to study in the Veterinary Institution at Belgachia. As regards the treatment of women, the Bankura and Hooghly District Boards contributed Rs. 275 and Rs. 1,200, respectively, towards the maintenance of branch hospitals established by the Dufferin Fund. The District Boards of Burdwan, Bogra and Jalpaiguri continued to contribute towards the pay of the lady doctors and midwives attached to the local hospitals; midwives were also employed at the cost of the District Boards of Noakhali, Birbhum and Pabna, and the Local Boards of Tangail, Netrokona, and Kishenganj, and a lady doctor by the Local Board of Jamalpur. As regards cholera, the District Boards of Midnapore, Bogra, Noakhali and Cuttack gave gratuitous medical relief to patients, and the District Board of Chittagong employed Hospital Assistants to suppress the epidemic of cholera which appeared after the cyclone. The District Board of Bhagalpur distributed packets of drugs to the people in the interior, and in Backergunge the District Board have purchased boxes of simple medicines, which they intend to entrust to panchayats for distribution as required. The District Board of Chittagong entertained 12 paid vaccinators during the year, and the District Board of Cuttack spent Rs. 660 in aiding to combat an epidemic of small-pox.

37. In the year under review many exceptional demands were made upon District Funds, and the increased allotment for medical expenditure is, therefore, the more satisfactory. In last year's Government Resolution it was stated that it was doubtful whether any substantial increase could be looked for unless means could be found of adding materially to the resources of the Boards. Within the limits of the Board's existing resources, however, the demands of medical charity must be allowed their full share, and an endeavour must be made gradually to work up to something more nearly approaching the scale of medical expenditure which obtains in other provinces.

38. *Sanitation.*—Particulars of the sanitary works undertaken by District Boards during the year are given in Form No. IV annexed. The total expenditure of the year amounted to Rs. 2,64,743 against Rs. 1,86,060 in 1896-97 as shown in the margin. The advance is satisfactory, but the total sum spent still represents only 4·4 per cent. of the ordinary income of the District Boards during the year. In some districts, too, the expenditure is insignificant; in Bogra it was only Rs. 500, and in Jalpaiguri only Rs. 480, while in Balasore only Rs. 20 were spent. By far the largest increase is shown in the sums spent on the improvement of water-supply, all the Divisions except Patna and Burdwan exhibiting an advance in expenditure under this head, although in 19 districts altogether the prescribed minimum of Rs. 5,000 was not attained. Quarterly reports from each Division have been submitted to Government throughout the year, and it appears that, as a rule, proper attention is being paid to this

	1896-97. Rs.	1897-98. Rs.
Improvement of water-supply ...	1,51,268	2,23,544
Ditto of village sites ...	7,816	7,005
Conservancy of towns and villages	887	2,034
Sanitation at fairs	8,295	7,883
Other sanitary expenditure ...	17,794	24,277
Total ...	1,86,060	2,64,743

important subject. The largest amount was expended by the District Board of Bhagalpur, where Rs. 42,655 were spent on the excavation and improvement of tanks as relief works in Supaul and Madhipura. In the 24-Parganas there was a decrease, as the necessity for expenditure caused by the drought of the preceding year did not exist. The Chairman of the Howrah District Board complains that a tank excavated by the District Board at Khalna, on the understanding that it would be reserved for drinking purposes, was found to be used also for bathing; he complains also of mischief done to tube and ring wells. To prevent this, an attempt should be made to give effect to the suggestion made in last year's Resolution that some person of local influence might be induced to take charge of the wells in his own village. The Magistrate of Faridpur also regrets the unpopularity of well as compared with tank water, since to excavate a tank costs Rs. 1,000, and re-excavation, which may very likely fail, Rs. 500. In Dacca, on the other hand, it is stated that the conspicuous success of tube-wells at the Nangalbund fairs seems at last to have decisively influenced public opinion in their favour. The expenditure rose from Rs. 17,368 to Rs. 27,962 in Mymensingh. The money was devoted to the excavation or improvement of 60 tanks and 98 wells: unfortunately many of these were damaged by the earthquake. In Backergunge Rs. 14,644 were spent against Rs. 7,320 in the previous year, and it is proposed to reserve at least one tank in each of the 509 chaukidari villages in the district.

39. The two registers of water-supply prescribed by Government under orders dated 15th May 1896, are reported to have been completed in all districts except Faridpur, Bankura, Hooghly, Midnapore, Pabna, Puri, Malda and Purnea, and in the Patna Division from which no information has been furnished. Till these have been completed, no general statement showing the progress throughout the province can be prepared.

40. The expenditure on sanitation at fairs is chiefly composed of grants of Rs. 3,370 by the District Board of Saran towards Sonepur and the other smaller fairs in the district, Rs. 2,750 by the District Board of the 24-Parganas towards the Ganga Sangor and Harwa *melas*, and Rs. 336 by the District Board of Birbhum for the Kenduli and Bakreswar *melas*. The greater part of the expenditure on other sanitary objects is accounted for by a contribution of Rs. 10,000 by the Gaya District Board towards the Chausa Inspection Camp, and a contribution of Rs. 5,000 by the Shahabad District Board to the Arrah Municipality for conservancy and other measures.

41. *Scientific and other Minor Departments.*—Two bulls at Pabna and Sirajganj were still maintained by the District Board of Pabna, but it is reported that no use was made of them during the year. The District Board of Shahabad continued to maintain an Arab stallion at Buxar, but declined a donkey sire offered them by the Government Veterinary Department.

42. *Stationery and Printing.*—The total outlay under this head was Rs. 49,282, which is Rs. 3,851 less than the previous year's expenditure.

43. *Miscellaneous.*—Miscellaneous charges fell from Rs. 62,607 in 1896-97 to Rs. 47,087 in 1897-98, chiefly owing to the transfer of the charges for staging bungalows to the proper head under "Civil Works."

44. *Famine Relief.*—The total expenditure was Rs. 1,90,592 against Rs. 2,86,990 in the previous year, Rs. 59,882 being spent on charitable relief, Rs. 1,08,874 on public works and Rs. 21,836 on miscellaneous works. The District Board of Bhagalpur spent Rs. 66,012 and the District Board of Bankura Rs. 35,492.

45. *Civil Works.*—The following table shows the expenditure on public works during the past two years:—

Year.	Ferry establishment, contingencies and refunds.	Original Works.	Repairs.	Establishment and contingencies.	Tools and Plant.	Water-supply and water-works.	Drainage works, &c.	Total.
1	2	3	4	5	6	7	8	9
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1896-97	46,543	12,26,850	19,51,779	6,00,978	26,550	98,913	12,744	40,23,159
1897-98	38,816	8,97,294	20,07,966	6,72,947	24,518	1,39,770	5,370	37,86,713
Difference	—7,732	—3,28,356	+56,187	+71,969	—2,032	+40,857	—7,374	—2,36,446

The total expenditure shows a decrease of Rs. 2,36,445, which occurred chiefly under the head of "Original Works." The decrease was largest in the Patna Division, where it was necessary to curtail the allotments for these works, in order to provide funds for famine relief. The most important works taken in hand during the year were the construction of a new Court-house for the Magistrate of Burdwan at a cost of Rs. 40,694; the construction of a girder bridge over the Painer river on the Gaya-Nawada road at a cost of Rs. 27,821; the construction of a Subdivisional Court house at Patuakhali at a cost of Rs. 10,099; the construction of an iron bridge over the Tushkhali-Matbaria khal at a cost of Rs. 12,751; the construction of a portion of the road from Jamalpur to Madarganj at a cost of Rs. 9,814; the improvement of the Sonbarsa road, which is an important feeder road to the Sitamarhi station on the Tirhut State Railway; the arching of thirteen timber-topped bridges and culverts in the district of Muzaffarpur and the construction of a school building at Monghyr.

46. An examination of Appendix C will show that throughout the province the average proportion which the cost of Civil Works bore to the total expenditure of District Boards was 56·9, the percentage rising to 72·5 in Jessore and 71·2 in Burdwan, and falling to 29·7 in Saran and 30·7 in Bogra. The percentage of the cost of establishment on total expenditure (column 10) was 9·4 for the whole province against 9·1 in 1896-97. It reaches 15·0 in Jalpaiguri and 13·2 in Gaya, while in Bogra it stands at only 4·8. For the province generally the salary of the District Engineer represents 36 per cent. of the total cost of establishment, though in Rajshahi it mounts to 53·7 per cent. Column 12 of the statement shows what proportion is borne to the expenditure on original works and repairs by the cost of establishment. The mean for the province is 22·5, but this is exceeded by 18 districts, and in Saran the percentage reaches 77·1. The ratio borne by the District Engineer's salary to the expenditure on original works and repairs is shown in column 13. The average is 8·1 per cent., but 10 per cent. is exceeded in 10 districts, Saran, Puri, Champaran and Shahabad in the order named showing the highest figures

47. *Village Roads.*—The total expenditure on village roads in each Division decreased during the year, as shown by the statement in the margin. The decrease is shared by all divisions except the Presidency and Patna. All the scheduled roads under the Local Boards in the districts of Monghyr, Bhagalpur and Purnea are now being treated as district roads, and, with the exception of Rs. 40 spent in Malda, no expenditure was incurred by the District Boards on the maintenance of village roads in the Bhagalpur Division. The Magistrate of Birbhum remarks that the division of the village road allotment into equal shares amongst all the village roads, irrespective of their requirements, of which he has known an instance, merely results in waste of money, while, on the other hand, if the expenditure is restricted to the important roads only, the minor roads are neglected. Distribution of the annual allotment amongst a few village roads taken in rotation, according to their importance and requirements, and with reference to the amount spent on them in previous years, is, in his opinion, best calculated to ensure the proper maintenance of the roads. This view is obviously correct: and it is the plain duty of the Magistrate, who is also Chairman of the District Board, to prevent so absurdly wasteful an arrangement. The Magistrate of Midnapore observes that during his tour he has hardly seen a single village road in a state of decent repair, and in his opinion, the Local Boards neglect all supervision of the work on these roads. The Lieutenant-Governor would take this opportunity to draw the attention of all District Boards to the remarks made on the subject by the Commissioner of the Burdwan Division, which were reproduced in paragraph 48 of the Resolution for the year 1895-96.

			1896-97. Rs.	1897-98. Rs.

	Total	...	2,64,103	2,54,235

48. *Water communication.*—The District Board of Patna undertook the improvement of the Telkupi khal in the Sirajganj subdivision, and also

subsidized a service of *gayna* boats on the line between Pabna and Kushtia on the Eastern Bengal State Railway, with a view to its eventually supplanting the costly steamer service. The District Board of Dacca expended Rs. 3,037 on the improvement of the Buriganga, Dhaleswari and Ichamati rivers. The District Board of Mymensingh undertook the survey of certain khals with a view to their improvement, and have under consideration projects for clearing certain important water channels of the district, which were blocked up by the earthquake of June 1897. In Dacca a new tow-path from Jamalpur to Kaliganj, a length of about 4½ miles, was constructed along the right bank of the Lakhya river, and the tow-path from Barama to Lakhyapura on the bank of the Banar river was repaired. In Noakhali it is stated that all the important navigable artificial channels were during the rains cleared of obstruction. The opening of the Sikal Baha Canal in Chittagong is said to have much facilitated communication with the southern part of the district.

49. *Steam communication.*—The District Board of Dacca continued to maintain steam communication between Naraingani and Munshiganj, which during the year yielded a net profit of Rs. 2,57- to the Board. In Noakhali the District Board continued their subsidy of Rs. 2,400 to the steamer service between Barisal and Noakhali, and the District Board of Pabna their subsidy of Rs. 5,000 to the service between Pabna and Kushtia. A temporary service was also kept up with Sandwip during the cold weather.

50. *Miscellaneous Public Improvements.*—The statement below shows the expenditure incurred by the several District Boards in the maintenance of trees on the sides of roads:—

	Rs.		Rs.		Rs.
Burdwan ...	4,050	Dinajpur ...	366	Chittagong ...	1,707
Birbhum ...	1,320	Jalpaiguri ...	319	Gaya ...	1,359
Midnapur ...	90	Rangpur ...	1,139	Shahabad ...	705
Hooghly ...	378	Bogra ...	187	Saran ...	426
Howrah ...	497	Pabna ...	1,068	Champaran ...	255
24-Parganas ...	838	Dacca ...	795	Monghyr ...	3,173
Nadia ...	501	Mymensingh ...	692	Bhagalpur ...	1,497
Murshidabad ...	145	Faridpur ...	106	Purnea ...	1,130
Jessore ...	639	Backergunge ...	82	Malda ...	204
Khulna ...	275	Tippera ...	815	Balasore ...	90
Rajshahi ...	243	Noakhali ...	1,515	Puri ...	335

The District Board of Backergunge also maintained the Public Works embankment at Bhola at a cost of Rs. 86, and spent Rs 155 in repairing the jetties at Patuakhali and Bhola. The District Board of Purnea spent Rs. 604 on the survey and gauge reading of the Kosi river, and Rs. 431 on the maintenance of the Belwa and Kosi bunds.

51. *Railway feeder roads.*—The District Board of the 24-Parganas spent Rs. 1,256 on the metalling of the southern section of the feeder road to Akra Station on the Budge-Budge Railway, and Rs. 1,084 on the acquisition of land required for the construction of a feeder road from the Halishahar Railway Station on the Eastern Bengal State Railway to the village of Halishahar. The repairs to the Kissenganj-Hansada feeder road, in the district of Nadia, which were begun in 1896-97, were nearly completed during the year. The road leading to the Khoksa Railway Station and other existing feeder roads in the same district and the three railway feeder roads in the district of Khulna, were maintained in good order. The important feeder road from Tangi to Kaliganj in the district of Dacca was much improved during the year at a cost of Rs. 5,392. In Burdwan land was acquired for the construction of a feeder road from Debipur Railway Station to the village of Debipur, and work commenced during the year. In Tippera four feeder roads were constructed at a total cost of Rs. 3,853, in Noakhali three at a cost of Rs. 3,592, and in Chittagong eight at a cost of Rs. 8,434. A feeder road was constructed by the District Board of Purnea from Kasba bazar to Kasba Railway Station.

52. *Railways and Tramways.*—Some progress was made during the year in the construction of the Ranaghat Krishnagar Tramway, and it is hoped that the line will be opened by the 31st of March next. The construction of a steam tramway from Barasat to Basirhat has not yet been commenced, nor the

railway from Garhara to Katihar in the district of Bhagalpur. Tenders have been invited by the District Board of Burdwan for the construction of a steam tramway over the existing road from Memari to Chakdigi with the prospect of extending it to Tarkeswar. Nothing has been done in connection with the projected railway line from Ahmadpur to Bhagalpur *viâ* Suri and Dumka. A proposal for the construction of a steam tramway from Chandrakona to Burisa *viâ* Ghatal is under the consideration of the District Board of Midnapore. The Howrah-Sheakhala Steam Tramway was finally completed and opened throughout its whole length in November 1897, one portion having been opened in August of that year and a second in September. The Howrah-Amta Tramway was opened during the year to the extent of $16\frac{1}{2}$ out of 30 miles. It is stated that the line promises to be a great success financially.

53. *Amendment of the Bengal Local Self-Government Act.*—In view of the late famine and the measures required to guard against plague it was not considered advisable to proceed during the year with the Bill to amend the Bengal Local Self-Government Act.

54. *General Remarks.*—The remarks recorded by the several Commissioners of Divisions on the working of the several District and Local Boards in their respective Divisions are reproduced below.

Mr. J. Kennedy, Officiating Commissioner of the Burdwan Division, writes:—

"Having taken charge of the Division after the close of the year, I possess no personal knowledge of the working of the District Boards during that period. It is clear, however, from the comments quoted above, that the District Boards discharged their duties in a satisfactory manner, and rendered useful assistance to District Officers as consultative bodies, a special feature of their deliberations being an entire absence of factious opposition and party spirit. The attendance of the members, too, appear on the whole to have improved. As regards Local Boards, there is a consensus of opinion as to their inutility; little as they had to do, that little seems to have been perfunctorily done, and, though this result is in some measure due to their want of sufficient power and scope of work, the fact remains that they have not fulfilled the expectations formed of them, and are therefore valueless as auxiliaries to district administration. I fail to see how anything much can be expected from them under present circumstances, and the tendency of Local Boards to regard their overseers and sub-overseers as dependent entirely on them, and not as subordinates of the District Engineer, is calculated to injuriously affect work."

Mr. C. E. Buckland, Commissioner of the Presidency Division, states:—

"There is a consensus of opinion that the District Boards do satisfactory work: their local knowledge is valuable, and many of them have fair experience of official business. But, hardly one has a good word to say for Local Boards: they have little money at their disposal to spend, and it is not unnatural that the members take so little interest in their unimportant duties. They might well be abolished without any detriment to the district administration."

Mr. P. Nolan, Commissioner of the Rajshahi Division, observes:—

"I find that the official Chairmen are practically allowed to conduct the administration with little interference. Such assistance as the other members of the Board give is generally useful, though in some matters, such as the increase of establishments, their influence is not for good. Where the work generally is good, the Chairman deserves most of the credit, and where it is otherwise, it is he who should take the blame.

"Mr. Clark, of Rangpur, says:—

"'When the bulk of the members of the District Board take a certain amount of what, for want of a better word, may be called theoretical interest in the proceedings, few, if any, of them take a practical interest in the way of superintending work. Personal questions, of which unfortunately we have several, arouse far deeper interest than work estimates, for example, regarding which, as a rule, no questions are asked.'

"Mr. Clark's view of the matter, and he is in charge of the largest district in the Division, seems to me to be correct. I may add that the residential members of the Board contribute very useful information, and that they preserve administrative traditions in such districts as Dinajpur, where the officials are constantly changed."

Mr. H. Savage, Officiating Commissioner of the Dacca Division, remarks:—

"On the whole, it seems that the District Board have done good work, and have been, as in previous years, particularly valuable as advisers of the executive on account of the local knowledge of the members. Local Boards are equally useful as consultative bodies, but their executive is weak and their funds are too often wasted for want of supervision."

Mr. G. E. Manisty, Officiating Commissioner of the Chittagong Division, says:—

"Not having joined the Division till the end of the year, I do not offer any remarks of my own on the working of the District and Local Boards. My predecessor's remarks for 1896-97 will be found in paragraphs 84 and 85 of the report for that year. I will only say that I consider Sadr Local Boards a superfluity and a mistake."

Mr. F. R. S. Collier, Officiating Commissioner of the Patna Division, records the following observations:—

"It will be observed that the District Officers are unanimous in testifying to the interest shown in their duties by the members of the District Boards and to the value of their opinion as consultative bodies. My own experience is entirely in accordance with their remarks. Their criticisms as to the Local Boards are less favourable. The funds which it is possible to place at the disposal of Local Boards are so small that it is unreasonable to expect the members to take any very absorbing interest in their working.

"A very common criticism of the working of District Boards in this Province is that they are merely consultative bodies, and that the actual work is left to the Chairman and the paid officers of the Boards. The criticism would have much more force if it were accompanied by examples of similar local authorities in other countries in which a different state of things exists. I do not know where such examples are to be found, and such criticisms appear to me to refer to a utopian standard and to have, therefore, very little practical value."

Mr. R. Carstairs, Officiating Commissioner of the Bhagalpur Division, makes the following remarks:—

"Mr. O'Brien, the Chairman of the Purnea District Board, observes:—

* * * * * * * *

"'As regards the Local Boards, it will be time to expect them to take an interest when they are given something to take an interest in. In Assam each Local Board performs the functions of a District Board within a subdivision, being credited with the local rates raised within its jurisdiction. This decentralisation is most successful, and accounts for the apparent paradox that in matters of Local Self-Government, Assam is far ahead of the Bengal mufassal'

"I have no personal knowledge of the working of the District Boards in this Division during the year. I sympathise with Mr. O'Brien's views on decentralisation, where possible."

Mr. G. Stevenson, Officiating Commissioner of the Orissa Division, comments as follows:—

"Having joined the Division only after the close of the year under report, I have nothing special to add here. My predecessor has left nothing on record as regards Local Self-Government."

55. The Lieutenant-Governor has little to add to the remarks of Sir Charles Elliott quoted in last year's Government Resolution. The year under review has been one in which the District Boards have been severely tried, and it was not, therefore, one in which constitutional reforms of any magnitude could be inaugurated. For the present no further step in the direction of decentralization will be taken, and District and Local Boards will continue unchanged. It is hoped that it will be found possible at no very distant date to take up the question of increasing their resources.

By order of the Lieutenant-Governor of Bengal,

E. N. BAKER,

Offg. Secretary to the Government of Bengal.

FORM No. I (*a*).

Statement showing the constitution of the District Boards in Bengal during the year ending 31st March 1898.

Serial number.	Names of District Boards.	Act under which constituted.	Area, in square miles.	Population within the area.	Number of Members.								Number of meetings held.	Number of meetings for which absence of quorum, or want of business, reported.	Average attendance at each meeting.

(a) The discrepancy of Rs 149 is due to the fact that Rs. 100 contributed towards scholarship has been shown in column 34(a) of Form No. III.

(b) The discrepancy of Rs. 41 between this and the Statement III is due to the amount of uncashed cheques and schooling fees being excluded from the outlay on education shown here under Director's Circular No. 43 of 31st March 1897.

APPENDIX C.

Statement comparing the salaries of District Engineers, the size of their Districts, and the Expenditure on Public Works in each in 1897-98.

RESOLUTION ON THE ANNUAL GENERAL ADMINISTRATION REPORT OF THE CHOTA NAGPUR DIVISION FOR THE YEAR 1897-98.

GENERAL DEPARTMENT—MISCELLANEOUS.

Calcutta, the 8th December 1898.

RESOLUTION—No. 3615.

READ—

The Annual General Administration Report of the Chota Nagpur Division for the year 1897-98.

Mr. Forbes was in charge of the Division throughout the year and has submitted the present report; there were no changes of District Officers, and the only office affected by transfers was that of the Subdivisional Officer of Gobindpur in Manbhum. The Division was exceptionally fortunate in this respect.

2. *Tours and Inspections.*—Mr. Forbes has given an interesting account of his tour which, extending over 172 days, included visits to all the districts of the Division with the exception of Palamau and to the Native States of Bonai, Gangpur, Raigarh, Udaipur, Sergujah and Jashpur. His arrangements during the early part of the year were seriously interfered with by the necessity for the supervision and control of the famine relief operations, and subsequently by the compilation of the report regarding them; and, as remarked by him, in the present state of communications in the Division, it is a physical impossibility for all parts of it and the Native States to be visited in one and the same year. As it was, the Commissioner was only able to make a complete inspection of the Hazaribagh office and partially of that of Manbhum, including a thorough enquiry into the affairs of the Pachete, Barabhum and Patkum encumbered estates.

The time spent by the Deputy Commissioners of Hazaribagh and Lohardaga in camp, fell slightly short of the period prescribed in consultation with the Commissioner. The tours of the District Officers generally seem to have been well planned and useful, and the necessary inspections were made. The Subdivisional Officers also spent the requisite time on tour.

3. *Weather and Crops, Prices, Material condition of the people.*—Mr. Forbes has given a full account of the vicissitudes of the different seasons of the year, the harvests reaped, and the condition of the people both in the early part of the year when famine was prevalent, and after the new crops were reaped and their prospects began to mend. The statistics of rainfall are of peculiar interest as showing clearly that the prospects of the season depend upon the distribution rather than the actual quantity of the rainfall. The rain measured was in every district less than the normal fall, and in Hazaribagh, Lohardaga and Singhbhum less than that of the preceding year, which had occasioned the disastrous crop failure that marked the Division, yet thanks to the timely occurrence of the showers, the different harvests in the Division generally were excellent, although at one time in Palamau and parts of Manbhum, temporary cessations of the rain raised fears of a repetition of a second famine year.

Writing of the character of the different crops, the Commissioner remarks:—

"On the whole, the past year, from an agricultural point of view, has been an unusually good one. The autumn and spring crops were on the whole fully up to the average, while the winter rice, the principal crop of the year, was everywhere a bumper one. Added to this the *mahua*, almost next in importance as regards food-supply to the rice crop, has been fully up to the standard in most of the districts, while the mango crop was almost the largest ever known. Oilseeds and sugarcane also did fairly well, being nowhere much under a three-quarter crop, and averaging for the Division 15 and 13½ annas respectively. Opium was about the least fortunate crop of the year, with a 12 anna outturn in Hazaribagh and 14 annas in Palamau. In neither district, however, is the quantity grown large."

The effects of the famine upon the people of the Division has already been discussed in a published Resolution of Government. At the commencement of the year under review prices had already reached an abnormal level, and famine had declared itself. As stocks ran out and the inaccessible nature of the Division rendered communication and importation difficult, prices rose still higher until they touched a pitch unequalled elsewhere in the history of the famine in these Provinces. With the harvesting of the new and excellent crops they gradually fell, although, on the 31st March 1898, they were still above the normal rates. Wages did not rise and, even for a time, under the stress of famine, fell. The material condition of the people was, therefore, most unfavourable; with the new harvest it improved greatly, and all signs of scarcity rapidly passed away, but the Commissioner is of opinion that the famine has had effects in embarrassing the circumstances of the poorer cultivators from which it will take them more than one year of good crops to recover.

The year was a most unhealthy one; the condition of the people, debilitated from want of food, was aggravated by the resort to unwholesome jungle products as a substitute for grain, and the early cessation of the rains of 1896 resulted in a deficiency of wholesome water-supply. The recorded death-rate rose to 39·6 per mille from 27·3 in 1895 and 30·7 in 1896; deaths by small-pox increased from 282 during the previous year to 648; by cholera, from 5,352 to 28,686, and by fever from 102,707 to 114,067. In Hazaribagh and Lohardaga the unusually high death-rate of over 46 per mille was recorded.

4. *Emigration and Immigration.*—The statistics of the number of emigrants from the Division are necessarily very imperfect; such as they are, the figures of coolies recruited during the last three years in all districts except Palamau, under the provisions of Act I of 1882, were 15,350, 22,690 and 26,468 respectively. Statistics regarding free emigration for the same period show annual totals of 11,156, 17,364 and 19,285 emigrants, the figures for Palamau being wanting. The effect of the famine is seen in the increase of emigration of both descriptions. The abuses of the cooly traffic are dwelt on by the Deputy Commissioner of Lohardaga, and the abolition of recruitment through *arkatis* advocated. With that proposal the Commissioner agrees, but considers that the extent of the abuses has been over-estimated, and that emigration in the Division has now been in force for so long that there are few who, through their friends or relations, are not acquainted with the details of the system of recruitment and the prospects offered. The matter is being separately discussed.

5. *Manufactures, Mines, and Commerce.*—The year was again unfavourable to the lac industry; the price of manufactured lac fell heavily, and the Calcutta market was overstocked and dull, with the result that in Lohardaga four out of six factories were closed, and in Manbhum, although 13,000 maunds were manufactured, in comparison with 13,771 maunds during the previous year, the value of the outturn declined from Rs. 6,68,500 to Rs. 3,90,000 during the year under review.

The weather during the year was fairly favourable for tea cultivation, but the Commissioner remarks that the prospects of the industry in the Division are not hopeful, and that the climate and soil are not such as to produce tea of a superior quality. The famine told heavily upon the silk weavers of Manbhum, although special measures were taken for their relief.

The outturn from the coal mines of the Giridih subdivision (664,694 tons) was slightly less than in the preceding year; from the Gobindpur coal fields there was a marked decrease in the output, from 1,281,294 tons in 1895 and 562,990 tons in 1896 to 417,588 tons during 1897. An important coal-mining concession was given during the year in the Gangpur Tributary State to a Bombay Syndicate. The mica industry, mostly in the mines in the Government protected forests of Hazaribagh, is increasing in importance. Experience has shown that it will be probably necessary to make considerable modifications of the conditions of lease.

The Commissioner again draws attention to the isolated character of the Division generally and the want of improved railway communication, a want which was clearly felt during the recent famine when, in the Lohardaga and Palamau districts, the importation of food-grains had to be stimulated by the measure, almost exceptional in India, of the grant of loans and bounties. The

figures of rail-borne traffic, therefore, do not furnish a complete analysis of the trade of the Division. However, so far as they go, the figures show a total export of 4,05,75,639 maunds by rail, as compared with 3,35,06,354 maunds in the previous year, and imports to the extent of 17,75,899 maunds in comparison with 14,68,687 maunds. The apparent large excess of exports over imports is purely due to the large export of coal and coke; excluding the figures on this account, the balance of trade is reversed. The effects of the famine are clearly seen in the increase in the amount of rice brought into the Division from 2½ and 3¾ lakhs of maunds in 1895-96 and 1896-97, respectively, to 4¾ lakhs of maunds during 1897-98.

6. *Civil Justice.*—The number of original civil suits disposed of by Deputy Commissioners and Subordinate Judges was 686, or 12 less than in the previous year. Fewer witnesses were examined, and only 6·03 per cent. were detained over two days as against 10·3 per cent. during 1896.

Six thousand seven hundred and seventy-eight cases were disposed of by munsifs, or 450 more than in the year preceding. The increase was chiefly under the head of title suits. The ratio of witnesses detained over two days declined from 9·2 to 7·5 per cent., although the total number examined was greater. The number of rent suits disposed of rose from 5,292 to 5,490 during the year under review; there was some improvement in the promptness with which witnesses in this class of cases were examined, a matter that had been the subject of unfavourable comment in the Resolution on the Report for 1896-97.

7. *Crime, Criminal Justice, and Police.*—The number of cognisable cases reported during the year was 15,642 in comparison with 8,899 during 1896; the increase of 75 per cent. over the figures for the preceding year was common to all districts of the Division, but most noticeable in Manbhum, Lohardaga and Hazaribagh. The famine and the high price of food-grains are given as the explanation of this very large fluctuation in crime, and although offences rose under all of the major classified heads, the increase was most marked in the case of the serious and minor offences against property which were in excess by 111·5 and 99·3 per cent., respectively, of the corresponding figures for the previous 12 months. Dacoity cases rose from 45 in 1896 to 145 in 1897; robberies from 28 to 42; burglaries from 2,189 to 4,446, and thefts from 2,504 to 5,109. These figures coupled with the history of many of the cases detected, the increase in crime as the pressure of the scarcity grew more intense, and its comparative cessation when the new crops were harvested, all bear out the Commissioner's opinion that hunger was the compelling cause in a majority of offences. The corresponding increase of nearly 80 per cent. in the cognisable cases disposed of was to be expected, but it is satisfactory that, while the Magisterial staff was not strengthened, the promptness with which cases were disposed of showed an improvement, only 15·3 per cent. being remanded four times and over, as compared with 21·8 per cent. during 1896. Of cases committed to the Courts of Session, 56·2 per cent. ended in conviction; but the results were poor in Manbhum.

There was a decrease of 714 in the number of non-cognisable cases instituted, contributed by the districts of Hazaribagh, Palamau, and Manbhum; the effects of the famine are also seen in these figures.

Eight thousand two hundred and seventy-seven cases, in which 30,653 witnesses were examined, were disposed of in the Stipendiary Courts, and 1,835 cases, involving the examination of 2,541 witnesses, by Honorary Magistrates. The proportion of witnesses detained over two days in the two classes of Courts was 4·7 and 6·5 per cent., respectively, as against 5·6 and 4·5 per cent., respectively, in the previous year; the results on the whole show an improvement, as more witnesses were examined in either instance. The attendance of Honorary Magistrates seems to have been on the whole fair, although more regularity might have been observed among the members of the Giridih, Ranchi, Gobindpur and Chaibassa Benches.

The realisation of criminal fines was not altogether satisfactory, and the balances outstanding at the close of the year in Lohardaga (Rs. 11,376) and Singhbhum (Rs. 3,117) were especially large.

The Commissioner expresses his opinion on the working of the Police force as on the whole favourable, in comparison with other Divisions of the Province, and in striking contrast with the administration in the Native States. The isolated character of the Division places restrictions upon the class of men recruited, and close and effective supervision is handicapped by the size of the areas under the charge of individual officers. Special measures for the patrolling of the roads were taken during the famine, and are said to have been efficacious in keeping down crime. Of the total demand on account of chaukidari cess, 71 per cent., and of the current demand, 83 per cent., in all was collected. The Commissioner is of opinion that the prevailing scarcity may be accepted as some excuse for this deficiency in the sums realised, but considers that the bad results in Manbhum were in part due to the absence of efficient supervison.

8. *Land Revenue and Cesses.*—Owing chiefly to the resettlement of the Kolhan Estate in Singhbhum, the current demand on account of land revenue in the Division rose from Rs. 4,16,156 to Rs. 4,97,706 during the year under review. The year at the same time opened with an arrear demand of Rs. 43,122. The total collections during the year aggregated 97·2 per cent. of the current, and 89·5 per cent. of the total demand. The proportion of current collections to current demand in the three classes of estates is compared below with the usual standards:—

District.	Permanently-settled estates.	Temporarily-settled estates.	Estates under direct management.
Standard	99	95	90
Hazaribagh	99·66	98·50	95·80
Lohardaga	99·92	95·93	75·81
Palamau	91·14	34·28	52·16
Manbhum	96·86	100	...
Singhbhum	69·41	...	100

The short collections in permanently-settled estates in Singhbhum have not been explained; the demand was, however, small and the balance insignificant, as also was the case with temporarily-settled estates in Palamau. The balance unrealised in the Government estates of the Palamau district was large, and although the Deputy Commissioner represents the impoverished condition of the raiyats in consequence of the famine, the Commissioner appears to consider that undue leniency was shown in the collections.

The collections of Road and Public Works Cess were on the whole satisfactory and amounted in all to 107 per cent. of the current demand. A general re-valuation of the districts of Lohardaga and Palamau was sanctioned during the year.

The certificate work in the Division is not heavy, but 37·7 per cent. of the total number of cases for disposal were pending at the close of the year, although the majority was for less than six months. The settlement operations in the Mahta and Koilapal estates in Manbhum were under revision during the year, and the operations in the Palamau Government estates and in the important Kolhan estate in Singhbhum were concluded during the period under review.

9. *Wards and Encumbered estates.*—There were altogether 70 Wards' and Encumbered estates under management during the year, as against 71 in that preceding. The revenue and cesses due to Government were paid in full in all instances, except in those of the Barabhum and Patkum estates in Manbhum. The total collection of rent and cesses due to the estates under management amounted to 89·2 per cent. of the current demand and, considering the circumstances of the year, the Lieutenant-Governor agrees with the Commissioner that the result is satisfactory. Of a total debt of Rs. 27,18,091 due by the Encumbered estates in charge of the Revenue authorities, the sum of Rs. 2,84,665 was discharged, or Rs. 27,885 less than the amount provided in the sanctioned schemes of management. The deficiency is explained by the Commissioner.

In the previous year attention was specially drawn to the expenditure of a suitable portion of the income of the estates under management upon the improvement of the property, as a matter equally incumbent upon Government

as the discharge with reasonable expedition of the encumbrances incurred by the proprietors. The Commissioner lays special stress upon the necessity for the undertaking of surveys and records of right in these properties, the more so as when they come under the control of the Revenue authorities, their affairs are usually in a state of disorder. The Lieutenant-Governor is glad to observe that the total expenditure upon improvements increased from Rs. 20,736 during 1896-97, to Rs. 28,382 during the year under review.

10. *Excise, Stamps, Income-tax.*—In the Resolution on the Report for the year 1896-97, it was remarked, as an unexpected circumstance, that in spite of the unfavourable harvests during that year, the total excise revenue still showed an increase. The effects, however, of the scarcity during the year now under review are clearly shown, the revenue falling from Rs. 11,07,737 to Rs. 7,84,351, the decrease being common to all districts. Ninety-three per cent. of the total loss of revenue was under the head of country spirit, the indifferent *mahua* crop, from which this liquor is distilled, being a special cause conducing to this result. The Commissioner expresses the opinion that the offence of illicit distillation is still widely prevalent, especially in Manbhum.

The stamp revenue, which amounted to Rs. 4,53,464, showed a small decrease of Rs. 5,133, although the receipts were still in excess of those of 1895-96. The decrease, which was confined to the districts of Hazaribagh, Lohardaga, and Palamau, is attributed generally to the effects of the scarcity and incidentally to local and accidental causes. Considerably fewer persons were prosecuted for breaches of the law.

There was a falling off of 173 in the number of persons finally assessed to income-tax, but an increase of Rs. 111 in the amount finally realisable from them. The increase was in the Singhbhum district only, where the impetus to the grain traffic and the work on the Sini-Midnapore Railway led to the discovery of new assessees. The percentage of collections, excluding costs and penalties, &c., was 96·7, which may be considered satisfactory.

11. *Railways and Public Works.*—As already mentioned, the need for more railways in the Division is one which was prominently brought to notice during the recent famine, and some progress was made during the year. All the earthwork and bridges, except one, were completed upon the Sini-Midnapore extension of the Bengal-Nagpur Railway. The survey of the Baroon-Daltonganj line in Palamau was finished, and that of the proposed line from Midnapore *vid* Bankura to Jharia and Ramgurh, with branch lines to Ranchi and Lohardaga, was commenced.

The famine relief operations enabled considerable improvements to be effected in connection with water-supply and irrigation, and, exclusive of the sums expended by municipalities and in Government and Wards' estates, Rs. 56,113 was spent on these objects by Government, and Rs. 89,127 by zamindars as loans under the Land Improvement Loans Act. Three hundred and seventeen miles of roads were also repaired and 200 miles newly constructed at a total cost of Rs. 1,71,673 by famine labour. Except in the district of Palamau, considerable attention, the Lieutenant-Governor observes with pleasure, is paid to arboriculture, and the Commissioner has recently drawn attention to the advantages of planting mango trees to a greater extent both as a source of shade and future income.

12. *Education.*—The decline both in the number of schools in the Division and of the pupils attending them, that occurred last year, continued also in the one under report. As compared with that year, there was a loss of 287 in the number of schools open, and of 6,292 in the pupils under instruction. The existence of famine, and epidemic disease in its wake, and the measures taken in some cases for the re-grouping of existing schools by the closing of those which were inefficiently managed, afford sufficient explanation of the general falling off, though it is curious that there was a small increase in the number of private schools in every district, except Lohardaga. The cause of female education fared badly, and only 108 schools with 2,826 pupils were in existence in comparison with 194 schools and 4,380 pupils in the previous year. The total expenditure upon education amounted to Rs. 3,55,740, or Rs. 3,563 less than in the previous year. The grant from Provincial Revenues remained approximately the same (Rs. 1,73,740).

With only 18·4 per cent. of the boys of a school-going age actually under instruction, the general condition of the Division, from this point of view, still remains very backward.

13. *Hospitals and Dispensaries.*—The number of public dispensaries and hospitals, exclusive of institutions under private management, was 18, or the same as in the previous year. The number of patients treated at them increased from 60,013 to 63,769, and the expenditure incurred, from Rs. 23,961 to Rs. 34,673 Of their total income 54·4 per cent. was derived from private subscriptions. The Lieutenant-Governor has read with marked interest the account of the Leper Asylums in the Division, noticeably that maintained at Purulia by the Dublin and Edinburgh Mission to lepers in the East, in which there were 488 patients maintained at a cost of some Rs. 26,000, in addition to a home for untainted children of lepers, kept up at a cost of Rs. 2,000, in which 61 children were accommodated. The Commissioner speaks in high terms of the management of the institution and the admirable work it effects.

14. *Local Self-Government Institution.*—None of the municipalities in the Division possess large incomes, but on the whole they seem to have discharged their duties satisfactorily. In the matter of sanitation, there appears to be special room for improvement in those of Chatra and Purulia. The Commissioner has submitted proposals for the extension of the Local Self-Government Act to the Division, minus the elective system.

15. *State of public feeling and conduct of zamindars.*—The Deputy Commissioner of Lohardaga (Mr. Streatfield) gives an interesting account of the state of feeling among the Kols and Uraons on the subject of agrarian difficulties; the benefits to be expected from the recent Act for commutation of predial services appear to be doubted, but further experience has yet to be gained of its working. The release from jail of Birsa Munda, who claims to be an incarnation of the deity, caused a certain amount of temporary excitement which has since subsided.

16. The Commissioner has given in some detail the history of the recent famine, which has, however, already been separately reviewed by Government.

17. Sir Alexander Mackenzie has already recorded his high appreciation of the services of Mr. Forbes in connection with the relief operations, and the thanks of Sir John Woodburn are due to him for his able administration of the Division in other respects, and for his present most interesting report.

By order of the Lieutenant-Governor of Bengal,

F. A. SLACK,

Offg. Secretary to the Govt. of Bengal.

Extract from the General Administration Report of the Chota Nagpur Division for 1897-98.

* * * * * * *

III.—WEATHER AND CROPS.

17. Before proceeding to consider the general conditions of the weather during the past year, and its effects on the crops, it may be of interest here to note the share taken by each of the principal crops, viz, the *bhadai*, the winter rice, and the *rabi*, in contributing to the total food-supply in each district. This is a matter particularly deserving of consideration in a Division like Chota Nagpur, where the food staples grown necessarily vary considerably with the physical features of the country. The following statement, which I reproduce from my final report on the late famine (where I have explained how the figures have been arrived at), gives this information.

Statement showing the approximate share, in annas, of the total food-supply (= 16 annas) of each district, which is contributed by each of the three main crops (bhadai, winter rice and rabi).

Description of Crops.	Hazaribagh.	Lohardaga.	Palamau.	Manbhum.	Singhbhum.	Divisional average.
1	2	3	4	5	6	7
	Annas	Annas.	Annas.	Annas.	Annas.	Annas
Autumn crops or *bhadai* ...	4·5	6·20	4·2	1·8	2·5	4·51
Winter rice	10·	9·78	6·4	12·0	12 8	10 14
Spring crops or *rabi* ...	1·5	0 02	5·4	2 2	·7	1 35
Total ...	16·0	16 0	16 0	16 0	16·0	16·0

18. It will be seen that although, taking the Division as a whole, the rice crop gives about two-thirds of the total food-supply, the *bhadai* crops something over a quarter, and the *rabi* not more than one-twelfth, yet the relative importance of each crop varies considerably in the different districts. Thus, while in Palamau an average *rabi* crop may be taken as equivalent to about a four months' food-supply, in Lohardaga its yield is quite insignificant. Again, in Lohardaga and Palamau a good *bhadai* harvest means a four and-a-half and a three months' supply of food in each district respectively, while in Manbhum it will give only a few weeks' supply. This is a matter of considerable importance when the effects of a failure or otherwise of one or other of the above crops have to be considered in reference to the different districts.

19. The general character of the weather during the past year is illustrated by the following statement showing the actual as compared with the normal rainfall, month by month, in each district:—

Month.	Hazaribagh.		Lohardaga.		Palamau.		Manbhum.		Singhbhum.		Average for the Division.	
	Actual.	Normal.	Actual.	Normal.	Actual.	Normal.	Actual.	Normal.	Actual.	Normal.	Actual.	Normal.

20. It will be observed that the total fall in every district was under normal, the average for the whole Division being even less than in the disastrous year preceding. The result, as regards the outturn of the different crops, is an illustration of the widely different consequences of a favourable or unfavourable distribution, in point of time, of the rainfall. In the preceding year the character of the rainfall was most capricious, heavy falls occurring when least needed, often doing more harm than good, and much of the water running to waste. During the year of report the exact opposite was the case, and, indeed, the regulation of the rainfall can only be properly described as *providential*. The different heavy falls came precisely when most needed for the crops, in some instances just in time to save them. There were no *excessive* falls, but every drop told and there was no running to waste. The generally beneficial results as regards the three principal crops are summarised below.

The *bhadai* crops.

21. The only parts of the Division that gave cause for anxiety in respect to this crop were the district of Palamau and the Gobindpur subdivision and certain other portions of the Manbhum district. In Palamau the *ante*-monsoon showers, which enable the lands to be prepared for the *aus* paddy and other *bhadai* crops, were very disappointing, the result for the six weeks ending 26th June, being a total fall of only 4·51 inches as compared with a normal fall of 7·40 inches. By the middle of July there had been no improvement, and matters were looking very serious indeed. Then, fortunately, in the third week of that month a good fall of over 5 inches came, just in time to save the crop from dying. There was then another bad break, and by the end of July, with a total fall of only 14·85 inches, as against a normal of 21·55, prospects had again become very threatening. Then came another sudden fall of 5 inches during the first week in August, which for a second time saved the situation; and, at last, after still another ten days' drought, while the other districts were getting rain in plenty, a third good fall of nearly 6 inches during the week ending 21st August practically preserved the district from a second year's famine, in comparison to which the one it had just experienced would have been child's play. For the eventual result, after the vicissitudes passed through, we cannot be too thankful.

22. In the Gobindpur subdivision and other parts of Manbhum the rainfall was, for a time, almost as capricious as in Palamau, and in the result less favourable. The last half of July in that district was particularly trying, being marked by abnormal heat and an entire absence of rain in places; and the *gondli* and other crops were in consequence considerably damaged by insects. The result was a rush, at the end of August, to the relief works, which had to be kept open for some six or seven weeks longer than in any other district of the Division. It is to be remarked, however, that this was not merely due to the failure of the *bhadai*, but also, and mainly, to the small extent to which autumn crops are grown in the Manbhum district, as will be seen by a reference to the statement in paragraph 17 above.

23. In the other districts the conditions were, on the whole, all that could be wished. The rains in May, June and July, it is true, were somewhat short, but they were very well distributed, and good falls during the first and third weeks in August secured for the *bhadai* crops a general outturn, except in Manbhum, of fully 16 annas.

Winter rice.

24. The good falls in August, noticed above, enabled the transplantation of the rice seedlings to be everywhere completed. It is true that in most of the districts there was a deficiency at the end of that month, of 5 or 6 inches, as compared with the normal. This, however, was compensated for by each successive fall having come just when wanted; and—given a short allowance—the distribution in point of time could not have been more favourable. In September the general fall was again somewhat below the normal, as had been the case in the previous year. But between 1896 and 1897 there was this marked difference, viz., that while in 1896 the stoppage occurred in the middle of September, and was then followed by a continued drought, in 1897 there was a good fall during the *last* week of that month, which was exactly what was wanted. Following this, in October, there were unusually copious *hatiya* rains, averaging 5·88 inches (for the month) against a normal of only 2·83, which everywhere secured a bumper rice harvest.

Rabi crops.

25. The heavy *hatiya* rains noticed above gave good moisture everywhere for the *rabi* sowings, but the usual showers in December and January held off, and it was not until February that any fall worth mention occurred. The result was, however, a full average crop in all the districts except Lohardaga and Palamau, the returns from which districts gave about a 12 annas outturn. The most favourable report was from Manbhum, where the estimate was 18 annas.

26. On the whole, the past year, from an agricultural point of view, has been an unusually good one. The autumn and spring crops were, on the whole, fully up to the average, while the winter rice, the principal crop of the year, was everywhere a bumper one. Added to this, the *mahua*, almost next in importance, as regards food-supply, to the rice crop, has been fully up to the usual standard in most of the districts, while the mango crop (now just over) has been almost the largest ever known. Oilseeds and sugarcane also did fairly well, being nowhere much under a three-quarters crop, and averaging, for the Division, 15 and 13½ annas respectively. Opium was about the least fortunate crop of the year, with a 12 annas outturn in Hazaribagh and 14 annas in Palamau. In neither district, however, is the quantity grown large.

IV.—PUBLIC HEALTH.

27. The general health of the Division during the past year was worse than ever known before since the days of statistics. Not only was there a very severe outbreak of cholera, which prevailed during the months June—September, but the mortality from small-pox, fevers and bowel-complaints was much larger than usual. This was only as might have been expected amongst a people predisposed to disease from the effects of scarcity. But there can be no doubt that there also exists in these districts a special cause for the general lowering of the tone of the system during a time of famine, viz., the large extent to which the people have recourse to jungle roots and berries to satisfy their hunger. These forest products when taken with their usual accompaniment of rice or other wholesome grain, form a valuable supplement to the ordinary food-supply, but when eaten by themselves, without the customary medium, and especially in an uncooked state, have a particularly irritating effect on the digestion, which soon renders the people more susceptible than usual to any form of prevailing sickness. There was also the fact that the first grain to ripen in the rains was *gondli*, a millet which is notoriously unwholesome when eaten without a proper admixture of rice. This—coming after a time of scarcity, when rice stocks had run very low—was recklessly indulged in, and no doubt was directly or indirectly responsible for many deaths from cholera and bowel-complaints. Moreover the early cessation of the rains in 1896 had caused a large number of wells, tanks and other reservoirs of water to run dry during the hot-weather months of the year under report, so that the deficiency in the supply of wholesome water intensified the outbreaks of cholera, fevers and bowel-complaints.

28. The cholera epidemic in Hazaribagh commenced in April in the neighbourhood of the Grand Trunk Road and extended to thanas Chowparan, Bagodar and Dumri. The really severe epidemic of cholera started in the town of Hazaribagh and simultaneously in the Barkagaon thana at the end of June. It became very severe in these parts in July, and in August the epidemic spread over the central and southern parts of the district. The disease accounted for 6,386 deaths, against 988 in the previous year.

In the other districts the cholera epidemic followed much the same course as in Hazaribagh, the mortality attaining its maximum in August, excepting in Manbhum, where the largest number of deaths occurred in the month of June. In all of the districts the effects lasted until the middle or end of October, excepting in Manbhum, where it practically disappeared by the end of September. The total number of deaths registered from this cause in all the districts amounted to 28,686 as compared with 5,352 in the preceding year. Details for the different districts are given in the statement in paragraph 30 below. One notable incident showing the growth of confidence

in prophylactics, was the large number of candidates for treatment by inoculation under Dr. Haffkine's method. In Manbhum alone the operations numbered 8,319, whilst in Ranchi and Hazaribagh a very considerable number of persons both amongst the well-to-do and the cooly classes were also inoculated.

* * * * * * *

V.—MATERIAL CONDITION OF THE PEOPLE.

32. The reply to this question, for the first half of the year under review, can be best inferred by a reference to the figures of the following statement:—

Statement showing the normal and actual average price for common rice for the last fortnight of each month, April—September 1897, in the different districts of the Chota Nagpur Division.

Months.	Hazaribagh (Sadar)		Lohardaga.		Palamau.		Manbhum. (Sadar).		Singhbhum.	
	Normal.	Actual in 1897.	Normal.	Actual in 1897.	Normal.	Actual in 1897.	Normal.	Actual in 1897.	Normal.	Actual in 1897.
1	2	3	4	5	6	7	8	9	10	11
	Srs. ch.	Srs. ch.	Srs. ch.	Srs. ch.	Srs. ch.	Srs. ch.	Srs. ch.	Srs. ch.	Srs. ch.	Srs. ch.
April	14 8	7 10	16 8	8 2	14 6	6 13	17 0	9 4	...	10 0
May	...	6 13	...	7 8	...	6 15	...	7 14	...	9 0
June	...	6 3	...	6 15	...	6 7	...	7 10	...	4
July	13 11	6 6	14 13	5 6	12 10	6 4	14 10	7 5	...	7 0

September	...	7 0	...	7 0	...	8 13	...	8 9	...	10 0

It seems needless to say more than that, during the above months, except in Singhbhum, famine was over the land. It made itself first felt in Palamau, Hazaribagh, and parts of Manbhum. In Lohardaga stocks at first seemed more plentiful than elsewhere, and the Deputy Commissioner did not apprehend much actual scarcity. As time went on, however, stocks ran out, the effects of insolation from the railway system told their tale, and scarcity throughout a large portion of the Lohardaga district became extremely acute; so much so that in the end of July at 101 out of 188 *hâts* in that district rice had risen to 5 seers or under *per* rupee, and at a number (29) of these it was selling at the unheard-of price of 4 seers and less, or at nearly four times the normal price. In Palamau and parts of Hazaribagh and Manbhum the distress was for a time scarcely less severe, though owing to the considerable quantity of jungle edibles in the first district and to the other two being partially served by the railway, there was not so much cause for real anxiety on their account. Singhbhum up to the end of June was an exporting district, but in July this ceased, prices hardened to 7 seers per rupee, and in August Singhbhum also began to import. I may mention that, in order to relieve the situation in Lohardaga, Government sanctioned, during August, the payment of Re. 1 per maund bounty on imports of rice *vid* Purulia. A similar concession, at a rate of 8 annas per maund, had been considered necessary in the case of Palamau from an early period of the distress.

33. By the time that relief was at hand—with the advent of the *bhadai*—the general condition of the population had naturally fallen to a very low ebb. Matters had further been aggravated by the insuperable lethargy of the aboriginal population and their great dislike to any form of compulsory labour, which made many of them prefer excessive privation to working on piece-work wages. An escape from such uncongenial labour was, at the same time, offered by the means at hand of finding food in the jungles, and large numbers managed to sustain life in this manner, though at the cost of reducing themselves to a state of great debility.

34. From the month of September, thanks to the good *bhadai* harvest, matters began steadily to improve, and with the succeeding plentiful rice crop and the good outturn of the *rabi*, *mahua* and mango crops, all signs of scarcity soon passed away, and the people appeared to quickly recover their normal

condition, so far as regards their physique and general state of health. But I fear that the circumstances of many of the poorer cultivators will be affected by the late scarcity for some time to come, and that it will require another year, or perhaps two years, of good crops before they are able to make good their losses. Writing on this subject, Mr. Streatfeild, the Deputy Commissioner of Lohardaga, offers the following remarks, with which I am disposed to agree. After mentioning that a considerable number of whole families have left many of their villages in the most affected tracts of his district, either for Assam and to take up waste lands in the Native States, he continues:—

"Even where the crops were good the exactions of the landlords and mahajans have prevented the people from recovering their normal condition of prosperity. The crops of 1896-97 not having in many cases sufficed to enable the raiyat to pay his rent and to repay any grain debts he might have, he was compelled to pay up all outstandings from last year's (1897-98) crop, leaving himself a very narrow margin for his own support. Moreover, loans made during the times of scarcity have been made to carry the most exorbitant interest * * * *

"On the whole, though the condition of the people gives no present cause for anxiety, there is no doubt that the commencement of the year 1898-99 finds the district far from prosperous."

VI.—EMIGRATION AND IMMIGRATION.

35. The following table compares the number of emigrants recruited and registered under Act I of 1882 during the last two years in the districts of Hazaribagh, Lohardaga, Manbhum and Singhbhum. There were no emigrants registered under the Act in the district of Palamau, where coolies are recruited under the free labour system from certain thanas for the tea districts of Jalpaiguri and Assam:—

District.	1896-97.	1897-98.
Hazaribagh	7,437	3,729
Lohardaga	5,701	9,488
Manbhum	9,429*	13,022*
Singhbhum	120	229
Total ...	22,690	26,468

* These figures are for the calendar year.

There has been a considerable increase in the number of registered emigrants in the districts of Lohardaga and Manbhum, which is principally due to the scarcity. In Lohardaga the increase is also due to the fact that two gentlemen who had hitherto despatched coolies without registration took out local agents' licenses towards the end of the year under report. The large decrease in the number of emigrants in Hazaribagh has not been explained by the district officer, but it is, I think, probably due to a larger number having been despatched under the free labour system of which no account has been furnished by the Deputy Commissioner. In Manbhum many of the registered emigrants came from other districts, especially from the Central Provinces. In this district 117 coolies withdrew their consent at the time of registration, and were repatriated at the cost of the contractors who brought them.

36. As noticed in last year's report, besides the emigrants registered under Act I of 1882, a large number of coolies are recruited every year under the free labour system. The exact number so recruited cannot be ascertained, as no records are available, but from returns obtained from the local contractors, it appears that 2,844 free emigrants were recruited in Hazaribagh, 1,859 in Lohardaga, 14,201 in Manbhum, and 381 in Singhbhum, making a total of 19,285 from these four districts, as compared with totals of 17,364 and 11,156 for the preceding and next preceding years respectively. The number of coolies recruited under this system from Palamau has not been furnished by the district officer. The figures for the district of Singhbhum relate only to those who passed through Chaibassa, as all emigrants from Dhalbhum and the portions of the district near the railway lines go direct to Purulia or Midnapore for registration.

37. It is also to be remembered that besides emigrants properly so called, a very considerable number of the population, especially from the district of Lohardaga, and consisting principally of Uraons, migrate after the winter rice harvest to the districts of Eastern Bengal to find employment on the roads, &c. Their number is reported to have been unusually large during the year under report owing to the scarcity.

38. The cooly depôts and rest-houses in the several districts of the Division are reported to have been duly inspected, and proper arrangements made to ensure the health and comforts of the emigrants. The general health of the coolies was good during the year, with the exception of a very severe outbreak of cholera in certain of the Manbhum depôts, in which there were 90 attacks with 71 deaths. The Government orders requiring one side of each enclosure to consist of an open iron or wooden railing have been complied with in each case.

39. In Hazaribagh only one emigrant was prosecuted under section 162 of Act I (B.C.) of 1882, but the case was compromised. There were three cases in which emigrants were the accusers. Two of these were under section 363, Indian Penal Code, and resulted in the conviction of two out of four accused. The third case was under sections 341 and 342, Indian Penal Code, against two accused, both of whom were convicted and sentenced to one month's rigorous imprisonment each.

40. In Lohardaga only one serious offence in connection with emigration was before the Courts, and is still under trial. In two cases the Deputy Commissioner has recommended the cancellation of agreement of two boys under section 11A of the Assam Labour and Emigration Act, but he now reports that in one of these his recommendation will have to be reconsidered, as later information shows it was not justified.

41. In Manbhum 58 cases in connection with emigration were reported during the year, of which 54 were brought to trial. Of these, 13 were against emigrants and 41 against recruiters and others. The cases against the emigrants were with the exception of one, which was under section 151, all under section 162 of Act I of 1882, and were all struck off. In the 41 cases against recruiters and others 81 persons were brought to trial, of whom 31 were convicted by the Magistrate, 13 committed to the Sessions, 27 acquitted, and 10 remained under trial at the close of the year. Of the persons committed 2 were convicted and 11 acquitted. In Singhbhum 17 cases, including 5 pending from the previous year, were before the Courts, of which 6 cases ended in conviction. In Palamau only two cases connected with emigration were instituted. One case with four accused ended in conviction and one case with two accused in acquittal.

* * * * * * *

Immigration.

44. There was no immigration worth the name into the districts of Hazaribagh, Lohardaga, Palamau and Singhbhum. In Manbhum the collieries in the Gobindpur subdivision attract, as reported in previous years, a large number of immigrants from Bihar and the North-Western Provinces, but statistics of their numbers are not available. The coal market having been very dull during the year, several collieries in this district remained closed, their coolies having to seek work elsewhere.

VII.—PRICES OF FOOD AND LABOUR.

45. Owing to the prevailing scarcity the prices of all kinds of food-grains ruled unprecedentedly high during the first-half of the year, and it was not till September and October, when the *bhadai* was harvested and the prospect of the winter rice assured, that prices began to fall; and by the close of the year the average price of common rice in the Division fell to between 12 and 13 seers per rupee, against about 9½ seers in the corresponding period of the preceding year. During the interval, however, several of the districts had gone through

	Srs.	Chs.
Hazaribagh	6	2
Lohardaga	5	6
Palamau	5	15
Manbhum	7	0
Singhbhum	7	0

a crisis, the average prices of common rice having risen in the different districts for a time (during July or August) to the rates shown in the margin. At the end of July in certain parts of the Lohardaga district the price of common rice rose to the phenomenally high rate of less than 4 seers per rupee.* The following table compares the average prices of wheat, common rice and gram in the several districts of the Division during the last fortnight of March in the past three years :—

* This, however, did not last long, as the importation of rice from Purulia under the bounty system brought down prices to 6 to 7 seers per rupee by the beginning of September.

Districts.	Wheat.			Common rice.			Gram.		
	March 1896.	March 1897.	March 1898.	March 1896.	March 1897.	March 1898.	March 1896.	March 1897.	March 1898.
1	2	3	4	5	6	7	8	9	10
	S. CH.	S. CH.	S. CH.	S. CH.	S. CH.	S. CH.	S. CH.	S. CH.	S. CH.
Hazaribagh	11 5	8 9	10 14	14 13	8 12	12 6	14 0	11 2	14 8
Lohardaga	11 8	8 8	8 0	14 0	8 4	12 0	13 8	9 8	9 8
Palamau	12 15	9 13½	14 1	14 10	8 2½	13 0	16 14	11 13	13 9
Manbhum	11 0	8 2	10 11	15 0	9 7	15 0	15 0	9 6	11 8
Singhbhum	13 0	9 12	8 0	16 8	12 14	12 0	12 0	11 0	8 2
Divisional average ...	12 0½	8 15	10 8	15 0	9 8	12 14	14 11	11 0	12 6

46. Wages of labour in the towns remained for the most part unchanged, but in the interior of the districts there was for a time a distinct fall, both in the rates for skilled and unskilled labour, owing to the general impoverishment of the agricultural classes. Expenses had to be cut down to a minimum, and both the village artizans and especially the field labourers were obliged to take work on practically starvation wages. In many of the lands where rice is usually transplanted, the crops, in order to save the cost of labour, were sown broadcast; and where this was not done the employers are reported to have endeavoured in many instances to put their labourers off with an anna a day in cash instead of the customary seer of rice. On the whole, I think that the rate of wages may be taken to have fallen during the period of scarcity by about 25 per cent.—a hardship which made itself exceptionally felt in the present instance, owing to the greatly increased cost of food. The persons amongst the menial classes who were probably the best off were the servants of Europeans and educated native gentlemen, who were, as a rule, allowed compensation by their masters on the principle adopted by the Government in the case of its own menial servants.

* * * * * * *

IX.—TRADE AND COMMERCE.

Trade routes.

58. The only part of the large area of 43,000 square miles comprised in the five British districts and nine Native States under this Commissionership which is served by the railway is its eastern extremity. There the Bengal-Nagpur Railway bisects the Manbhum district, passing through the civil station of Purulia and onwards through the Singhbhum district and the Native State of Gangpur, while branch lines from the Sitarampur and Modhupur junctions on the East Indian Railway tap the Gobindpur subdivision to the north of Manbhum and the Giridih subdivision in the extreme north-east corner of Hazaribagh. The rest of the above large area is completely isolated, the divisional head-quarters at Ranchi and the civil station at Hazaribagh being 75 and 73 miles distant from the railway (by metalled roads to Purulia and Giridih), while Daltonganj, the head-quarters of the Palamau district, is 100 miles (by unmetalled road) from the nearest railway station at Gaya. There are no navigable rivers or canals, though boats of a small size occasionally get up the Sone and Kool rivers as far as Daltonganj. But any trade by this means is of a very insignificant and uncertain character, being only possible at intervals, for a few days at a time, after heavy falls of rain.

59. The great inconvenience and danger of this state of general isolation were brought into prominent relief during the late famine, and, as noticed elsewhere in this report, it was found necessary for Government to come forward

and assist the trade by granting a bounty on imports of rice into the Palamau and Lohardaga districts, besides making large advances to keep the small local dealers of the former in funds. But notwithstanding the most strenuous efforts to stimulate supplies, the prices of food-grains throughout the greater portion of the Division continued, for months together, at higher rates than in any other part of India. Steps are now, however, I am glad to say, being taken to remedy this state of things. The project for a branch line to connect Daltonganj with the South Bihar Railway at Dehri (on the Sone Canal) has been sanctioned by the Government of India, and the work will be put in hand during the next cold weather; and a survey has just been completed under the auspices of the Bengal Nagpur Railway Company for a line to run east and west from the centre of the Division (at Ramgurh in the Damodar valley), crossing that Company's main line (on its way to Midnapore) between Purulia and Asansole, with a light feeder branch to Ranchi and Lohardaga opening out the Ranchi plateau. To accomplish the proper opening up of the Chota Nagpur Division and complete the through connection between the North-West Provinces and the south-eastern sea-board of Bengal, there will then only remain the link between Daltonganj and Ramgurh, the survey of which portion was made some years ago.

60. The principal internal trade routes of the Division are the metalled roads already mentioned between Ranchi and Hazaribagh to the railway stations at Purulia and Giridih respectively; the Grand Trunk Road, which runs through the Gobindpur subdivision of Manbhum and the Hazaribagh district; metalled roads between Ranchi and Hazaribagh (58 miles), from Ranchi to Lohardaga (47 miles) the principal mart on the Ranchi plateau, and in the Singhbhum district from Chaibassa to the Bengal-Nagpur Railway Station at Chakradharpur.16 miles; and unmetalled roads from the town of Lohardaga to the equally important mart, Chatra, in Hazaribagh, passing on northwards to the Grand Trunk Road and thus giving an exit into the Gaya district. Traffic by the above routes, excepting the last, is by bullock-carts, which are hired for the most part from Bihar and the Bardwan and Bankura districts. Along the last of the above routes goods are carried by pack-bullocks, as is the case with most of the interior trade of all the districts. Palamau is especially badly off in the matter of communications and carriage. There is no metalled road, and scarcely a bullock-cart in the district, practically the whole of the trade being carried on pack-bullocks.

Trade in food-grains.

61. As regards food-grains, it used formerly to be supposed that there was a balance of trade in favour of all the districts, Palamau only excepted. But as regards Hazaribagh, Manbhum and Singhbhum, the railway statistics, so far as they go, for they are only available for the last three or four years, seem to upset this theory. They show a ± balance for rice and all other food-grains in the case of these three districts, as noted on the margin. Lohardaga, however, is still known to be a somewhat heavily exporting district, numerous droves of pack-bullocks coming every year from Palamau, and also from Hazaribagh and even Gaya, to take away rice from the large marts of Lohardaga and Chainpur on the Ranchi plateau. Palamau, on the other hand, is considered by the Deputy Commissioner always to be a deficit district in the matter of food grains, drawing its requirements from Lohardaga and the neighbouring Tributary States. The latter source of supply was, however, closed to it during the late scarcity, as the several Chiefs passed orders (with my approval) at an early period of the distress forbidding the exportation of food-grains from the different States.

Years.	Hazaribagh.	Manbhum.	Singhbhum.
1	2	3	4
	Mds.	Mds.	Mds.
1894-95 ...	—1,22,976	—41,642	—38,994
1895-96 ...	—1,58,774	—1,96,275	—46,298
1896-97 ...	—2,32,991	—2,40,510	+72,180
1897-98 ...	—3,24,602	—3,38,395	—12,108

Trade in articles other than food-grains.

62. In regard to articles other than food-grains, the exports consist chiefly of coal, oilseeds, hides, timber, raw tusser, silk, tea and mica (from the mines in Manbhum and Hazaribagh), besides large quantities of *mahua*, lac and other jungle products, the imports being salt, piece-goods, tobacco, sugar, kerosine oil, and other ordinary commodities.

* * * * * * *

XVII.—CONDITION OF THE DIVISION AS REGARDS LAND AND LAND REVENUE ADMINISTRATION.

107. The demands and collections of land revenue in the several districts of the Division for the past two years are compared below :—

Districts.	Number of Estates.		Demands.						Collections.					
			1896-97.			1897-98.			1896-97.			1897-98.		
	1896-97.	1897-98.	Current.	Arrear.	Total.	Current.	Arrear.	Total.	Current.	Arrear.	Total.	Current.	Arrear.	
1	2	3	4	5	6	7	8	9	10	11	12	13	14	
			Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	
[illegible]ribagh ...	198	192	1,20,782	388	1,30,170	1,30,[illegible]3	2,714	1,32,797	1,27,052	280	1,27,432	1,28,295	2,653	1,[illegible]
[illegible]rdiaga ...	218	218	48,[illegible]48	3,051	51,697	48,[illegible]	5,914	54,279	44,061	1,348	45,409	44,295	3,081	[illegible]
Palamau	261	261	1,02,436	13,202	1,15,638	1,[illegible]3	34,492	1,36,895	68,183	13,903	81,002	68,841	29,827	[illegible]
Manbhum	20	29	82,462	...	82,462	82,[illegible]	...	82,462	82,462	...	82,462	79,939	...	[illegible]
Singhbhum	3	3	52,930	1,004	54,534	1,34,[illegible]	2	1,34,395	52,028	290	53,318	1,32,293	2	1,[illegible]
Total ...	709	703	4,16,156	18,245	4,34,401	4,97,[illegible]6	43,123	5,40,828	3,74,642	14,881	3,89,523	4,48,654	35,563	4,[illegible]

There was a decrease of six estates in Hazaribagh under class II, owing to their transfer to, and amalgamation with, estates under class III. Two of these were, under the orders of the Deputy Commissioner, brought under *khas* management on the cancellation of *ticca* leases, while the remaining four were transferred under the orders of the Board of Revenue.

108. The total current demand of revenue in the several districts, including the Chutia Nagpur Tributary States, was Rs. 4,97,706, against Rs. 4,16,156 in the previous year, showing a net increase of Rs. 81,550, due mainly to the resettlement of the Singhbhum Kolhan.

109. The current collections amounted to Rs. 4,48,654, against Rs. 3,74,642 in 1896-97, thus showing an increase of Rs. 74,012, which is almost commensurate with the increase in the year's demand, so that the percentage of current collections has remained almost the same as in the previous year, viz., at 90·14, against 90·02 in 1896-97. Taking the districts separately, it appears that the current collections have been satisfactory in Hazaribagh, Manbhum and Singhbhum, being respectively 98·6, 96·9 and 98·4 per cent., against 97·9, 100·0 and 99·9 in the previous year; fair in Lohardaga, being 91·5 per cent., against 90·7 in 1896-97; and bad in Palamau, being only 62·3 per cent., against 66·5 per cent. in the preceding year. This decrease in Palamau is mainly due to the poor collections in the Government khas mahals, and is attributed by the Deputy Commissioner, Mr. Renny, to the Government raiyats being hard pressed by the famine and unprecedentedly high prices of food-grains which prevailed up to September 1897. He adds that there is not the least doubt of the raiyats in Palamau, whether Government or zamindari, having been impoverished to a very great degree by the above causes, and that time is required to enable them to pull themselves together again. My own opinion is that Mr. Renny is much too ready to accept excuses in this matter, and that the Government raiyats in Palamau are quite as well off as in any of the other districts. The Deputy Commissioner hopes, however, to be able to materially reduce the outstanding balances as soon as the lac and other crops lately reaped reach

the market. The arrear demand for all the districts amounted to Rs. 43,122, out of which Rs. 35,563, or about 84·4 per cent., was collected.

Operations of the sale law.

110. The number of estates which became liable to sale during the year for non-payment of Government dues was five in Hazaribagh, of which one was exempted on payment of all the arrears due on issue of sale notice. The arrears of the remaining four estates were not paid, and consequently they were notified for sale on the 1st June 1898. In Palamau the provisions of the sale law were not applied to the newly-created estates, which are still being dealt with under the Public Demands Recovery Act. They will, however, be brought under the sale laws from the date of the next *kist*. Of the old estates in pargana Belonja, 13 fell into arrear, viz., 3 estates on the first, 3 on the second and 7 on the third *kist* day, but none were sold, as the amounts were paid on the day following the *kist* days. The amounts of arrears in all these cases were very small and below Rs. 50.

Road and public works cesses.

111. The following table shows the demands, collections, remissions and balances of road and public works cesses in the several districts of the Division:—

District.	Net demand after excluding reductions and remissions.			Collections (including advance collection).	Percentage of collection on current demand (columns 2 and 5).	Balances.	Percentage of balances on gross demand (columns 7 and 4).	Remissions.
	Arrear.	Current.	Total.					
1	2	3	4	5	6	7	8	9
	Rs.	Rs.	Rs.	Rs.		Rs.		Rs.
Hazaribagh ...	1,10,387	3,926	1,14,313	1,07,533	97·41	5,915	5·12	1,197
Lohardaga ...	94,529	22,551	1,17,079	1,03,858	109 87	13,221	11·29	8
Palamau ...	43,624	8,812	52,336	42,561	97·78	11,359	21 70	...
Manbhum ...	95,910	47,504	1,43,414	1,15,915	120·85	27,499	19 17	...
Singhbhum ...	16,245	12	16,258	16,258	100 07	Nil.	...	1
Total ...	3,60,595	82,805	4,43,400	3,86,125	107·08	57,394	13·07	1,206

In all the districts both the cesses were levied at the maximum rate allowed by law.

112. In Hazaribagh the current collections were above 90 per cent.; in Lohardaga they were above 80 per cent., but below 90; in Palamau and Manbhum they were below 80 per cent., but above 75 per cent. In Singhbhum alone the entire current demand was collected during the year.

113. The arrear demands in Lohardaga and Singhbhum were collected in full. In Hazaribagh 93·8 per cent. of the arrear demand was collected, while in Palamau and Manbhum the percentages were 99·6 and 89·4 respectively.

114. In Hazaribagh, out of the balance of Rs. 5,915, a sum of Rs. 3,051 has been realized since the close of the year, and the rest are in course of recovery under the certificate procedure.

In Lohardaga the entire balance has been realized since the close of the year. In Palamau the balance is on account of *kists* ending 20th October 1897, 28th January 1898, and 28th March 1898. For the arrears of the first two *kists* coercive measures have been taken, and for those of the March *kist* certificates will shortly be issued. Out of the outstanding balance, Rs. 2,543 are reported to have been realized since the close of the year. In Manbhum, out of the balance of Rs. 27,499, Rs. 15,358 were due from the encumbered estates. Certificates have been issued for the realization of the residue. There was no balance in Singhbhum at the end of the year.

Revaluation.

115. There was no regular revaluation in Hazaribagh, but there was an assessment for cess purposes of two revenue-paying estates and three rent-free tenures under the special sanction of the Board given under section 37 of the Cess Act. A general revaluation of the entire districts of Lohardaga and Palamau was sanctioned during the year, and in the former district the operations were commenced from the 4th December 1897. Some 5,582 notices were issued direct to the different tenure-holders without waiting for the return from the

Maharaja of Chutia Nagpur, whose estate comprises the entire district. No action could, however, be taken on the returns submitted by the tenure-holders pending the receipt of the Maharaja's return. In Palamau the revaluation Deputy Collector joined his appointment on the 18th February, and the work commenced from March. Beyond issuing notices on all revenue-free and revenue-paying estates, nothing further could be done within the year.

Public Demands Recovery Act.

116. The total number of certificates pending from the previous year was 475, and the number filed during the year was 2,277, making a total of 2,752 for disposal, of which 1,713 were disposed of, leaving 1,039 pending. Of the 1,039 pending cases, 50 were pending for more than six months and 991 for less than six months. The number of institutions has increased in the aggregate by 755. This increase is shared more or less by all the districts. In Hazaribagh the increase is attributed to the effects of the prevailing scarcity. In Lohardaga the increase is slight, and calls for no special explanation. In Palamau the increase is due to the fact of the Palamau Government estate having come under *khas* management, and to larger institutions in consequence of dák cess assessment in the district having been made on all estates, including those paying revenue at below Rs. 50 per annum. In Manbhum the increase is due to the fact that in the previous year certificates in cases of road cess below Rs. 5 were not issued, while they were issued during the year of report in respect of balances of both years. In Singhbhum the increase is mainly due to a large number of institutions by the Dhalbhum encumbered estate, against none in the year before. Under special orders of the Board this estate has been declared ripe for the application of the certificate procedure.

Land acquisition.

117. In Hazaribagh no fresh case was instituted during the year. In Lohardaga one case was pending at the close of the previous year, and one fresh case instituted during the year of report. Both these were disposed of during the year. In Palamau there was one case for the acquisition of land required for the out-houses of the Daltonganj charitable dispensary. It is still pending. In Manbhum there were three new cases and three old ones pending from the previous year. Out of these six cases, in four awards were made within the year and in one after its close. The other case, which is one of the three pending from 1896-97, is still in appeal in the Court of the Judicial Commissioner. Besides the six cases mentioned above, there were a number of small projects for the acquisition of lands for railway purposes, in 12 of which the proceedings were confirmed by the Board, in two final reports were submitted but not confirmed, while in five others the proceedings were finished, though the final reports remained to be submitted. Only six small projects were pending at the close of the year. In Singhbhum acquisition proceedings continued to be held in connection with the Sini-Midnapur-Calcutta Cuttack section of the Bengal-Nagpur Railway, and the total area acquired during the year was 1,256 acres, and there were altogether 66 cases for disposal in connection with the acquisition. The total area acquired during the two years 1896-97 and 1897-98 was 3,255 acres over a length of 64 miles, and the number of cases disposed of was 197. The work was undertaken in 1896-97 and lasted for about 20 months. The total expenditure incurred during the year was Rs. 1,30,569-7-3, out of which Rs. 1,13,681-6 were paid as compensation. The rate of compensation averaged about Rs. 35 per acre.

Survey.

118. No survey was undertaken during the year in any of the districts of the Division.

Settlements.

119. There was no regular settlement made during the year in the districts of Hazaribagh, Lohardaga, Palamau and Singhbhum. In Manbhum the proceedings in connection with the settlement of the Mahta and Koilapal estates were revised by the Settlement Officer, Babu Harbans Sahai, from the attestation stage. After reattestation the rate reports were submitted by him, and *jamabandies* published in August and September last. The Settlement Officer's proposal to fix the Government revenue at 50 instead of at 33 per cent. of the gross assessment as formerly has been approved by me, and orders have been issued to the Deputy Commissioner to offer the settlement to the proprietors on the above terms. In Palamau the settlement operations of the Palamau Government

estate were finally closed, and the final report on the settlement submitted during the year. The total cost of the settlement operations during the year amounted to Rs. 3,880. In Singhbhum the settlement of the Kolhan estate was completed during 1896-97, and the final report was submitted during the past year. The work of distributing copies of the record of rights and *pattas* and of taking *kabuliyats* still remains to be done.

* * * * * * *

XXIII.—RAILWAYS AND OTHER PUBLIC WORKS.

Railways.

163. The only railway line under construction during the past year was the Sini-Midnapore-Cuttack-Howrah extension of the Bengal-Nagpur Railway in Singhbhum, all earthwork and bridges in connection with which, except the one on the Subarnarekha, were completed during the year. The final survey of the Baroon-Daltonganj line in Palamau was taken in hand and completed during the year. It is understood that the earthwork on this line will commence during the approaching cold weather. The survey of the proposed line from Midnapore *viâ* Bankura to Jharia in Manbhum and thence to Ramgurh in Hazaribagh with a narrow-gauge branch line to Ranchi and Lohardaga was undertaken during the year by the Bengal-Nagpur Railway Company, and I understand that good progress has been made. A special report was submitted to Government on the latter portion of this project in this office No. 46M.R., dated 19th April 1898.

Works under the Public Works Department.

164. The Executive Engineer has forwarded me a list of some 43 works under this head which were carried out at a total cost of Rs. 36,270 during the past year. Of these the following may be mentioned:—

Work.	Cost.
	Rs.
Diversion of 47th mile of the Ranchi-Purulia road ...	7,928
Provision of water-supply to Central Jail, Hazaribagh	5,762
Construction of record-room, Deputy Commissioner's Court, Chaibassa	2,020
Iron latrines, Purulia, Hazaribagh, and Chaibassa Jails and at certain police-stations in Hazaribagh ...	3,990
Extension of European cemetery at Hazaribagh ...	546
Erecting stained glass window in St. Stephen's Church, Hazaribagh	179

The remaining items consist chiefly of repairs to Government buildings and the maintenance of Provincial roads and bridges.

Works of improvements in Government estates and estates under Government management.

165. Twenty-two *bandhs* or irrigation reservoirs and a well and 23 *dari* wells were constructed, repaired or improved in the Government estates of Hazaribagh at a total cost of Rs. 1,941. In the Dhanwar Court of Wards' estate in the same district the construction of 15 *bandhs* was also taken in hand, seven of which have been completed. Thirty-eight *dari* wells were also constructed, the total cost incurred in this estate in the construction of *bandhs* and wells amounting to Rs. 7,775. A sum of Rs. 2,220 was also spent by the encumbered estates of the district in the construction and improvement of 16 irrigation *bandhs*. In Lohardaga in the Government estates a sum of Rs. 3,147 was spent on works of miscellaneous sanitary and agricultural improvements.

In Palamau the total expenditure on miscellaneous, agricultural and sanitary improvements in the Palamau Government estate amounted to Rs. 4,028, out of which Rs. 1,633 were spent on works of irrigation, and Rs. 1,100 in sinking wells for the supply of drinking water.

In Manbhum a sum of Rs. 3,055 was spent from the funds of four wards' and encumbered estates in the construction and repairs of tanks and wells. In Singhbhum out of a sum of Rs. 6,000 allotted for miscellaneous improvements, &c., in Government estates, a sum of Rs. 431 was spent in the construction of a well in the Chaibassa mela hát, Rs. 2,741 in the construction and repairs of irrigation *bandhs*, and Rs. 1,991 in the repairs of roads and culverts in the Singhbhum Kolhan. The Dhalbhum encumbered estate expended a sum of

Rs. 2,108 in the construction of irrigation *bandhs* and wells and in repairing culverts and drains in the town of Ghatsila.

Famine and *quasi*-famine relief works (other than roads).

166. Besides the above works, very considerable improvements were effected in most of the districts in connection with water-supply and irrigation by means of the famine relief works undertaken by Government itself or by private landlords from funds advanced by Government under the "Special famine conditions." The following statement shows the expenditure incurred in the different districts in this manner:—

District.	Sums expended from Government funds on the construction or repairs of water-works (relief tanks, irrigation *bandhs* and wells).	Amounts advanced to zamindars in loans under the Land Improvements Loans Act (under famine conditions, or otherwise for construction or repairs of water-works, &c., &c.).	Total.
1	2	3	4
	Rs.	Rs	Rs.
Hazaribagh	1,202	9,776	10,978
Lohardaga	2,008	13,780	15,788
Palamau	31,739	32,024	63,763
Manbhum	19,899	33,147	53,046
Singhbhum	1,265	400	1,665
Total ...	56,113	89,127	1,45,240

Improvements in water-supply in Municipalities and by Road Cess Committees.

167. In addition to the works referred to above, the following improvements effected by various municipalities and Road Cess Committees may here be left on record.

In Hazaribagh the Road Cess Committee cleansed two old *dari* wells and constructed eight new ones, and the two municipalities of Hazaribagh and Chatra cleansed sixteen old wells, constructed six new ones, and cleansed and re-excavated two old tanks. In Lohardaga the Road Cess Committee re-excavated a tank, the Ranchi Municipality constructed some new wells and cleansed all the old tanks and wells, and the Lohardaga Municipality excavated two tanks, cleansed an old one and a well, and re-constructed the embankments of a large reservoir which forms the main water-supply of the town. In Manbhum the Purulia Municipality constructed a new well and cleansed and re-excavated a tank and constructed an irrigation *bandh*.

XXIV.—COMMUNICATIONS.

(*a*) Provincial roads.

168. As reported last year, the following roads are maintained by the Public Works Department:—

(1) The Grand Trunk Road.
(2) Giridih and Dumri Road.
(3) Hazaribagh and Bagodar Road.
(4) Hazaribagh and Ranchi Road.
(5) Hazaribagh and Barhi Road.
(6) Ranchi-Purulia Road.
(7) Ranchi-Chaibassa Road.
(8) Chord line between Aimandih and Churra in Manbhum.

Besides these, there are two other provincial roads, viz., the Chas-Goolboria and the Purulia-Burrakar roads, which have been placed under the supervision of the Manbhum District Road Committee, and for the maintenance of which a

yearly contribution is made from Provincial funds. All these roads are reported to have been maintained in fair order. An attempt was made during the past year to remove the large boulders from the crossings of the Burrakur and Damodar rivers on the Dumri-Giridih and the Hazaribagh-Ranchi roads, but the work seems to have not yet been completed. The surface of the stone causeway across the Burrakar and its ramps on both banks of the river have been considerably injured, while a portion of the causeway over the Damodar has been washed away, with the consequence that the inconvenience to wheeled conveyances in their passage over these two rivers has been much increased. I fear indeed that there will be no material improvement until both crossings are bridged. On the Ranchi-Purulia Road a diversion was made on the 47th mile from Purulia, avoiding two crossings of a stream. This has materially improved this road.

(5) District roads.

160. In Hazaribagh nothing was spent under the head of original works, but 815 miles of district and village roads were repaired and maintained in proper order at a total cost of Rs. 25,304. Mr. Herald, the Deputy Commissioner, states that most of the expenditure (Rs. 6,941) on village roads was incurred in the maintenance of the Giridih town roads. The question of extending the Bengal Municipal Act to this town is under discussion between myself and the Deputy Commissioner.

170. In Lohardaga no original works could be undertaken, as a sum of Rs. 7,000 had to be diverted from the allotment for such works to famine relief, but materials were collected for the construction of a masonry bridge over the river Sankh on the Ranchi-Lohardaga road at a total expenditure of Rs. 1,496. This road carries a fairly heavy cart traffic, so that it cannot be maintained in thorough order during the rains unless it is metalled. About 20 miles of it were regravelled during the past year. Besides this, about 825 miles of the district and village roads were improved and maintained at an aggregate cost of Rs. 31,445, which includes Rs. 10,101 spent on famine-relief test works. On four of the more important district roads 35 temporary bridges were renewed with dry rubble masonry abutments and wing-walls and salwood roadways, while on the Ranchi-Lohardaga road a culvert was reconstructed.

171. In Palamau three bridges and culverts were constructed at a total expenditure of Rs. 1,204, while 353 miles of the district and village roads were repaired and maintained at a cost of Rs. 7,894. The work on the second section of the Garhwa-Sirguja Road was unfortunately allowed to remain uncompleted, as the balance of the Government grant for its construction was diverted for expenditure on famine relief. The aggregate length of the roads undertaken as famine relief works was 80½ miles, out of which 42½ miles were new construction and 38 miles reconstruction of existing unraised district roads.

172. In Manbhum a sum of Rs. 2,112 was spent on original works, and a further sum of Rs. 20,226 on repairs and maintenance of nearly 421 miles of district and village roads. Part of the District Road funds ordinarily available here for repairs to roads had to be diverted for famine-relief operations, and the amount spent on them was consequently less than in previous years. It may, however, be noted that the relief works included roads of an aggregate length of 250 miles, of which those from the Anara Railway Station to Para, Chinpina to the Adra Railway Station, Nirsha and Kharkabad to the Kulabathan Railway Station, Katras and Bhalworun to the Katras Railway Station and Pokhuria to Gobindpur, aggregating a length of 29 miles, will prove useful feeder roads, while several others, when completed, will materially improve the internal communications of the district.

173. In Singhbhum nearly 413 miles of the district and village roads were improved and maintained at a total expenditure of Rs. 9,861, out of which Rs. 4,367 were spent on original works and Rs. 5,474 on repairs. A sum of Rs. 1,149 was also spent in this district within the Kolhan Government estate on road works out of the Government Estates Improvement Fund. The income of the District Road Cess Committee is very small, amounting to only Rs. 7,914, and hence an annual contribution of Rs. 10,000 is made out of Provincial revenues for the improvement of the communications in the district.

174. The following statement gives the particulars of road works executed by famine labour and the expenditure incurred thereon:—

District.	Number of roads.	Length in miles.		Amount spent.
		Repaired.	New construction.	
1	2	3	4	5
				Rs.
Hazaribagh ...	48	186	...	27,183
Lohardaga ...	31	Not given	...	11,566
Palamau ...	29	38	42½	20,818
Manbhum ...	38	93	157½	1,11,719
Singhbhum ...	2	Not given	...	357
Total ...	148	317	200	1,71,673

Arboriculture.

175. In Hazaribagh about 7,000 existing trees were maintained and 500 new trees planted along roadsides at a total cost of Rs. 1,186. The nursery attached to the Road Cess Office compound contains about 3,097 young plants of sorts. In Lohardaga 9,800 existing trees were maintained, and 350 new ones were planted along roadsides at a cost of Rs. 750. The District Road Committee also maintained three nurseries, viz., one at the head-quarters station, and the other two at two of the inspection bungalow compounds. In Palamau nothing was done beyond maintaining the existing trees along roadsides out of the provision for the repairs of the roads. In Manbhum 5,069 old trees and 2,064 new ones were maintained and planted out by the Public Works Department along the three provincial roads noted on the margin, while the District Road Committee spent Rs. 337 in the maintenance of existing trees along the sides of district roads and Rs. 2,024 along the provincial roads in their charge. Only 60 new trees were planted in this district along the sides of the district roads and 156 on the sides of the provincial roads. In Singhbhum Rs. 225 were spent on arboriculture.

Ranchi-Purulia Road, Aimandi-Churra Road, Grand Trunk Road (Kandra section).

176. I have lately called the attention of the Inspector of Works to the desirability of making much greater use of the mango-tree for roadside avenues than is now done. I find that many of the young trees, though interesting enough from a botanical point of view, belong to kinds which are otherwise of little or no use. Both as regards shade and a means of future income the mango-tree cannot well be improved upon.

* * * * * * *

XXX.—LOCAL SELF-GOVERNMENT INSTITUTIONS.

205. The local affairs of the division are managed by Municipal, Road Cess, and Education Committees at the head-quarters of each district, and there are in addition Municipal Committees at Chatra, Lohardaga, Jhalda and Raghunathpur and a Branch Road Cess Committee at Giridih in the Hazaribagh district. The elective system is in force in the municipalities of Hazaribagh, Chatra, Ranchi and Purulia. In the rest of the municipalities as well as in the case of the Road Cess and in Education Committees of all the districts the members are appointed by Government. The Chairmen of all the municipalities are also appointed by Government.

Municipal Committees.

206. The Hazaribagh Municipality is composed of fifteen members including the Chairman (the Deputy Commissioner). Of the total number of Commissioners, ten are non-officials and five officials. During the year under report 13 general meetings were held, at all of which a *quorum* was obtained, the percentage

of attendance being 53·3, against 41·3 in the previous year. In this as in all the other municipalities in this Division the form of assessment is a tax upon persons according to their circumstances under section 85(*a*). The total income of the municipality including the opening balance was Rs. 9,187, against Rs. 11,359 in the preceding year, the decrease being due to the prevailing scarcity. The total expenditure amounted to Rs. 8,502, of which Rs. 3,027 were spent on conservancy and Rs. 897 on works of improvement, against Rs. 2,888 and Rs. 2,226 respectively in the previous year. The town of Hazaribagh was kept throughout the year in a satisfactory sanitary condition.

207. The Chatra Municipal Board consists of fifteen members, excluding the Chairman, of whom ten should be elected by the rate-payers and five appointed by Government. But at the general election which was held during the course of the year, the rate-payers elected only six of the Municipal Commissioners, the number appointed by Government being therefore nine. During the year under report 16 meetings were held, at 13 of which there was a *quorum*, the percentage of attendance being 46·8, against 43·1 in the previous year. The total income of the year including the opening balance amounted to Rs. 5,871, against Rs. 5,571, and the total expenditure to Rs. 5,791, against Rs. 5,033 in the previous year, of which Rs. 1,390 were spent on conservancy and Rs. 1,124 on works of improvement, against Rs. 1,248 and Rs. 412 respectively in the preceding year. The affairs of this municipality, especially as regards sanitation, were much mismanaged during the time of the late Committee as noticed in last year's report, but much improvement is expected by the Deputy Commissioner in these respects under the new *regime*.

208. In the Ranchi Municipality excluding the Chairman (the Deputy Commissioner) there are fifteen Municipal Commissioners, of whom ten are elected and five appointed. The Commissioners held ten meetings during the year, the percentage of attendance being 56·0, against 48·7 in the preceding year. Much good work was done during the year, the Commissioners being reported to take much interest in the welfare of the town.

209. The Lohardaga Municipal Board is composed of 11 members including the Chairman, all of whom are appointed by Government. There were 29 meetings during the year with a percentage of attendance of 60·9. In this municipality a regrettable disagreement occurred between the Chairman and the Vice-Chairman, which resulted in the latter absenting himself from meetings and finally resigning his post. The municipality is practically managed by the Chairman, the Munsif-Deputy-Magistrate, and appears, on the whole, to be worked efficiently.

210. The Daltonganj Municipality consists of nine members excluding the Chairman (the Deputy Commissioner), all appointed by Government. Ten meetings were held during the year with a percentage of attendance of 55·0. The total income including the balance of the previous year amounted to Rs. 6,771, and the total expenditure to Rs. 4,616, leaving a balance of Rs. 2,155 at the close of the year.

211. The Purulia Municipality consisted of 18 Commissioners excluding the Chairman, of whom 12 are elected and 6 appointed. Of the total number of Commissioners 14 are non officials and five officials. A general election was held on the 3rd April 1897, at which eight of the old Commissioners were re-elected, and four were newly elected. The number of meetings held was 15, the percentage of attendance being only 42·1. The reports of the Officiating Deputy Commissioner and of the Civil Medical Officer regarding the sanitary condition of the town are not so satisfactory as I could wish, and the necessity of various improvements in this regard have lately been pressed upon the Municipal Commissioners.

212. In the Jhalda Municipality there are nine Municipal Commissioners including the Chairman, all of whom are appointed by Government. Ten meetings were held during the year, the percentage of attendance being 48·0. The municipality spent about Rs. 180 on works of sanitary improvements. The

Chairman, Babu Srikanta Roy, who is the Rural Sub-Registrar, is reported to have attended properly to his duties.

213. The Raghunathpur Municipality is composed of nine Commissioners excluding the Chairman, all of whom are appointed by Government. In the last reorganization of the Committee, six of the old Commissioners were reappointed, three being newly appointed. The Commissioners held 15 meetings during the year, the percentage of attendance being 57·0. The amount spent on sanitary improvements during the year was Rs. 95. The Vice-Chairman, a local pleader, is reported to have performed his duties satisfactorily.

214. The Chaibassa Municipality consists of 12 Commissioners excluding the Chairman (the Deputy Commissioner), all of whom are appointed by Government. The municipality held 14 meetings during the year, the percentage of attendance being 56·5. The total income including the opening balance amounted to Rs. 7,325, and the total expenditure to Rs. 5,665, leaving a balance of Rs. 1,660 at the close of the year. The town of Chaibassa is in a progressive state as evidenced by the increased tendency to rebuild existing houses as well as by the number of applications received for new building sites.

215. None of the municipalities were inspected by either the Deputy Sanitary Commissioner or the Sanitary Commissioner during the year.

District Road Cess Committees.

216. There was no change in the *personnel* of the District Road Cess Committee of Hazaribagh during the year. Only four meetings were held, the average attendance being 9·2, against 12·4 in the previous year. The Deputy Commissioner attributes the indifferent attendance partly to the distance at which several of the members reside from head-quarters, and partly to the want of interest taken by those living at head-quarters in the affairs of the interior. This cannot, in the present backward state of education, be remedied, but the disadvantage is in effect more apparent than real, the executive responsibility resting with the Chairman and other Government officers who are well acquainted with the district requirements. This remark applies, with greater or less force, to all the districts of this Division. During the year under report the Committee transferred Rs. 37,000 from their own to the Provincial funds for the purpose of famine relief, the few number of meetings held being due, as in the case of Lohardaga, to this fact.

217. The District Road Cess Committee of Lohardaga held only three meetings during the year, against ten in 1896-97, the average attendance being 6·0, against 5·0 in the previous year. The falling off in the number of meetings is explained by the Deputy Commissioner to be due to the fact that the whole of the available funds of the Committee were diverted for famine relief and test works under the Deputy Commissioner's direct control. There thus remained practically nothing for the members of the Committee to do excepting for those of them who were specially employed on famine duties.

218. The District Road Cess Committee of Palamau held eight meetings during the year under report with an average attendance of 4·6.

219. The District Road Cess Committee of Manbhum held 13 meetings during the year with an average attendance of 5·3.

220. The District Road Cess Committee of Singhbhum held five meetings during the year under report, the average attendance of members at each meeting being 5·8.

District Education Committees.

221. The District Education Committee of Hazaribagh held two meetings during the year with an average attendance of 6·0. The Education Committee of Lohardaga held only one meeting attended by 8 out of 22 of its members. The District Education Committees of Palamau and Manbhum held no meetings during the year under report, while the Singhbhum Education Committee held two meetings attended by 8 out of 15 of its members.

222. The different Local Committees, both Road Cess and Municipal, have, on the whole, worked well during the past year. The Municipal Commissioners have shown themselves ready to accept the advice given from time to time by this office in regard to their budget requirements, and on general questions of sanitation, assessments and other matters; and they have given their respective Chairmen ready support in taking such initial measures as were considered necessary to guard against the introduction of the plague, and especially against the occurrence of any foolish or unreasonable scare. The usefulness of the Road Cess Committees is much circumscribed by the narrow limits within which their action is confined by the existing Act; and I have no doubt, after a year's further experience, regarding the advisability of extending the provisions of the Local Self-Government Act, *minus the elective system*, to this Division. Proposals to this effect have been submitted to Government in this office No. 291T.J., dated 9th December 1897, and the matter need not further be noticed here.

WEATHER AND CROP REPORT.

For the week ending the 12th December 1898.

Burdwan.—No rain. Weather seasonable. Harvesting of *aman* paddy continues. Cold-weather crops doing well. A few cases of cattle-disease reported. Fodder and water sufficient. Common rice selling as follows:—

	Srs.	
Sadar	14 to 17	per rupee.
Kalna	14½ „ 15	
Katwa	17	
Raniganj	16	

Birbhum.—No rain. Weather seasonable. Harvesting of *aman* continues vigorously. Price of common rice at Sadar 18 seers, and at Rampur Hát 17½ seers per rupee. Fodder sufficient.

Bankura.—No rain. Weather seasonable. Harvesting of *aman* rapidly going on. *Rabi* crops thriving. Fodder and water sufficient. No cattle-disease reported. Rice is selling at 19½ seers per rupee at Sadar and 16½ seers at Vishnupur.

Midnapore.—No rain. Harvesting of *aman* going on. Prospects of standing crops very good. Common rice sells as follows:—

	Srs.	
Sadar	15 to 18	per rupee.
Contai	16	
Tamluk...	13 to 16	
Ghatal	14 to 16	

Hooghly.—No rain. Reaping of winter rice crop going on Prospects of *rabi* crops good. Cattle-disease prevails in some parts. Common rice sells from 12 to 14 seers per rupee.

Howrah.—Rainfall nil. Weather seasonable. Harvesting of *aman* continues. Out-turn favourable. Sowing of *rabi* going on. Fodder and water sufficient. Common rice sells at 12 to 14 seers per rupee.

24-Parganas.—Rainfall nil. Weather seasonable. Prospects of standing crops good. Harvesting of *aman* paddy going on. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	Srs.	
Sadar	12½	to 13½	per rupee.
Barasat	17		
Basirhat	15⅝		
Diamond Harbour	16		

Nadia.—No rain. Weather fine and cool. Sowing of *rabi* crops almost finished. Harvesting of *aman* going on. Prospects of standing crops good. Common rice selling at 11 to 17 seers per rupee. Fodder and water sufficient. No cattle-disease reported.

Murshidabad.—No rain. Weather seasonable. Harvesting of *aman* still going on. State of *kalai*, *rabi*, indigo and mulberry good. Fodder and water sufficient. No cattle-disease reported. Common rice sells as follows:—

	Srs.	
Sadar	18	per rupee.
Kandi	19	
Jangipur	20	

Jessore.—Rainfall nil. Weather seasonable. Prospects of standing crops good. *Aman* paddy is being harvested. Sowing of indigo over. No cattle-disease reported. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	16 to 20	per rupee.
Jhenida	18 „ 20	
Magura	18 „ 22	
Narail	19	
Bangaon	20	

Khulna.—Rainfall nil. Weather seasonable. *Aman* is being harvested. Sowing of winter crops continues. Prospects good. Fodder and water sufficient. Common rice sells as follows :—

	Srs.	
Sadar	19 to 22	per rupee.
Bagerhat	19	
Satkhira	16 and 20 (new *aus*).	

Rajshahi.—No rain. Prospects of standing crops good. Harvesting of winter paddy progressing. Sowing of *rabi* crops continues. No cattle-disease. Fodder and water plentiful. Common rice sells from 16 to 28 seers per rupee.

Dinajpur.—No rain. Weather fine and cool. Harvesting of *haimanti* paddy continues. *Rabi* crops good. No cattle-disease. Fodder and water plentiful. Rice 17 to 18 seers a rupee.

Jalpaiguri.—Rainfall nil. Weather seasonable. Harvesting of *aman* paddy going on. Transplantation of tobacco and cultivation of *rabi* crops finished. Fodder and water sufficient. Common rice sells from 8 to 20 seers a rupee.

Darjeeling.—No rain. Weather seasonable. Hills—*Haimanti* paddy, *bara marua* and *kalai* being harvested; wheat, barley, *phaphar*, and *tori* progressing. Terai—*Haimanti* paddy being harvested; mustard, potatoes, and *kalai* progressing. Sugarcane being cut. Coarse rice sells as follows :—

	Srs.	
Hills	11 to 12	per rupee.
Terai	14 to 19	

Bhutta sells at Darjeeling 25 seers and at Poolbazar 40 seers per rupee.

Rangpur.—No rain. Weather fine and cool. Transplantation of tobacco and reaping of winter rice going on. *Rabi* crops being sown in places. Prospects good. Common rice (new) selling at 14 to 20 seers per rupee. Fodder and water sufficient.

Bogra.—No rain. Harvesting of *aman* in progress. *Rabi* crops doing well. Common rice sells from 17½ to 23½ seers a rupee. Fodder and water sufficient.

Pabna.—Rainfall nil. Weather seasonable. Winter crops good. Price of rice 14 to 20 seers per rupee.

Dacca.—Rainfall nil. Weather seasonable. Prospects of standing crops favourable. Fodder available. No cattle-disease. Common rice 14 to 19 seers per rupee.

Mymensingh.—No rain. *Aman* continues to be harvested and promises to be a bumper crop. Cultivation of *rabi* crops going on. Rice sells from 16 to 21 seers per rupee. No cattle-disease reported. Water and fodder available.

Faridpur.—No rain. Weather seasonable. Prospects of crops good. Rice 20 seers a rupee.

Backergunge.—Rainfall nil. Weather fine. Prospects of crops good. Common rice sells from 12 to 19 seers (old *aman*), and from 13 to 22 seers (new *aman*) per rupee.

Tippera.—No rain. Harvesting of *aman* continues. *Rabi* being sown. Prospects good. Rice 15 to 26 seers per rupee.

Noakhali.—No rain. Crops good except in Hatia and Sandip. Cultivation of land for *rabi* crops continues. No cattle-disease. Fodder good except in Lakhmipur. Water good. Price of rice stationary.

Chittagong.—Rainfall nil. Weather seasonable. Reaping of *aman* continues. *Rabi* crop is being sown. Prices stationary. Water and fodder sufficient.

Patna.—No rain. *Rabi* sowing completed. Harvesting of paddy and sowing of poppy in progress. Prospects favourable. Prices almost stationary. Common rice in Patna sells at 22 seers per rupee. Fodder and water for cattle sufficient.

Gaya.—No rain. Harvesting of paddy continues. Prospects of *rabi* and poppy good. Common rice selling at 20 seers per rupee.

Shahabad.—No rain. Weather cold. Paddy harvesting continues. Standing crops good. Poppy germination satisfactory. Rice sells at Arrah 15 seers per rupee. Fodder and water for cattle sufficient.

Saran.—No rain. Weather seasonable. Paddy cutting going on. Prospects of *rabi* and poppy good. Average price of common rice 17½ seers and of *makai* 28½ seers per rupee.

Champaran.—No rain. Winter rice harvest progressing. Prospects of *rabi* and poppy favourable. Common rice sells at 16¼ seers and maize at 25 seers per rupee.

Muzaffarpur.—Rainfall nil. Winter rice being harvested. *Rabi* crops promising well. Prospects good. No cattle-disease. Prices are—Common rice 12 to 17 seers, wheat 15 to 18 seers, barley 30 to 35 seers, gram 20 to 25 seers, rahar 22½ seers, maize 25 to 35 seers, and *marua* 27½ seers per rupee.

Darbhanga.—No rain. Paddy is being harvested and threshing going on. *Rabi* shows good prospects. Weather continues favourable for poppy; the seed has germinated satisfactorily. Weeding and irrigation commenced. Fodder sufficient. Ordinary rice sells at Sadar 16 seers per rupee.

Monghyr.—No rain. Weather cold with westerly wind. Harvesting of winter paddy going on. *Rabi* sowings in progress. Young plants coming up well. Sugarcane pressing continues. Opium prospects hopeful and young plants thriving well. No cattle-disease. Common rice sells as follows:—

	Srs.	
Monghyr	14	per rupee.
Begusarai	13 to 15	
Jamui	21 (new)	

Bhagalpur.—Rainfall nil. Weather seasonable. Harvesting of winter rice continues. *Rabi* crops doing well. No cattle-disease reported. Fodder and water sufficient. Prices stationary.

Purnea.—No rain. Weather seasonable. Harvesting of winter rice in progress. *Rabi* crops doing well. Tobacco plants are being transplanted. Cattle-disease reported from both subdivisions. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	20	per rupee.
Kishanganj	20	
Araria	21	

Malda.—No rain. Weather seasonable. Harvesting of winter paddy in full swing. *Rabi* crops growing well. Ordinary rice (*bhadoi*) selling at 20 seers per rupee at English Bazar. Fodder sufficient.

Sonthal Parganas.—Rainfall nil. Weather seasonably cold. Reaping of paddy in full progress; outturn good. *Rabi* crops doing well. Fodder sufficient. Price of rice varies from 18 to 24 seers, and of maize from 35 to 40 seers per rupee.

Cuttack.—Rainfall nil. Weather warm. *Laghu sarad* being harvested. *Guru sarad* maturing and in places being cut. *Biri, kal'hi*, and *arhar* are in flower and pod. Sugarcane being harvested. Tobacco being planted. Condition of cattle generally good. Fodder and water sufficient. Common rice sells as follows:—

	S.	ch.	
Cuttack	18	6	per rupee.
Jajpur	19	11	
Kendrapara	21	0	
Banki	22	14	

Balasore.—Rainfall nil. Harvesting of *sarad* and *beali* continues. Sugarcane being pressed. *Dalua* being sown. *Rabi* crops in flower. Cattle-disease reported from Basudevpur circle. Rice sells from 17 to 24 seers per rupee in the interior, and at 18 and 21 seers per rupee at Balasore and Bhadrak respectively. Fodder and water sufficient.

Angul.—No rain. Prospects of *rabi* and oil-seed crops good. Fodder and water sufficient. No cattle-disease. Common rice selling at 26 seers per rupee in Angul and 19 seers in Khondmals.

Puri.—No rain. *Sarad* being cut. *Dalua* being sown. *Kulthi* and *arhar* growing well. Sugarcane is being pressed. Fodder and water sufficient. Cattle-disease continues in some parts. Price of common rice (new) almost stationary.

Hazaribagh.—Rainfall nil. Weather seasonable. Harvesting of rice finished. Prospects of *rabi* crops excellent. Poppy sowings completed and seedlings are healthy. Common rice selling at 14 to 21 seers per rupee.

Lohardaga.—No rain. Paddy harvesting continues. State of standing crops good. Rice sells at Ranchi 19 seers per rupee, and in the interior from 19 to 22 seers per rupee. No report of cattle-disease. Fodder and water sufficient. Grain in stock sufficient.

Palamau.—No rain. Weather seasonable. Paddy harvesting about finished. *Rabi* crops want rain. Fodder and water sufficient. Rice sells from 15 to 24 seers per rupee.

Manbhum.—Rainfall nil. Weather seasonable. Prospects of crops on the ground are good. Most of the paddy has been cut. Cattle-disease reported from thana Purulia. Fodder and water sufficient. Average price of common rice at Sadar 21 seers 10 chitaks and at Gobindpur 20 seers per rupee. Supply sufficient.

Singbhum.—Rainfall nil. Prospects of crops good. Rice selling at 20 to 24 seers per rupee. Cattle-disease reported from Chakradharpur.

General Summary.—There was no rain during the week. The harvesting of the winter rice crop is being pushed on rapidly everywhere, and a good outturn is generally expected. The young *rabi* crops are doing well. Reports of the poppy crop in Bihar and Hazaribagh are good. Tobacco is promising. The pressing of sugarcane is proceeding in some districts. No important change in the price of common rice has been reported since last week. There was some cattle-disease in Hooghly, Purnea, Balasore, Puri, Manbhum, and Singhbhum. The fodder-supply is reported sufficient everywhere except in a part of Noakhali.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT,
The 13th December 1898.

F. A. SLACK,
Offg. Secretary to the Govt. of Bengal.

STOCKS OF RICE IN AND AROUND CALCUTTA.

No. 844Statis.—The following is published for general information.

F. A. SLACK,
Offg. Secy. to the Govt. of Bengal.

Statement showing the Stocks of Rice in and around Calcutta during December 1898.

STATISTICAL DEPARTMENT,
the 13th December 1898.

F. A. SLACK.
Offg. Secretary to the Government of Bengal.

Abstract of the Results of Meteorological Observations taken at the Alipore Observatory in the month of November 1898.

	Inches.	Date.	Hour.
The mean pressure of the month	29·930		
The average pressure of November from 24 years' registers ...	29·970		
The highest pressure in the month	30·131	30th	10
The lowest pressure in the month	29·756	13th	16
The range of pressure	0·375		
	Hours.		
The total number of hours of bright sunshine during the month	238·7		
The maximum possible number of hours of sunshine ...	330·8		
	⊖		
The mean temperature of the month	72·2		
The average temperature of November from 24 years' registers	74·8		
The highest temperature in the month	85·7	9th	
The lowest temperature in the month	57·7	16th	
The range of temperature during the month	28·0		
The mean daily range of temperature	18·4		
The greatest range of temperature in one day	23·1	15th	
	Per cent.		
The mean humidity of the month	77		
The average humidity of November from 24 years' registers ...	72		
	Inches.		
The mean vapour tension of the month	0·595		
The average vapour tension of November from 9 years' registers	0·616		
The mean cloud proportion of the month	1·71		
The average cloud proportion of November from 21 years' registers	2·39		
	Ins.		
The total rainfall of the month	Nil		
The total rainfall indicated by a Beckley's self-registering rain-gauge (mouth of the gauge about 52 feet above the ground)	Nil		
The average fall of November from 48 years' registers ...	0·65		
The greatest fall in 24 hours	Nil		
	Days.		
The number of rainy days in the month	Nil		
The average number of rainy days in November from 24 years' registers	2		
The mean maximum equilibrium temperature of solar radiation during the month	⊖ 135·5		
The mean difference of sun and air temperatures	53·5		
The greatest sun temperature	143·3	6th	
The greatest excess of sun over air temperature	61·2	13th	
The mean temperature of the nocturnal radiation thermometer on woollen cloth	56·5		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground	7·3		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature	10·0	14	
	Miles.		
The mean movement of the wind per day	48·7		
The greatest movement of the wind in one day	86·0	7th	
The greatest movement of the wind in one hour	9·0	28th noon to 1 P.M., and 30th, 10 to 11 A.M., and 11 to noon.	

The number of hours with winds from each of the 8 points—
N. 319, N.E. 36, E. 22, S.E. 25, S. 0, S.W. 8, W. 72, N.W. 117, Calm 121.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore ·003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 1·6 lower; and, finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0·6 higher than the Kew Standard thermometer, which is the standard of reference at the present Observatory.

G. W. KUCHLER,

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF NOVEMBER 1898.

THE most noticeable feature of the weather in November was the almost entire absence of rainfall in all parts of the Province. Fine settled weather of the cold-weather type usual in that month prevailed, both inland and over the north of the Bay; while the area of disturbance appears to have been displaced more to the south than in normal years. This apparent displacement may be partly due to there having been no reports from Diamond Island, the only Burma station which gives a reliable indication of the state of the weather in the south-east of the Bay. In consequence cyclonic disturbances were not shown till the central area of the depression was close to the Madras coast.

Only two such disturbances occurred, one, in the first week, of moderate severity, and the other at the end of the month of only slight intensity. They both passed westward across the extreme south of the Peninsula, without showing any sign of recurving.

After the first of these disturbances heavy rainfall continued for some time on the Madras coast and extended northwards over the Circars. It just reached the south of Orissa, the only rainfall reported being ·53 inch at Puri on the 9th.

Unsettled weather during November in the north of the Bay and in Bengal is invariably due to the recurving of disturbances which have formed in the south, and the uniformly settled weather throughout the month just past was due to the fact that the two depressions mentioned above followed a straight path across the south of the Peninsula.

At the beginning of the month a fairly normal distribution of pressure prevailed, with some excess at all except the extreme southern stations. Winds were generally northerly and temperature low at inland stations. Over the Bay weather was settled except in the south-west, where well-defined north-east monsoon conditions obtained. A depression had probably by that time formed towards the centre of the southern sea area, and was moving westward or north-westward towards the Madras Coast. The pressure gradient increased steadily, with stronger winds and rough sea till the morning of the 6th when the centre of the disturbance crossed the Coast near Madras moving in a north-westerly direction. The stormy weather caused by the depression extended as far north as Vizagapatam, and after it ceased general rain continued on the Madras Coast.

Meanwhile the changes over Bengal and the north of the Bay were of small importance. All the meteorological elements were normal except temperature in which there was a small to moderate defect. By the 6th it had largely disappeared, and was followed by a period of comparatively warm weather which continued till near the middle of the month.

On the 12th a shallow depression was approaching the province from the west. Pressure, however, was at the same time low over the Bay, especially in the south-east, so that, though readings were nearly ·2 inch below the normal in Bengal, the effect of the disturbance on the general weather conditions was of the slightest. The sky remained cloudless or lightly clouded, and no rain fell. From the 14th to the 20th there was a slow but steady recovery of pressure, and the distribution was on the latter date practically normal.

The small oscillations characteristic of settled weather obtained till the end of the month in both pressure and temperature, each of which showed a small but increasing excess in Bengal and the north of the Bay.

Weather was somewhat unsettled in the south-west of the Bay for a few days at the end of the month, and on the 29th a shallow depression was close to the Madras Coast Pressure was falling moderately, but the difference from the normal was small at all the Coast stations. By the morning of the 30th the area of lowest pressure was inland, and winds at all the Madras Coast stations were easterly. Pressure had recovered and the weather was rapidly becoming more settled.

Pressure.—Changes have never been large, either in Bengal or over the Bay throughout the month, and there has rarely been any but a small difference from the normal. The most rapid fall occurred on the Madras Coast on the 5th and 6th when the depression was moving towards that part of the Coast, and the greatest defect there was ·3 inch. In Bengal the greatest defect was ·17 inch in the west of Bihar on the 14th. At other times the difference from the normal was generally less than ·05 inch. The average difference for the whole month was defect of ·02 inch.

Temperature was generally above the normal by small amounts. For a few days at the beginning of the month and again towards the middle cool weather prevailed over the greater part of the province with a maximum defect of 3° to 4°; but as these periods were of short duration, the means for the month are not affected to any great extent by the comparatively low temperature then obtaining. Maximum temperature on an average for the month is above the normal, except in the extreme north, by amounts varying from a small fraction of a degree in the east and north to more than 2° in Chota Nagpur. The difference in night readings varies from a small defect in the south to a small excess in the north. The mean difference is small over the greater part of the province.

The average excess in Chota Nagpur is about 1°, in Bihar and Orissa half a degree, and in the other divisions less than half a degree.

Rainfall was almost entirely absent. A few showers fell in North Bengal and in Orissa, giving an average of only ·07 inch in the former and ·03 inch in the latter. In other divisions the fall was *nil*.

The following table gives in a condensed form the rainfall information for each of the six large meteorological divisions of Bengal for the present year up to the close of November. The numbers there given, as in the case of the former months of the year, are the actual average rainfalls in each division, expressed as a percentage of the normal fall for the period, and the last column also gives the total rainfall up to the close of November, expressed in the same way:—

Meteorological Divisions.	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	Actual rainfall of first eleven months of 1898 expressed as a percentage of the normal fall for the period.

	Inches.
The mean pressure of the seven days	29·994
The average pressure of the corresponding period for 24 years, Surveyor-General's Office	30 022
	Hours.
The total number of hours of bright sunshine	60·7
The maximum possible number of hours of sunshine	75·4
	°
The mean temperature of the seven days	66·4
The average temperature of the corresponding period for 24 years, Surveyor-General's Office	69·2
The extreme variation of temperature	28·6
The maximum temperature	80·0
	Miles.
The highest velocity of the wind in one hour	10
	%
The mean relative humidity	75
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	71
	Inches.
The total fall of rain from 4th to 10th December 1898	Nil
The average fall of the corresponding period for 24 years, Surveyor-General's Office	Nil
The total fall from 1st January to 10th December 1898	59·52
The average fall of the corresponding period for 24 years, Surveyor-General's Office	65·19

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

d, dew.

METEOROLOGICAL OFFICE, GOVT. OF INDIA,
Calcutta, the 12th December 1898.

G. W. KÜCHLER,
For Meteorological Reporter to the Govt. of India.

Results of the Barometrical and Thermometrical Observations taken at the Meteorological Office, Chowringhee, from 4th to 10th December 1898.

Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal, assembled under the provisions of the Indian Councils Acts, 1861 and 1892.

THE Council met at the Council Chamber on Saturday, the 17th December, 1898.

Present:

The Hon'ble SIR JOHN WOODBURN, K.C.S.I., Lieutenant-Governor of Bengal, *presiding.*
The Hon'ble SIR CHARLES PAUL, K.C.I.E., Advocate-General of Bengal.
The Hon'ble RAI DURGA GATI BANERJEA, BAHADUR, C.I.E.
The Hon'ble NAWAB BAHADUR SYUD AMEER HOSSEIN, C.I.E.
The Hon'ble W. B. OLDHAM, C.I.E.
The Hon'ble R. B. BUCKLEY.
The Hon'ble C. W. BOLTON, C.S.I.
The Hon'ble E. N. BAKER.
The Hon'ble SAHIBZADA MAHOMED BAKHTYAR SHAH, C.I.E.
The Hon'ble M. C. TURNER.
The Hon'ble NORENDRA NATH SEN.
The Hon'ble SALIGRAM SINGH.
The Hon'ble KALI CHARAN BANERJEE.
The Hon'ble SURENDRANATH BANERJEE.
The Hon'ble JATRA MOHAN SEN.
The Hon'ble T. W. SPINK.
The Hon'ble RAJA SHASHI SHAKHARESWAR ROY BAHADUR, of Tahirpur.

The Hon'ble THE PRESIDENT said:—"Gentlemen of the Council, as I arrived at the Council Chamber this morning I received the grievous news of the death of our eminent colleague the Maharajah of Darbhanga last night. His death has created a great loss to the country and to the Government, and I feel sure that the sense of the Council will be with me when I propose out of respect to his memory that the Council be adjourned. If that is the sense of the Council we shall meet again on Wednesday next, the 21st instant."

The Council was adjourned to Wednesday the 21st instant.

CALCUTTA;
The 20th December, 1898.

F. G. WIGLEY,
Offg. Asst. Secy. to the Govt. of Bengal,
Legislative Department.

RESOLUTION ON THE REPORT ON PUBLIC INSTRUCTION IN BENGAL FOR THE YEAR 1897-98.

GENERAL DEPARTMENT—EDUCATION.

Calcutta, the 16th December 1898.

RESOLUTION—No. 3747.

READ—

The Report on Public Instruction in Bengal for the year 1897-98.

Dr. C. A. Martin was in charge of the Education Department as Director of Public Instruction throughout the year, and has submitted the report with most commendable punctuality. In accordance with the orders of Government, that details should be entered into only in alternate years, Dr. Martin has, in the report under review, discussed certain matters at some length, but at the same time conciseness has not been lost sight of. He has, however, introduced into the body of the report and solicited the orders of Government on other matters involving changes of considerable administrative importance which should have formed the subject of separate references.

2. *Number under instruction.*—The following table shows the number of schools and colleges in Bengal, and the number of pupils in them, at the end of the years 1896-97 and 1897-98:—

Class of Institution.	1896-97.		1897-98.	
	Schools.	Pupils.	Schools.	Pupils.
1	2	3	4	5
PUBLIC INSTITUTIONS—				
University ... ... Arts Colleges	33	6,384	33	6,440
Secondary ... ... High English schools ..	393	53,040	400	56,069
Middle English schools	942	69,658	948	73,462
Do. vernacular schools ..	1,140	65,441	1,129	65,370
Primary .. .. Upper primary schools	4,038	102,371	4,113	105,192
Lower ditto	45,812	1,081,432	43,882	1,050,635
Special (including Madrasahs and institutions for professional training).	210	10,248	129	9,574
Female	3,261	69,419	2,861	63,147
Total ...	55,640	1,548,593	53,100	1,504,893
PRIVATE INSTITUTIONS—				
(1) Advanced teaching—				
(a) Arabic or Persian	1,219	14,014	1,201	13,916
(b) Sanskrit	1,703	17,627	1,641	16,593
(2) Elementary, teaching a vernacular only or mainly—				
(a) With 10 pupils and upwards	598	9,428	605	9,877
(b) With less than 10 pupils	3,607	21,403	3,462	21,693
(3) Elementary, teaching the Koran only	4,717	59,790	4,848	55,840
(4) Other schools not conforming to the Departmental standards.	363	3,920	166	2,474
Total ..	12,207	126,182	11,413	119,923
GRAND TOTAL ..	67,847	1,674,775	64,513	1,624,816

Compared with the figures for 1896-97, the total number of institutions decreased in 1897-98 by 3,334, or 4·91 per cent., and the pupils attending them by 49,960, or 2·97 per cent. The number of colleges remained stationary, but there was a slight increase in the number of pupils attending them There was some increase in the number of high English, middle English, and upper primary schools and in the number of pupils attending them, but there was a falling off both in the number of, and attendance at, all other classes of schools. The lower primary schools decreased by 2,130 and the pupils attending them by 44,797. The Lieutenant-Governor observes this with much regret. Similarly in private institutions there was a loss of 794 schools and of 6,259 pupils. The falling off has been in both cases attributed generally to the scarcity, and no doubt this must have been an important factor in the very large decrease which has taken place; but the subject merits further examination than has been bestowed on it by the Director in his report. It is difficult to believe that so large a decrease can be solely attributed to the famine, which at the commencement of the year had already almost reached its zenith, especially when it is remembered how surprisingly quick and complete was the return to prosperity, and that in the previous year the loss of pupils attributed to famine was only 2,227.

Turning to results by divisions, it would appear from the figures in Table VIII that in Patna, where the famine was severest, there was only a

decrease of 886 pupils; while Chittagong shows a decrease of 16,518 pupils, Dacca of 7,229 pupils, the Presidency of 6,442, Orissa of 6,307, and Chota Nagpur of 3,464. It is hoped that the decreases in Dacca and Chittagong may be largely attributed to distress caused by the earthquake and the cyclone, and that they are temporary in nature; but the decrease in all five divisions seems larger than can fairly be attributed to the national calamities for which the year 1897 is so memorable; and Government awaits from the Director of Public Instruction further information as to the causes which led to this decrease and the arrangements that have been made for recovering lost way.

3. *Ratio of pupils to population.*—The population of Bengal, excluding Hill Tippera, and the Tributary States of Chota Nagpur, the schools of which are not included in the educational returns, is 73,043,697, of whom 36,412,749 are males and 36,630,948 females. This gives, at the usual rate of 15 per cent., 5,461,912 male children and 5,494,642 female children of school-going age. Of the pupils on the educational returns 1,520,000 were boys and 104,815 were girls. Thus of all boys of school-going age 27·8 per cent. and of all girls of school-going age 1·9 per cent. were at school in 1897-98. The percentages in the previous year were 28·5 and 2·0 respectively. As has been before remarked the percentage of pupils at school to the number of boys of school-going age varies enormously from district to district. Progress has, however, been made in the more backward districts. Thus where there were ten districts in 1894-95 that showed a percentage of less than 15, there are only seven now. Muzaffarpur, Bhagalpur, Darbhanga and the Santhal Parganas have risen out of this class; and it is hoped they will maintain their improved position. On the other hand, Champaran has descended in the scale, and the percentage in Saran has also decreased. It is on the most backward districts that the Department's most fostering care must be bestowed, and the Director is requested to ensure this being done.

4. *Schools classified according to their management.*—The following table classifies the colleges and schools according to their management:—

	1897.		1898.	
	Schools.	Pupils.	Schools.	Pupils.
1	2	3	4	5
PUBLIC INSTITUTIONS.				
Under public management.				
Managed by Government ...	252	28,044	171	24,757
Managed by District or Municipal Boards.	200	13,097	195	13,493
Under private management.				
Aided by Government or by District or Municipal Boards.	41,173	1,202,202	37,270	1,117,662
Unaided...	14,016	308,160	15,464(a)	348,980
Total ...	55,640	1,548,503	53,100	1,504,892
PRIVATE INSTITUTIONS.				
Of indigenous instruction	12,207	126,182	11,413	119,923
GRAND TOTAL ...	67,847	1,674,775	64,513	1,624,815

(a) Including schools maintained by Native States.

The decline in the number of schools managed by Government, from 252 to 171, is due chiefly to the abolition of the guru-training classes attached to middle schools. The schools managed by District Boards decreased by five. The number of aided schools diminished by 3,902, while the number of unaided schools rose by 1,448.

5. *Financial results.*—The total expenditure during the year under report was less than that of the previous year by Rs. 26,140. The expenditure from Provincial revenues fell off by Rs. 2,09,176, from District funds by Rs. 59,326, and from Municipal funds by Rs. 3,811. The decrease under the first head is solely due to the fact that much less was expended on buildings, the reduction on this account alone amounting to nearly two lakhs and a-half. The total income from other sources on the other hand increased by Rs. 2,46,173, and betokens, on the part of those for whom education is provided, a satisfactory

appreciation of the advantages offered, and an increased readiness to avail themselves thereof. The increase of Rs. 29,813 against superintendence was due mainly to the appointment of two Inspectors to the Bhagalpur-Chittagong and Rajshahi circles which have been newly formed.

6. *Inspection tours.*—The Director of Public Instruction was on tour for 51 days outside Calcutta, and visited the districts of Rajshahi, Dinajpur, Jalpaiguri, Rangpur, Singhbhum, Patna, Cuttack, Dacca and Chittagong. The Lieutenant-Governor is aware of the heavy office duties that chain the Director to head-quarters, but the importance of inspection by the head of the Department is so great that it seems to His Honour essential that some adjustment shall be made to enable the Director to make more frequent tours. It is not by statistical tests and correspondence that the Director can best inform himself of the character of the work that is being done, and of the efficiency of the subordinate staff, or compare the relative results in different parts of the province. No one can make these comparisons with such experience and authority as the Director himself, and it is on his judgment that in all such matters the Government itself must expressly rely. The subject will be taken up separately, but the Lieutenant-Governor desires that the Director will give it his early consideration. The time spent on inspection by the inspecting staff of the Province is shown and compared with that of the preceding year in the following statement:—

	1896-97.		1897-98.	
	Number of officers	Average number of days.	Number of officers.	Average number of days.
1	2	3	4	5
Inspectors	5	176	7	146
Inspector, European Schools ...	1	74	1	69
Inspectress of Schools ...	1	67	1	40
Assistant Inspectors	10	161	10	153
Deputy Inspectors	48	174	48	177
Sub-Inspectors	210	221	210	218

The increase in the number of Inspectors has been alluded to in paragraph 5. The work done by these officers is reported to have been satisfactory, though the large decrease in the number of days devoted to inspection can scarcely be compatible with the maintenance of the very high standard of supervision that has heretofore obtained, and the Lieutenant-Governor must ask that orders be issued to ensure that the period of inspection tours be restored to its former level. The Inspector of European Schools and the Inspectress of Schools have heavy inspection duties at head-quarters, and are not expected to go as much into the interior as their brother officers do. The Assistant Inspectors, who have very little office work to do, are expected to show a higher average than only 153 days touring in the year. Some of them have, indeed, exceeded 180; and there is no reason why others should not do the same. Four Deputy Inspectors failed to put in the prescribed minimum of 150 days touring, but in only one case was the explanation unsatisfactory. The prescribed minimum of 200 days' touring for Sub-Inspectors has on an average been exceeded in all Divisions though there have also been individual short-comings in all. The proposal to allow District Boards at their option to substitute for Inspecting Pandits a limited number of "Assistant Sub-Inspectors," who would be drawn, to a great extent, from the same class of men as the present Sub-Inspectors, is under the consideration of Government.

The principle of Dr. Martin's recommendation that Inspectors of Schools should be convened to attend quinquennial conferences at which matters

relating more closely to inspection work should form the chief topic of discussion; and that Inspectors of Schools should hold similar biennial or triennial conferences with their Assistant and Deputy Inspectors appears to the Lieutenant-Governor worthy of consideration; but the present proposals are of course mere suggestions, and before sanction can be given to any final action being taken in the matter, a definite programme of work and a list of the subjects which require more thorough discussion should be drawn up and submitted for the approval of Government.

7. *District Boards.*—It is satisfactory to notice that the relations between the District Boards and the Educational Department continued on the whole to be harmonious.

8. *Municipal Boards.*—Most municipalities are merely called upon to supply the money required for the provision of primary education to one-half the number of boys of school-going age. This they do, but as they to a great extent act without guidance from any one experienced in educational matters, it is feared that the best use is not made of the money so provided. Dr. Martin thinks it would be very desirable that the Deputy Inspector should be *ex-officio* a member of each municipality in his district, and that, as in the case of District Boards, the Commissioners should appoint an Educational Sub-Committee, of which the Deputy Inspector should be a member. This suggestion will be referred to the Municipal Department for consideration.

9. *University education.*—The number of Arts Colleges open during the year was 38, the same as in the previous year. The Uttarpara College has been transferred from the aided to the unaided list. The Harendra Lal College, at Munshiganj, and the Hetampur College in Birbhum (both unaided) appear in the list for the first time, while the Calcutta Boys' School, College Department, and La Martiniere for Girls, disappear from it. Eleven colleges are supported by Government, 1 (at Midnapore) by Municipal funds, 6 are aided and 20 are unaided. The total number of college students increased from 6,384 to 6,440.

10. *Cost of College education.*—The total expenditure on colleges rose from Rs. 7,47,764 in 1896-97 to Rs. 7,71,372, or by 3·1 per cent., as against an increase of 5·7 per cent. in the preceding year. This increase was mostly in unaided colleges, while both in the Government and the aided colleges the cost decreased by over Rs. 10,000. The expenditure from Provincial revenues on Government colleges declined from Rs. 2,69,884 to Rs. 2,49,710, due to the transfer of certain officers from the head "Government colleges" to that of "Inspection." There was a decrease of Rs. 9,610 in the Presidency college, Rs. 6,231 in the Hooghly College, Rs. 8,451 in the Patna College, Rs. 3,283 in the Ravenshaw College, and Rs. 3,134 in the Rajshahi College, while there was an increase of Rs. 6,729 in the Krishnagar College and Rs. 3,631 in the Bethune College. The expenditure from Provincial revenues on aided colleges remained nearly the same as in the preceding year, the small reduction being chiefly due to the reduced grant to the Victoria College, Narail. The annual cost per student under collegiate instruction declined from Rs. 113-13-7 to Rs. 111-8-5 and the Government share from Rs. 45-2-0 to Rs. 39-11-6.

11. *Success at University examinations.*—Two thousand seven hundred and twenty-four candidates appeared at the First Arts Examination held in March 1898, as compared with 2,631 in 1896-97. The percentage of successful candidates increased from 38 to 46. In Government colleges the percentage was 55, in aided colleges 49, in the Municipal College at Midnapore 47, and in unaided colleges 43. All Government colleges, with the exception of those at Hooghly, Patna and Rajshahi, passed more than half the candidates, the Presidency College having passed 76 per cent. Of the aided colleges, the General Assembly's Institution passed 55 per cent. of its candidates. Among the unaided colleges the Loretto House passed all its three candidates, and the Braja Mohan Institution, Barisal, and the Hetampur College passed 66 per cent., the Century College 65, the Arya Mission Institution 62, and the Bangabasi College 53 per cent. of their candidates.

The total number of candidates for the B. A. degree rose from 1,521 in 1896-97 to 1,588, or by 4·4 per cent., and the number of successful candidates increased from 386 to 391, or by 1·2 per cent. The percentages of successful

candidates in both courses together were 35·2 in Government, 22·3 in aided, and 19·9 in unaided colleges. Of 991 candidates in the A course, 26·3 per cent. passed as against 26·1 in 1897, while of 597 candidates in the B course, 21·7 per cent. passed as against 23·9 in 1897. In the A course the Government colleges passed 39·4 per cent., the aided colleges 24·2, and the unaided colleges 20·2 per cent. In the B course the corresponding percentages were, respectively, 29·3, 18·3, and 19·4. Among Government colleges, the highest place, as usual, was taken by the Presidency College, which passed 46·8 per cent. of its candidates—62 per cent. in the A and 31·8 per cent. in the B course.

Though the number of candidates for the M.A. degree declined from 194 in 1897 to 172, the number of those successful was the same as in the previous year, *i.e.*, 83. Of the successful candidates, 51 belonged to Government colleges, 21 to aided colleges, and one only to an unaided college; while of the remaining ten, 9 were private students and one a teacher. The Presidency College again shows by far the best results.

12. *Secondary Education.*—The main statistics relating to secondary schools for the last five years are shown in the following statement:—

Year.	Number of schools.	Number of pupils.	Expenditure.		
			Public funds.	Private funds.	Total.
1	2	3	4	5	6
			Rs.	Rs.	Rs.
1893-94 ...	2,373	198,736	5,94,328	21,33,751	27,28,079
1894-95 ...	2,397	206,989	6,09,740	21,85,658	27,95,398
1895-96 ...	2,422	207,542	6,07,983	22,61,106	28,69,089
1896-97 ...	2,451	215,131	6,01,526	22,95,876	28,97,402
1897-98 ...	2,453	220,159	5,99,672	23,46,117	29,45,789

Secondary schools of all classes taken together increased slightly in the last year from 2,451 to 2,453, and the pupils attending them from 215,131 to 220,159. High schools showed an increase of seven in number and of 2,264 pupils. Middle English schools increased by six and their pupils by 2,835, while middle vernacular schools decreased by 11 and their pupils by 71. The expenditure from public funds decreased by Rs. 1,854, while that from private funds increased by Rs. 50,241. The total expenditure on secondary education increased from Rs. 28,97,402 to Rs. 29,45,789.

13. *High schools.*—The number of Government high schools increased by one, owing to the Uttarpara Collegiate School (returned in the previous year as aided) having been separated from the Uttarpara College and taken over as a Government school from 1st April 1897. The number of schools under the management of District or Municipal Boards remained the same, viz. five. Though the number of aided schools decreased by one, there was an increase of 516 pupils. The number of unaided schools increased by seven and the pupils attending them by 996. At the University Entrance Examination 2,658 boys passed out of 4,754 candidates (55·8 per cent.), against 2,792 out of 4,667 candidates (59·6 per cent.) in 1896-97. The Hindu School, the Hare School and the Dacca Collegiate School also each gained over 50 in merit marks.

14. *Drawing.*—In conformity with the orders of Government, that the marks obtained by candidates in drawing at the Entrance Examination in 1897 and subsequent years, should be taken into consideration in the award of junior scholarships, arrangements for teaching this subject have been made in all Government high schools (except Rangamati) and in many of the schools under private management. The number of candidates who took up this subject in Government schools rose from 589 to 655, but the number who came out successful fell from 217 to 199, due, it is believed, to the test being more difficult in 1897-98. The University, the Lieutenant-Governor is glad to see,

contemplates making the drawing examination a greater test of merit than it has hitherto been.

15. *Middle schools.*—The middle English schools increased from 927 with 67,769 pupils in 1896-97 to 933 with 70,604 pupils. The number of schools under public management remained unchanged, but the pupils attending increased by 102, or 4·7 per cent. The aided middle English schools decreased from 657 to 654, but their pupils increased from 48,956 to 50,218, or by 2·5 per cent. The number of unaided schools increased by nine and the pupils attending them by 1,471.

The number of middle vernacular schools fell from 1,140 with 65,441 pupils in 1896-97 to 1,129 with 65,370 pupils. The schools maintained by Government rose from 37 to 39, owing to the establishment of two schools in the Chota Nagpur Division. The number of schools managed by District or Municipal Boards decreased by five. The aided schools declined from 811 with 45,035 pupils to 799 with 44,547 pupils. The unaided schools rose from 143 with 8,782 pupils to 147 with 9,234 pupils.

The following table shows in a condensed form the results of the Middle Scholarship Examination from the two sets of schools (Middle English and Middle Vernacular) for the last two years:—

	Number of candidates.	Passed at the Middle English examination.	Passed at the Middle Vernacular examination.	Total.
1896-97.				
Middle English schools ...	3,316	938	1,089	2,081
„ Vernacular schools ...	3,452	81	2,018	2,099
Total ...	6,767	1,019	3,098	4,117
1897-98.				
Middle English schools ...	3,433	858	901	1,759
„ Vernacular schools ...	3,428	96	1,494	1,590
Total ...	6,861	954	2,395	3,349

The Lieutenant-Governor desires further enquiry regarding the causes of this serious retrogression, being unable to accept as a complete explanation the reason given by the Director, viz., that it is due to a year of disaster.

16. *Discipline and moral training.*—The Lieutenant-Governor has read with regret the list of cases of breach of discipline mentioned in paragraph 90 of the Director's report.

Happily, there has been a considerable reduction both in the number and the degree of gravity of the more serious offences: but much remains to be done. Three cases of assault with violence on masters are reported, while at one school two boys were expelled for bringing a courtezan into the school-house at night. There are still cases of boys and masters tampering with school registers and certificates: while punctuality and regularity in attendance are both on the part of masters and pupils often not even aimed at or expected; and are almost always poor. The Director of Public Instruction fully recognises the gravity of the whole question. A power of maintaining discipline and imbuing his pupils with a good moral tone is the first essential in a school-master, the absence of which will be held an insuperable barrier to promotion, or to the holding of positions of responsibility which necessitate its exercise.

17. *Boarding-houses.*—The number of hostels or boarding-houses for boys and girls, and the number of their inmates at the end of the year, were, respectively, 195 and 5,475, as compared with 170 and 4,483 in the previous year. The growing recognition of the value of these institutions and the growing generosity of the public in providing them have the Lieutenant-Governor's warm appreciation. The total expenditure in these boarding-houses also increased from Rs. 2,23,123 to Rs. 2,42,845, and the results of the year under this head are most satisfactory.

18. *Physical training.*—Cricket and foot-ball are reported to continue to maintain undiminished popularity, and to be extending to many places in the mufassal. Country games, too, have been increasing in favour, specially among boys who cannot afford to buy any expensive article for the play-ground. The question of the introduction of physical drill in schools with a view to eventually

making it compulsory to all is one which might receive the consideration of the Director and his subordinates. In addition to the benefit to health that is derived therefrom, the habit of prompt obedience and orderliness it develops is certainly useful as a factor in improving the standard of discipline.

19. *Primary education.*—The number of primary schools and their pupils during the past five years is shown in the following statement :—

Year.	Upper primary.		Lower primary.	
	Number of schools.	Pupils.	Number of schools.	Pupils.
1	2	3	4	5
1893-94	3,763	141,483	44,020	988,745
1894-95	3,901	150,878	45,897	1,055,253
1895-96	3,944	153,070	47,054	1,087,356
1896-97	4,029	162,102	45,612	1,081,432
1897-98	4,107	165,057	43,482	1,036,635

The steady increase in the number of upper primary schools notwithstanding many exceptionally adverse circumstances is a sign of healthy development, since it takes years for a lower primary to develop into one of the upper class. As regards the lower primary schools, Dr. Martin expresses his surprise that a much larger number did not collapse during the last two years. As regards the decreases shown in the various divisions, that in Chittagong is, as was surmised in paragraph 2, attributed to the cyclone, the storm-wave and the cholera epidemic which succeeded it: while in Noakhali and Tippera floods and failure of crops are held to be responsible. No specific reasons other than the scarcity are advanced for the other decreases.

20. *Cost of primary schools to Government.*—The expenditure incurred by Government and by District Boards on account of primary schools for native boys and girls for the last two years is compared in the following table :—

Description of schools and expenditure.	From Provincial revenues.		From District funds.		Total.	
	1896-97.	1897-98.	1896-97.	1897-98.	1896-97.	1897-98.
1	2	3	4	5	6	7
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Stipendiary schools ...	1,27,359	1,27,769	1,80,915	1,71,137	3,08,274	2,98,906
Non-stipendiary schools	26,847	20,919	3,69,066	3,21,989	3,95,913	3,42,908
Subordinate inspecting agency.	13,326	14,196	90,572	88,628	1,03,898	1,02,824
Lower primary scholarships.	2,873	2,202	23,274	24,047	26,147	26,249
Buildings and furniture	5,723	5,067	1,402	978	7,125	6,045
Charges for abolished schools.	3,339	4,541	12,588	9,538	15,927	14,079
Examinations, prizes and rewards.	4,759	5,828	38,153	32,596	42,912	38,424
Miscellaneous ...	13,170	9,058	22,194	24,348	35,364	33,406
Total ...	1,97,396	1,89,580	7,38,164	6,73,261	9,35,560	8,62,841
Allotments ...	2,01,428	1,97,470	7,53,245	7,46,616	9,54,673	9,44,086
Savings	4,032	7,890	15,081	73,355	19,113	81,245

The above table does not include the expenditure on primary schools which are aided from the grant-in-aid and circle funds. Nor does it include a sum of Rs. 1,73,616, which represents 80 per cent. of the charges on account of Sub-Inspectors, and under Government orders is chargeable to the cost of primary education. The expenditure on primary education came to Rs. 8,62,841 as against Rs. 9,35,560 in the preceding year. The allotments from District funds were Rs. 7,46,616 as against Rs. 7,93,245, but the savings effected came up to very nearly 10 per cent. of their allotments in 1897-98. The Lieutenant-Governor trusts that as District Boards recover from the severe strain that has been put on their finances by the famine, the earthquake, and the cyclone they will at all times be mindful of the primary claim elementary education has to being helped from the funds at their disposal. The Municipal expenditure on primary schools for boys and girls was Rs. 62,319 as against Rs. 63,095 in 1896-97.

21. *Comparison of cost of upper and lower primary schools.*—The apportionment of the grants from Provincial revenues and District funds between upper and lower primary schools and the relative cost of both classes are shown division by division in the following table, which has been condensed from that in paragraph 103 of the report:—

Division.	Allotment.	Expenditure.		Number of schools.		Number of pupils		Cost per school in rupees.		Cost per pupil in annas.	
		Upper.	Lower.	Upper.	Lower.	Upper.	Lower.	Upper.	Lower.	Upper.	Lower.

Chota Nagpur ...	62,293	9,050	54,225	124	1,835	5,741	48,259	72·9	29·5	35·2	17·9
Total for 1897-98 ...	11,45,480	1,83,087	4,66,809	3,691	30,030	145,832	769,459	49·7	15·5	20·1	9·7
Total for 1896-97 ...	11,41,998	1,89,575	5,37,708	3,691	33,909	140,780	864,636	51·3	15·8	20·6	10·0

The annual cost of each pupil in an upper primary school has fallen from 20·6 annas in 1896-97 to 20·1 annas, and in a lower primary school from annas 10 to annas 9·7. The Director remarks:—

"The comparative advancement of different districts explains the wide variation in cost in the different divisions. The strange divergence which appears in the cost of educating each pupil in districts which adjoin each other, and which are apparently similarly circumstanced, is to be found in the extent to which the stipendiary system is followed in them. Thus, in Birbhum, where the stipendiary system is wholly abolished, the annual cost of an upper primary school was only Rs. 27·4, whereas in the adjoining district of Burdwan, where the stipendiary system is more in favour, it was Rs. 42·2. The average cost of upper primary schools is heavy in the Patna Division, owing to stipends being given on a more liberal scale than in the districts of Bengal Proper. This is also the case in the Monghyr, Bhagalpur, and Purnea districts of the Bhagalpur Division."

The Lieutenant-Governor has read with much interest Mr. Podler's remarks on the comparative merits of the stipendiary and payment-by-result systems and Dr. Martin's remarks thereon. The discussion of such an important matter is perhaps hardly within the scope of an ordinary Annual Report, but Sir John Woodburn welcomes so thoughtful an examination of our

methods, and will be glad to consider any proposals Mr. Pedler may wish to make on the subject. There is, however, no concealing the fact that in the present state of Provincial finances any scheme, however good in itself, which involves a heavy increase of expenditure, is beyond the range of practical consideration, and upon the merits it is open to question whether the time is not yet far distant when considerations of the quality of our primary schools can supersede the supreme and imperious necessity of providing elementary instruction to the children of the poor. As Dr. Martin says, England is not India, and the lessons of English experience India is not sufficiently advanced to assimilate. In the practical application of their respective theories, however, the Director and his highest officer do not appear to reach very different results; and if the outcome of the discussion is to be the necessary improvement of the inspecting gurus and the establishment of a single stipendiary model school in each subdivision, the Lieutenant-Governor ventures to hope that it may be possible to meet their united conclusions without a material opposition from the Financial Department of this Government.

22. *Relative position of districts.*—In paragraph 104 of his report, the Director has given the usual table showing the number of pupils in each district and division in the different stages of primary instruction, and comparing its relative position with reference to the progress made in this respect. The principle on which the table has been compiled is the same as in previous years, and the divisional figures showing the percentage of merit marks to the male population of school-going age are reproduced in the margin. The order of the divisions arranged by this standard remains the same as last year. Patna and Bhagalpur continued to show the worst results.

Divisions.	Merit marks.
Burdwan	132·5
Chittagong	98·0
Presidency	80·97
Orissa	75·4
Dacca	74·4
Raj-shahi	50·1
Chota Nagpur... ...	41·6
Bhagalpur	35·7
Patna	32·4

23. *Primary Scholarship Examinations.*—The results of the Upper Primary Scholarship Examination for boys, including candidates from upper primary schools and private students for the last four years, are shown in the following statement:—

Year.	Number of competing schools.	Number of successful schools.	Number of candidates.	Number of successful candidates.	Percentage of successful schools.	Percentage of successful candidates.
1	2	3	4	5	6	7
1894-95	2,484	1,613	5,898	3,751	65	46·8
1895-96	2,637	1,942	6,182	3,466	73	56·2
1896-97	2,092	2,057	6,518	3,524	75·9	58·6
1897-98	2,617	2,115	6,118	4,051	79·9	66·2

The yearly increase in the percentages of successful schools, and of successful candidates, indicate a most satisfactory improvement in the progress of education.

In the Lower Primary Scholarship Examination the number of competing schools increased from 13,326 to 13,725, and the number of successful schools from 10,063 to 10,460. The number of successful candidates advanced from 27,088 to 28,761 and the number of successful Muhammadan candidates from 5,235 to 5,884.

24. *School Post Office.*—There were 745 school post offices during 1897-98 as against 697 in the preceding year. The system is generally working well, but a complaint comes from one district that schools suffer greatly by this arrangement, since during school hours teachers are interrupted when the mail is received and despatched. It was a condition of the experiment that postal work was to be considered subordinate to educational duties, and where such a practice prevails the Deputy Inspectors of Schools should address the Inspectors of Post Offices with a view to the removal of the hindrance.

25. *Training Schools.*—The number of training schools for teachers of both sexes was 29 as against 118 in the previous year, and the pupils in them decreased

from 1,770 to 1,262. The guru-training classes attached to middle schools were, with the exception of three schools in the Chota Nagpur Division, abolished during the year. As in the previous year, there were 9 aided training schools for mistresses, but the pupils attending them increased by 26. The expenditure from Provincial revenues on all these institutions increased from Rs. 97,055 to Rs. 97,648, or by Rs. 593, while the total expenditure from the District funds, fees and fines, and other sources declined by Rs. 49, Rs. 2,853 and Rs. 9,668, respectively, the net result being a decrease of Rs. 11,977. The average cost of each pupil per annum in the Government training schools increased from Rs. 137-7 to Rs. 154-7, chiefly on account of the poor attendance in the English classes which were opened in 1896 in connection with the training schools at Calcutta, Hooghly, Dacca, Patna and Cuttack for the training of English teachers for secondary schools. The experiment has not yet been given a long enough trial to warrant any final opinion being passed as to its want of success. It will be time enough to consider the proposal of stopping it if after three years no greater measure of success is obtained.

The results of the English Teachership Examination show that 12 certificates were granted; seven in the second grade and five in the third grade. The total number of candidates that appeared at the Vernacular Mastership Examination held in 1898 was 420 as against 412 in the previous year; but the number of successful candidates was only 275 as against 292. A common examination for a special certificate in drawing was held for the training schools, and the results are shown in the following statement:—

	Total.
Calcutta	4
Hooghly	6
Dacca	3
Chittagong	2
Rangpur	2
Total ...	17

26. *Law Classes.*—The number of law schools was the same as in the preceding year, viz. 16, but the number of pupils attending them increased by 83. The average annual cost of educating each pupil in the law departments of the Government colleges was nearly Rs. 52-4-5 as against Rs. 51-6 in 1896-97. The number of pupils reading for the degree of Bachelor of Law fell off by 32, while the students attending the pleadership classes increased by 115.

The total number of candidates who appeared at the last examination for the degree of Bachelor of Law was 468 as against 400 in the previous year, while the number of successful candidates also increased from 204 to 239, of whom the Ripon College passed no fewer than 120.

27. *Medical schools.*—The total number of medical institutions fell off from 11 to 9, and the number of students attending them from 1,950 to 1,815. The total strength of the Medical College at the beginning of the session was 583 as against 588, 511, 484 and 419 of the four preceding years. Of the students that competed at the various examinations 44 per cent. were successful against 53·2 per cent. in the previous year.

The number of students in the Campbell Medical School at Sealdah on the 31st March 1898 was 229, of whom 15 were females. Sixty-eight male and 10 female students appeared at the second or final diploma examination, 56 of the former and 9 of the latter being successful. All the female students, excepting one, who is married, were boarders in the Lady Elliott Hostel. The number on the rolls of the Dacca Medical School on the 31st March last was 145, of whom 9 were females. Thirty-eight students (one female) succeeded in passing the final examination. The number attending the Temple Medical School at Patna on the 31st March 1898 was 136, of whom four were females. Twenty-eight candidates passed at the final examination. In the Cuttack Medical School the number of pupils on the rolls on the 31st March 1898 was 99, of whom 4 were females. Thirty-one students passed the final examination.

28. *Sibpur Engineering College.*—In the Engineering Department, which is affiliated to the University, there were 118 students, all of them, with the exception of 5 Europeans and Eurasians and two Muhammadans, being Hindus. In the Apprentice or Foreman Mechanic Department, there were 184 students, of whom 153 were Hindus, 30 Europeans and Eurasians, and one a Muhammadan; while the Artizan class had 11 students. An Agricultural Department was opened in connection with the college in June 1898. There was an increase of 20 pupils in the Engineering Department and a falling off of 21 pupils in the Apprentice Department. The Artizan class gained four pupils The total strength of the college on the 31st March 1898 was 313 as against 310 in 1896-97. At the L. E. Examination, two candidates appeared, both of whom failed. At the B. E. Examination, 13 candidates appeared, of whom six passed—two in the first division and four in the second division. Of the 15 candidates for the B E. and L. E. Examinations of the University, 10 were students of the college, and five ex-students, who had failed previously. Three Overseers' and 20 Sub-Overseers' certificates were granted to students leaving the college without going through the full course. The results of the annual examination of the Apprentice Department were satisfactory. The mining scholarships are reported to be unpopular, only one student having elected, since the scholarships were established, to undergo a mining course. The attempt to induce B. E's. to undergo a special training in electricity, so as to pass the Honours' examination in Engineering in this subject, has not met with success. The electric light installation was in working order in July 1897, and on the whole the plant has been successful. Of the high merit and value of this college there can no longer be any doubt. Its students get employment as fast as they are declared qualified. It so clearly meets a great want, under the conditions of the time, that it is entitled to and will receive all the help the Lieutenant-Governor can give it. He considers it of such importance that the 23 industrial schools in the mufassil, which are affiliated to it, should be brought to a useful standard and enabled to supply well-trained students to the higher instruction of the college itself, that Mr. Slater, the Principal at Sibpur, has been deputed to examine each one and report in detail on the character of the instruction and the sufficiency of the necessary appliances.

29. *Survey schools.*—The number of pupils in the three Government survey schools at Dacca, Patna, and Cuttack, on the 31st March 1898, was 190, 182 and 84 respectively as compared with 324, 194 and 73 the previous year. The large decrease in the Dacca School is attributed to a rumour that vernacular students were not qualified for admission, and to the enforcement of the rule that only those who had some knowledge of English should be allowed to join the second year class. The latter proved a bar to the progress of 60 out of the 113 pupils who appeared at the annual examination. Practical training receives much attention at the Dacca and Patna Survey Schools, especially in cadastral survey with plane-tables and theodolites. The number of pupils from these schools who appeared at the final examinations was 235, the number who passed being 158.

30. *School of Art.*—The number of students on the rolls on the 31st March 1898 was 226, of whom 206 were in Division I, the practical art side; and 20 in Division II, the fine art side of the school. The course in Division I includes, besides the general classes for drawing, classes for architectural and mechanical drawing, lithography and wood engraving and modelling. Division II affords an ordinary artistic training in drawing, painting and sculpture, similar to that given in art academies in Europe. The intention of the new regulations was, on the one hand, to develop the practical side of the school, especially in the direction of decorative art and, on the other, to give a higher aim and better training to those who entered the school to become painters or sculptors. In Division I special attention is given to fresco decoration for walls; the designing and making of stained glass windows; and lacquer work and stencilling. Under the new regulations specially low fees are charged to those actually employed in any branch of industrial art. The number of pupils admitted in the Artizan class under these rules at the close of the year was 12, most of whom were the sons of silversmiths.

31. *Female education.*—The main statistics of female education, *i.e.*, the attendance and expenditure in schools for native girls, are shown in the following table :—

Class of Schools.	Number of schools.	Number on the rolls on the 31st March 1898.	Average monthly roll number.	Average daily attendance.	Expenditure— From public funds. Provincial revenues.	District funds.	Municipal funds.	From private funds. Fees.	Other sources.	Total.

Total for 1894-95 ...	3,218	64,567	59,603	45,066	1,46,682			2,58,796		4,05,478
Total for 1893-94 ...	2,999	61,034	56,047	41,748	1,39,786			2,46,703		3,86,489

There was a large falling off both in the number of schools for girls and of the pupils attending them during the year under review, which is ascribed to the great agricultural distress which prevailed during the year 1897. Besides the girls shown in the above table, there were also 36,806 girls in boys' schools, as against 38,530 in the previous year. The net result of the year is a loss of 401 schools and of 8,125 pupils, including the girls in boys' schools. The decrease in the number of schools was largest in the Chota Nagpur and Bhagalpur Divisions, and was considerable in the Presidency, Dacca, and Chittagong Divisions. On the other hand in Calcutta, there was an increase of more than 11 per cent. in the number of schools, and of more than 3 per cent. in the number of girls. There was a decrease of Rs. 12,723 in expenditure from public funds, and of Rs. 425 from private funds. The net decrease in expenditure during the year under review as compared with that of 1896-97 was Rs. 13,148. The only two girls' schools maintained by Government are the Bethune Collegiate School in Calcutta and the Eden Female School in Dacca. The Bethune School sent up seven girls at the last Entrance Examination, of whom three passed, while in 1897 all the six candidates sent up passed. The total number of girls who passed the modified middle English, middle vernacular, upper primary, and lower primary examinations for boys was 4, 13, 82, and 899, respectively;—figures which show a very material advance on those of 1896-97, and fully justify the Director's contention that if the quantity of female education has decreased, its quality has improved. The question of unifying the standards for girls' examinations over the whole Province is still pending, and practically nothing further in this direction has been done in the year under review. The question must not be considered as disposed of, however, and it is trusted that the Director will see a way to overcoming the difficulty. The question referred to by the Director of substituting prizes for scholarships in the cases of Hindu and Muhammadan girls will be separately considered on receipt of definite proposals on the subject, should he consider a change advisable.

32. *Education of Europeans.*—The following table shows the number of Government, aided and unaided, schools for European education for Bengal, and the number of pupils attending them for the last two years:—

	31ST MARCH 1897.				31ST MARCH 1898.			
	Number of schools.	NUMBER OF SCHOLARS.			Number of schools.	NUMBER OF SCHOLARS.		
		Boys.	Girls.	Total.		Boys.	Girls.	Total.
1	2	3	4	5	6	7	8	9
SECONDARY SCHOOLS. Government	1	109	...	109	2	143	55	198
Aided	42	2,786	2,796	5,584	41	2,753	2,749	5,502
Unaided	10	1,108	277	1,385	11	1,275	299	1,574
Total	53	4,003	3,073	7,076	54	4,171	3,103	7,274
PRIMARY SCHOOLS. Aided	20	411	548	959	17	353	501	854
Unaided	4	35	58	93	3	31	61	92
Total	24	446	606	1,052	20	384	562	946
Government schools	1	109	...	109	2	143	55	198
Aided schools	62	3,199	3,344	6,543	58	3,116	3,250	6,366
Unaided schools	14	1,143	335	1,478	14	1,306	360	1,666
GRAND TOTAL OF ALL SCHOOLS	77	4,451	3,679	8,130	74	4,555	3,665	8,220

During the year a new Government school for girls has been opened at Kurseong. The number of schools fell from 77 in 1896-97 to 74, while the number of pupils attending them increased from 8,130 to 8,220. The total cost of European education was Rs. 13,84,365 as against Rs. 13,56,392 in 1896-97, of which Government contributed Rs. 2,07,346 as against Rs. 2,27,579. The number of candidates from European schools for the University Entrance Examination was 30 as against 100 in the previous year, and the number of successful candidates was 24 as against 66. Of this number, three pupils gained scholarships, the corresponding number last year being two. The Inspector of European Schools explains that this falling off in the number of candidates for the Entrance Examination is due mainly to the majority of schools adopting the High School Pass Examination, in the belief that the proposed High School Honour Examination will be shortly established as the test of students wishing to qualify for entrance into Government service.

The proposals made by Mr. Peake regarding the professional training for teachers in European schools, the provision by Government of funds to assist the establishment of Kindergartens, and the affiliation of the Victoria School and others to the Sibpur Engineering College, on which the Director has requested the special orders of Government, are not matters that can be satisfactorily dealt with in this Resolution, the necessary details not having been furnished. The Director is desired to make each the subject of a separate correspondence.

33. *Muhammadan education.*—The total number of Muhammadan pupils decreased from 477,019 to 445,179, *i.e.*, by 1·0 per cent. In public institutions there was a decline of 25,614 Muhammadan pupils, and in private institutions of 6,226 Muhammadan pupils. With the exception of the lower primary schools, training schools, and Madrasas, all classes of public institutions gained pupils of the Muhammadan persuasion. Arts colleges, middle English schools, middle vernacular schools, upper primary schools, professional colleges, and technical schools showed an increase both in the number and in the percentage of Muhammadan pupils, while high English schools showed an increase in the number of pupils only as compared with the previous year. On the other hand, both the number and the percentage of Muhammadan school-going pupils, decreased very much in lower primary schools, which were the first to feel the effects of the calamities of the year. The loss in private institutions, mainly due, it is said, to the above cause, was shared by all classes of schools, the *Koran* schools and elementary schools having suffered most. There was a decrease of Muhammadan pupils in all divisions, with the exception of Burdwan, in which there was a slight increase. In Chittagong the loss of Muhammadan pupils reached the enormous total of 20,119, owing to the cyclone and tidal

wave which swept away almost all the school buildings in the parts chiefly affected by these calamities. There were heavy losses in the Presidency, Rajshahi, Patna, and Dacca Divisions, and everywhere the causes are alleged to have been the scarcity and the agricultural depression which affects Muhammadans more than the rest of the community.

There was a slight increase in the number of successful Muhammadan candidates at the B. A. and F. A. Examinations, but a heavy decrease in the number who were successful in the Entrance Examination. The total number of successful candidates at these and the M. A. examinations was 267, as compared with 308 in the previous year.

The number of candidates at the central examinations of Madrasas declined from 261 to 205, and that of successful candidates from 155 to 123. This decrease is shared by all the Madrasas, except those of Dacca, Sasaram, and Sitakund. The total number of pupils in the Madrasas under Government management was 1,570 as against 1,667 in the preceding year. The total receipts and expenditure were Rs. 32,129 and Rs. 69,021 respectively, as against Rs. 24,455 and Rs. 54,877 respectively in 1896-97. The increased expenditure is due to a great extent to the increased salaries which several officers draw under the system which came into force when the Department was reorganized.

34. *Education of aborigines.*—The number of pupils of aboriginal races decreased from 37,848 in 1896-97 to 33,708 in 1897-98, or by 4,140. The decrease is shared, more or less, by upper and lower primary schools for boys', and by girls' schools. The loss of aboriginal pupils in the lower primary schools was 2,992. Upper primary and girls' schools lost 385 and 1,022 respectively, while high schools gained 7 pupils, middle English 37, middle vernacular 163, and special and private schools 52. The decrease of these pupils is found in all the divisions of Bengal, except Orissa, where there is an increase. The five missions in Chota Nagpur maintained 192 schools with 6,323 pupils in 1897-98, as against 203 schools with 6,271 in the preceding year. This year no aboriginal pupil passed the last Entrance Examination, but 683 pupils, as compared with 627 in the previous year, passed other Departmental examinations, and the increase in the middle scholarship examinations was very marked.

35. *Private institutions.*—There are a large number of private institutions scattered throughout the Province which do not conform to any particular departmental standards of instruction, and submit to no public test, but adhere to indigenous modes of teaching. They include the elementary schools for reading and writing, Sanskrit *tols*, and *maktabs* for teaching the *Koran* or Arabic and Persian. The number of these schools and that of the pupils attending them during the last two years are shown below:—

	1896-97.	1897-98.
Schools	12,207	11,413
Pupils	126,182	119,923

36. *Sanskrit.*—The number of Sanskrit *tols* decreased by 122 and their pupils by 1,034. With reference to this the Director writes:—

"The education imparted in the *tols* has been rendered methodical, and their standard of teaching and general tone have been elevated since they have been brought under the rules and regulations prescribed by Government. Two separate examinations for *tols* are now conducted with the same examiners and the same set of questions prepared under the general supervision of the Principal of the Sanskrit College. The standards for these examinations were so arranged as to lead up eventually to the Sanskrit Title examination, which has been annually held since 1878. Now that regular courses are prescribed for these institutions and their progress is tested by examinations held under the auspices of the Department, it appears that the time has come when those which appear on the books of the 'Registrar of the Examinations for Sanskrit *tols*' should be transferred from the class of private institutions conforming to no departmental standards to the class of institutions for special instruction."

The Lieutenant-Governor agrees with the opinion expressed above and desires that steps may be taken to effect the transfer. At the Sanskrit First examination 463 candidates passed in 1898 as against 411 in 1897: at the

Second examination 178 passed as against 187 in 1897. At the Sanskrit Title examination 87 out of 217 candidates passed in 1898 as against 61 out of 168 in the previous year. The total expenditure during the year under review from Provincial revenues for the encouragement of Sanskrit learning in *tols* amounted to Rs. 21,270, exclusive of Rs. 700 spent on the conduct of Sanskrit Title and Sanskrit First and Second examinations.

37. *The Central Text-book Committee.*—The Central Text-book Committee now consists of 20 members, with the Hon'ble Mr. Justice Guru Das Banerjea as President and the Inspector of Schools, Presidency Circle, as *ex-officio* member and Secretary. All the members, with three exceptions, are Fellows of the Calcutta University, and 11 are unconnected with the Education Department. During the year under review the Committee dealt with 283 new books, of which 64 were approved for various purposes, 97 were rejected, and upon the rest no opinion had been recorded before the close of the year owing to the fact that no less than 164 were submitted for examination in the last month of the year. Besides the Central Text-book Committee, sitting at Calcutta, there is a Branch Committee at Patna for the selection of Hindi and Urdu books, and another at Cuttack to consider Uriya publications. The Patna Committee dealt with 43 books, and prepared during the year a revised list of books approved as text and prize-books. The Orissa Committee reported on 12 books during the year, of which 3 were approved.

38. *Conclusion.*—Dr. C. A. Martin has administered his Department with an enthusiasm and assiduity which the Government and his subordinates alike appreciate, and the thanks of the Lieutenant-Governor are due to him and to the Principals, Professors, Inspectors, Assistant Inspectors and other officers who have been specially mentioned.

By order of the Lieutenant-Governor of Bengal,

F. A. SLACK,

Offg. Secretary to the Government of Bengal.

FINAL REPORT ON THE BHADOI CROPS IN BENGAL, 1898.

THE following is published for general information.

F. A. SLACK,

The 17th December 1898. *Offg. Secy. to the Govt. of Bengal.*

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL.

Final report on the bhadoi crops in Bengal 1898.

Explanatory.—Estimates of area and outturn of all the *bhadoi* food and non-food crops are furnished in this report. The food crops, of which *bhadoi* paddy, maize and millets are the most important, occupy 81 per cent. of the total *bhadoi* area, the remainder being occupied by non-food crops, which include jute, indigo and cotton.

2. *Character of the season.*—In April, the rainfall was deficient over the whole of Bengal proper; it was nearly normal in Bihar and Chota Nagpur and a little in excess of the normal in Orissa. In May, it was slightly in defect in almost all parts of these Provinces. In June, it was above the average in Bengal and Chota Nagpur and below

the average in Bihar and Orissa. In July, it was generally below the normal. In August, on the other hand, it was in excess everywhere, excepting in parts of North Bengal and North Bihar. In September, it was heavier and more continuous than usual. All parts of these Provinces except Orissa received an excess of rain in this month. The heaviest falls were in Bihar and North Bengal, where floods damaged the crops in large areas to some extent. In October, Bihar and Chota Nagpur received less than the normal rain and all the other Divisions received more than the normal. In November, there was little or no rain.

3. *Area cultivated*.—No alterations have been made by District Officers in the revised figures of normal areas as given in the preliminary *bhadoi* forecast of September last, except in the case of Purnea where the Collector has slightly modified his figures. Figures showing the areas cultivated this year and last have been slightly modified in some cases. The district returns now appended to this note show an area of 16,189,800 acres under all *bhadoi* crops this year as compared with 16,109,300 acres estimated to have been cultivated in these crops last year. The increase, amounting to 80,500 acres or ·5 per cent., is only nominal. Taking *bhadoi* food crops and *bhadoi* non food crops separately, the former show an increase this year of 281,300 acres over the corresponding area last year, and the latter, a decrease of 200,800 acres. This result, as pointed out in the preliminary forecast, is mainly due to the cultivation of paddy this year on lands hitherto sown with juto.

4. *Character of the crops*.—The appended returns show that 14 districts report better crops than those estimated in September last, while in 11 districts the crops have not proved so good as was anticipated. In the remaining 20 districts, the estimates of September remain unchanged. The floods of September last did much damage to the *bhadoi* crops in Saran, Champaran and Muzaffarpur districts of North Bihar, where, over an area of 1,805,200 acres, the estimate of outturn has been reduced by 40 per cent. A smaller reduction of estimates on account of floods has also been made in Burdwan, Midnapore, Murshidabad, Jessore, Shahabad, Darbhanga and Monghyr, while it is now reported from Midnapore, that the damage done by grasshoppers to the *bhadoi* paddy crop was confined to a small area of about 17 square miles in the Chaudrakona thana.

These adverse circumstances have been more than compensated for, however, by the improvement in the outturn of many important districts, such as Dinajpur, Dacca, Mymensingh, Faridpur and Hazaribagh, and the final crop for Bengal generally may be estimated at 94 per cent.

N. N. BANERJEI,
Asst. Director of Land Records and Agriculture, Bengal.

Countersigned.

P. C. LYON,
Director of Land Records and Agriculture, Bengal.

CALCUTTA,
The 15th December 1898.

Final Report on the Bhadoi Crops of Bengal, 1898.

1	2	3	4	5	6	7	8	9	10	11
District.	Total area of district in acres.	Total area in district estimated to be under cultivation in acres.	Names of *bhadoi crops*.	Approximate normal area under each specified *bhadoi* crop in acres.	Approximate area *last year* under each specified *bhadoi* crop in acres.	Estimated area *this year* under each specified *bhadoi* crop in acres.	Taking 100 to represent the normal outturn per acre, how much represented outturn last year?	Taking 100 to represent the normal outturn per acre, how much will represent this year's outturn?	Remarks by District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
Burdwan ...	1,726,080	1,283,800	*Bhadoi* paddy	173,700	172,500	172,500	119	100	Owing to want of rain at the time of sowing and excessive rainfall subsequently, the outturn of non-food-crops was less than that of last year.	
			Indian-corn (maize) ...	3,000	3,000	3,000	63	100		
			Other *bhadoi* cereals and *bhadoi* pulses.	8,100	8,100	7,100	104	100

			Other *bhadoi* cereals and *bhadoi* pulses.	8,400	8,600	8,700		75		
			Other food-crops (*e.g.*, vegetables).	700	800	800		93		
			Other non-food-crops (*e.g.*, jute, indigo, *bhadoi til*, *sunn* hemp, mulberry, &c., &c.).	8,000	8,900	9,100		100		
			Total ...	45,100	45,500	45,300	94	97		
Midnapore ...	3,292,800	2,111,500	*Bhadoi* paddy	107,300	113,700	108,300	81	59	The decrease in area under cultivation is due partly to want of rain during the sowing time and partly to sudden floods. Floods have also affected the outturn: about 5 per cent. of *bhadoi paddy* was damaged by grasshoppers in the Chandrakona thana, within an area of about 17 square miles.	
			Bajra	6,100	6,000	6,000	62	70		
			Mandua (or *marua* or *ragi*).	2,000	2,000	2,000	68	60		
			Indian-corn (maize) ...	21,200	18,000	18,000	75	65		
			Other *bhadoi* cereals and *bhadoi* pulses.	48,700	47,600	45,900	64	65		
			Other food-crops (*e.g.*, vegetables).	23,300	22,800	19,500	72	61		
			Other non-food-crops (*e.g.*, jute, indigo, *bhadoi til*, *sunn* hemp, mulberry, &c., &c.).	91,800	92,700	90,900	70	58		
			Total ...	300,400	301,800	290,800	73	60		

Hooghly ...	1,087,360	702,200	*Bhadoi* paddy	46,000	56,000	47,600	88	86	The rainfall in September has been sufficient and the outturn of crops has consequently exceeded that previously anticipated.	
			Indian-corn (maize) ...	100	100	100	88	88		
			Other *bhadoi* cereals and *bhadoi* pulses.	2,500	2,700	2,600	69	81		
			Other food-crops (*e.g.*, vegetables).	3,000	3,500	3,300	81	75		
			Other non-food-crops (*e.g.*, jute, indigo, *bhadoi til*, *sunn* hemp, mulberry, &c., &c.).	28,700	36,500	35,000	81	81		
			Total ...	80,300	98,800	88,000	85	83		
24-Parganas ...	1,344,640	1,082,900	*Bhadoi* paddy	108,700	108,500	122,100	90	106	The increase in area in column 7 is due to the conversion of some jute lands into *aus* paddy lands. The outturn is favourable owing to seasonable rainfall.	
			Other *bhadoi* cereals and *bhadoi* pulses.	3,000	2,600	2,600	65	75		
			Other food-crops (*e.g.*, vegetables).	4,900	5,200	5,400	75	96		
			Other non-food-crops (*e.g.*, jute, indigo, *bhadoi til*, *sunn* hemp, mulberry, &c., &c.).	42,000	40,700	23,300	75	109		
			Total ...	158,600	157,000	153,400	79	104		
Nadia ...	1,758,160	1,363,000	*Bhadoi* paddy	276,500	331,700	412,400	91	89	The increase in the area sown, as well as in the outturn, is due to seasonable rainfall.	Probably paddy was grown largely this year in preference to jute.
			Indian-corn (maize) ...	1,000	100	100	62	65		
			Other *bhadoi* cereals and *bhadoi* pulses.	45,200	29,800	30,000	75	70		
			Other food-crops (*e.g.*, vegetables).	20,900	16,200	15,200	81	80	The decrease in the area sown with non-food-crops is due to the difficulty in steeping jute and to the closing of some indigo factories.	It appears that the steeping of jute has been prohibited by the local authorities, on sanitary grounds, in tanks or *jhils*, the water of which is used by the public for drinking.
			Other non-food-crops (*e.g.*, jute, indigo, *bhadoi til*, *sunn* hemp, mulberry, &c., &c.).	107,500	89,400	70,700	81	66		
			Total ...	451,200	267,200	528,400	80	87

* Estimated by this Department.

FINAL REPORT ON THE WINTER RICE CROP IN BENGAL, 1898.

THE following is published for general information.

F. A. SLACK,

The 17th December 1898. *Offg. Secy. to the Govt. of Bengal.*

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL.

Final report on the Winter Rice Crop in Bengal, 1898.

1. *Character of the season.*—The character of the season up to September last was described in the first forecast of the winter rice crop, issued on the 5th of October. In April, the rainfall was somewhat deficient over the whole of Bengal proper, was normal in Bihar and Chota Nagpur, and slightly above the normal in Orissa. In May, it was a little below the average in almost all parts of these Provinces. In June, the rainfall was abundant in Bengal proper and Chota Nagpur, and was evenly distributed. In Bihar and Orissa, it was in defect. In July, it was generally below the normal, and, in August, in excess of the normal everywhere, excepting parts of North Bengal and North Bihar, where rain was wanted at that time for transplantation. In September, excessive rain fell throughout all parts of these Provinces excepting Orissa, where the deficiency interfered with the work of transplantation. The falls were heaviest in Bihar and North Bengal. There was a small excess in Lower Bengal, and a moderate excess in Chota Nagpur. As already reported in the preliminary forcast, this abnormal rain caused high floods in several parts of Bihar, but the damage done has not been so great as was feared in October last. Although the crop in low-lying lands suffered seriously, outside the submerged tracts and on high lands, the heavy rain was of actual benefit. In October, less than the normal rain fell in Bihar and Chota Nagpur and more than the normal elsewhere. In November, there was practically no rain, only a few slight showers being received in Darjeeling, Jalpaiguri and Puri. This has been favourable to harvesting operations. Damage was done by grasshoppers in Midnapore, the extent of which is noted in the Provincial statement appended to this note. Insect pests appeared in Backergunge and Balasore, but they do not appear to have done much injury.

2. *Area cultivated.*—The normal area under winter rice was shown in the forecast of October last to amount to 31,195,600 acres. This area was arrived at partly from a consideration of the areas sown during the past five years and partly from figures obtained by special enquiry. Further revision has been made since, by the District Officers of the 24 Parganas, Champaran and Cuttack, in consequence of which, the normal area for the Province now stands at 30,987,000 acres as shown in column 5, page 14 of the

appended statements. No alterations have been made in last year's area, but revised figures for this year's area have been received from Rajshahi, Faridpur, Tippera and Champaran, and the area under cultivation this year for the whole Province is now estimated at 31,944,400 acres, against 31,815,500 acres estimated to have been cultivated last year. The increase in cultivation is due, as explained in the first forecast, to seasonable weather and to the cultivation of winter rice in preference to jute.

3. *Character of the crop.*—In the forecast of October last, the winter rice crop was roughly estimated by this Department as a 95 per cent. crop. It was doubtful at the time how far the floods of September had injured the crop. It would now appear that the damage done has been confined to comparatively small areas and has not in any way affected the Province as a whole. In fact, the heavy rain of September and the good weather of October have done much good to the rice crop in many parts of these Provinces. The local officers of no fewer than 20 districts now anticipate a higher outturn than was looked for at the time of the first forecast, while 11 officers have made no change in their estimates and 14 have reduced them. Of the 45 districts of these Provinces, 18 districts report crops above the normal (100 per cent. crop), 7 districts report normal crops, 19 districts crops between 75 per cent. and 100 per cent., and only one district, viz. Muzaffarpur (where the crop was much damaged by flood water), reports a crop (54 per cent.) less than 75 per cent. It seems clear, therefore, that the prospects of the crop have been favourably affected by the weather of the past three months, and that an outturn somewhat in excess of the normal may be expected. I have accordingly estimated the crop at 105 per cent. The outturn last year, as shown in column 8, page 14 of the Provincial statement annexed hereto, amounted to 97 per cent., and this crop was reaped over a slightly smaller area than that sown in the present year.

4. *Gross outturn.*—Accepting 105 per cent. as the best estimate for this year, the gross outturn of cleaned winter rice for the Province will amount to 369,642,300 cwts. against 340,101,200 cwts., the yield for last year produced from a 97 per cent. crop.

N. N. BANERJEI,
Assistant Director of Land Records and Agriculture, Bengal.

(Countersigned,)

P. C. LYON,
Director of Land Records and Agriculture, Bengal.

CALCUTTA,
The 15th December 1898.

APPENDIX I.

Final Report on the Winter Rice Crop of Bengal, 1898.

Birbhum	Sadar	709,120	900,000	393,300	390,600	393,300	119	113	There has been more than sufficient rain during the last rainy season. Some slight damage was done to the crop in Rampur Hát by excessive rain in October. The crop on the whole is not far short of a bumper crop.	
	Rampur Hát ...	412,800		211,600	225,900	226,100	106	113		
	District Total ..	1,121,920	900,000	604,900	615,900	619,400	112	113		

1	2	3	4	5	6	7	8	9	10	11
District.	Subdivision.	Total area of subdivision in acres.	Total area estimated to be under cultivation in acres.	Approximate normal area under winter rice in acres.	Approximate area under winter rice last year in acres.	Estimated area under winter rice this year in acres.	Taking 100 to represent the normal outturn, how much represented the outturn last year?	Taking 100 to represent the normal outturn, how much will represent this year's outturn?	Remarks by District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
Bankura	Sadar	1,230,080	468,800	346,000	355,000	355,000	105	112	Owing to favourable rainfall in October last the outturn is estimated above normal.	
	Vishnupur ...	446,000	214,000	180,400	182,000	182,000	105	112		
	District Total ...	1,677,480	682,800	526,400	537,000	537,000	105	112		
Midnapore	Sadar	2,093,440	1,220,100	717,500	760,000	760,000	105	105	The area brought under cultivation this year is smaller than that of last year everywhere except in the Sadar subdivision, and is due to the submersion of some lands under water. In the Sadar subdivision the outturn has been good. In Tamluk and Ghattal the crop has been damaged by floods and in Contai by heavy rain in September. Grasshoppers also damaged the crops badly in Ghattal and Contai.	The Collector reports that in Ghattal 5 per cent. of the crop was affected by the ravages of grasshoppers over an area of 10,880 acres in thana Chandrakona, and that in Contai 12 per cent. was so affected in thana Egra covering an area of 55,600 acres, and 62 per cent. in Pataspur, covering an area of 64,550 acres.
	Tamluk	417,920	279,600	230,500	230,500	230,000	100	75

24-Parganas	Sadar	533,700	462,700	255,700	300,700	340,500	100	100	The increase in the area under the winter rice crop this year is due to favourable rainfall. In the south of the district sowings were retarded owing to insufficient rain during the early part of the season, but subsequent rains have improved the prospects of the crop, and the outturn is expected to be not below the average. Transplantation was somewhat delayed, especially in Diamond Harbour, for want of rain.
	Barasat	315,600	288,400	102,100	117,100	117,100	100	110	
	Basirhat	230,400	193,500	142,500	142,500	142,500	100	100

PROVINCE.	ACREAGE.					OUTTURN IN CWT.					Remarks by the Department of Land Records and Agriculture, Bengal.
	Of current year's crop.	Of previous year's crop.	Average of four preceding years, viz., 1893 to 1896.	Percentage by which column 2 exceeds (+) or falls short of (—) area in—		Estimated yield of current year, i.e., of area in column 2.	Yield of previous year, i.e., of area in column 3.	Average of four preceding years, viz., 1893 to 1896.	Percentage by which column 7 exceeds (+) or falls short of (—) outturn in—		
				Column 3.	Column 4.				Column 8.	Column 9.	
1	2	3	4	5	6	7	8	9	10	11	12
Bengal	31,944,400	31,815,600	30,440,000	+·4	+5	369,462,300	340,101,200	281,713,000	+8·6	+31·1	The outturn in columns 7 and 8 have been calculated with reference to the area and percentage outturn and to the normal rate of yield which has been assumed to be 15 maunds of cleaned rice to the acre.

RESOLUTION ON THE ANNUAL GENERAL ADMINISTRATION REPORT OF THE PATNA DIVISION FOR THE YEAR 1897-98.

GENERAL DEPARTMENT—MISCELLANEOUS.

Calcutta, the 20th December 1898.

RESOLUTION—No. 3837.

READ—

The Annual General Administration Report of the Patna Division for the year 1897-98.

Mr. Bourdillon was in charge of the Division from the 1st April 1897 till the 18th of March 1898, when he was succeeded by Mr. Collier, by whom the report was submitted only four days after the date it was due. There were changes of officers in all districts and also in all subdivisions except four.

2. *Tours and Inspections.*—The necessities of famine work and the inspection of the various plague camps interfered greatly with the Commissioner's regular work of inspection; but these very causes enabled him to move more about his Division than a Commissioner ordinarily can. No record, however, appears to have been kept of the actual number of days he was on tour. The Collector of Patna, Mr. Inglis, was on tour for 77 days only, and Mr. Blackwood, the Subdivisional Officer of Samastipur, for 87 days only. These shortcomings have been duly explained; and, excepting them, all the tours were adequate in the matter of inspections and largely above the average in length.

3. *Weather and crops.*—The rainfall during the year was plentiful and on the whole well distributed. The eastern portion of the Saran district was flooded to the extent of about 800 square miles by the abnormal rainfall in the last week of June, and the *bhadoi* crop was thereby reduced to a 14-anna outturn. Excessive moisture was the cause of the *bhadoi* crops in Champaran showing a similar yield; and of the outturn in Patna being only 9 annas. In the remaining districts there was not much variation from the 16-anna average crop. The *aghani* crop was everywhere either an average one or above that standard. This result is attributable to the unusually favourable rainfall in October, which was also the cause of the excellent *rabi* crops that were obtained throughout the Division. On the whole the year was a fairly favourable one for the poppy crop, but the indigo crop was poor.

4. *Public health.*—In all the districts of the Division, except Gaya and Shahabad, the year was healthier than the preceding one, in spite of the famine. In Gaya the increased mortality is said to have been partly due to the success of the efforts to obtain improved registration, while in Shahabad the epidemic of fever that raged in that district at the end of the rains is assigned as the cause. The material condition of the people was far below the normal during the first five months of the year, but a succession of good crops quickly improved their condition, and the Commissioner considers that by the end of the year the normal condition of affairs had revived, with perhaps the one exception that indebtedness had increased to some extent.

5. *Emigration and Immigration.*—The number of emigrants to the Colonies and the tea districts decreased considerably as compared with 1896-97, the figures being 1,329 and 447, as compared with 1,997 and 834, respectively. This is attributed partly to the South Bihar-Moghulserai Railway extension work and partly to the famine relief works, which afforded ample employment for such as wanted it. The general condition of the depôts was fair. There is no immigration into the Division.

6. *Prices of food and labour.*—At the beginning of the year the prices of food-grains were in some districts double those which obtained at the commencement of the previous year, and they continued to rise till well on into August. By the end of September the fall became marked, and at the close of the year common rice was only 13 to 33 per cent. above the

normal price. This rise in prices had but little effect on the wages of labour, which are chiefly paid in kind. In Gaya the wage of black smiths did indeed rise, but this was due to the large increase in the demand for the labour of artizans of this class, caused by the construction of the two railway lines.

7. *Trade and Statistics.*—The total traffic of the Division increased by over 19 lakhs of maunds. Imports, of which over 48 per cent were food-grains, rose from 108⅔ to 147⅖ lakhs of maunds, while exports, of which only 26 per cent. were food-grains, fell from 71½ to 52⅐ lakhs of maunds. The chief imports were rice and paddy, of which no less than 25 lakhs of maunds were imported from Calcutta alone as compared with 6 lakhs of maunds in 1896-97 and 292 maunds in 1895-96. This increase was, of course, entirely due to the demand for Burma rice created by the famine. Gram and pulses formed the principal articles of export. The traffic to and from Bihar *viâ* the Nadia rivers was again very insignificant.

8. *Civil Justice.*—The number of civil suits disposed of by the District and Subordinate Judges was almost the same as in the previous year, while those disposed of by Munsifs rose from 38,259 to 41,345, the increase being chiefly under the head of rent suits, of which Munsifs decided 24,770. No explanations of the fluctuations have been furnished by the District Judges.

9. *Crime.*—There was a very serious increase of over 38 per cent. in the number of cognizable offences reported, the number being 41,149 as against 30,056 the previous year. The increase was common to all districts in the Division and is attributed to the scarcity. From the fact that there was an increase of no less than 9,951 nearly 90 per cent. of the entire increase) in the number of offences against property, it would seem that the explanation offered is correct, and it is hoped that the figures of the current year will support this opinion. There was a trifling increase of 370 in the number of non-cogniz able cases reported. Though there was an increase of 239 in the number of bad livelihood prosecutions instituted, only 26·7 of the cases were tried in or near the villages of the accused. This is doubtless partly accounted for by Subdivisional Officers being prevented by famine work from making their regular tours, yet there is no disguising the fact that such a state of affairs is most unsatisfactory, and the Lieutenant-Governor would impress on all District Officers the paramount importance in cases of this nature of checking and verifying among the neighbours the information as to the evil repute of the accused, for it is only by so doing that there can be any certainty of arriving at a just or true decision The question of the Dome settlements is receiving the separate consideration of Government.

A separate resolution concerning the police and chaukidars having already been issued from the Judicial Department, the facts now reported need no detailed comments; but the Lieutenant-Governor would observe that the Commissioner's remarks in paragraph 117 have his entire approval.

10. *Criminal Justice.*—On an average there were nearly ten more Magistrates sitting than dur ng the preceding year (when the number of Magistrates was also exceptionally large), and per officer the number of cases disposed of rose from 194 to 210·4 ; while there was a slight decrease in the number of witnesses examined, as also in the proportion of witnesses detained over two days, the percentage in the latter being 4·2 as against 4·8 the previous year. The very material improvement which has taken place in this respect in Patna and Barh has been noted with satisfaction, though the percentage in the latter (10·8) is still much higher than it should be. A similar remark applies to Hajipur and Samastipur, where the figures were 9·53 and 13·3, respectively. The percentages were lowest in Dinapore (1·58), Gopalganj (·7), and Aurangabad (·22). In the last-named place, if the figures have been correctly given, the result is extremely creditable, as there was only one Magistrate employed, who disposed of no fewer than 596 cases, with an average of 4·5 witnesses in each. Taking the working year as containing 280 days, it would appear that this Magistrate on the average examined daily 9·6 witnesses, a singularly large number, and the Commissioner should satisfy himself of the accuracy of these figures.

The ratio of A forms remanded six times or more to total A forms was 5·8 as against 6·01 for the Division, and was highest in Buxar (22), Sasaram

(14·6), Bankipore (12·7), Samastipur (11·9), Sewan (11·58). The attention of the various District Officers concerned, and especially of the Magistrate of Shahabad, should be drawn to these figures. From the Commissioner's remarks it would appear that in Shahabad this delay is to some extent inexcusable.

The ratio per cent. of decisions confirmed on appeal to the total appealed against was 80·9 as compared with 79·9 of the previous year, and not (as is shown by the Commissioner in paragraphs 118 and 119), 76·5 as compared with 80·4. It is presumed that the statistics furnished in paragraph 118 of the Commissioner's report have been compiled from those in Table XI; but they appear to be utterly inaccurate both in this respect and in the number of witnesses detained two days and in the ratio of A forms remanded six times or more. The figures utilised in this review have been taken direct from Table XI. The Commissioner's attention is drawn to this discrepancy, and he is requested to take steps to prevent its recurrence. With the exception of Madhubani, where the percentage of sentences confirmed on appeal to those appealed against was 47·8, all the subdivisions return a percentage under this head of 70 or over. The bad results in Madhubani are solely due to the work done by M. Gauhar Ali, only 25 per cent. of whose judgments, out of a total of 59 appealed against, were upheld on appeal. The percentage of sessions cases in which convictions were obtained to the total number disposed of was 73·9, as compared with 72·7 the previous year. Shahabad showed the worst result and Gaya and Darbhanga the best. Shahabad occupied the same unenviable position last year, while in Patna the percentage decreased from 90 to 70. Out of Rs. 1,02,611, the total of the fines outstanding for collection, Rs. 88,024 only were collected during the year, and Rs. 38,938-7-10 were written off, leaving a balance of Rs. 60,648-9-1 to be collected. While the Lieutenant-Governor agrees with the Commissioner that there is a tendency to keep unrealised fines in the Register much longer than is necessary or even expedient, he cannot go quite so far as the Commissioner in the opinion that if an accused has no property the fine should be written off at once. Such a procedure would absolutely prohibit the levy of fines from offenders whose sole means of livelihood was their monthly salary, and from whom the police are, in the existing state of the law, fully justified by realising in instalments. The state of the balance sheet is far from satisfactory, and there is no surer index to the character of an officer's criminal work than the judgment he displays in the imposition of fines. The power of fining when used by a good officer is one of the most salutary means for ensuring effectual criminal administration; but when, as from these figures it would appear to be the case in the Patna Division, fines have been imposed indiscriminately and with no regard to the power of the person fined to meet the demand made, a very powerful weapon of oppression is put into the hands of the police. Under the law imprisonment in default does not exonerate the convict from the payment of the fine and the constant dread of measures for its enforcement. The results were most unsatisfactory in Champaran, where only 31 per cent. of the total outstandings was realised, and best in Darbhanga, where 64 per cent. was realised.

It is to be regretted that discrepancies, similar to those between the figures in Statement XI and paragraph 118, are also found between the statement in paragraph 123 and Statement XII in which statistics of the work done by Honorary Magistrates are examined. It would appear from the former tables that the Divisional percentage of witnesses detained over two days to those examined was 9·03 (and not 9·4) as against 5·3 of the previous year, while the percentage of successful appeals to appeals preferred was 70·4 (and not 73·0) as against 62·9 the previous year. It is not certain on the papers whether the Honorary Magistrates are responsible for these delays. They may be due to unpunctuality in attendance; they may be due to insufficient attention by the District Magistrates in the allotment of cases to the fixed dates for the sitting of the Honorary Magistrates. The Commissioner will be requested to enquire into the matter. From Honorary Magistrates sitting singly the best results are due, as they have not to contend with the difficulty experienced in Benches, where despatch in the disposal of case work is dependent on the regularity of a colleague's attendance. It is, however, observed, with much regret, that the worst figures appear against the names of certain of these

officers, but for such there may be, it is hoped, some satisfactory explanations, though none have been given by the Commissioner.

The only Benches in which similarly bad results are shown are those of Aurangabad (27·67), Buxar (23·5), Madhubani (23·3) and Samastipur (22·9). As the Commissioner has remarked, the entire working of the two last-named Benches has been most unsatisfactory. It is pleasing to turn from this list of shortcomings to notice the good work done by the Nawada, Jahanabad, Sewan and Daudnagar Benches, and above all by the Gaya Bench.

11. *Registration of documents.*—Two new offices were opened in the Division during the year, one in Saran and the other in Muzaffarpur. There was a large increase in the number of documents registered which rose from 156,233 to 195,010. The scarcity which prevailed during the first-half of the year is assigned as the cause.

12. *Land Revenue.*—The current demand for land revenue during the year was Rs. 82,21,300 as against Rs. 82,22,835 in the previous year. The difference is trifling. The percentage of current collections to total current demand was 97·1 as against 96·9 in the previous year, and of total collection to total demand 96·11, the same as in 1896-97. In permanently-settled estates the current collections were 98·2 of the current demand as against 98·09 the previous year. In Shahabad the number of estates defaulting rose from 5,326 to 7,040, but the number sold also increased from 49 to 205. It is clear from the figures of previous years that in Shahabad defaults are made habitually, and it is trusted that steps will be taken to check the growth of this habit.

The collections in temporarily-settled estates and in estates held direct by Government are exhibited below and compared with the standard district by district:—

	Temporarily-settled estates.	Government estates.
	Per cent.	Per cent.
Standard	95	90
Patna	77·42	67·49
Gaya	96·01	82·56
Shahabad	87·41	56·24
Saran	91·46	52·33
Champaran	84·29	...
Muzaffarpur	81·57	...
Darbhanga	96·29	69·49

The sale law throughout the Division was applied with moderation, only 5·3 per cent. (as against 4·3 per cent. in the previous year) of the estates which had rendered themselves liable to sale having been actually sold. It is satisfactory to note that Register D has been re-written in all the districts of the Division, except Saran, and that the outturn of partition work was so satisfactory. Under the Land Improvement Act, XIX of 1883, Rs. 20,360 were advanced in Darbhanga. With a view to enabling raiyats impoverished by the famine to purchase seed and cattle, a sum of 12 lakhs of rupees was placed at the disposal of District Officers, of which only some 7 lakhs were actually given out. Of this sum over two lakhs were distributed in each of the districts of Saran and Champaran, and in Muzaffarpur Rs. 1,75,000 odd. The total collections were Rs. 91,487.

13. *Wards' and attached estates.*—Charge of the Bettiah Estate was assumed on the first of April 1897; but, owing to the release of the estate of Kuar Bhagwant Prashad of Patna, the number of estates at the end of the year was the same as in 1896-97. The Government demand on account of revenue and cesses amounted to Rs. 12,28,066 as against Rs. 5,94,384 in the previous year, the increase being due to the assumption of charge of the Bettiah Estate, and to a complete year's demand having been shown against the Hatwa Estate. Of this sum, Rs. 11,52,838 were collected; and, with the exception of Rs. 2,279 due from two very heavily involved and petty estates in Saran, the balance is being or has been realised.

The rent and cesses due to the estates amounted to Rs. 43,01,402 current and Rs. 26,50,659 arrear. The total collections amounted to Rs. 43,47,110 or 62·5 per cent. on the total as against 36·3 in the previous year. It is satisfactory to

note that the arrear is now less than the current demand. Rupees 1,31,374 were remitted during the year, leaving a balance of Rs. 24,35,782 outstanding at the close of the year. The Lieutenant-Governor would have been glad of an assurance that full attention had been given to the classification and remission of arrears, but he fears that the figures in the report show that much still remains to be done under this head. The debts due from the estates at the commencement of the year amounted to Rs. 92,20,395, of which no less than Rs. 82,23,760 are owed by the Bettiah Estate alone. By the close of the year the total of the debts due from all estates was reduced to Rs 90,30,067. The cost of management fell from 17·1 on the current rent and cess demands of all estates to 9·01, mainly owing to the cheapness of management in the Bettiah Estate, where almost all the dues are collected from ticcadars. The total expenditure on improvements amounted to Rs. 4,11,238. Almost all the estates showed an increase in this respect over the figures of the previous year, the most marked increases being in the Tikari Estate in Gaya and the Bhalvadra Prashad Sing Estates in Shahabad, while the Majhauli and Hatwa Estates in Saran showed a decrease.

14. *Excise: Stamps: and Income-tax.*—The excise revenue, which up to 1896-97 had been steadily growing, sustained during the year under report a further check in its growth. Whereas last year the deficit was a little over a lakh, the figures of the present year show a decrease of over two lakhs as compared with those of 1896-97. This was undoubtedly due to the famine, and a substantial increase of revenue may be expected with the return of prosperity. The opium revenue of the Division decreased by Rs. 1,235, but the decrease was confined to the two districts of Patna and Gaya, and in the latter it was inappreciable. There was an increase of Rs. 27,767 in stamp revenue, the total of which for the year under report was Rs. 22,83,777. The most substantial increase (Rs. 44,165) occurred under impressed sheets, and is attributed to the execution of a large number of bonds and deeds of sale as a result of the famine. There were large decreases under court-fees (Rs. 16,796 and hundis (Rs. 11,803), which of course illustrate the reflex action of the scarcity on the sale of stamps. There was an increase of 2·9 per cent. in the final demand on account of income tax, which stood at Rs. 4,59,581. All the districts of the Division not only reached the prescribed standard of collections, but showed percentages of 97 and over of collections to final demand. The increase, though at first sight strange as occurring in a year of famine, was the necessary outcome thereof. There are but few trades or manufactures in the Division, and the year was one of enormous profit to money-lenders and grain merchants, who form the bulk of the assessees.

15. *Railways.*—The construction of the South Bihar Railway line is nearly finished, and is expected to be open for goods traffic from 1899. About three-fourths of the total earthwork and one-third of the bridgework on the Moghalsarai-Gaya Railway have been completed. The construction of the feeder line in Champaran and the Hajipur-Katihar and Sakri-Jainagar extensions in connection with the Bengal and North-Western Railway were in progress. Complaints continue to be made about the unpunctuality of the train service in the Patna-Gaya and Bengal and North-Western Railways.

16. *Canals.*—As was to be expected, the area irrigated from the Sone Canals decreased from 522,143 bighas to 414,915 bighas, but it is still largely in excess of the area irrigated in 1895-96. The collections increased from Rs. 9,58,925 to Rs. 11,37,821, and the percentage of collections to total demand from 99·02 to 99·87, figures which reflect the greatest credit on the management. Several important irrigation schemes were started in Saran and Champaran as relief works; but the more important of them have not been yet finished.

17. *Communications.*—With the exception of Shahabad, the state of communications is said to have been fair in all the districts of the Division. In Shahabad the exigencies of the famine, the construction of the plague camp at Chausa, and the absorption of the subordinate staff on those works is said to have caused such damages to the state of the roads that two years will elapse before they are repaired. With the exception of the plague camp, these causes also operated in other districts; and laxity of supervision or an absence

of forethought and organization must also have contributed to this result. All the District Boards except those of Gaya and Saran worked fairly well up to their allotments. In the former the cause assigned is a strike (which has since been overcome) on the part of the contractors against making a security deposit in cash; and in Saran it is partly ascribed to the fact that a large number of bills were received too late to be settled within the year. Though it is satisfactory to note the improvement that has taken place in Saran, much remains to be done. With regard to the planting, the attention of the Commissioner is specially drawn to the remarks made on the subject in the Government resolution dealing with the General Administration Report of the Presidency Division, 1897-98, as they are specially relevant to the roadside lands in Bihar.

In future, as regards wells, the tabular statement should make some distinction between masonry and temporary wells, for the permanent value of the work done in ordinary years depends on whether it was carried out on masonry wells.

18. *Education.*—The number of schools in the Division fell from 6,431 to 6,236, and the number of pupils from 178,011 to 177,125. The decrease in the number of scholars is wonderfully little, considering the vicissitudes of the year, and it occurred chiefly in primary schools. The districts of Shahabad and Saran show the largest decrease in the number of pupils. The others were but little affected by the famine, while Champaran and Muzaffarpur actually showed an increase.

19. *Dispensaries and Hospitals.*—Three new dispensaries were opened during the year, two in Champaran, and one in Darbhanga. The total income of all dispensaries, of which 38·8 per cent. was derived from private subscriptions, was Rs. 1,94,007, an increase of Rs. 6,259 in the previous year's total. The total number of patients treated declined from 630,425 to 607,388, and the falling-off is attributed to the unusual healthiness of the year, to the attendance at famine hospitals, and to the absurd scares with regard to plague precautions which for a time gained such wide credence.

20. *Local Self-Government Institutions.*—It is satisfactory to learn that good progress has been made in improving the drainage of Patna; and since the report has been submitted the difficulty of obtaining a competent Secretary and one who would be acceptable to the Commissioners has been solved. Real progress is now expected in the improvement of the management and cleanliness of this important but unwieldy Municipality. The finances of the Arrah Municipality have engaged the attention of Government, and the Municipal Commissioners have but to utilise the powers placed in their hands by law to restore them to a sound footing. The marked improvement in the municipal administration in Saran, and more especially in Chapra, is one on which the Magistrate is to be congratulated. In Muzaffarpur all the municipalities showed a decrease both in income and expenditure. The omission to furnish an explanation on the subject should not recur. In Champaran and Darbhanga the administration was satisfactory. The District Boards are again reported to have worked harmoniously. Their total income was Rs. 18,77,028 as against Rs. 16,86,966 in the previous year, while the expenditure decreased from Rs. 18,39,859 to Rs. 15,13,838.

21. *Employment of Muhammadans.*—The percentage of appointments of all kinds held by Muhammadans to total employments fell from 30·9 to 24·5, but was still far in excess of the proportion of Muhammadans to the entire population, which was only 11·32.

22. *Post-offices.*—The total amount paid on inland money-orders (exclusive of money-orders remitting revenue or rent) in the various post-offices in Bihar was Rs. 1,18,14,072 as against Rs. 1,10,86,359 in 1896-97. This large increase of over seven lakhs, which was, however, accompanied by a decrease of 46,606 in the number of money-orders, is attributed to the increase, owing to the scarcity, in the number of temporary emigrants who had to remit money to their families. There was a similar increase of over seven lakhs in the amount of money remitted on money-orders issued at the various post-offices in the Division, and this is attributed to the sums which the officials on the large famine staffs had to send to their families and to the increase in the importation of grain.

23. *Public feeling.*—The relations between Hindus and Muhammadans were on the whole satisfactory, and though there was some slight friction in the Bihar subdivision of Patna and in Gaya, no actual conflict took place The year was rather remarkable for the series of absurd rumours which found much credence among the public. The Commissioner remarks:—

"The use of permanganate of potassium to purify some wells in Muzaffarpur apparently gave rise to the widely-spread rumour that Government had ordered all the wells to be poisoned, presumably to reduce the redundant population and expenditure on famine relief in the future. This rumour also spread into the neighbouring district of Saran Another scare was in connection with the total eclipse of January 21st, which was confidently expected to be followed by all kinds of horrors The publication of the original plague notifications started another panic, and thousands of the population fled away from Patna. This panic was echoed at Gaya, Arrah, Muzaffarpur, and Darbhanga, and the three municipalities in Saran. The publication of the revised plague regulations, the speeches of Sir Alexander Mackenzie at Bankipore and Muzaffarpur, and the explanations and influence of the District Officers caused the alarm to subside."

24. *Conduct of zamindars.*—The generosity of the Maharaja of Darbhanga and the Raja of Hatwa in assisting their tenants in the famine, was continued during the year under report, and has been an example and incentive to their brother-landlords of the Division. It has been a source of great satisfaction to the Lieutenant-Governor to hear of the good work done by the Shahabad and Saran zamindars. The thanks of Government have already been conveyed to the planting community for the invaluable assistance they afforded during the famine; and Sir John Woodburn would again put on record his sense of the obligation owed to them as a body. The Lieutenant-Governor has with deep regret just received the sad news of the death of the Maharaja of Darbhanga, a great landlord and a good man, to whose benevolence these reports are witness, a loss of which due acknowledgment is made in this Gazette, but which it would be impossible not to notice here.

The good work done by Mr. Bourdillon has been publicly acknowledged by a well-earned decoration, as also has the work of two of his Collectors. To the other officers of the Division, the Lieutenant-Governor would again tender his thanks for the devotion to duty and their ready self-denial and cheerful acceptance of hardship which were the leading characteristics of the work done in a year of special difficulty. Brighter days, it is trusted, are now in store for the Division, and in spite of the buffets of fortune the year has been one of steady progress. To Mr. Collier his thanks are due for an interesting report, extracts from which are published for general information.

By order of the Lieutenant Governor of Bengal,

F. A. SLACK,

Offg. Secy. to the Govt. of Bengal.

Extracts from the Annual General Administration Report of the Patna Division for the year 1897-98.

N.B.—The figures in column "Actual" have been taken from the district reports for the *Sadar*, but the figures for the column "normal" have been taken from the *Calcutta Gazette*, which appear to be mean for the whole district.

It will be seen that in all the districts except Darbhanga the rainfall was above the normal, and in every instance greater than in the preceding year, in most cases very much so.

32. The rainfall was on the whole plentiful and well distributed. There was sufficient rain to enable the land to be prepared for the *bhadoi* crop, though the excessive rain in June damaged the crop, especially in the Patna district. In Saran, the heavy rain during the last week of June flooded the eastern portion of the district to an extent of about 800 square miles. The *bhadoi* crops had to be resown in the flooded tract, and owing to excessive moisture and delay in resowing, the outturn was only a 14-anna one. In Champaran also, the *bhadoi* crop was damaged by floods, and the outturn was the same as in Saran, viz., 14 annas. In Muzaffarpur and Darbhanga, where the rainfall in June, July and August was much less than in the other districts, the *bhadoi* crops were very fair, being estimated at 16½ and 17 annas respectively. In the Gaya and Shahabad districts the *bhadoi* crops were also damaged by floods,

but did not fall very much below the average. The *aghani* crops were fair everywhere, and best in the districts south of the Ganges, and in Saran. The fall in October, which was much above the normal, not only much benefited the rice crop, but facilitated the preparation of the lands for the *rabi* crop. There was sufficient rain in the cold weather to prevent the *rabi* crops from drying up, and the outturn was above the average in all the districts of the Division, except Shahabad, where only a 13 annas crop was reaped.

33. The following statement gives the outturn of all three crops in the district, as estimated by the Director of Land Records, on the reports of District Officers:—

District.	Bhadoi.	Aghani.	Rabi.
1	2	3	4
Patna ..	9	17	15½
Gaya ...	14¾	18¾	16
Shahabad ..	15	18	13
Saran ...	14	17⅓	17
Champaran ...	14	16	19
Muzaffarpur ...	16½	16	19
Darbhanga ...	17	16	15¾

On the whole it is evident that the outturn of the crops of the year was decidedly good.

34. The year was, on the whole, a favourable one for the poppy. The outturn was everywhere better than last year, except in the three districts south of the Ganges, which showed a falling off. In the Motihari Circle, the outturn was more than double that of the preceding year, being 3,191 maunds, as compared to 1,594 maunds. In the Bettiah Circle the outturn was also more than doubled. The Collectors of Patna and Muzaffarpur have not mentioned the subject at all. The Collector of Gaya has given no estimate of the crop in annas. In Shahabad the crop is said to have been a 14-anna one. In Saran it is estimated at 14 annas, as compared with 9 annas last year. In Champaran the outturn is reported to have been 15 annas, as compared with 12 annas in the preceding year. In Darbhanga the outturn is estimated at 17 annas. On the whole, the crop appears to have been well up to the average.

35. The season commenced with good *kathia* rains, and sowings commenced early. Towards the end of October there was heavy rain which retarded the completion of the sowings, and damaged the young plants which had sprung up. The rain was followed by a spell of hot and dry weather which damaged the crop on the high lands, and, in many cases, necessitated resowings. Prospects, however, appeared very good until the second week in January, when the crop began to dry up for want of the usual Christmas rain. There were showers at the end of January, and also in the first-half of February, especially in the north Gangetic districts, which much improved the prospects of the crop. Some damage was done by hail in February, especially in the Aliganj Circle in Saran, where the loss of produce from this cause is estimated at 300 maunds. The setting in of strong west winds at the time of the collection of the crop impeded the free flow of the juice, and had an unfavourable

effect on the outturn. The general statistical results for the Division are given below :—

Season.	Estimated produce.	Actual outturn.	Payments to cultivators — On account of opium.	On account of leaves.	On account of trash.	Total.	Remarks.
1	2	3	4	5	6	7	8
	Mds.	Mds. s. ch.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.

							‡Approximate estimate calculated on 28,000 maunds damdetta opium, on 9,000 maunds leaves, and on 15,000 maunds trash.
							§Approximate estimate calculated on 28,000 maunds damdetta opium, on 13,950 maunds leaves, and on 20,000 maunds trash.

The indigo crop was a poor one. Particulars as to this crop will be found in paragraph 59 under "Manufactures and Mines."

IV.—PUBLIC HEALTH.

36. From the statement given in the margin, it is evident that the year 1897 was on the whole a very much more healthy one than the preceding year. In the districts of Gaya and Shahabad the mortality increased; instead of decreasing as in the other districts. The explanation of the increased mortality given by the Collectors of both districts is the same, viz., the heavy rainfall. The fact that there was a considerable increase of fever in both districts renders this explanation a probable one. The increased rainfall, however, apparently had the effect of making the remaining districts of the Division more healthy. Probably the natural drainage of the districts has a good deal to do with these apparently contradictory results. The reorganisation of the chaukidari system in Gaya probably has resulted in better reporting, and this fact may account for some of the apparent increase in that district. As regards Shahabad, there is no room for doubt that there was a serious increase in mortality, as an epidemic of fever raged in that district at the end of the rains. It has often been remarked that the district of Shahabad has become much less healthy since the construction of the canals and their distributaries,

District.	Population in 1891.	Number of deaths reported.			Ratio per mille.		
		1895.	1896.	1897.	1895.	1896.	1897.
1	2	3	4	5	6	7	8
Patna ...	1,769,004	53,533	73,814	56,576	30·26	41·64	31·9
Gaya ...	2,138,331	[illegible],305	73,858	79,273	31·	34·5	37·0
Shahabad ...	2,069,337	56,135	57,112	73,177	27·2	27·6	35·4
Saran ...	2,467,477	65,275	84,529	76,010	26·4	34·2	30·8
Champaran	1,859,465	59,092	71,325	64,717	32·26	40 29	34·8
Muzaffarpur	2,711,445	88,355	126,099	86,932	32·56	46 7	32·06
Darbhanga	2,801,955	91,805	117,467	76,665	29·19	41·9	27·3
Total ...	15,811,014	481,400	603,404	513,350	30·46	38·5	32·5

and their existence may account for the fact of an increased rainfall causing increased mortality. No instances are reported of deaths from absolute starvation, though the existence of famine during the greater portion of the year must of course have had its influence on the death-rate. The figures for each district may now be considered.

PATNA.

37. Mr LeMesurier remarks that the fact that the death-rate fell in the face of the prevailing high prices, indicates that the year was an unusually healthy one. Deaths from cholera fell from 7,322 in 1896, to 1,938. There were only 19 deaths reported in the district during the first quarter of the year, but a somewhat severe outbreak occurred in the Patna Municipality in April, and spread itself to other parts of the district. The number of deaths from small-pox was 1,414, as compared with 2,148 in the preceding year. Excluding cholera and small-pox, the reported deaths are 30·01 per mille, as compared with 36·31 per mille last year.

38. In *Gaya* the number of deaths from cholera rose to 6,425, against 4,696 in the preceding year. The Aurangabad subdivision shows the largest number of villages attacked, viz., 351. Deaths from small-pox rose to 2,600, as compared with 756 in the preceding year. There is said to be a very general opposition to vaccination in this district. The deaths from fever increased from 56,958 in the preceding year, to 59,249 in 1897, the rates per mille for the two years being 26·6 and 27·7 respectively. It seems probable that the term "fever" is made to include a good many diseases.

39. In *Shahabad* deaths from cholera increased from 2,859 in 1896, to 3,054 in 1897. Deaths from small-pox also rose from 1,429 in 1896, to 4,070 in 1897. There is some opposition to vaccination in this district, but apparently it is much less strong than in Gaya. Deaths from fever rose from 42,864 in 1896, to 55,779 in 1897.

40. Of the *Saran* district, Mr. Macpherson remarks as follows:—

"Although the deaths recorded were fewer than those of the year 1896, the average standard of health of the people of the district was not so good as in the previous year, owing to the famine."

Assuming that the deaths were correctly recorded in the two years, the correctness of this remark seems to be improbable. A lowering of the average standard of health could hardly be accompanied by a considerable fall in the death-rate. Deaths from cholera fell from 5,664 in 1896 to 878 in 1897, while deaths from small-pox rose from 264 to 899.

41. It appears that small-pox is increasing over a large portion of the Division, and it is obvious that vaccination requires to be pushed with more vigour. Deaths from fever decreased from 19·1 per mille of the population, to 17·2.

42. In *Champaran* the deaths from cholera reported were 1,309, as compared with 7,376 in 1896. Deaths from small-pox rose from 359 in the previous year, to 827 in 1897. The number of deaths from fever reported in 1897 was 46,939, as against 50,359 in 1896.

43. In *Muzaffarpur* there was a remarkable decrease in the number of deaths from cholera, the figures being 23,856 for 1896, and 955 for 1897. There was also a marked decrease in deaths from small-pox, the figures having fallen from 579 to 75. Deaths from fever also fell from 86,718 in 1896, to 73,340 in 1897.

44. *Darbhanga* bears the reputation of being the most unhealthy district in the Division. But according to the figures reported, it was the most healthy district in 1897, the death-rate being only 27·3, as compared with 41·9 in 1896—a most satisfactory improvement. Mr. Geake states that the general health of the town and the whole district was exceptionally good in 1897, and the figures certainly bear out this remark. Deaths from cholera fell from 17,491 in 1896, to 420 in 1897, and deaths from small-pox from 286 to 15, the latter being much the lowest figures for any district of the Division. Deaths from fever fell from 87,293 in 1896, to 65,256 in 1897.

45. The following table shows the births and deaths registered in each municipality, and the rate per mille:—

Statement showing the total number of deaths and the death-rate in the different Municipalities during the years 1896 and 1897.

District.	Town.	Population.	Deaths registered.				Births registered.			
			1896.	1897.	Rate per mille.		1896.	1897.	Rate per mille.

	Total ...	810,163	32,223	31,394	39·6	38·6	25,468	25,424	31·3	31·8

*Owing to the revision of the boundaries of the Siwan Municipality, the area and population of the municipality have been reduced from 4 square miles and 17,709 persons to 2·6 square miles and 14,785 persons, respectively, with effect from the 1st April 1897, *vide* Government Notification No. 4936, dated 19th December 1898.

46. It will be observed that 13 towns show a decreased death-rate, and 12. an increased rate. In the Patna district, the town of Patna shows an increase in the death-rate, while the three small municipalities show a decrease. All the municipalities in Gaya and Shahabad show an increase, and this fact agrees with the district totals for these districts. In Saran the municipalities of Chapra and Siwan show an increase, and Revelganj a decrease. All the municipalities in Champaran, Muzaffarpur, and Darbhanga show a decreased death-rate, and this fact agrees with the totals reported for those districts. The most unhealthy municipality in the Division, according to the figures, is Buxar, though Bhabua, which only reported a death-rate of 19·65 per mille in 1896, now trebles those figures for 1897, by reporting a death-rate of 60 06.

47. Birth registration seems to be as incorrect as usual in this Division. While the population of the Division is known to be increasing rapidly, these municipalities show an average death-rate of 38·6 and a birth-rate of 31·3. According to the figures, Bhabua is in a bad way, with a death-rate of 60·06 and a birth rate of 20·35. As the death-rate has been raised from 19·65 in 1896 to 60·06 in 1897, the local officers should now also give their attention to the reporting of births. This remark also applies to the Siwan Municipality, which reports a birth-rate of 20·78 only.

V.—MATERIAL CONDITION OF THE PEOPLE.

48. The material condition of the people, all over the Division, fell far below the normal standard during the first five months of the year. As noticed by Mr. Bourdillon last year (though the information actually refers to the year under report), the distress was greatest about the 5th June 1897, when the number on relief rose to 733,850, or 9·7 per cent. of the population of the affected area. The favourable *bhadoi*, *kharif* and *rabi* crops have, however, done much to ameliorate the condition of the people, which is now almost normal, except that indebtedness has increased to some extent.

49. The condition of the people in the districts south of the Ganges was very much more favourable than in those to the north, throughout the year. Of the Saran district, Mr. Chapman, the Collector, remarks that its material and

industrial resources are in ordinary years entirely inadequate for the support of its population. The population is denser than in any other rural district in India, having been 930 to the square mile at the last census, and now probably having reached 950 to the square mile. The pressure of the population on the means of subsistence is so great, that a large proportion of the male population has to leave the district to find work every cold weather. Mr. Chapman states:—

"Mr. Tytler, Sub-Deputy Opium Agent of Siwan, whose knowledge of the north and west of the district is unrivalled, estimates that 95 per cent. of the ordinary raiyats live and die in debt. Good seasons do not go far to increase their savings, for what profit they make is devoured immediately."

VI.—EMIGRATION AND IMMIGRATION.

50. The following table shows the number of emigrants registered during the last two years in the several districts of this Division:—

Name of District.	For the colonies.		For the tea districts.	
	1896-97.	1897-98.	1896-97.	1897-98.
1	2	3	4	5
Patna ...	355	364	...	...
Gaya ...	...	...	720	370
Shahabad ...	1,482	885	114	77
Saran ...	160	80	...	...
Champaran ...	...	...	...	...
Muzaffarpur ...	...	...		...
Darbhanga ...	...	...	...	...
Total ...	1,997	1,329	834	447

The increase in Patna is slight, and no special cause need be assigned for it. The falling off in the number of emigrants in Gaya is reported to be due partly to better agricultural prospects, and partly to the large demand for coolies on the Moghalserai and South Bihar Railways now under construction in that district. The decrease in Shahabad, the Magistrate states, may be accounted for partly by the reduction in the number of sub-depôts, and partly by the fact that ample work for all who required it was supplied on the Gaya-Moghalserai Railway works, and on famine relief works. All the emigrants registered in Saran were bound for Fiji. Of the 80 emigrants, only 5 were of the Saran district, 1 of Champaran, and the remaining 74 were from the North-Western Provinces and Oudh.

51. No emigrants either to the colonies or to the tea districts, were registered in the districts of Champaran, Muzaffarpur and Darbhanga. The Magistrate of Champaran reports that there is usually a considerable seasonal emigration in November, and again in March, for employment in harvesting the crops in Nepal, Purnea, and North Bengal, where much higher wages than those current in Champaran can be got. I do not think that this is stated quite accurately. There is certainly no emigration to Northern Bengal in March, as the *rabi* crops grown there are unimportant. I doubt if there is any to Purnea. The emigration in March is no doubt to Nepal only, though the emigration to the other places in November is considerable.

52. Mr. Chapman, the late Collector of Saran, states:—

"Every year, at the slack season during the cold weather, thousands migrate to Eastern Bengal and Assam for employment, and return for the cultivation of rice and *bhadoi* at the end of May. In December 1896 it was a matter of common observation, that the number of emigrants was much larger than usual. The villages I visited seemed deserted of their able-bodied male population, and the roads were lined with travellers to the East. I estimate that 25,000 persons, chiefly men, migrated."

There was free emigration from the Jagdispur estates in Shahabad belonging to Messrs. Mylne and Company to their grant in Burma.

53. The general condition of the depôts was, on the whole, saisfactory. The accommodation provided was generally sufficient, and the supply of drinking water plentiful. The sanitary arrangements were fairly good. There were no complaints during the year in regard to the system of recruiting.

54. There is practically no immigration into this Division.

VII.—PRICES OF FOOD AND LABOUR.

55. The following statement gives the price of common rice, wheat and maize on the last Saturday of each month in the year 1897-98:—

Statement showing the number of seers of common rice, wheat and maize to be purchased for one rupee in the several districts of this Division on the last Saturday of each month in the year 1897-98.

56. It will be observed that the year opened with very high prices. In some districts the prices were just double of those which ruled in the corresponding month of the preceding year. In the months of May, June, and July, prices gradually rose higher. At the end of August, there was a slight fall in some districts, due probably to the favourable prospects of the *bhadoi* crop. At the end of September, the fall was more marked. At the end of November, there was a very marked fall in all the districts, no doubt due to the fact that the prospects of the crop were assured all over the province. From this period to the end of the year, there was on the whole a general tendency in prices to fall. At the close of the year, though still higher than usual, they were very much lower than at the beginning of the year.

57. The cash wages of labour have shown very little variation. In Gaya the wages of blacksmiths are reported to have risen, in consequence of the demand for artizans of that class, occasioned by the construction of the two railway lines. All over the Division, agricultural labour is usually paid in kind, and the same number of seers are given whatever their price may be. The theories of political economists as to the factors which fix the rate of wages, have a very limited application in this country, where custom is almost the sole arbiter in such matters.

* * * * * * *

IX.—TRADE AND COMMERCE.

65. The statistics under this head, for the year under review, have been compiled in accordance with the instructions contained in Statistical Department Circular No. 103, dated 22nd July 1897. From the returns supplied by the railway audit offices, the Collectors have prepared and submitted two statements of the 24 chief articles mentioned in the Government order—one for imports, and the other for exports. These statements are submitted as appendices to this report, bearing Nos. XXXIII to XLVI. The District Officers have also submitted statistics shewing the import and export trade along the Nadia rivers, and along the canals, where available. Besides the above, two more statements of exports and imports, with regard to the trade of the several districts with Calcutta, have been prepared from the monthly statements published in the *Calcutta Gazette*.

66. The following amalgamated statement, shows the up and down import and export traffic, in the 24 chief articles of commerce, which has been recorded in the several districts of the division, as carried (1) by rail, (2) along the Nadia rivers, and (3) by canal during the year. They also include the trade with Calcutta, but not the frontier trade with Nepal, which is shown separately, further on in this chapter. It is to be noted, that in the statement below, the traffic between the different districts in this Division has been eliminated, and the result is that the totals represent the foreign trade of the Division as a whole, but the details for districts do not represent the total trade of each district, and therefore they will not tally with the district trade statistics to be found elsewhere in the report:—

STATEMENT A.

Statement showing separately the total import and export traffic carried by rail and along Nadia rivers and canals classified into up and down traffic during the year 1897-98.

67. Taking the Division as a whole, its trade amounted, during the year, to 1,99,60,198 maunds, of which imports were 1,47,41,349 maunds, and exports 52,18,849, as compared to a total of 1,80,23,000 maunds, and of imports and exports, of 1,08,68,000 maunds and 71,55,000 maunds, respectively, in the previous year. But I do not think that a detailed comparison with the previous year's figures will be of any use, as the returns for the year under report have been compiled on different principles, the trade of each district with other districts having been divided into up and down traffic, according to the geographical position of each district, as enjoined in the Government order dated 22nd July last, while in previous years all traffic going towards Calcutta used to be treated as "down" traffic, and all traffic coming from the direction of Calcutta as "up" traffic. I shall, therefore, confine my remark to a comparison of the total trade of the Division, as a whole, with previous years without going into details.

68. The subjoined statement shows an abstract of this trade, district by district, in thousands of maunds:—

District.	Imports—		Exports—		Total.		Total trade.
	From up country.	From down country.	To up country.	To down country.	Imports.	Exports.	
1	2	3	4	5	6	7	8
	Mds.	Mds.	Mds.	Mds.	Mds.	Mds.	Mds.
Patna ...	4,15	43,01	3,19	17,77	47,16	20,96	68,12
Gaya ...	2,33	8,91	20	3,50	11,24	3,70	14,94
Shahabad ...	2,67	17,37	3,06	6,27	20,04	8,33	28,37
Saran ...	12,09	9,55	65	2,42	21,64	3,07	24,71
Champaran ...	14	5,19	27	2,99	5,33	3,26	8,59
Muzaffarpur ...	2,43	13,63	67	3,21	16,06	3,88	19,94
Darbhanga ...	2,68	23,31	1,32	7,64	25,99	8,96	34,95
Total ...	26,49	1,20,97	9,36	42,80	1,47,46	52,16	1,99,62

It will thus be seen that the total imports during the year far exceeded the total exports in all the districts, and this is due to the high prices of food-grains during the year. Patna shows the largest trade and Champaran the smallest.

69. The following table compares the total trade of the Division during the past two years:—

	1896-97.	1897-98.	Difference.
1	2	3	4
	Mds.	Mds.	Mds.
Imports—			
Up	1,01,49,843	26,18,774	−75,01,069
Down	7,19,204	1,20,95,575	+1,13,76,371
Total ...	1,08,69,047	1,47,44,349	+38,75,302
Exports—			
Up	32,31,587	9,36,346	−22,95,241
Down	39,22,580	42,79,503	+3,56,923
Total ...	71,54,167	52,15,849	−19,38,318
Total Trade ...	1,80,23,214	1,99,60,198	+19,36,984
Net Trade	I+37,14,880	I+95,28,500	.....

As compared with the previous year, the total imports during the year show an increase of 38,75,302 maunds, or 35·6 per cent., against 4,87,967 maunds, or 4·7 per cent., in 1896-97, while the total exports exhibit a diminution of 19,38,318 maunds, or 27 per cent., against 45·4 per cent. in the preceding year. As already stated, the large increase in imports, and the falling off in the export trade, are due to the scarcity of food-grains during the year. The net result of the year's trade is, that in this Division the surplus of imports in 1897-98 was 48,13,620 maunds, in excess of the figures for 1896-97, but the volume of the trade increased by 19,36,984 maunds.

70. The statement below shows the traffic in food-grains during the past two years in thousands of maunds:—

Statement comparing the Food-grain traffic in 1896-97 and 1897-98 (in thousands of maunds).

	Imports—						Exports—					
	From up country.		From down country.		Total		To up country.		To down country.		Total.	
	1896-97.	1897-98.	1896-97	1897-98	1896-97.	1897-98	1896-97.	1897-98.	1896 97.	897-98	1896-97	1857-98.
1	2	3	4	5	6	7	8	9	10	11	12	13
Rice ...	26,01	3,51	41	36,59	26,42	40 30	2,98	1,34	27	52	3,25	1,86
Paddy	5,56	91	4	7,54	5,60	8,45	51	16	5	4	59	20
Wheat ...	38	3,85	50	11	88	3,96	47	23	73	57	1,20	80
Gram and pulse ...	1,16	71	5	97	1,21	1,68	15,58	2,81	5,56	5,88	21,14	8,72
Other food-grains ...	7,35	12,20	80	5,42	8,15	17,62	7,25	48	1,44	1,55	8,69	2,03
Total ..	40,46	21,38	1,81	50,63	42,27	72 01	8,62	5,05	8,07	8,56	34,90	13,61

From a comparison of the figures in the above statement with those shown in the table in the foregoing paragraph, it will be seen that out of a total import of 1,47,44,349 maunds in the year of report, 72,00,508 maunds, or 48·83 per cent., were food-grains. Similarly, out of an export of 52,15,849 maunds 13,60,962 maunds, or 26 per cent., consisted of food-grains. Compared with the previous year, there was an increase of 29,74,000 maunds in the total import of food-grains, while in exports there was a decrease of 21,29,000 maunds. The chief imports during the year were rice and paddy, which formed two-thirds of the total import, while the principal articles of export, were gram and pulses.

71. The usual statement showing the movement of some of the principal articles of commerce, district by district, is given below:—

Statement showing the movements by rail along Nadia rivers and by canals of the following articles in the districts of the Patna Division during the year ending 31st March 1898. (In thousands of maunds.)

River-borne traffic between Bihar and the Nadia river.

72. As remarked last year, river-borne traffic appears to have been almost entirely killed by the scarcity, as the following figures indicate:—

	1895-96.	1896-97.	1897-98.
	Mds.	Mds.	Mds.
Import ...	89,350	8,101	1,240
Export ...	3,80,466	2,102	3,766

73. During the year under report, statistics of river-borne traffic between Buxar and Ballia (North-Western Provinces, were registered for famine purposes. From 26th September 1897, to 31st March 1898, the total export of food-grains from Buxar was 4,66,394 maunds, while import into Buxar amounted to 2,55,606 maunds. Since the close of the year, arrangements have been made for the more thorough registration of these statistics.

Trade with Calcutta.

74. The subjoined statements exhibit separately the statistics of export and import trade, between Calcutta and the Districts of this Division, carried by all routes—rail, road, river and canal—during the year 1897-98:—

Exports from the Patna Division to Calcutta.

Whence exported.	Food-grains.

75. It will be seen that the total export of food-grains to Calcutta during the year remained almost the same as in the previous year, viz., 7,11,577 maunds against 7,12,802 maunds, but the total imports of food-grains from Calcutta rose from 6,35,178 maunds in 1896 97 to 25,34,986 in 1897-98. This large increase occurs chiefly under the head "Rice" and this is due to the large importation of Burma rice during the famine. The other items do not call for any special comment.

Trade with Nepal.

76. The statement below shows the statistics of the trade with Nepal during the past two years:—

Statement showing Statistics of the Trade with Nepal in 1896-97 and 1897-98.

ARTICLES.	Imports from Nepal.		Exports to Nepal.

* Omitting the figures for piece-goods.

77. It will be seen that the total imports show a slight increase of 41,619 maunds as compared with the previous year. The principal articles of import are food-grains, oilseeds and tobacco. As regards exports, the figures, as they stand, are complicated by the fact that in 1896-97 the piece-goods traffic was shown by value, while in the year of report it is not clear whether the figures represent the value, or the weight in maunds, as in 1895-96, and the district reports do not throw any light on the subject. The attention of the District Officers will be drawn to this for future guidance. However, eliminating from both years the figures against articles 18 and 19, we get a total export traffic for 1896-97 of 2,65,881 maunds, and in 1897-98 of 4,22,407 maunds, showing an increase of 1,56,526 maunds, which is noticeable chiefly in tobacco, salt and kerosine oil. On the other hand, there is a falling off under the heads "Gunny-bags," "Sugar," and "Coal and Coke."

* * * * * * *

XVII.—CONDITION OF THE DIVISION AS REGARDS LAND AND THE LAND REVENUE ADMINISTRATION.

131. The total number of estates in the Division in the year of report was 67,839, against 66,736 in the preceding year. The increase of 1,103 estates was mainly due to partitions effected during the year.

132. The current demand of the year was Rs. 82,21,300 against Rs. 82,22,835 in 1896-97. The demand of each class of estates is compared below with the corresponding figures for the preceding year:—

	1896-97.	1897-98.	Difference.
	Rs.	Rs.	Rs.
Class I (Permanently-settled estates) ...	77,59,195	77,61,076	+ 1,881
„ II (Temporarily-settled estates)	2,19,133	2,20,923	+ 1,490
„ III (Estates held direct by Government)	2,44,207	2,39,301	— 4,906
Total ...	82,22,835	82,21,300	— 1,535

The total exhibits a decrease of Rs. 1,535, against a net increase of Rs. 10,821 in 1896-97. The increase in the demand under Class I is mainly due to the transfer of the *jama* of estate Erazi Jahangirpur Mangurpal, in the district of Patna, to this class from Class III, and to the sale of some petty Government estates in Gaya, in 1896-97, the demands of which have subsequently been transferred to Class I. The increase in the demand under Class II is the net result of the resettlements at higher or lower *jamas*, and of the transfer of estates from one class to another. Under Class III, the decrease of Rs. 4,906, is chiefly due to the exclusion of a large amount of fictitious demand in Gaya, to the transfer of two estates, Raman Tolah and Erazi Jahangirpur, in Patna, to Classes II and I, and of two estates in Muzaffarpur to Class II.

133. The current collections under each class of estates are compared in the margin with the results of the year 1896-97. The total exhibits a net increase of Rs. 14,761. The percentage of total current collections on the total current demand, was 97·10, against 96·90 in 1896-97. The arrear collections amounted to Rs. 2,02,987, or 68·69 per cent., on the arrear demand of Rs. 2,95,524. The arrear and current collections together, amounted to Rs. 81,85,659, or 96·11 per cent., on the total demand of Rs. 85,16,824, against Rs. 85,05,945, and 96·11 per cent., in the previous year. The percentage of total collections on the current demand in permanently settled estates was 99·5, against 99·3 in 1896-97. The total remissions of land revenue granted during the year under report amounted to Rs. 5,497 as detailed in the margin. Remissions of grace were, as usual, allowed chiefly for loss of crops and the death, desertion and poverty of tenants. Remissions of right were allowed on account of deterioration of land, and nominal remissions were granted in consequence of mistakes in the accounts in the district of Gaya, on account of estate Bishunpur Bondu Chapra, in the district of Shahabad, having been under water, and for fluctuation in the demand in *sayer* revenue as well as for the non-settlement of relinquished holdings.

	Rs.
1. Remissions of grace ...	4,726
2. Ditto of right ...	533
3. Nominal remissions ...	238
Total ...	5,497

134. The balance amounted to Rs. 3,25,668 against Rs. 2,93,662 in the previous year, as distributed under each class of estates in the margin. The percentage of total balance on the total demand is 3·8, as against 3·9 in 1896-97. Of the total balance outstanding at the close of the year, a sum of Rs. 3,22,917 is reported to have been under recovery, and Rs. 2,751 is classed as doubtful and irrecoverable:

	1896-97.	1897-98.
	Rs.	Rs.
Class I ...	1,60,811	1,80,735
„ II ...	42,835	46,802
„ III ...	91,016	98,131
Total ...	2,95,662	3,25,668

135. Out of 10,392 estates and shares of estates which became liable to sale for non-payment of Government dues during the year of report, only 556, or 5·3 per cent., were actually sold. Of these, 317 were whole estates, and 239 were shares. The revenue demand of the properties sold was Rs. 56,744, and the dues for which they were brought to sale amounted to Rs. 33,191. The amount realised by sale was Rs. 5,38,338, or about ten times the Government revenue. Four whole estates, with an aggregate revenue of Rs. 3,078, were purchased by Government for Rs. 9. Deposits forfeited under section 23 of Act XI of 1859 amounted to Rs. 2,994, for estates, and Rs. 356 for shares. The sales of 16 estates and 22 shares were annulled during the year, and recommendations for annulment of sales on the ground of hardship were made in the case of two estates and one share. The sales were most numerous in the district of Shahabad, and the large number of defaults was due to famine in the Chainpur pargana. The law was generally enforced with moderation in all the districts.

136. The total number of certificates filed during the year was 61,052, against 62,912 in 1896-97. The total number of cases for disposal during the year, including those pending on the 1st April 1897, was 89,447, of which 61,494, or 68·7 per cent., were disposed of. In 15,739 cases the demand was paid on the mere issue of notice, in 27,759 cases on attachment of property of the judgment-debtors, and in 1,789 cases recourse to actual sale was necessary. In 4,445 cases the demand was paid on issue of warrants against the defaulters, while in three cases the debtors were imprisoned.

137. The total number of estates under direct management was the same as in the previous year, viz., 220, of which 200 were the exclusive property of Government, and 20 belonged to private individuals. A total sum of Rs. 49,274 was spent upon the management and improvement of estates, as per details in the margin.

	Rs.
Management proper	28,899
Miscellaneous improvements, including agricultural improvements and experiments	18,244
Sanitary improvement	2,131
Total ...	49,274

138. The total number of settlement cases for disposal during the year was 92, of which 68 were disposed of, resulting in a net increase of Rs. 3,500. These figures do not include the larger settlements which are under the Director of Agriculture, nor the smaller settlements under the Tenancy Act, which are under my general supervision.

	Rs.
Original settlements	14
Resettlements	31
Summary settlements	23
Total ...	68

139. The number of land registration cases pending at the close of the preceding year was 7,047, and the number instituted during the year of report was 24,246, thus making a total number of 31,293 cases for disposal during the year. Of these 24,347, or 77·8 per cent., were disposed of, against 25,076 cases and 78 per cent. in the preceding year. The expenditure on account of land registration charges during the year amounted to Rs. 3,846. The fees realised under section 64 of the Land Registration Act amounted to Rs. 1,231. The work of rewriting register D has been completed in all the districts, except Saran. The mauzawar register C is being revised in the district of Muzaffarpur, while in Darbhanga and Champaran it is proposed to revise the register at the cost of the Settlement Department.

140. The number of partition cases pending at the close of the preceding year was 999, and the number instituted during the year of report being 267, the total number of cases for disposal during the year was 1,266. The number of cases disposed of was 349, and the number pending at the close of the year was 917. No case was disposed of in the district of Champaran, though there were 12 cases for disposal in this district, all pending from 1896-97. The proceedings were stayed pending completion of the cadastral survey operations. It is satisfactory to notice that the disposals exceeded the institutions in all the districts, except Muzaffarpur. Special Deputy Collectors were employed for partition work in all the districts of the Division, except Champaran. The new Partition Act, V of 1897, has only recently been introduced in supersession of the old Act, VIII of 1876. The

new law has simplified the procedure to be observed at different stages of partition, and is a decided improvement on the old.

141. The total number of land acquisition cases on the file was 231, of which the proceedings in 64 cases were confirmed by the Board of Revenue during the year. 29·5 acres 2 roods 17 poles of land required by Government, Municipalities and District Boards &c., costing Rs. 46,835, were acquired under Act I, 1894. The Railway irrigation projects taken up during the late famine were under progress during the year.

142 Under the Land Improvement Loans Act, XIX of 1883, a sum of Rs. 25,500 was allotted to the several District Offices in the Division during the year, but only Rs. 27,984 was actually advanced, viz., Rs. 1,500 in Gaya, Rs. 6,124 in Champaran, and Rs. 20,360 in Darbhanga. The total amount realized during the year was Rs. 37,952. In consequence of the famine, there was an unusual demand for loans under the Agriculturists' Loans Act, for the purchase of seed and cattle. Out of a sum of Rs. 12,05,500 placed at the disposal of the several District Officers during the year, Rs. 6,98,861 only was actually given out, as noted in the margin. The amount collected during the year was Rs. 91,487.

	Rs.
Patna	2,258
Gaya	13,310
Shahabad ...	60,966
Saran	2,37,812
Champaran ...	2,19,344
Muzaffarpur ...	1,75,291
Darbhanga ...	361
Total ...	6,98,861

143. The relations between landlords and tenants were, on the whole, peaceful throughout the year except in the following cases:—

In the Barh subdivision of the district of Patna relations are said to have been somewhat strained, and a case under section 69 of the Tenancy Act resulted in a riot.

The Moorli Indigo concern in Champaran has not yet been able to settle its disputes with its tenants, who still refuse to sow indigo on their lands. In the Ramnagar estate in the same district, matters are said to be improving since the appointment of a European Manager. But the reputation which the Madhuban Babu has gained for want of sympathy towards his tenants, continues the same.

144. The working of the various sections of the Tenancy Act in the Division during the two years, 1896-97 and 1897-98, is shown below:—

	1896-97.	1897-98.
(1) Voluntary transfers, section 12 (3)	1,010	939
(2) Transfer by decree sale, section 13 (2) and 14 ...	.....	.....
(3) Transfer of tenures by succession, section 15 ...	2	4
(4) Commutation of rent payable in kind section 40 ...	37	45
(5) Appraisement of produce where rent is paid in kinds, sections 69 and 70	283	529
(6) Registration of improvements	114	217
(7) Application for certificate of Collector as to acquisition of land for building and other purposes, section 84	1	2
(8) Notices of resumption of land by landlords, section 87 (2)	515	809
(9) Written permission to landlords to measure land, under section 90	... ..	.....
(10) Applications for a survey and records-of-rights under Chapter X	4	1
(11) Local enquiries held by order of a Court, section 158	24	21
(12) Applications by Collectors for appointment of a common Manager, section 93	.....	1

It will be seen that there has been an increase in the number of cases under all the heads except under heads (1), (10) and (11). Mr. Maxwell, the Collector of Champaran, reports that there were 662 notices of resumption of land in his district, against 403 in 1896-97. The increase is attributed to the abandonment of a large number of holdings near the Dhanauti river, which has got the reputation of being very unhealthy.

* * * * * * *

XIX.—EXCISE.

153. The following statement shows, district by district, the total revenue derived from excise in the year of report and in each of the previous five years:—

District.	1892-93.	1893-94.	1894-95.	1895-96.	1896-97.	1897-98.	Increase or decrease in the last year, compared with the year 1896-97.
1	2	3	4	5	6	7	8
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Patna	6,50,796	6,63,047	6,82,276	7,36,845	7,19,249	6,37,100	—82,149
Gaya	5,37,231	6,14,126	6,56,030	6,25,960	5,57,874	5,13,976	—43,897
Shahabad ...	3,19,938	3,27,221	3,26,563	3,57,529	3,08,276	2,62,797	—45,479
Saran	3,22,741	3,29,316	3,20,259	3,33,609	3,22,795	3,15,191	— 7,604
Champaran ...	2,16,486	2,16,696	1,97,605	2,10,131	1,99,171	1,92,001	— 7,170
Muzaffarpur ...	2,42,338	2,55,328	2,64,885	2,39,615	2,66,678	2,59,005	— 7,673
Darbhanga ...	2,01,588	2,27,576	2,20,175	2,44,631	2,60,865	2,50,605	—10,260
Total ...	24,91,128	26,33,381	26,38,784	27,28,250	26,34,807	24,30,675	2,04,132

154. The year under review was not favourable to excise settlements, on account of the famine, and the revenue which has shown a steady increase for some years past, suffered a diminution of about a lakh of rupees in 1896-97, and a further loss of about double the amount during the year of report. The decrease occurred in all the districts.

155. A comparison of the details of revenue derived under each head of exciseable articles during the year under review, with the results of the previous year, shows that the falling off was the largest under the heads "Country spirits" (Rs. 1,36,655), "Tari" (Rs. 6,381), "Ganja and Bhang" (Rs. 60,839), and "Opium" (Rs. 1,245).

156. The decrease under the head of "Country spirit" is shared by all the districts. The largest fall was in Gaya, where the decrease amounts to Rs. 52,395; next to it comes Patna with a decrease of Rs. 37,289, and next Shahabad, where the decrease is Rs. 19,761. In Saran the falling off amounts to Rs. 14,293, and in Champaran and Muzaffarpur, to Rs. 6,693, and Rs. 5,571, respectively, while in Darbhanga it is only Rs. 652. The decrease in the revenue is attributed by all the District Officers to the short consumption of distillery liquor on account of the famine, and to the settlement of outstills at reduced fees owing to the high prices of food-grains which prevailed at the time the shops were settled. Mr. Oldham, the Collector of Gaya, has also assigned the following reason for the large decrease in the revenue in his district:—

"A great difficulty was experienced in the settlement of outstill licenses owing to the high incidence of taxation on outstill liquor in this district, as compared with the other districts in the Division, the generally poorer condition of the local *abkars*, the dearness of *mahua*, and finally a strong combination among the *abkars* against taking settlement at the upset fees. The Excise Deputy Collector visited several other districts in the Patna and Bhagalpur Divisions, and succeeded in importing a number of substantial *abkars* and settling with them outstills and other shops bearing more than half the total amount of annual fees."

157. Under the head "Tari" there has been a large decrease of Rs. 16,658 in Patna, but this was greatly counterbalanced by the increase of revenue under this head, amounting to Rs. 7,624, in the district of Gaya. Mr. LeMesurier, the Collector of Patna, ascribes the falling off in his district to the non-payment of advance fees for 1898-99, as no *tari* shops were settled until after the close of the year, owing to the lateness of the *tari* season, and to a smaller collection of the current demand, as a greater portion of it was paid in advance in 1896-97.

158. The fall of revenue in *ganja* and *bhang* occurred in Patna (Rs. 25,844), Shahabad (Rs. 25,523), Darbhanga (Rs. 10,320), Champaran (Rs. 2,692) and Muzaffarpur (Rs. 2,266). In Patna and Shahabad the decrease is attributed to the smaller export of the drug to the North-Western Provinces, and in Darbhanga, Champaran and Muzaffarpur to the smaller export to Nepal. In the two remaining districts of Gaya and Saran, there was an increase of revenue to the extent of Rs. 576, and Rs. 5,230, respectively. In the former district, the increase is attributed to the settlement of the shops at favourable rates, and to the payment of advance fees in March 1898, while in the latter it is chiefly due to the export of about 25 maunds of *ganja* to the North-Western Provinces, against only 11 maunds in 1896-97, on payment of duty.

159. The net falling off in the receipts from opium amounted to Rs. 1,235. The decrease in the revenue occurred only in the two districts of Patna and Gaya. In the former district, the decrease (Rs. 2,519) is attributed (*a*) to the issue of licenses at reduced fees, (*b*) to the short collection of advance fees, and (*c*) to the strict supervision exercised over the vendors to check smuggling of opium to Bengal. In Gaya the decrease is small, being Rs. 89 only. It calls for no special notice.

160. The increase in the revenue in the remaining districts of the Division is ascribed by the Collectors to the consumption of a larger quantity of licit opium, on account of more close supervision.

161. The total population of the Division being 15,815,121, and the total excise revenue Rs. 24,30,675, the incidence of revenue per head of population is 2 annas 5 pies per annum.

162. The figures in the margin show the number of persons arrested during the years 1896-97 and 1897-98, for offences against the excise and opium laws. These figures show the arrests made by both police and excise officers.

District.	1896-97.	1897-98.
Patna	109	97
Gaya	145	114
Shahabad	44	27
Saran	86	76
Champaran	69	60
Muzaffarpur ...	59	82
Darbhanga	37	19
Total ...	648	444

163. The following figures show the number of prosecutions for drunkenness in the municipalities, in each district, during the last two years:—

District.	Number.	
	1896-97.	1897-98.
Patna	533	392
Gaya	65	47
Shahabad	112	87
Saran	159	77
Champaran	38	40
Muzaffarpur	64	103
Darbhanga	78	59
Total ...	1,049	805

There was generally a falling off in the number of cases, which may be attributed to the famine.

XX.—STAMPS.

164. The total revenue derived from the sale of stamps and Court paper during the year under review, was Rs. 22,83,777, against Rs. 22,56,010 in 1896-97, showing an increase of Rs. 27,767, as compared with the preceding year, and of Rs. 1,46,309, as compared with the year 1895-96. The statement

below shows the revenue derived from the sale of each kind of stamps during the two years 1896-97 and 1897-98:—

Description.	1896-97.	1897-98.	Increase.	Decrease.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
Court-fees	15,01,080	14,84,284	.....	16,796
Stamps for copies	1,07,330	1,14,353	7,023	.....
Impressed sheets .	5,80,146	6,24,311	44,165	.....
Receipt stamps	17,638	21,772	4,134	.....
Notarial stamps	106	52	.....	54
Hundi stamps	19,810	8,007	.....	11,803
Court papers	29,900	30,998	1,098	.....
Total ...	22,56,010	22,83,777	27,767	.. ...

165. It will be observed that there has been an increase under four, and a decrease under three heads. Under "Court-fees" there has been an increase in the districts of Shahabad and Darbhanga, to the extent of Rs. 18,739, and a falling off in the remaining five districts, to the extent of Rs. 35,535. The increase in the districts of Shahabad and Darbhanga is attributed by the Collectors, Messrs. Cargill and Geake, to the large number of civil suits instituted during the year, while the falling off in the other districts is reported to have been due to the fact that there were fewer suits of high value instituted during the year, owing to the scarcity. Mr. Maxwell, the Collector of Champaran, also attributes the decrease in his district to the slackness of the settlement operations necessitated by the famine. Under the head "stamps for copies" there was a total increase of Rs. 7,383 in the five districts of Patna, Shahabad, Saran, Muzaffarpur and Darbhanga, and a total decrease of Rs. 360 in the remaining two districts of Gaya and Champaran. No special reason has been ascribed for the fluctuation by most of the Collectors. But in Patna Mr. LeMesurier attributes the increase to the large number of copies issued in one very protracted and important criminal case, while Mr. Maxwell, the Collector of Champaran, ascribes the falling off in his district to the smaller number of copies issued owing to the slackness of the settlement operations. To the large increase under the head "Impressed sheets" (non-judicial), all the districts contribute, except Gaya. The increase is attributed to the execution of a large number of bonds and deeds of sale, owing to the distress on account of the failure of crops in the previous year, and to the high price of food-grains throughout the greater portion of the year under report. In Gaya the Collector, Mr. Oldham, also ascribes the falling off in the revenue to the scarcity, which he states kept in abeyance all transactions requiring stamps of high value. The increase under the head "Receipt stamps" is shared by all the districts, and is generally attributed to the large number of agricultural and land improvement loans advanced during the year, and to the numerous payments made to contractors and to employés in the famine relief operations. The decrease under the head "Notarial stamps" was very small, and does not call for any special remark, while that under the head of "Hundi or bill of exchange stamps," which occurred in all districts, except Shahabad, is reported to have been due to the dullness of trade, owing to the scarcity which prevailed during the year. Mr. Macpherson, the Collector of Saran, ascribes the decrease in his district more particularly to the failure in business of several bankers. The increase in the "Sale of Court papers" is trifling, and does not call for any special notice.

166. There were 412 cases of unstamped or insufficiently stamped documents detected by the Civil Courts and Revenue authorities during the year of report, against the same number of cases in the preceding year. The amount of duty and penalty realised was Rs. 5,396, against Rs. 4,881 in 1896-97.

167. The number of prosecutions instituted for breaches of the stamp law, during the year of report, was 32, in which 38 persons were brought to trial, against 31 cases, in which 47 persons were brought to trial, in the preceding year. Of the 38 persons brought to trial, 29 were convicted, and 4 acquitted. The amount of fines imposed during the year was Rs. 491, against Rs. 253 in the previous year. No rewards were paid.

XXI.—INCOME-TAX.

168. The number of persons finally assessed during the year 1897-98 was 15,800, and the final demand amounted to Rs. 4,59,581. The corresponding figures for the preceding year were 15,862 and Rs. 4,46,516, respectively. Thus, in the year of report there was again a large increase of Rs. 13,065, or 2·9 per cent., in the final demand, notwithstanding a decrease of 62 in the number of assessees.

169. The final demand under each part was as follows:—

		Rs.		Rs.	
Part I	... ...	37,292	against	38,748	in 1896-97.
„ II	... ...	1,233	„	1,772	„ „
„ IV	... ...	4,21,056	„	4,05,996	„ „
		4,59,581		4,46,516	

170. As compared with the previous year, there was an increase in the final demand in all the districts of the Division, except Patna, where there has been a decrease of Rs 340, caused by the decrease of 94 in the number of assessees, due to the exemption of petty dealers who suffered losses on account of scarcity. In Shahabad, Saran, and Darbhanga, the final demand increased with the increase in the number of assessees, ranging from 189 in Darbhanga to 62 in Saran, due to the careful revision of asessment; but in the remaining districts of Gaya, Champaran and Muzaffarpur, there was a decrease in the number of assessees, ranging from 150 in Gaya to 64 in Champaran, due to the same cause as in Patna. The final demand, nevertheless, increased, as the assessments on capitalist traders were enhanced in accordance with the instructions contained in paragraph 58 of the Board's Income-Tax Administration Report for 1896-97, as they made large profits by money-lending and grain dealing during the late famine.

171. The collections amounted to Rs. 4,56,423, or 99·3 per cent., on the final demand, against Rs. 4,41,059, or 98·7 per cent., in the previous year. The district of Patna alone succeeded in collecting the entire demand within the year. The collections were over 99 per cent. in Gaya (99·8), Champaran (99·8) and Saran (99·6), and over 98 per cent. in Muzaffarpur (98·9) and Shahabad (98·8), and over 97 per cent. in Darbhanga (97·8). It is satisfactory to observe that in all the districts of this Division the collections exceeded the standard of 95 per cent. fixed by Government and the Board. The percentage of tax contributed by each part on the total amount of tax collected is given in the margin.

Part I	...	8·1	against	8·3 in 1896-97.
„ II	...	·3	„	·4 „
„ IV	...	91·1	„	91·3 „

172. The arrears of previous years collected during the year under report, excluding the amount remitted as irrecoverable, amounted to Rs. 5,171, and penalties, fines, and costs, amounting to Rs. 4,631, were also collected during the year. Thus, the gross collections amounted to Rs. 4,66,225, against Rs. 4,51,926 in the previous year, out of the gross demand of Rs. 4,71,908, as compared with a gross demand of Rs. 4,61,755 in the previous year. It will be seen that the collections, as in the previous year, kept pace with the increased demand; and this satisfactory result is due to the assessment in all the districts having been completed early enough to allow of the bulk of the current demand being realised before the close of the year.

173. The outstanding balance on account of tax, penalties and costs for the year under report, was as follows:—

	Rs.		Rs.	
Tax	3,950	against	7,616	in 1896-97
Penalties	1,350	„	1,628	„ „
Costs	383	„	585	„ „
Total ...	5,683		9,829	

The result is satisfactory, the total balance outstanding at the close of the year being much less than that of the preceding year.

174. The percentages of the number of assessees under each class, on the total number of assessees, show that the assessees, under the first six classes make up 88·71, or ·29 less than 90 per cent., of the total number as shown in the margin. These six classes have contributed 44·9 per cent. of the total amount of tax collected during the year. Assessees having incomes from Rs. 2,000 to Rs. 10,000, formed only 9·83 per cent. of the total number, and they contributed 32·59 per cent. of the total amount of tax collected. Persons with incomes of more than Rs. 10,000 formed but 1·46 per cent. of the total number, while the assessment imposed on them was 22·51 per cent. of the total amount.

Class I ...	49·9
„ II ...	15·8
„ III ...	12·01
„ IV ...	5·2
„ V ...	3·6
„ VI ...	2·2
	88·71

175. As in the previous year, the largest contributions to the tax were made by the following classes:—

	Rs.	
Money-lending class ...	1,56,322, or 34·2	per cent. of the total tax.
Grain merchants	76,147, or 10·1	„ „
Piece-goods merchants ...	34,885, or 7·6	„ „

176. The total actual expenditure of the year under review for assessing and collecting the tax, amounted to Rs. 18,900, as compared with Rs. 18,611 in the preceding year, showing an increase of Rs. 289. The percentage of charges on collections was 4·02, against 4·09 in the previous year.

177. The system of payment of income-tax by money-orders continues to rise in public favour, as the Division shows an increase of 2·3 per cent. in the number of money-orders, and of 5·2 per cent. in the amount remitted by them during the year under report. Altogether, a sum of Rs. 1,38,670 was remitted to the Collectors in the Division by 7,781 money-orders, during the year of report, as against Rs. 1,31,696 remitted by 7,607 money-orders in the previous year.

178. The number of firms and other employers who undertook to collect the tax under section 9 (2), Act II of 1886, was 11, against 10 in the previous year. The total amount of tax collected by them during the year of report was Rs. 4,035, against Rs. 4,119 in the previous year. The total amount of remission allowed under rule 13 of the Bengal Government Rules was Rs. 177, against Rs. 139 in the previous year. The amount actually credited into the treasury during the year, therefore, amounted to Rs. 3,858, against Rs. 3,980 in the previous year.

179. Out of 15,800 persons finally assessed, coercive measures were taken only against 834, or 5·3 per cent., as compared with 934, or 5·9 per cent., in the preceding year. Property was distrained in 484 of these cases, but was only actually sold in 56 cases, against 522 and 63 cases, respectively, in the previous year. As in the previous year, Gaya shows the largest number of sales, though the number of sales in that district fell from 47 to 27 in the year under report.

180. It is satisfactory to observe that the number of distress warrants issued was smaller than in the preceding year, and the number of cases in which actual sale was resorted to fell from 63 to 56.

181. In Saran, at the instance of the Collector of Calcutta, a notice was issued on the branch firm at Chapra of Jugal Kishore Rektakesh, calling upon the agents to make a return of income, and to produce their account books in support of it. The two agents of the firm refused to receive the notice and

prevented its service. They were therefore prosecuted, with the Collector's sanction, and convicted under section 173, Indian Penal Code, and sentenced to a fine of Rs. 40 each, or in default to undergo rigorous imprisonment for 15 days. Their petition of motion before the Sessions Judge was rejected. In Muzaffarpur, a tahsildar appointed by the Collector to sell properties for recovery, reported two cases in which the defaulters had rescued the attached property from the custody of the chaukidars. The Income-Tax Deputy Collector, who made enquiries into these cases, recommended the prosecution of the defaulters under section 183 of the Indian Penal Code. The cases are pending before the Subdivisional Officer of Sitamarhi. In Shahabad, during the year under report, Shah Mohiuddeen of Sasaram, Sajada Nashin of Sasaram Endowment, instituted a suit in the Civil Court to set aside an assessment under Part I. The Munsiff's Court gave a decree to the plaintiff, and an appeal was preferred before the District Judge. The Judge upheld the order of the Lower Court. The Collector states that steps will probably have to be taken, as soon as a copy of the Judge's order is received, to move the High Court to decide the question of the Civil Court's jurisdiction in the matter.

182. In two cases in Muzaffarpur, and in one case in each of the three districts of Patna, Shahabad and Champaran, the taxes were compounded for three years under section 31 of the Act.

* * * * * * *

XXIII.—RAILWAYS AND OTHER PUBLIC WORKS.

East Indian Railway.

187. In the Patna district, a new railway station at Neora was opened for traffic during the year. There were 41 railway accidents during the year, against 38 in the preceding year, in which 31 persons were killed and 12 wounded. There were also two instances of moving trains colliding with loaded waggons, and the railway employés at fault were criminally prosecuted and punished.

In the Shahabad district there were 13 accidents, against 14 in the preceding year. In these eight persons were killed and five wounded.

Patna-Gaya Railway.

188. As reported last year, complaints of want of punctuality and of insufficient accommodation for the third class passengers on the occasion of large gatherings, of pilgrims, still continue to be made. The Collector of Gaya remarks:—

"I have travelled two or three times up and down this line, and on no occasion did I find the trains up to time. On one occasion going from Gaya, and on one occasion coming from Bankipore, the trains were an hour and-a-half late in *starting*. This sort of delay causes serious inconvenience to passengers."

South Bihar Railway.

189. The construction of this line of railway is in progress, from the east bank of the Phalgoo to Lakhisarai. The earthwork is finished, and all the bridges and culverts, with the exception of the major bridge over the Phalgoo river, are now ready for girders. Stations are also in progress of construction, and it is possible that this portion of the line will be open for goods traffic in January 1899.

Moghalsarai-Gaya Railway.

190. The construction of this line of railway is in progress. It traverses the Babhua and Sasaram subdivisions of the Shahabad district, and passes on to Gaya. About three-fourths of the total quantity of earthwork, and about

one-third of the total work on the major and minor bridges, have been completed. Collection of the permanent-way materials is in progress, and the laying of the line has been commenced from the Gaya end since the close of the year.

THE BENGAL AND NORTH-WESTERN RAILWAY, INCLUDING TIRHUT STATE RAILWAY.

191. Complaints of want of punctuality continued to be made, as reported last year. The railway authorities have begun to fence the line.

192. In the Saran district there were 13 railway accidents during the year, in which eight persons were killed and three wounded. In the Champaran district there were two accidents during the year, but they are reported as not due to negligence on the part of the railway servants. The only railway line open in this district during the year was a portion of the Tirhut State Railway which runs to Bettiah.

193. Several complaints were made against the working and management of the Bengal and North-Western and Tirhut State Railways, by the merchants of the Motihari and Bettiah towns, in respect of theft of goods. The matter has been enquired into, and the result reported to the Consulting Engineer to the Government of India.

194. The construction of a light feeder line of railway from Segowlie to Ruxaul was pushed on.

195. In the Muzuffarpur district there were 21 railway accidents (against eight in the preceding year), in which eight persons were killed and five wounded. One railway servant was punished for negligence of duty.

196. In the Darbhanga district the construction of the railway line from Hajipur to Katihar through Samastipur, and another extension from Sakri to Jainagar, were in progress. A branch line of railway from Roserah to Dalsingsarai is under contemplation by the railway authorities.

197. There were eight railway accidents reported from Samastipur (against two in the preceding year), in which three persons were slightly injured and one killed. There was also one derailment through the wrong adjustment of the points, but without any loss of life.

198. The complaints against the railway authorities do not appear to have been remedied. The Magistrate of Darbhanga remarks:—

"As regards the deficiency in rolling stock noticed in the last year's report, I am not sure whether any improvement has been made in this respect. Judging from the delay in delivering both goods and parcels, I surmise that the railway is still unable to cope with the traffic."

TRAMWAYS.

199. The District Board of Patna is trying to have a tramway constructed from the Bakhtiarpur Railway Station to Bihar. A prospectus was widely published, and tenders were received from several firms. No final arrangements have yet been made.

200. The income of the Patna City Tramway, which extends over a length of five miles, was Rs. 31,346, against Rs. 34,586 of the past year. The falling off in the income is due partly to the scarcity, and partly to the competition of a better class of ekkas. Eight accidents occurred during the year. The drivers, who were tried in two cases, were discharged, and the remaining cases were entered as accidental.

ARRAH WATER-WORKS.

201. The supply of filtered water remained constant throughout the year. In the month of August 1897 a high flood of the Sone washed away a large portion of the river bank immediately above the intake. Steps have been taken to prevent further encroachment. The amount of filtered water drawn off the standposts varied from 100,000 gallons per diem in the cold weather, to 150,000 gallons in the hot weather. This quantity cannot be exceeded until more standposts are provided.

EMBANKMENTS.

202. In the Patna and Gaya districts there is only one embankment called the Sakri Bandh, which is situated near the trijunction of the districts of Monghyr, Patna, and Gaya. Its maintenance charges were very small during the year.

203. In the Saran district, the embankment along the right bank of the Gandak is maintained by Government from a cess bond from the proprietors of lands benefited by the embankment. The following table shows the financial results of the administration of the embankment during the year:—

Arrear demand.	Current demand.	Total.	Collection during the year.	Balance.
1	2	3	4	5
Rs. 15,983	Rs. 23,682	Rs. 39,665	Rs. 25,720	Rs. 13,945

204. From the above table it will be seen that the percentage of collection was 61·8, against 58·4 of the past year. The cost of maintaining the embankment was Rs. 30,420. The continual encroachment that was occurring almost every year, as reported last year, has now stopped.

205. In the Champaran district, the Gandak embankment is the only public embankment, and it is maintained by the Public Works Department as before. The expenditure incurred on construction and maintenance during the year, amounted to Rs. 16,597, against Rs. 13,794 of the previous year.

206. The construction of a retired line of embankment at Sagrampur, which was commenced towards the close of the previous year, was completed at a cost of Rs. 22,760, of which Rs. 19,000 were paid from the Famine Fund and the balance, Rs. 3,760, by the Public Works Department.

207. The subjoined table compares the collection of the contract rates for the maintenance of the embankments during the past three years:—

YEAR.	Arrear demand.	Current demand.	Total.	Collection during the year.	Balance.
1	2	3	4	5	6
	Rs.	Rs.	Rs.	Rs.	Rs.
1896-97 ...	2,344	13,000	15,344	9,743	5,601
1897-98 ...	5,601	13,000	18,601	15,530	3,071
Difference ...	+3,257	.....	+3,257	+5,793	−2,530

208. The percentage of collections during the year was 83·4, against 63·3 of the past year. Out of the balance outstanding at the end of the year, Rs. 489 were realised after the close of the year. A further sum of Rs. 223 was realised during the year, on account of advance for the current year 1898-99.

209. In the Muzaffarpur district, there are two lines of embankments called the Gandak and Turki embankments. The former is maintained under the contract system, and the latter under the taccavi system. Both the embankments are properly maintained. A third embankment, viz., that at Daudpur, constructed as a protection to the whole town of Muzaffarpur, has just come under the Act. The total demand including arrears was Rs. 41,181, out of which Rs. 15,532 was realised, and Rs. 111 adjusted from previous advance collection. The balance outstanding on 31st March 1898 was Rs. 24,538.

210. In the Darbhanga district, there are two lines of embankments, viz., the Ganges and the Gandak embankments, which were maintained on the

contract and taccavi systems, respectively. The financial results of the cesses levied for these two systems during the year, will appear from the subjoined table:—

Embankment.	Arrear of last year.	Demand for current year.	Total.	Remission	Collection.	Balance.	Interest.
1	2	3	4	5	6	7	8
	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.
Gandak	1,453 3 11	2,119 0 8	3,572 4 7		2,166 0 1	1,406 4 6	52 2 1
Ganges	96 1 10	3,367 6 7	3,463 9 7	29 2 1	2,068 10 7	765 11 9	61 10 1
Total ...	1,549 5 9	5,486 7 3	7,035 13 0	29 2 1	4,824 10 8	2,182 0 3	113 12 2

Canal Irrigation.

211. The Sone Canals remained under the direct management of the Public Works Department. The subjoined statement shows the area irrigated, and the main financial statistics in connection with the levy of water-rates during the last three years, in the districts of Patna, Gaya and Shahabad:—

District.	Year.	Area irrigated, in acres.	Total demand.	Collection.	Remission.	Total adjustment	Balance.	Percentage of total adjustments on total demand.
1	2	3	4	5	6	7	8	9
			Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.

Saran Canals.

212. These canals were directly managed by the Public Works Department. It was reported last year that the canals were opened in November 1896 to enable the raiyats to irrigate their *rabi* lands, after the serious failure of rain in 1896. They were utilised to a small extent by the cultivators, and the total area irrigated during the year was 1,552 acres, of which 1,187 acres were *kharif*, 309 hot-weather crops, and the balance of 56 acres was indigo. The cost of maintaining the canals was Rs. 3,887.

213. The excavation of the Sadowa Channel in the Gopalganj subdivision, which was started before the commencement of the year, as a famine relief work, was designed with the intention of irrigating some rice *chours*, and a

sum of Rs. 10,345 was sanctioned for the acquisition of the land required for the project. The work was not completed during the famine operations, and though the project afforded work to the famine-stricken population of the neighbouring villages, the channel could not serve the purpose of irrigation.

Madhuban Canal.

211. In the Champaran district, there is only one canal called the Madhuban Canal, which is maintained by Government. No water-rates are levied on this canal, owing to arrangements made with the zamindars of Madhuban.

215. The area irrigated from the canal during the year was 1,970 acres, as against 11,251 acres in 1896.

216. Several important projects of irrigation and drainage were started during the year, to provide employment to famine relief labour. The distributary of the Madhuban Canal, called the Lakhowra distributary was commenced by famine labour, but was not completed.

217. The excavation of nine canals or irrigation distributaries was undertaken during the year, as a famine relief work to improve the water supply, as well as to afford work to the famine-stricken, and Rs. 1,78,797 was spent on them from the Relief Fund. They were all completed, with the exception of the Tribeni and the Dhaka Canals, on which Rs. 1,38,506 was spent.

Roadside Wells.

218. The following statement shows what has been done to improve the roadside wells, during the last two years, in each of the districts in this Division:—

District.	1896-97.				1897-98.			
	Number of wells repaired or cleaned.	Number of new wells constructed.	Number of wells provided with chain, bucket, &c.	Cost of operations in columns 2, 3 and 4.	Number of wells repaired or cleaned.	Number of new wells constructed.	Number of wells provided with chain, bucket, &c.	Cost of operations in columns 6, 7 and 8.

* * * * * * *

XXVI.—EDUCATION.

234. The total number of schools in the Division again fell during the year from 6,431 to 6,236, and the number of pupils decreased from 178,011 to 177,125. There was thus a decrease of 195 schools and of 886 scholars. The decrease occurs chiefly in primary schools.

235. In Patna the number of schools and pupils increased by 59, and 5,190, respectively, as compared with the figures for 1896-97. The increase is noticeable under the head "Primary schools," and is attributed to the revival of some of the schools closed last year on account of the then prevailing scarcity. The decrease of one middle English school is due to the closure of the school at Badalpura. The upper primary schools show a loss of one school, which is due to the conversion of one non-stipendiary upper primary to the standard of lower primary. The lower primary schools increased by 71, and the increase is attributed, as stated above, to the comparatively better agricultural conditions of the year under report.

236. In Gaya there was a decrease of 21 schools, with an increase of 258 pupils. One high class English school, viz., the Indian Moral Institution, ceased to exist during the year owing to financial difficulties. The number of lower primary schools fell from 928 to 908. This decrease is due to the fact that several gurus left off teaching for want of local support, in consequence of the high prices of food-grains that prevailed during the first-half of the year. The pupils, however, who had been attending these patshalas, joined other schools in the neighbourhood.

237. In Shahabad there has been a decrease of 151 schools and 4,515 pupils. This decrease is due to the fact that the stipendiary schools of municipalities were abolished, owing to the withdrawal of the Government primary grant from them, and that the District Board educational budget estimates for the year under review were curtailed by Rs. 5,051, owing to famine. Consequently the rates of reward were reduced by half. The number of upper primary schools decreased by one, owing to the Jagdispur upper primary school having been abolished during the year under report.

238. In Saran there was a decrease of 110 schools and 2,259 scholars. High English schools increased by one, with the recognition by the Calcutta University of the new school started at Chapra, under the name of the Chapra Collegiate School. There was a decrease of one middle English school, owing to the abolition of an unaided school at Sutihar. There was a gain of two upper primary schools. Lower primary schools declined by 112. The loss is due to the strictness with which schools were selected for the reward examinations by the Sub-Inspector. The Chapra zilla school continues to work without any cost to Government, the income from fees and subscriptions being more than sufficient to meet the entire cost. It is reported that there was no improvement in the results of the departmental examinations, as many candidates were absent. This is due to the fact that just at the time these examinations were to be held, an exodus of the people from the town was going on on account of the sanitary measures ordered to be adopted for the prevention of the plague.

239. In Champaran the total number of public schools rose from 641 to 655, and the number of pupils attending them from 15,943 to 16,096, showing an increase of 14 schools and 153 pupils. The increase occurs chiefly in lower primary schools.

240. In Muzaffarpur public schools show a gain of 15 institutions and 874 pupils. The number of middle English schools was unchanged, but while the school at Harouli was abolished early in the year under review, one at Paharpur was opened later on with the grant of the closed institution. The decrease in the number of middle vernacular schools is explained by the abolition of the school at Tepri maintained by the Darbhanga Raj, on account of the want of appreciation by the local public. The fluctuation in the number of upper primary schools, is due to the abolition of the non-stipendiary school at Berna, and to the raising of the lower primary schools, at Karhari and Sahtha, to the status of upper primary schools. The lower primary schools have increased by 15. The Sanskrit school at Hajipur was revived during the year under report.

241. In Darbhanga, there were 897 public schools, with 26,688 pupils, during the year under report, against 912 schools with 27,024 pupils, in the preceding year, showing a loss of 15 schools and 336 pupils. This decrease shows the effect of the last famine on education. There is a Sanskrit school in Madhubani, aided by the Education Department. There were 56 boys on the roll

on the 31st March 1898, against 54 in the previous year. Five boys were sent up at the Prathama Pariksha and three at the Madhyam Pariksha. All of them have passed

242. Throughout the Division, the proportion of boys of a school-going age, who are attending school, has decreased from 15·5 to 14·7. The decrease is probably due to the scarcity and high prices. Patna, with a percentage of 33·6, still stands first, and Saran, with 10·2 percentage, stands last.

243. Taking the Division as a whole, the average annual cost of educating each pupil was Rs. 4-11-1, against Rs. 4-8-11 in the preceding year. The highest cost was in Patna (Rs. 5 11-9) and the lowest in Darbhanga (Rs. 3-1-8).

244. The following table gives the number of schools for females, and the number of pupils attending them, in the several districts of the Division, during the past two years:—

District.	1896-97.		1897-98.	
	Schools	Pupils.	Schools.	Pupils.
1	2	3	4	5
Patna	100	1,468	103	1,442
Gaya	17	388	13	430
Shahabad	16	368	15	399
Saran	64	955	45	714
Champaran	5	121	3	99
Muzaffarpur	14	356	16	395
Darbhanga	40	622	40	663
Total .	256	4,318	235	4,142

245. There is thus a falling off of 21 schools and 176 pupils, during the year, as compared with the preceding year. Besides these girls' schools, a large number of girls attend boys' schools.

246. The decrease in the number of girls' schools in Gaya and Shahabad, is due to the closure of schools in these districts in consequence of high prices. The loss in girls' schools in Champaran, is reported to be due to the fact that the Bishunpur and Fulwari Rewarded Girls' Schools were amalgamated with the boys' schools, owing to the insufficient number of girls attending them. Two Bengali girls passed from the Bankipore Girls' School, at the upper, and four at the lower primary examination. Five girls passed the lower primary examination from the Darbhanga district, held in December 1897. Mr. Macpherson, Magistrate of Saran, states that all the schools for the education of girls owe their existence to the efforts of Government. Not a single pice is paid by the people, and the prejudice against the education of girls, even at the public cost, is still very great.

247. As an encouragement to Muhammadan education, stipends are given in certain maktabs in the Patna district. In Saran special facilities, in the way of free-studentships and studentships on reduced fees, are offered by the District Board for the education of poor Muhammadans. There was a decrease in Muhammadan pupils in Champaran. It is explained to be due to the fact that

Muhammadans, as a class, were affected by the famine, to a far greater extent than the Hindus.

248. There were 2,980 private institutions, and 28,818 pupils attending them, as shown below. These are indigenous pathshalas and maktabs, and do not conform to the rules of the department:—

District.	Number of private institutions.	Number of pupils.
1	2	3
Patna	534	5,374
Gaya	508	4,877
Shahabad	278	3,091
Saran	240	2,568
Champaran	140	1,779
Muzaffarpur ...	722	5,317
Darbhanga	558	5,812
Total ...	2,980	28,818

249. The total number of special schools was 20, against 19 in the preceding year. The increase of one school is due to the raising of one maktab to the status of a Madrasa in the Patna district.

* * * * * * *

XXXII.—POST-OFFICES AND TELEGRAPH.

287. The general working of the Postal and Telegraph Departments has continued to be satisfactory. The following statement shows the number of inland money-orders issued and paid in each district during the last two years, exclusive of money-orders used for transmitting rent and revenue. These figures have been furnished by the Deputy Postmaster-General, Bihar:—

Name of District.	1896-97.				1897-98.			
	Issued.		Paid.		Issued.		Paid.

It will be seen that the number of money-orders issued in this Division has risen from 354,704 in 1896-97, to 418,087 in the year of report. The increase occurs in all the districts. The amount remitted has risen from Rs. 63,47,238 to Rs. 70,32,037. The rise is noticeable in all the districts, except Patna, which shows a falling off. The increase may partly be attributed to the fact, that a large number of persons were employed on famine duty in the Division during the year, who had to remit money to their families. The increase may also be partly due to the importation of grain.

288. As regards money-orders paid, there has been a decrease of 46,606 in their number, but an increase of Rs. 7,27,713 in the amount transmitted by them. The increase in the amount remitted, is probably due to temporary emigration having increased on account of the scarcity.

289. The following statement shows the Post Office Savings Bank transactions in the last two years. The figures speak for themselves and indicate unmistakably that the system is growing in popularity :—

NAME OF DISTRICT.	Deposits.						Withdrawals.						Total number of accounts open on 31st March.		Total amounts in deposit on 31st March.	
	Number of accounts opened during—		Number of deposits made during—		Amount deposited.		Number of withdrawals.		Amount withdrawn during—		Number of accounts closed.

An imperial mail line (Bhagwanpur to Mohwa) in the Muzaffarpur district was opened during the year under report.

290. In October 1897 a highway mail robbery took place in the Sasaram subdivision, and property worth about Rs. 100 was looted. The case was successfully enquired into and committed to the Sessions, and resulted in the conviction of three out of six accused persons. There was one case of temporary misappropriation of Government money, by the postal officials of Jaintpur in the district of Muzaffarpur. No prosecution was undertaken for want of evidence, but the case was dealt with departmentally. A case of theft of seven registered articles containing, amongst other enclosures, currency notes for Rs. 1,800, occurred at Pupri, in the district of Muzaffarpur, in the month of January. Enquiries were made departmentally, and the Postmaster of Pupri, who was suspected of complicity, was made over to the police; but, although the stolen property was recovered buried in the backyard of the postmaster's quarters, no prosecution was undertaken, for want of evidence. The postmaster was dealt with departmentally and degraded.

291. A new Postal and Telegraph office was opened at Arwal in the Gaya district during the year. Two combined Post and Telegraph offices were opened, one at Nagra, and the other at Dighawara, in Saran, and the Telegraph office at Darunda in the same district was closed in the year of report. Telegraph offices at Pupri and Sitamarhi, in the district of Muzaffarpur, were opened during the year.

XXXIII(*b*).—FAIRS.

294. The most important fair in this Division is the Sonepore fair in Saran. It is held at Sonepore at the confluence of the Gangos and the Gandak. This fair is held annually at the full-moon of Kartik. Last year the fair was held from 30th October to the 18th November 1897. As usual, the sanitary and conservancy arrangements were made under the supervision of the Magistrate, the District Engineer, the District Superintendent of Police, and the Civil Surgeon. The total expenditure amounted to Rs. 28,487, as compared with Rs. 3,672 in the preceding year. There were three cases of cholera during the fair. On the whole the health of the fair-goers was good. The average daily attendance was roughly estimated by the police, to have been about a lakh. Prizes for cattle were distributed as usual. A sum of Rs 145 was distributed in prizes to 20 persons, for 6 bullocks, 7 cows and 8 buffaloes. The Government of Bengal sanctioned Rs. 250 for making

arrangements for the safe picketting of elephants, brought for sale at the fair, out of which sum Rs. 70 only was paid to 7 mahouts at Rs. 10 each. There are four other fairs in the district of Saran, held at Silhoni, Mehuar, Thawaj and Kochiakote. The usual sanitary and conservancy arrangements were made. There was no outbreak of cholera, or of any other epidemic, at these fairs.

295. In Patna there are a number of fairs which are not important. No epidemic broke out at any of them.

296. In Gaya, the principal fairs are in the *Chait Sankrant* or *Bisua mela*, held in April, and the *Kartik Purnamashi mela*, held in November. Both these fairs are held at Salempur, on the east bank of the Phalgu river, opposite the old town of Gaya. The attendance is said to have been rather less than in the preceding year, but the number of cattle brought for sale was about the same. Besides these are the *Deokund*, *Phalguni* and *Baisakhi melas*, held in March and May, the *Kartik Chhat* and *Chait Chhat melas*, held at Deo in April and October, and the Rafiganj *mela* held in April. The largest of these fairs is the Rafiganj *mela*, which lasts for 15 days. The attendance was larger than usual, but there was a falling off in the number of cattle brought for sale, a fact which indicates an improvement in the condition of the raiyats. A recently-established fair, held in village Kako in the Jehanabad subdivision, is reported to be growing in popularity, owing to the exertions of the local proprietors. About 3,000 head of cattle were brought for sale in the past year. The usual sanitary arrangements were made at all these fairs, and the water-supply was adequate.

297. The chief fairs in Shahabad, are those held at Barahpur in the Buxar subdivision, in February and April. These are essentially cattle fairs, but horse-dealers also attend. The number of cattle brought for sale at the April fair in 1897 was 23,343, as compared with 20,085 in the preceding year, and the attendance was larger than usual. At the February fair in 1898, the number was 18,700, as compared with 20,451 in the preceding year, and the attendance was much less than usual. The falling off was due to rumours about the plague. The usual conservancy and police arrangements were made. In connection with the February fair, an agricultural exhibition is held, and prizes are given for live-stock and agricultural produce. In addition to the above, three fairs are held at Buxar, viz., the Khichari, Amawas and Satuan fairs. They are bathing fairs. This year the Amawas fair coincided with the total eclipse of the sun, and the result was a very large gathering at Buxar. In Sasaram the Bhaluni fair is reported to have been attended by 30,000 persons. There was no outbreak of any disease at these fairs.

298. The principal fairs in Champaran are those held at Bettiah, Triveni and Arreraj, the Bettiah fair being the most important. The Arreraj fair is held twice a year—once in February, and once in April. The gathering at the fair held in February last, was larger than usual, in consequence of the order passed by the Nepal Government, prohibiting pilgrims from India from visiting the shrine of Pasupatinath at Katmandu, on the occasion of the *Sivaratri* festival celebrated in that month. This order led many who would have otherwise gone to Katmandu, to make their offerings at the temple of Mahadeva at Arreraj. No disease of any kind broke out in any of the fairs during the year.

299. The only important fair in the Muzaffarpur district is the Sri Ram *Navami* fair, held at Sitamarhi. This, besides being a large general fair, is also a cattle fair, and it is estimated that more than a lakh of people came to it, and about 60,000 or 70,000 cattle were brought for sale. There are many small fairs held in this district. This year, the number both of people and of cattle brought for sale at the fairs was very much smaller than usual. This appears to be due to the various rumours on the subject of plague.

300. There are no important fairs in Darbhanga.

WEATHER AND CROP REPORT.

For the week ending the 19th December 1898.

Burdwan.—No rain. Weather seasonable. Harvesting of *aman* paddy continues. *Rabi* crops and potatoes doing well. A few cases of cattle-disease reported. Fodder and water sufficient. Common rice selling as follows:—

	Srs.	
Sadar	15 to 17	per rupee
Kalna	14 „ 16	
Katwa	16½	
Raniganj	16¼	

Birbhum.—No rain. Weather seasonable. Harvesting of *aman* going on briskly. Price of common rice at Sadar 18 seers, and at Rampur Hat 17½ seers per rupee. Fodder sufficient.

Bankura.—No rain. Weather occasionally cloudy at the beginning of the week. Harvesting of *aman* still continues. *Rabi* crops and sugarcane doing well. Fodder and water sufficient. No cattle-disease reported. Rice selling at Sadar 19½ seers and at Vishnupur 16¼ seers per rupee.

Midnapore.—Rainfall at Sadar 04, Contai ·48. Harvesting of *aman* going on. Prospects of standing crops very good. Common rice selling as follows:—

	Srs.	
Sadar	15 to 18	per rupee.
Contai	16	
Tamluk...	14	
Ghatal	16 to 19	

Hooghly.—No rain. Reaping of winter rice crop continues. Prospects of *rabi* crops good. Common rice sells from 12 to 14 seers per rupee.

Howrah.—Rainfall nil. Weather seasonable. Harvesting of *aman* continues. Sowing of *rabi* almost over. Fodder and water sufficient. Common rice sells at 12 to 14 seers per rupee.

24-Parganas.—Rainfall nil. Weather seasonable. Prospects good. Harvesting of *aman* paddy going on. *Rabi* crops doing well. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs. Srs.	
Sadar	13 to 14	per rupee.
Barasat	15½	
Basirhat	16	
Diamond Harbour ...	16	

Nadia.—Rainfall at Ranaghat ·02, elsewhere nil. Harvesting of *aman* continues. Standing crops doing well. Common rice sells from 11 to 17 seers per rupee. Fodder and water sufficient.

Murshidabad.—No rain. Weather seasonable. Harvesting of *aman* going on. State of *kalai*, indigo, and mulberry good. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	18	per rupee.
Kandi	19	
Jangipur	19	

Jessore.—Rainfall at Sadar ·19 and Magura ·04, elsewhere nil. Weather seasonable. Prospects of standing crops good. *Aman* paddy being harvested. Sowing of *rabi* crops going on. Fodder and water sufficient. No cattle-disease reported. Common rice sells as follows:—

	Srs.	
Sadar	16 to 20	per rupee.
Jhenida	18 „ 20	
Magura	18 „ 22	
Narail	19	
Bangaon	20	

Khulna.—Rainfall nil. Weather seasonable. Harvesting of *aman* going on. Sowing of winter crops still continues. Prospects good. Fodder and water sufficient. Common rice sells as follows :—

				Srs.	
Sadar	...	...	...	17 to 22	per rupee.
Bagerhat	...	...	...	18	
Satkhira	...	...	...	16 and 20 (coarse *aus*).	

Rajshahi.—No rain. Prospects of crops good. Harvesting of winter rice continues. No cattle-disease. Fodder and water ample. Common rice selling from 16 to 27½ seers per rupee.

Dinajpur.—No rain. Weather fair and cool. Harvesting of *haimanti* paddy continues. No cattle-disease. Fodder and water plentiful. Common rice sells at 17 to 18 seers a rupee.

Jalpaiguri.—No rain. Weather fine and cool. Harvesting of *haimanti* paddy going on. Prospects of crops good. Fodder and water ample. Price of common rice steady.

Darjeeling.—No rain. Weather seasonable. *Hills*—Harvesting of *haimanti* paddy finished; *kalai* being gathered; *phaphar*, wheat, and barley progressing favourably. *Terai*—Harvesting of *haimanti* paddy continues; mustard, potatoes, and *kalai* progressing; sugarcane being cut. Coarse rice sells as follows :—

					Srs.	
Hills	...	...	...	...	9 to 13	per rupee.
Terai	...	...	...	...	14 to 20	

Bhutta sells at Darjeeling 25 seers and at Kalimpong 40 seers per rupee.

Rangpur.—No rain. Weather cold. Transplantation of tobacco nearly over. Reaping of winter rice continues. *Rabi* crops being sown in places. Prospects good. Common rice (new) selling at 14 to 20 seers per rupee. Fodder and water sufficient.

Bogra.—No rain. Prospects of standing crops good. Harvesting of *aman* going on. Common rice selling from 17 to 24 seers per rupee. Water and fodder-supply sufficient.

Pabna.—Rainfall nil. Weather seasonable. Prospects of crops good. Price of rice 15 to 20 seers per rupee

Dacca.—Rainfall at Sadar ·08. Weather seasonable. Prospects of standing crops good. Fodder available. No cattle-disease. Common rice sells from 14 to 18 seers per rupee.

Mymensingh.—Rainfall nil. Weather seasonable. Outturn of *aman* is nearly 20 annas. Cold-weather crops doing excellently. Common rice selling at 16 to 20 seers per rupee. Condition of people and cattle good.

Faridpur.—No rain. Weather seasonable. Prospects of crops good. Rice sells at 20 seers per rupee.

Backergunge.—Rainfall at Sadar ·98. Weather fine. Prospects of crops good. Common rice sells from 11 to 18 seers (old *aman*), and from 14 to 22 seers (new *aman*) per rupee.

Tippera.—No rain. Weather fine and cold. Harvesting of *aman* and sowing of *rabi* being rapidly pushed on Prospects good. Rice 13 to 26 seers per rupee.

Noakhali.—No rain. Prospects of crops good except in Hatia and Sidhi. No cattle-disease. Fodder and water sufficient. Price of new rice 16 to 18 seers per rupee.

Chittagong.—Rainfall nil. Weather seasonable. Reaping of *aman* continues. *Rabi* being sown. Common rice 16 seers per rupee. Water and fodder sufficient.

Patna.—No rain. Harvesting of paddy in progress. Prospects favourable. Prices of all grains except rice have fallen. Common rice in Patna sells at 21 seers per rupee. Fodder and water for cattle sufficient.

Gaya.—No rain. Harvesting of paddy and pressing of sugarcane continue. *Rabi* and poppy doing well. Prices are—Common rice 20 seers, wheat 18 seers, barley 32 seers, *arhar* 21 seers, gram 27½ seers, and *makai* 35 seers per rupee.

Shahabad.—No rain. Weather cold. Paddy harvest continuing. Standing crops good. *Rabi* being irrigated. Poppy being sown. Fodder and water sufficient. Rice sells at Arrah 16 seers per rupee.

Saran.—No rain. Weather cold. Cutting of paddy still going on. *Rabi* and poppy doing well. Average prices are—Common rice 17 seers 11 chitaks and *makai* 28 seers 13 chitaks per rupee.

Champaran.—No rain. *Rabi* crops and poppy doing well, but some rain required. Rinderpest in parts of Bettiah subdivision. Price of common rice 16¼ seers and of maize 27½ seers per rupee.

Muzaffarpur.—Rainfall nil. Prospects of crops good. No cattle-disease. Prices are—Common rice 12 to 17 seers, wheat 15 to 20 seers, barley 30 to 35 seers, gram 22 to 25 seers, *rahar* 22 to 23 seers, maize 30 to 40 seers, and *marua* 25 to 27½ seers per rupee.

Darbhanga.—No rain. Weather cold. Harvesting and threshing of paddy continue. Prospects of *rabi* crops favourable. Common rice selling at Sadar 16½ seers per rupee. Fodder and water sufficient.

Monghyr.—No rain. Weather cold with west wind. Paddy harvesting continues and threshing going on in places. *Rabi* sowing and sugarcane pressing in progress. Prospects of poppy good; late-sown crop very small and backward, and needs rain. No cattle-disease. Common rice sells as follows:—

	Srs.	
Monghyr	14 to 16	per rupee.
Begusarai	13 to 16	
Jamui	20 (new)	

Bhagalpur.—Rainfall nil. Weather seasonable. Harvesting of winter paddy continues. No cattle-disease reported. Prices steady.

Purnea.—No rain. Weather seasonable. Harvesting of *aghani* rice continues. *Rabi* crops still being sown and prospects good. Cattle-disease still prevails in Araria, but not in Kishanganj. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	18	per rupee.
Kishanganj	20	
Araria	21	

Malda.—No rain. Weather very cold with westerly wind. Harvesting of winter paddy progressing. *Kalai* coming into maturity. *Rabi* crops doing well. *Bhadoi* rice selling at 20 seers per rupee at English Bazar. No want of fodder.

Sonthal Parganas.—Rainfall nil. Weather seasonably cold. Harvesting of winter paddy nearly completed. Sugarcane pressing in Deoghar subdivision going on. *Rabi* crops doing well. Fodder and water ample. Price of rice varies from 18 to 25 seers, and of maize from 35 to 40 seers per rupee.

Cuttack.—Rainfall at Jajpur ·03, Banki ·12. Weather seasonable. Harvesting of *laghu sarad* nearly over and that of *guru sarad* in progress. *Biri*, *kulthi*, and *arhar* maturing. Sugarcane being harvested. Tobacco being planted. Condition of cattle generally good. Fodder and water sufficient. Common rice sells as follows:—

	S.	ch.	
Cuttack	17	1	per rupee.
Jajpur	19	11	
Kendrapara	21	0	
Banki	22	14	

Balasore.—Rainfall at Sadar ·18. Harvesting of *sarad* and *beali* continues. Sugarcane being pressed. *Dalua* seedlings growing well and other *rabi* crops in flower. Cattle-disease reported from Basudevpur circle. Rice sells from 17 to 25 seers per rupee in the interior, and at 17 and 21 seers at Balasore and Bhadrak respectively. Fodder and water sufficient.

Angul.—Rainfall at Angul ·85. Harvesting of rice in full progress. *Rabi* and oilseed crops doing well. Sugarcane being harvested. Fodder and water sufficient. No cattle-disease. Common rice selling at 26 seers per rupee in Angul and at 19 seers in Khondmals.

Puri.—No rain. *Sarad* paddy being reaped. *Kulthi*, *arhar*, *dalua* rice, and mustard growing well. Sugarcane being pressed. Fodder and water sufficient. Cattle-disease continues in some parts of the district. Common rice (new) sells as follows:—

	S.	ch.	
Puri	17	2	per rupee.
Khurda	17	0	
Interior of district	17 to 23	0 to 3	

Hazaribagh.—Rainfall nil. Weather seasonable. *Rabi* crops want rain. Outturn of winter rice crop good. Poppy crop healthy and of good colour, and fairly well forward. Common rice selling at 15 to 21 seers per rupee.

Lohardaga.—No rain. Paddy harvesting nearly finished. State of standing crops good. Rice sells at Ranchi 19 seers and in the interior 24 seers per rupee. No report of cattle-disease. Fodder and water sufficient. Grain in stock sufficient.

Palamau.—No rain. Weather seasonable. Paddy harvesting nearly finished. *Rabi* crops want rain, but doing well. Fodder and water sufficient. Rice sells from 16 to 23 seers per rupee.

Manbhum.—No rain. Weather seasonable. Prospects of crops on the ground are good Cattle-disease not reported. Fodder and water sufficient. Average price of common rice at Sadar 21 seers 6 chitaks and at Gobindpur 20 seers per rupee. Supply sufficient.

Singbhum.—Rainfall ·27. *Rabi* crops doing well. Rice 16 to 20 seers per rupee.

General Summary.—There were slight showers of rain in Orissa and in some other districts during the week. The general prospects of the crops are favourable, but some rain is required for the *rabi* in Champaran, Hazaribagh, and Palamau, and for the late-sown poppy in Monghyr. The rice harvest is in full progress, and an outturn somewhat in excess of the normal may be expected for the whole Province. The pressing of sugarcane is going on in some districts. Except in a few districts, prices were stationary or falling. No cattle-disease is reported except in places in Champaran, Purnea, Balasore, and Puri. The fodder-supply is everywhere sufficient.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT,
The 20th December 1898.

F. A. SLACK,
Offg. Secretary to the Govt. of Bengal.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h., and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

☵, dew.

METEOROLOGICAL OFFICE, GOVT. OF INDIA,
Calcutta, the 19th December 1898

G. W. KUCHLER,
For Meteorological Reporter to the Govt. of India.
